feather@mboro.k12.ar.us

The conversion charter school would be housed in the present Murfreesboro High School facility, and presently we plan to keep the same name, but will change if necessary. We plan to serve students in grades 9-12 under the charter with no enrollment cap.

The purpose of our proposed school is to better engage students through project-based learning aided by the increased use of technology. We are currently working toward a partnership with New Tech to expedite our goal of becoming more progressive and better equipping our students for their future.

Respectfully,

Roger Featherston, superintendent
