

DATE: January 27, 2014
TO: Arkansas Educators
FROM: Arkansas Department of Education, Curriculum and Instruction Section
SUBJECT: Listserv Message #67: CCSS-Mathematics Resources

The information below should help in the implementation of the Common Core State Standards for Mathematics (CCSSM) and preparation for the next generation assessments. If any of the links imbedded in the descriptions are not working properly, there is a full list of all links in a shortened format at the bottom of this email.

[Opus](#) is a free math problem bank where educators can search for problems and build assignments aligned to the CCSSM.

[XP Math Games](#) features fun and educational math games for Grades 2-9. The games can be sorted by math topic or grade level. The classroom setup tool allows educators to keep track of their students' progress.

[TeachEngineering](#) provides teachers with standards-based engineering lessons and hands-on activities for use in implementing the CCSSM in mathematics classrooms.

[STEM-in-Sports](#) provides games and activities that will help educators inspire kids to learn more about math and science through sports.

[Let's Read Math](#) provides information on books and other literary resources that educators can use to engage the students in mathematical concepts while supporting literary instruction within all subject areas.

The [Curriculum and Instruction Unit](#) of Granite School District (Salt Lake City, Utah) has shared their CCSSM implementation work including a [Math Vocabulary](#) site that may be useful for all educators and a [Dual Immersion Math Vocabulary](#) site that may be an excellent resource for supporting foreign language education.

Please share this information with others that might be interested. Thank you for serving the students of Arkansas.
