Consent Agenda

C-1 Minutes - May 5, 2015

Presenter: Deborah Coffman

C-2 Minutes - May 14, 2015

Presenter: Deborah Coffman

C-3 Minutes - May 15, 2015

Presenter: Deborah Coffman

C-4 Newly Employed, Promotions and Separations

The applicant data from this information is used to compile the Applicant Flow Chart forms for the Affirmative Action Report, which demonstrates the composition of applicants through the selecting, hiring, promoting and terminating process. The information is needed to measure the effectiveness of the agency's recruitment, hiring and promotion efforts and is in conformity with federal government guidelines, which require the agency to compile statistical information about applicants for employment.

Presenter: Ivy Pfeffer and Clemetta Hood

C-5 Report on Waivers to School Districts for Teachers Teaching Out of Area for Longer than Thirty (30) Days, Ark. Code Ann. §6-17-309

Arkansas Code Annotated §6-17-309 requires local school districts to secure a waiver when classrooms are staffed with unlicensed teachers for longer than 30 days. Requests were received from 4 school districts covering a total of 4 waivers. There were also requests for long-term substitutes from 11 school districts requesting a total of 11 waivers for long-term substitutes. These requests have been reviewed, approved or denied by Department Staff, and are consistent with program guidelines.

Presenter: Ivy Pfeffer

C-6 Review of Loan and Bond Applications

The members of the Arkansas State Board of Education are requested to review the following: Commercial Bond Application – 2 Second Lien and 1 Voted

With the recommendation to approve from the Loan Committee and additional information provided by the school district in its application package:

Pursuant to Arkansas Code Annotated § 6-20-805 concerning the Revolving Loan Program, the State Board of Education, in its discretion and after considering the merits of each application with the loan committee recommendation, may approve a school district revolving loan application for the full amount of the proposed loan, approve the application for a loan of a lesser amount than requested, or disapprove the application.

Pursuant to Arkansas Code Annotated § 6-20-1205 concerning school district bonds, a school district shall not sell bonds until the issue is approved by the State Board of Education.

Therefore, the State Board of Education, in its discretion and after considering the merits of each application with the loan committee recommendation, may approve a school district bond application for the full amount of the proposed bond issue, approve the application for a lesser amount than requested, or disapprove the application.

Presenter: *Cindy Hollowell and Amy Woody*

C-7 Final Report Fiscal Year 2014-15 - Summary of Activities for the Standards Assurance Unit

This report is being submitted for compliance with A.C.A. § 6-15-102 (g) (1) and (2).

Presenter: *Johnie Walters*

C-8 Consideration of the Recommendation of the Professional Licensure Standards Board for Case #14-173 – Judith Ann Conway

Violation of Standard 1: An educator maintains a professional relationship with each student, both in and outside the classroom. Violation of Standard 3: An educator honestly fulfills reporting obligations associated with professional practices. The Professional Licensure Standards Board Ethics Subcommittee recommends that the State Board order a written reprimand and assess a \$50.00 fine. Ms. Conway and her attorney were notified of the Ethics Subcommittee's recommendation on April 6, 2015. Ms. Conway did not respond to the recommendation within the required thirty (30) day time period.

Presenter: *Wayne Ruthven*

C-9 Consideration of the Recommendation of the Professional Licensure Standards Board for Case #15-001 – Melissa René Grice

Violation of Standard 1: An educator maintains a professional relationship with each student, both in and outside the classroom. Violation of Standard 3: An educator honestly fulfills reporting obligations associated with professional practices. The Professional Licensure Standards Board Ethics Subcommittee recommends that the State Board order the suspension of Ms. Grice's license for one (1) year and assess a \$100.00 fine. Ms. Grice and her attorney were notified of the Ethics Subcommittee's recommendation on May 8, 2015. Ms. Grice accepted the Ethics Subcommittee's recommendation on May 11, 2015.

Presenter: *Wayne Ruthven*

C-10

Consideration of the Recommendation of the Professional Licensure Standards Board for Case #15-048 – Mary Jill Davis

Violation of Standard 1: An educator maintains a professional relationship with each student, both in and outside the classroom. The Professional Licensure Standards Board Ethics Subcommittee recommends that the State Board order the probation of Ms. Davis' license for one (1) year and assess a \$75.00 fine.

Ms. Davis was notified of the Ethics Subcommittee's recommendation on March 27, 2015. Ms. Davis accepted the Ethics Subcommittee's recommendation on April 27, 2015.

Presenter: Wayne Ruthven

C-11 Consideration of the Recommendation of the Professional Licensure Standards Board for Case #15-066 – Robin Keith Robinson

Violation of Standard 1: An educator maintains a professional relationship with each student, both in and outside the classroom. The Professional Licensure Standards Board Ethics Subcommittee recommends that the State Board order the revocation of Mr. Robinson's license. Mr. Robinson and his attorney were notified of the Ethics Subcommittee's recommendation on April 8, 2015. Mr. Robinson did not respond to the recommendation within the required thirty (30) day time period.

Presenter: Wayne Ruthven

C-12 Consideration of the Recommendation of the Professional Licensure Standards Board for Case #15-070 – Tammy Kay Warren

Violation of Standard 4: An educator entrusted with public funds and property, including school sponsored activity funds, honors that trust with honest, responsible stewardship. The Professional Licensure Standards Board Ethics Subcommittee recommends that the State Board order a written reprimand and assess a \$50.00 fine. Ms. Warren was notified of the Ethics Subcommittee's recommendation on April 8, 2015. Ms. Warren accepted the Ethics Subcommittee's recommendation on April 22, 2015.

Presenter: Wayne Ruthven

C-13 Consideration of the Recommendation of the Professional Licensure Standards Board for Case #15-073 – Casey Lanne Spradlin

Violation of Standard 1: An educator maintains a professional relationship with each student, both in and outside the classroom. The Professional Licensure Standards Board Ethics Subcommittee recommends that the State Board order a written reprimand and assess a \$50.00 fine. Mr. Spradlin was notified of the Ethics Subcommittee's recommendation on April 8, 2015. Mr. Spradlin accepted the Ethics Subcommittee's recommendation on April 21, 2015.

Presenter: Wayne Ruthven

Action Agenda

A-1 Consideration of 2015-16 Arkansas Better Chance Renewal Grant Applications

Pursuant to the authority granted to the State Board of Education, the Division of Child Care and Early Childhood Education respectfully requests approval for the renewal of the Arkansas Better Chance grants for the 2015-2016 year.

Presenter: Mary K. McKinney

A-2 Consideration of Report from the Special Committee on Academic Distress

On May 15, 2015, the Special Committee on Academic Distress met with the Forrest City School District.

Presenter: Vicki Saviers, Chair

A-3 Consideration of Report from the Special Committee for the Pulaski County Boundaries Study

On January 28, 2015, the State Board of Education established a State Board committee charged with studying the appropriate school district lines within Pulaski County, taking into account communities of interest, student demographics, facilities, and property tax base with a report due back to the State Board no later than the June 2015, regularly scheduled meeting. State Board Chairman Sam Ledbetter appointed Dr. Jay Barth as chair. Committee members include Dr. Barth, Mr. Ledbetter, Ms. Zook, and Mr. Davis.

Presenter: Dr. Jay Barth, Chair

A-4 Consideration of Little Rock School District Report

Presenter: Baker Kurrus, Superintendent

A-5 Consideration of Classification of District in Fiscal Distress - Guy-Perkins School District

Pursuant to Ark. Code Ann. §6-20-1905, the Guy-Perkins School District received notice by certified mail as being identified by the Arkansas Department of Education (ADE) for Fiscal Distress status. The identification, recommendation for classification, and any appeal would be presented at the May 14, 2015 State Board meeting. The District was informed in the March 10, 2015, identification letter that they could not incur any future debt obligations without prior written approval from ADE. On April 15, 2015, the Department received notice that the Guy-Perkins School District would appeal the fiscal distress classification. The notice was dated April 13, 2015, which was not within the 30 days allowed by law to file an appeal. Therefore, the District did not comply with Ark. Code Ann. §6-20-1905(b). The Arkansas State Board of Education voted at the May 14, 2015, meeting to table their decision on fiscal distress status for Guy-Perkins School District until the June 11, 2015 State Board meeting. The Department recommends that Guy-Perkins School District be classified as being in Fiscal Distress as of June 11, 2015.

Presenter: Dr. Eric Saunders

A-6 Arkansas K-12 Science Standards for Grades K-4 and 5-8

The Arkansas K-12 Science Standards for Grades K-4 and 5-8 are respectfully submitted to the Arkansas State Board of Education (SBE) for adoption. On April 10, 2014, the Arkansas SBE unanimously voted to endorse the Next Generation Science Standards (NGSS) as a basis for the development of new K-12 science standards. The endorsement authorized the Arkansas Department of Education (ADE) to develop the NGSS into standards that fit Arkansas's curriculum mandates. The Curriculum and Instruction Unit worked with 45 representatives from K-8, career education, and higher education over the past year to create the new Arkansas K-12 Science Standards for Grades K-4 and 5-8. The Arkansas K-8 Science Standards Committee dove deep into the NGSS performance expectations for Grades K-8 to map the NGSS middle school standards into Grades 6-8. The committee also added to the K-8 standards Arkansas-specific clarification statements and assessment boundaries, created grade-specific learning progressions by topic and disciplinary core idea, and wrote overviews of the content for each grade for teachers. There

are several aspects about the Arkansas K-12 Science Standards to bring to the attention of the SBE. The committee chose to keep the K-8 standards as a set of integrated life science, earth and space science, and physical science content standards like the current Arkansas K-8 science standards and to use the same format as the NGSS standards. The Arkansas K-12 Science Standards include the three-dimensional student performance expectations as written in the NGSS that incorporate the science and engineering practices, crosscutting concepts, and disciplinary core ideas from the Framework for K-12 Science Education (NAP, 2010). There are content shifts, alignment to the Common Core State Standards for English Language Arts and Math, clarification statements and assessment boundaries, and connections to other standards within each grade and across grades to guide instruction. The shifts in middle school content were necessary to align to the eighth grade content shifts of the Common Core State Standards for Mathematics. In addition to the three domains of content, K-8 engineering content is included for the first time in Arkansas science standards to support Science, Technology, Engineering, and Math (STEM) education initiatives. The Curriculum and Instruction Unit posted drafts of the K-4 and 5-8 standards for public comment from April 15 to May 15, 2015. The majority of the 134 Arkansas respondents read the standards that were of interest to them and agreed that those standards were appropriate as written. Several members of the K-8 committee met on June 4, 2015 to review the comments, questions, and concerns posted by Arkansas teachers and made recommendations for the best course of action to take in response to the field. The goal of the Arkansas K-12 Science Standards is to prepare students to know and apply science concepts to real-world situations when they graduate from high school and beyond. As this work progresses, the current Arkansas Science Curriculum Frameworks and Science Benchmark and End-of-Course Biology assessments will be in place for the 2015-2016 school year. The Arkansas K-12 Science Standards for Grades K-4 are set to be implemented in 2016 and for Grades 5-8 in 2017. The Arkansas 9-12 Science Standards Committee will begin writing new high school science courses this summer with a plan to present those to the SBE for consideration to adopt in spring of 2016. New science licensure competencies that are aligned to the new standards to support the preparation of new science teachers go into effect 2015. Professional development workshops, communication plans, new assessments, and tools to support schools in the transition continue to be developed. ADE science assessment, professional development, and curriculum and instruction specialists continue working with other states in the Council of Chief State School Officers (CCSSO) Science Assessment Item Collaborative, CCSSO Science SCASS, and NGSS Network to support the ongoing implementation of the Arkansas K-12 Science Standards. Presenter: Dr. Debbie Jones

A-7 Equitable Access to Excellent Educators Plan

This information is provided to keep the State Board of Education apprised of the Department's work activities associated with the equitable access to excellent educators plan.

Presenter: Ivy Pfeffer and Karli Saracini

A-8 Consideration of Request for Approval of Nominated Members for the Professional Licensure Standards Board to Replace Members Whose Terms are Expiring June 30, 2015

Request Approval of Nominated Members for the Professional Licensure Standards Board to Replace Members Whose Terms are Expiring June 30, 2015. Pursuant to § 6-17-422 members of the PLSB serve

rotating terms. Five (5) members of the Professional Licensure Standards Board will complete their three-year terms on June 30, 2015. Nominations to fill these positions are as follows: Dr. Shelly Albritton, Associate Professor at the University of Central Arkansas, has been nominated for re-appointment by the Arkansas Professors of Educational Administration (ARPEA) to represent Educational Leadership. Dr. Greg Murry, Superintendent of Conway School District has been nominated by the Arkansas Association of Educational Administrators (AAEA) to represent Public School Superintendents. Todd Sellers, Principal at Bethel Middle School in the Bryant School District has been nominated by the Arkansas Association of Educational Administrators (AAEA) to represent Middle Level Building Administrators. Brenda Brown, Pre-K teacher at Helena-West Helena Elementary School in the Helena-West Helena School District has been re-nominated by the Arkansas Education Association (AEA) to represent Public School Classroom Teachers – Grades P-4. Dr. Mary B. Gunter, Director for the Center for Leadership and Learning at Arkansas Tech University has been nominated by the Arkansas Association of Supervision and Curriculum Development (AASCD) to represent Curriculum Programs. The terms of these members will begin on July 1, 2015 and end on June 30, 2018.

Presenter: Ivy Pfeffer

A-9 State Board Review of PLSB Evidentiary Hearing Findings and Recommendations – PLSB Case No. 13-047; Beverly Garner-Harris

Violation of Standard 1: An educator maintains a professional relationship with each student, both in and outside the classroom. Violation of Standard 6: An educator keeps in confidence information about students and colleagues obtained in the course of professional service, including secure standardized test materials and results, unless disclosure serves a professional purpose or is allowed by law. Following an evidentiary hearing on November 21, 2014, the Professional Licensure Standards Board Ethics Subcommittee recommended that the State Board order the suspension of Ms. Garner-Harris' license for three (3) years, assess a \$100.00 fine, and require Ms. Garner-Harris to, by the end of the suspension period, complete professional development on ArkansasIDEAS, Number CID 1001366(11)-ASCD: Classroom Management: Building Effective Relationships, ArkansasIDEAS, Number CID 1000265(1b)-Annenberg Media: The Learning Classroom: Feelings Count, ArkansasIDEAS, Number CID 1001186(2d)-ASCD: Classroom Management: Managing Challenging Behavior, and by reading A Framework for Understanding Poverty by Ruby K. Payne, Ph.D. and providing the PLSB office with a written reflection on the book and its impact on her teaching practices. Ms. Garner-Harris made a timely request for State Board review. Ms. Garner-Harris has filed written objections and the PLSB has filed its response. Ms. Garner-Harris is represented by attorney Clayton Blackstock.

Presenter: Jennifer Liwo

A-10 State Board Review of PLSB Evidentiary Hearing Findings and Recommendations – PLSB Case No. T13-015B; Simone S. Vaughn

Violation of Standard 3: An educator honestly fulfills reporting obligations associated with professional practices. Following an evidentiary hearing on January 9, 2015, the Professional Licensure Standards Board Ethics Subcommittee recommended that the State Board suspend Ms. Vaughn's license for two (2) years and assess a \$100.00 fine. Ms. Vaughn made a timely request for State Board review. Ms. Vaughn has filed written objections and briefs. The PLSB has filed its response Ms. Vaughn is represented by attorney John L. Burnett.

Presenter: Jennifer Liwo

A-11 Consideration of Barton-Lexa School District – Appeal of Probationary Status Not teaching required 38 Units for the 2014-15 school year

Barton-Lexa High School was in violation of Standards Rules 9.03.4.2 (Physics – 1 unit). The district had no students enrolled in Physics during the 2014-15 school year. The district is requesting Accredited-probationary status not be upheld and a status of Accredited-cited be applied to Barton-Lexa HS.

Presenter: Johnie Walters

A-12 Consideration of Earle School District - Appeal of Probationary Status-Teacher Not Certified for the 2014-15 School Year

The district employed a Teach for America teacher who was unable to secure necessary licensure to be qualified to teach the courses to which they were assigned. The district is requesting Accredited-probationary status not be upheld and a status of Accredited be applied to Earle Elementary School.

Presenter: Johnie Walters

A-13 Consideration of England School District - Appeal of Probationary Status-Not Teaching Required 38 units for the 2014-15 School Year

England School District requests a waiver form Standards Rule 9.03.4.1 (Drama - 1/2 unit) and 9.03.4.2 (Physics - 1 unit). The district did not provide a Dram (1/2 unit) course in their 2014-15 schedule. The district had two (2) students enrolled in Physics until the end of the first semester when they dropped the course. The district is requesting Accredited-probationary status not be upheld and a status of Accredited-cited be applied to England High School.

Presenter: Johnie Walters

A-14 Consideration of Mountain Pine School District - Appeal of Probationary Status-Not Teaching Required 38 units for the 2014-15 School Year

Mountain Pine High School was in violation of Standards Rules 9.03.4.2 (Physics - 1 Unit). The district had two (2) students enrolled in Physics but the students dropped the course during the first two weeks of the fall semester. No other students enrolled. The district is requesting Accredited-probationary status not be upheld and stays of Accredited by applied to Mountain Pine High School.

Presenter: Johnie Walters

A-15 Consideration of West Side School District (Cleburne Co.)- Appeal of Probationary Status-Not Teaching Required 38 units for the 2014-15 School Year

West Side High School was in violation of Standards Rule 9.03.4.1 (Journalism - 1 unit). the district states that one student was enrolled in Journalism during the fall semester but the student dropped the class (see explanation in attached appeal letter). The district is requesting Accredited-probationary status not be upheld and a status of Accredited-Cited be applied to West Side High School.

Presenter: Johnie Walters

A-16 Consideration of White County Central School District - Appeal of Probationary Status-Not Teaching Required 38 units for the 2014-15 School Year

White County Central High School was in violation of Standards Rules 9.03.4.1 (Journalism - 1 unit). The district had no student enrolled in Journalism during the 2014-15 school year. The district is requesting Accredited-probationary status not be upheld and a status of Accredited by applied to White County Central High School.

Presenter: Johnie Walters

A-17 Consideration of Final Accreditation Report Fiscal Year 2014-15 - Summary of Accreditation for Arkansas Public Schools and School Districts

This report is being submitted for compliance with A.C.A. § 6-15-102 (g) (1) and (2).

Presenter: Johnie Walters

A-18 Consideration of Awarding Waiver Days for Inclement Weather 2014-2015

School Districts may request a waiver of instructional days due to inclement weather. The Ashdown School District requests a waiver of four instructional days.

Presenter: Johnie Walters

A-19 Hearing for Open-Enrollment Public Charter School: Covenant Keepers College Preparatory Charter School

On April 15, 2015, the Charter Authorizing Panel met and made the decision to take no action after reviewing the processes and procedures that Covenant Keepers College Preparatory Charter School is employing to improve its academic standing. On May 14, 2015, the State Board voted to review the decision made by the Charter Authorizing Panel. The State Board will conduct a full hearing to consider the possibility of acting on the Covenant Keepers open-enrollment charter pursuant to Ark. Code Ann. § 6-23-105. The possible actions allowed by the statute include the State Board placing the school on probation, modifying the open-enrollment charter, and revoking the charter.

Presenter: Mary Perry

A-20 Consideration of ESEA Flexibility Waiver IMO Reports for Priority Schools 3rd Quarter of 2014-15 school year

34 schools continue to be identified in ESEA Flexibility Waiver status as Priority. Of the 34 schools in Priority status, 22 schools are also identified as in Academic Distress through the State Accountability System. The ESEA Flexibility Waiver identified that schools in Priority status, in collaboration with district leadership, would develop Improvement Plans targeting the four turnaround principles of: 1) Teacher and Leadership Practices; 2) Student Progress and Achievement; 3) Student Safety and Discipline; and 4) Parent and Community Engagement. Within the improvement plans, school leadership was to identify interim measurable objectives in order to monitor quarterly progress. Attached are the 3rd quarter summary reports for State Board review.

Presenter: Dr. Richard Wilde and Elbert Harvey

A-21 Consideration for Emergency Adoption: 2015 District Conversion Charter School Application

The State Board approved the 2015 District Conversion Charter School Application for emergency adoption on May 14, 2015. Included in the application was a due date for the applications of July 28, 2015.

Department staff respectfully requests the State Board give approval to a new application that includes the

changes from the previously adopted emergency application and changes the due date to September 9, 2015.

Presenter: Kendra Clay

A-22 Consideration for Emergency Adoption: Repeal of 2015 District Conversion Charter School Application

The State Board approved the 2015 District Conversion Charter School Application for emergency adoption on May 14, 2015. Included in the application was a due date for the applications of July 28, 2015. In order to implement the new requested due date of September 9, 2015, Department staff respectfully requests the State Board repeal the emergency adoption of the 2015 District Conversion Charter School Application that was effective on May 15, 2015.

Presenter: Kendra Clay

A-23 Consideration for Final Approval: ADE Rules Governing the Public School Choice Act of 2015

Act 560 of 2015 revised Arkansas laws pertaining to the Public School Choice Act of 2013. The State Board released these rules for public comment on April 9, 2015. A public hearing was held on April 28, 2015. The public comment period expired on May 18, 2015. Written comments were received during the public comment period. Typographical revisions were made to the rules. Arkansas Department of Education staff respectfully requests that the State Board of Education give final approval to these rules pending approval by the Governor's Office and Legislative Council review.

Presenter: Jennifer Davis

A-24 Election of Officers for State Board of Education for 2015-2016

In accordance with the Board Operating Guidelines, Chairman Ledbetter selected a nominating committee. Members included Ms. Saviers, Mr. Black, and Dr. Barth. The Nominating Committee reported their recommended slate of officers May 14, 2015. Nominations included: Chairman: Toyce Newton; Vice-Chairman: Mireya Reith. The election shall take place by voice vote at the June meeting. The outgoing Chair shall serve through the conclusion of the meeting, at which time the newly elected Chair shall take office.

Presenter: Nominating Committee - Ms. Saviers, Mr. Black, and Dr. Barth

**Minutes
State Board of Education Meeting
Tuesday, May 5, 2015**

The State Board of Education met Tuesday, May 5, 2015, in Room 303-B of the Department of Education Building. Chairman Sam Ledbetter called the meeting to order at 2:02 p.m.

Present: Sam Ledbetter, Chairman; Toyce Newton, Vice-Chair; Alice Mahony; Diane Zook; Vicki Saviers; Dr. Jay Barth; Jonathan Crossley, Teacher of the Year; and Johnny Key, Commissioner.

Present via phone: Mireya Reith and Kim Davis

Absent: Joe Black

Action Agenda

Consideration of Arkansas Department of Education Recommendation Pursuant to Ark. Code Ann. § 6-15-430 regarding the Administration of the Little Rock School District

On July 10, 2014, the State Board of Education classified six schools within the Little Rock School District as being in academic distress. On January 28, 2015, the State Board of Education voted to assume authority over the Little Rock School District. Pursuant to Ark. Code Ann. § 6-15-430, the Arkansas Department of Education recommends that the State Board of Education waive the application of certain Arkansas laws and corresponding State Board of Education rules regarding the administration of the Little Rock School District.

Commissioner Johnny Key said Arkansas Code Annotated, Section 6-15-430 allowed the State Board of Education to waive the application of Arkansas law or corresponding State Board of Education rules. He said he had been engaged in a search for a new administrator for the Little Rock School District and would like to hire an individual from the Little Rock community who has extensive, relevant experience in the Little Rock community and the Little Rock School District. Mr. Key said he would like to hire someone who is a proven leader and who will engage with the Little Rock community in a collaborative way to improve education in the six academically-distressed schools and the district as a whole.

Commissioner Key requested that the Board grant flexibility allowed in law under Arkansas Code Annotated, Section 6-15-430 to waive any educator licensure, administrator licensure, and experience required by Arkansas law and corresponding State Board of Education rules relating to the qualifications of

superintendents so that he can hire an individual to administer and supervise the Little Rock School District, even though that individual may not have an educator's license or an administrator's license.

Commissioner Key's request for this waiver included, without limitation, a waiver of all statutory and regulatory requirements related to educator and administrator licensure and experience, including the Rules Governing Educator Licensure, the Standards for Accreditation, and Rules Governing the Superintendent Mentoring Program. He said this waiver request was specific to the position of superintendent. He said he was seeking to hire Mr. Baker Kurrus of Little Rock. He said he would ask Mr. Kurrus to serve in this role until the district is returned to local control.

Mr. Jeremy Lasiter said this waiver was for a period of time confined to academic distress identification.

Mr. Kurrus said he does have a work plan in mind. He said his role is to facilitate the community's involvement. He said he will be asking questions and listening. He said the LRSD Civic Advisory Committee needed to be the eyes and ears of the district. He said this is a community problem that will need to be solved by the community. He said morale in the district is at a 25-year low. He said his focus is motivating and energizing the adults and students to do the hard work in this district.

The Board discussed the intent of the LRSD Civic Advisory Committee. Board Members clarified the LRSD Civic Advisory Committee does not have the same role as the Community Advisory Board as noted in Code for the second year under state authority.

Ms. Newton moved to approve Commissioner Key's request for a waiver. Specifically, Ms. Newton moved that the Board exercise its authority under Arkansas Code Annotated, Section 6-15-430 to waive any educator licensure, administrator licensure, and experience requirements in Arkansas law and corresponding State Board of Education rules pertaining to the position of superintendent. This motion included, without limitation, a waiver of all statutory and regulatory requirements related to educator and administrator licensure and experience for the position of superintendent, including the Rules Governing Educator Licensure, the Standards for Accreditation, and Rules Governing the Superintendent Mentoring Program. The specific intent of this motion is to waive the operation of any and all laws and administrative rules that would require a superintendent of the Little Rock School District to hold a teaching license, administrator's license, or to hold certain educational or experience requirements, and to allow the Commissioner of Education to appoint, employ, and compensate an individual to administer the Little Rock School District who may not hold an educator's license or an administrator's license. The motion was seconded by Ms. Saviers.

Substitute motion: Ms. Mahony made a substitute motion to include Ms. Newton's motion plus reinstate the LRSD Board, as the membership existed January 22, 2015, as a working partner with Mr. Kurrus. Ms. Reith seconded the motion. Ms. Zook, Ms. Saviers, Ms. Newton, Dr. Barth, and Mr. Davis voted no. The final vote was 2-5. The substitute motion failed.

Dr. Barth made the motion to add the following two amendments to Ms. Newton's motion: the waiver applies to this hire only and the LRSD leadership team must contain a member with a superintendent's license. The amended motion was approved by Ms. Newton and Ms. Saviers. The amended motion carried unanimously.

Adjournment

The meeting adjourned at 2:54 p.m.

Minutes recorded by Deborah Coffman.

**Minutes
State Board of Education Meeting
Thursday, May 14, 2015**

The State Board of Education met Thursday, May 14, 2015, in the Pulaski County Special School District Administration Building. Vice-Chairman Toyce Newton called the meeting to order at 10:00 a.m.

Present: Toyce Newton, Vice-Chair; Diane Zook; Joe Black; Dr. Jay Barth; Mireya Reith; Vicki Saviers; Kim Davis; Jonathan Crossley, Teacher of the Year; and Johnny Key, Commissioner.

Absent: Sam Ledbetter, Chairman and Alice Mahony

Work Session

Nomination Committee

The Nomination Committee, Vicki Saviers; Dr. Jay Barth; and Joe Black, met at 9:30 a.m. to consider recommendations for Chair and Vice Chair of the State Board of Education. The Committee shall secure the consent of its nominees to serve and report to the Board at the May meeting. Nominations from the floor shall be allowed. The election shall take place by voice vote at the June meeting. The outgoing Chair shall serve through the conclusion of the meeting, at which time the newly elected Chair shall take office.

Consent Agenda

Dr. Barth requested to pull Consent Item 5: Progress Report on the Status of Districts Classified in Fiscal Distress.

Ms. Zook requested to pull Consent Item 4: Report on Waivers to School Districts for Teachers Teaching Out of Area for Longer than Thirty (30) Days, Ark. Code Ann. §6-17-309.

Mr. Davis moved, seconded by Ms. Reith, to approve the consent agenda less C-4 and C-5. The motion carried unanimously.

The Board discussed the two consent items with ADE Assistant Commissioners.

Dr. Barth moved, seconded by Ms. Reith, to approve the consent agenda item C-4. The motion carried unanimously.

Ms. Zook moved, seconded by Mr. Davis, to approve the consent agenda item C-5. The motion carried unanimously.

Items included in the Consent Agenda:

- Minutes - April 9, 2015
- Minutes - April 10, 2015
- Newly Employed, Promotions and Separations
- Report on Waivers to School Districts for Teachers Teaching Out of Area for Longer than Thirty (30) Days, Ark. Code Ann. §6-17-309
- Progress Report on the Status of Districts Classified in Fiscal Distress
- Consideration of the Recommendation of the Professional Licensure Standards Board for Case #14-165 - William E. Crotts, Jr.
- Consideration of the Recommendation of the Professional Licensure Standards Board for Case #15-044 – Larry D. Walters
- Consideration of the Recommendation of the Professional Licensure Standards Board for Case #T13-015A – Claudia M. Garrigus

Action Agenda

Consideration of Approval as Final Rule – Department of Education Rules Governing Educator Mentoring Programs

Professional Licensure Standards Board (PLSB) Attorney Cheryl Reinhart said on February 12, 2014, the State Board approved, for public comment, proposed Rules Governing Educator Mentoring Programs. She said the Department received and considered public comment and had made some changes to the rules. She said public and private school personnel would be able to take advantage of mentoring programs.

Ms. Saviers moved, seconded by Mr. Davis, to approve the Department of Education Rules Governing Educator Mentoring Programs. The motion carried unanimously.

Consideration of Approval as Final Rule – Department of Education Rules Governing Educator Licensure

Professional Licensure Standards Board (PLSB) Attorney Cheryl Reinhart said on February 12, 2014, the State Board approved, for public comment, proposed Rules Governing Educator Licensure. She said the Department received and considered public comment and had made some changes to the rules.

Dr. Barth requested that the rules define “equity plan” as it is referenced in the rules.

Dr. Barth moved, seconded by Ms. Saviers, to approve Department of Education Rules Governing Educator Licensure with changes to define “equity plan”. The motion carried unanimously.

Consideration of Approval as Final Rule – Repeal of Department of Education Rules Governing Nontraditional Licensure

Professional Licensure Standards Board (PLSB) Attorney Cheryl Reinhart said on July 10, 2014, the State Board approved, for public comment, the repeal of the Rules Governing Nontraditional Licensure as the provisions of the rule are incorporated into the Rules Governing Educator Licensure (approved for public comment on February 12, 2015). She said no public comment was received.

Ms. Saviers moved, seconded by Ms. Reith, to repeal the Department of Education Rules Governing Nontraditional Licensure. The motion carried unanimously.

Consideration of Approval as Final Rule – Repeal of Department of Education Rules Governing the Lifetime Teaching License

Professional Licensure Standards Board (PLSB) Attorney Cheryl Reinhart said on July 10, 2014, the State Board approved, for public comment, the repeal of the Rules Governing the Lifetime Teaching License as the provisions of the rule are incorporated into the Rules Governing Educator Licensure (approved for public comment on February 12, 2015). She said no public comment was received.

Dr. Barth moved, seconded by Ms. Zook, to repeal the Department of Education Rules Governing the Lifetime Teaching License. The motion carried unanimously.

Consideration for Report on ABCTE as an Accelerated Teaching Program

Assistant Commissioner for Human Resources, Licensure and Educator Effectiveness Ms. Ivy Pfeffer said she would work with ABCTE to discuss licensure issues.

Mr. Black moved, seconded by Ms. Reith, to approve the report on ABCTE as an Accelerated Teaching Program. The motion carried unanimously.

Consider Recommendation of New Praxis Computer Science 4-12 Test

Director of Educator Licensure Ms. Karli Saracini said to address a new Arkansas educator licensure area in Computer Science 4-12, Educational Testing Service (ETS) facilitated a multi-state standard setting study on April 27 and 28, 2015, on the new Praxis™ Computer Science (5651). She said the purpose of the standard setting study was to support the decision-making process for the Department to establish a passing score (cut score) for the new computer science test. She said two Arkansas computer science specialists will serve on the study panel. She said within a week after the study, ETS would provide a recommended cut score for the Department, the PLSB, and the State Board of Education to adjudicate. She said the ADE recommended adopting the Praxis™ Computer Science (5651) test with the recommended cut score of 171 effective immediately. She said the first testing window would be June 15-26, 2015.

Ms. Saracini said there would be two options to become licensed. A licensed teacher may take the test and, if the teacher exceeds the cut score, then the teacher may receive a license. A licensed teacher may take courses and then the test to receive a license. The second option is for a nontraditional licensure pathway.

Ms. Zook moved, seconded by Dr. Barth, to approve the Praxis Computer Science 4-12 Test with a cut score of 171. The motion carried unanimously.

Consideration for an Addendum to the North Little Rock School District ABC Program

Ms. Mary Kaye McKinney, representing the Division of Child Care and Early Childhood Education, said the North Little Rock School District established a classroom within the Amboy Elementary School to accommodate the children who may have needed services because of the closing of the ABC Preparatory Academy. She said these details were presented and approved during the January 2015 State Board of Education meeting. She said the North Little Rock District was approved for \$2,741,040.00 during the June 2014 State Board Meeting. She said the new grant award amount would be \$2,784,920.00.

Ms. Saviers moved, seconded by Ms. Reith, to approve the addendum to the North Little Rock School District ABC Program. The motion carried unanimously.

Consideration of Little Rock School District Progress Report

Little Rock School District Superintendent Mr. Baker Kurrus said he had assessed the organization during his first week on the job. He said the issues are communications, failure to operate toward a structured organization,

bottlenecks, lack of delegation of authority, low morale and lack of peer respect, and budget issues. These issues have translated into school failures. He said curriculum and instruction has not been integrated into teaching and learning. He said the lack of communication has resulted in surprises as exemplified by the recent concerns at the Rockefeller School community. He said the decision-making should be made by the people who will be implementing the work. He said the draft plan for Baseline Elementary is a continuous improvement plan. He said he would hire a new principal and challenge the staff to work together to revise the plan. He said the district would provide the support needed to ensure progress. Mr. Kurrus said the work must be community based. He said he is reaching out for assistance.

Ms. Reith said she is encouraged by the work in the community and the continuous improvement plans being worked at the school level. She encouraged open honest conversation between teachers and administrators.

Mr. Davis said he appreciated Mr. Kurrus being in the field. He recommended a sustainable communication plan.

Mr. Kurrus said the culture has stifled innovation and hard work. He expects the staff to be energetic and focused. He said the district has good people who need to work collaboratively.

Commissioner Key thanked Mr. Kurrus for his work.

Dr. Barth moved, seconded by Ms. Zook, to approve the Little Rock School District Progress Report. The motion carried unanimously.

Proposed Charge for the LRSD Civic Advisory Committee

Ms. Saviers moved, seconded by Mr. Davis, to place the Proposed Charge for the LRSD Civic Advisory Committee on the action agenda.

Dr. Barth submitted a proposed charge for the LRSD Civic Advisory Committee. The Board made a few revisions and submitted the following document to the Little Rock School District:

Charge for the LRSD Civic Advisory Committee
At its special meeting on 28 January 2015, the State Board of Education (SBE) established a “formal body of parents, students, community and business leaders, reflective of the Little Rock community and philanthropic organizations [to] serve as a Civic Advisory Committee to aid in improving the performance of students in all schools.” After that meeting, the Civic Advisory Committee (CAC) was populated through appointments by area legislators for zone positions and community and philanthropic organization positions and by school leaders for

faculty and student positions from the six academically distressed schools in the district.

The SBE sees the CAC as a group to foster lay leadership as the LRSD prepares for its ultimate return to local control, to facilitate effective communication among the stakeholders in the community, and to aide the LRSD and ADE leadership in making community-based decisions with promise to move LRSD in a positive direction in terms of academic achievement.

If the LRSD remains under state control, a Community Advisory Board will be established in the second year of state takeover in accordance with Ark. Code Ann. § 6-15-430; the Community Advisory Board will have those powers laid out in statute. Until the time of its sunset with the appointment of a Community Advisory Board, the CAC shall operate with the following responsibilities:

1) To more effectively carry out its work and to prepare a cadre of lay leaders for the LRSD moving into the future, the CAC members shall engage in study of the forces that led to the current academic achievement challenges facing the district and the most promising practices for turning around those most academically distressed schools in the LRSD.

2) The CAC shall serve as a sounding board for the LRSD/ADE leadership as they consider strategies for moving the LRSD in a positive direction in terms of academic achievement.

3) The CAC shall advise the ADE and LRSD on how best to communicate with parents and patrons of the district about plans being developed for the operation of the school district and, as appropriate, shall itself serve as a communication vehicle between the ADE/LRSD and the public.

4) The CAC shall work to foster partnerships between parents, teachers, community groups (civic and business), reflective of the diversity of the district, and the LRSD in bringing to fruition programs that have particular promise for promoting academic achievement.

As appropriate, the Civic Advisory Committee may break itself into committees or working groups to more efficiently and effectively carry out its work.

At present, the leadership of the CAC is unclear. No later than June 1, the chair of the State Board of Education, the ADE Commissioner, and the Superintendent of the LRSD shall identify an individual—either a current member of the CAC or another individual—to serve as liaison between the CAC and the SBE, ADE, and LRSD. In addition, that person shall chair meetings of the CAC and report regularly to the SBE.

Dr. Barth moved, seconded by Ms. Reith, to approve the Charge for the LRSD

Civic Advisory Committee. The motion carried unanimously.

Consideration of Petition for Alteration of Education Service Cooperative Boundaries

Department Deputy General Counsel Mrs. Lori Freno said the Fordyce School District requested the State Board consider Fordyce's decision to change cooperative membership from the Dawson Education Service Cooperative (Arkadelphia) to the South Central Education Service Cooperative (Camden). She said this request would facilitate the alteration of cooperative boundaries as outlined in A.C.A. §6-13-1003 and §6-13-1005.

Ms. Zook moved, seconded by Mr. Davis, to approve the alteration of Education Service Cooperative Boundaries. The motion carried unanimously.

Classification of District in Fiscal Distress - Guy Perkins

Assistant Commissioner for Fiscal and Administrative Services Dr. Eric Saunders said pursuant to Ark. Code Ann. §6-20-1905, the Guy-Perkins School District received notice by certified mail as being identified by the Arkansas Department of Education for Fiscal Distress status. He said the District was informed in the March 10, 2015 identification letter that they could not incur any future debt obligations without prior written approval from ADE. He said on April 15, 2015, the Department received notice that the Guy-Perkins School District would appeal the fiscal distress classification. The notice was dated April 13, 2015, which was not within the 30 days allowed by law to file an appeal. Therefore, the District did not comply with Ark. Code Ann. §6-20-1905(b). Dr. Saunders recommended the Guy-Perkins School District be classified as being in Fiscal Distress as of May 14, 2015.

Guy-Perkins School District Superintendent Mr. Brian Cossey said he has reworked the budget and expected to end the year with approximately a half million dollars in unrestricted funds. He expressed concerns that a change in ADE staff had impaired the District's progress.

Dr. Saunders said until the district closed the books the final balance was unknown. He provided examples of the Department's concerns including expected expenditures and tax collection.

Ms. Reith moved, seconded by Ms. Saviers, to suspend the late filing and consider the appeal. Dr. Barth and Mr. Davis voted no. The final vote was 4-2. The motion carried.

Ms. Reith moved, seconded by Ms. Saviers, to table the action until the June

State Board meeting. The motion carried unanimously.

Classification of Districts in Fiscal Distress - Maynard

Assistant Commissioner for Fiscal and Administrative Services Dr. Eric Saunders said pursuant to Ark. Code Ann. §6-20-1905, the Maynard School District received notice by certified notice mail as being identified by the Arkansas Department of Education for Fiscal Distress status. He said the District was informed in the March 10, 2015, identification letter that they could not incur any future debt obligations without prior written approval from ADE. He said on April 9, 2015, the Maynard School District filed a letter of appeal.

Maynard School District Board President Mr. Steve Bounds said the Board made some decisions that may have affected the fiscal status of the district. He said the Board waited to make drastic cuts. He said recently, the district passed a millage for a building project. He said the Board had recently made staffing changes that will save the district approximately \$250,000.00.

Maynard School District Superintendent Ms. Patricia Rawlings said cuts have been made and she expected to have an increased balance.

Dr. Saunders said due to declining enrollment the district would receive less funding next fiscal year.

Dr. Barth moved, seconded by Ms. Saviers, to classify the Maynard School District in Fiscal Distress. The motion carried unanimously.

A-12 Review of Charter Authorizing Panel Action on Open-Enrollment Public Charter School: Covenant Keepers College Preparatory

Office of Educational Options Director Ms. Cindy Hogue said on April 15, 2015, the Charter Authorizing Panel considered the possibility of acting on the Covenant Keepers open-enrollment charter pursuant to Ark. Code Ann. 6-23-105, regarding an alleged failure to meet academic performance criteria deemed appropriate and relevant for the public charter school by the authorizer. She said by a vote of 3 to 1 the Charter Authorizing Panel decided to take no action.

Assistant Commissioner Dr. Eric Saunders said the progress of the charter school was below expectation.

Assistant Commissioner Dr. Debbie Jones said the charter school served high-need, highly mobile, high percentage of free and reduced lunch students.

Covenant Keepers Head of School Ms. Valerie Tatum said the charter school

had improving scores before the issue with the high school. The charter closed the high school and was trying to rebuild. She said the Latino students may be moving between countries. She said other students are displaced and therefore move to another school or district.

Assistant Commissioner Ms. Annette Barnes said the school improvement team was encouraged by the progress of the charter school.

Ms. Saviers moved, seconded by Dr. Barth, to review the Charter Authorizing Panel action on Open-Enrollment Public Charter School for the Covenant Keepers College Preparatory. The motion carried unanimously.

Consideration for Emergency Adoption: 2015 Open Enrollment Charter School Application

Department Staff Attorney Ms. Kendra Clay said the 2015 Open Enrollment Charter School Application included additional prompts suggested by the Charter Authorizing Panel and updated the submission deadline for the 2015 application cycle.

Dr. Barth moved, seconded by Mr. Davis, to approve the 2015 Open Enrollment Charter School Application for emergency adoption. The motion carried unanimously.

Consideration for Public Comment: 2015 Open Enrollment Charter School Application

Department Staff Attorney Ms. Kendra Clay said the 2015 Open Enrollment Charter School Application included additional prompts suggested by the Charter Authorizing Panel and updated the submission deadline for the 2015 application cycle.

Dr. Barth moved, seconded by Ms. Zook, to approve the 2015 Open Enrollment Charter School Application for public comment. The motion carried unanimously.

Consideration for Emergency Adoption: 2015 District Conversion Charter School Application

Department Staff Attorney Ms. Kendra Clay said the 2015 District Conversion Charter School Application included additional prompts suggested by the Charter Authorizing Panel and updated the submission deadline for the 2015 application cycle.

Ms. Reith moved, seconded by Dr. Barth, to approve the 2015 District Conversion Charter School Application for emergency adoption. The motion carried unanimously.

Consideration for Public Comment: 2015 District Conversion Charter School Application

Department Staff Attorney Ms. Kendra Clay said the 2015 District Conversion Charter School Application included additional prompts suggested by the Charter Authorizing Panel and updated the submission deadline for the 2015 application cycle.

Ms. Reith moved, seconded by Ms. Saviers, to approve the 2015 District Conversion Charter School Application for public comment. The motion carried unanimously.

State Board Review of PLSB Evidentiary Hearing Findings and Recommendations – PLSB Case No. 13-047; Beverly Garner-Harris

Item was pulled from the agenda at the request of Ms. Beverly Garner Harris.

Consideration of Waiver Request for Teaching License – Rayleun Rideout

Professional Licensure Standards Board (PLSB) Attorney Cheryl Reinhart said Mr. Rayleun Rideout is a licensed educator. She said on January 13, 2015, the Department advised Mr. Rideout that the Department would seek revocation of his teaching license based on a disqualifying offense for licensure under Ark. Code Ann. § 6-17-410(c). She said Mr. Rideout has requested a waiver of the disqualifying offense. She said Mr. Rideout does have a true finding and is on the child maltreatment registry.

Attorney Mr. James Phillips requested a waiver for Mr. Rideout. He said the true finding was related to Mr. Rideout's discipline of his child at home. He said police investigated the incident but filed no criminal charges. He said a safety plan was implemented by DHS so the family could remain in the home.

Attorney James Phillips said the incident occurred at the home while Mr. Rideout was disciplining his child.

Mr. Rayleun Rideout said the incident occurred in May 2014.

Mrs. Tabitha Rideout said her husband is a man of integrity. She said the family had been compliant with all requests.

Mr. Davis moved, seconded by Ms. Zook, to approve the waiver of the disqualifying offense with a two-year probation of Mr. Rideout's license, with no disqualifying offenses during that two-year period for Mr. Rayleun Rideout. The motion carried unanimously.

Hearing on Licensure Action – Leon Harris, Jr.

Professional Licensure Standards Board (PLSB) Attorney Cheryl Reinhart said Mr. Leon Harris, Jr. is seeking licensure by reciprocity. She said in 2004, the State Board permanently revoked a provisional license issued to Mr. Harris. Mr. Harris filed a motion asking the State Board to rescind that decision on the grounds that he was denied due process in 2004.

Attorney Cody Kees said Mr. Harris received a standard teaching license from Montana. Mr. Harris received an Arkansas license through reciprocity. Montana rescinded his license due to a procedural error. Because of reciprocity, the State Board revoked Mr. Harris' license in 2004. He said Mr. Harris has a standard teaching license in Nevada.

Ms. Reinhart recommended the Board rescind the previous decision. She said Mr. Harris could apply for an Arkansas license through reciprocity with Nevada.

Mr. Leon Harris, Jr. said he is applying now because he misses working with students.

Ms. Saviers moved, seconded by Mr. Davis, to rescind the revocation of license for Leon Harris, Jr. The motion carried unanimously.

Consideration for Final Approval: Proposed Revision of the Arkansas Department of Education Standards for Educational Interpreters and Translitterators

Ms. Courtney Salas-Ford, attorney for the Special Education Unit, said the ADE Standards for Educational Interpreters and Translitterators were revised to reflect changes in licensure for interpreters of the hearing impaired as required by Arkansas Code Annotated § 20-14-801 et seq. (Act 1314 of 2013). The State Board released these standards for public comment on April 9, 2015. A public hearing was held on April 28, 2015. The public comment period expired on May 13, 2015. No comments were received during the public comment period. Department staff respectfully requests the State Board approve the proposed standards pending Legislative Council review.

Ms. Zook moved, seconded by Mr. Davis, to approve the revision of the

Arkansas Department of Education Standards for Educational Interpreters and Transliterators. The motion carried unanimously.

Consideration of Nomination Committee Report

Ms. Saviers said the nomination committee recommended Ms. Toyce Newton for Chair and Ms. Mireya Reith for Vice-Chair. She said the election shall take place by voice vote at the June meeting.

Mr. Black moved, seconded by Dr. Barth, to approve the nominations. The motion carried unanimously.

Adjournment

The meeting adjourned at 2:37 p.m.

Minutes recorded by Deborah Coffman.

Minutes
State Board of Education Special Committee on Academic Distress Meeting
Friday, May 15, 2015

The State Board of Education Special Committee on Academic Distress met Friday, May 15, 2015, in the Pulaski County Special School District Administration Building. Chairman Vicki Saviers called the meeting to order at 11:27 a.m.

Present: Vicki Saviers, Chair; Toyce Newton; and Diane Zook

Absent: Sam Ledbetter

Reports

Chair's Report

No report.

Consent Agenda

Ms. Newton moved, seconded by Ms. Zook, to approve the consent agenda. The motion carried unanimously.

Items included in the Consent Agenda:

- Minutes - March 12, 2015

Action Agenda

Consideration of Progress - Lincoln Academy of Excellence, Forrest City Junior High and Forrest City High School

Forrest City School District Superintendent Dr. Tiffany Hardrick said many of the findings from the academic distress team were aligned with the findings from her assessment of the schools. She said the district did not have a curriculum or interim assessments. The district has adopted curriculum and interim assessment for K-12. She said the teachers have worked on response to intervention. She said the district was working on improving the climate and culture. She said leadership is an action, and the professional development has been designed to support all educators. Dr. Hardrick said the school board has been very supportive of the urgency and innovation. She said the district made some reconfigurations to better meet the needs of students.

School Improvement Program Manager Dr. Richard Wilde said the ADE team conducted an onsite visit to examine validity of the school improvement specialists' weekly reports and the capacity of the Forrest City leadership team to implement the improvement plan and achieve measurable results. He said the district is hiring appropriate staff, the school board has a sense of urgency, and the district is supporting teacher leadership. The ADE encouraged the district to monitor if the taught curriculum is aligned to the written curriculum. He said the interim assessments are showing student progress. He said stability of leadership is key to sustainability.

School Improvement Specialist Mr. Zrano Bowles said the district has made noticeable improvements.

School Improvement Specialist Ms. Janie Hickman said the district and schools have been diligent about meeting the expectations of the 45-day plans.

Public School Accountability Coordinator Mr. Elbert Harvey said the ADE is transitioning tools for districts. He said the IMO report would become the 45-day plan. He said the Indistar system would become the ACSIP tool.

Forrest City School Board President Mr. Joey Astin said the school board is supportive of Dr. Hardrick's leadership. He said his daughter is in the right school.

The committee members expressed their support for the collaboration between the school board and the district leadership.

Adjournment

The meeting adjourned at 12:07 p.m.

Minutes recorded by Deborah Coffman.

NEWLY EMPLOYED FOR THE PERIOD OF April 21, 2015 – May 22, 2015

No new hires during this period.

Section 1
Second Lien Bonds

Arkansas Code Annotated (A. C. A.) § 6-20-1229 (b) states the following:

(b) All second-lien bonds issued by school districts shall have semi-annual interest payments with the first interest payment due within eight (8) months of the issuance of the second-lien bond. All second lien bonds shall be repaid on payment schedules that are either:

- (1) Equalized payments in which the annual payments are substantially equal in amount; or
- (2) Decelerated payments in which the annual payments decrease over the life of the schedule.

Standards Assurance Unit**

**Summary Report of Activities
Fiscal Year 2014-15**

Mr. Johnny Key, Commissioner, Arkansas Department of Education

Members of the Board:

Samuel Ledbetter (Chair)– Little Rock
Toyce Newton – Crossett
Alice Williams Mahony – El Dorado
Vicki Saviers – Little Rock
Joe Black – Newport
Mireya Reith – Fayetteville
Jay Barth – Little Rock
Diane Zook – Melbourne
Kim Davis - Fayetteville

Submitted by Johnie Walters, Unit Leader of the Standards Assurance Unit for compliance with A.C.A. § 6-15-102 (g) (1) and (2).

The Standards Assurance Unit (SAU) is a part of the Division of Public School Accountability, under the supervision of Ms. Annette Barnes, Assistant Commissioner, Arkansas Department of Education. The Standards Assurance Unit is responsible for ensuring that Arkansas school districts are in compliance with Arkansas statutes and rules promulgated by the Arkansas State Board of Education that apply to the districts and schools of the State of Arkansas.

This report offers a summary of activities of the Standards Assurance Unit for the 2014-15 school year.

The unit currently has thirteen employees. They are:

Johnie Walters – Unit Leader	
Tim Barnes – Area 7	25 Districts/108 Schools
John Calaway – Area 9	28 Districts/103 Schools
Roy Causbie – Area 3	31 Districts/106 Schools
Derryl Evans – Area 10	15 Districts/122 Schools
Kay Gardner – Educational Liaison	
Shade Gilbert – Area 8	27 Districts/99 Schools
Randall Lawrence – Area 1	18 Districts/128 Schools
Tammy Long – Area 6	28 Districts/95 Schools
Brandon Morrison – Area 5	30 Districts/98 Schools
Mari Beth Nokes – Area 4	26 Districts/106 Schools
David “Nath” Tumlison – Area 2	30 Districts /105 Schools
Pamela Butler – Administrative Assistant	

Please see attached area map and spreadsheet for more detailed information.

2014-15 Unit Activities Summary

Provided Technical Assistance to District and School Personnel

Assisted with Desegregation Monitoring

Assisted Charter Schools Division, Office of Teacher Licensure, Alternative Learning Education, Career and Technical Education and Student Information Systems Division in Various Capacities

Conducted/Provided:

- 4 Staffing Ratio Compliance Projection Reports for Individual Districts
- 8 Technical Assistance Visits to Individual School Districts
- 9 Visits to Schools in Fiscal Distress or Alert Status

20 Workshops in Area Educational Cooperatives or in conjunction with other organizations

On-Site Monitoring Visits in 292 Individual School Sites within 64 School Districts

Completed other duties and assignments as directed by the Commissioner, Supervisors and the Board

Completed Annual Accreditation Reports for 239 School Districts and 18 Charter Districts and assigned a recommended Accreditation Status for 1066 schools

Respectfully Submitted – June 11, 2015
Johnie Walters, Unit Leader
Standards Assurance Unit/ADE

Minutes
State Board of Education Special Committee on Academic Distress Meeting
Friday, May 15, 2015

The State Board of Education Special Committee on Academic Distress met Friday, May 15, 2015, in the Pulaski County Special School District Administration Building. Chairman Vicki Saviers called the meeting to order at 11:27 a.m.

Present: Vicki Saviers, Chair; Toyce Newton; and Diane Zook

Absent: Sam Ledbetter

Reports

Chair's Report

No report.

Consent Agenda

Ms. Newton moved, seconded by Ms. Zook, to approve the consent agenda. The motion carried unanimously.

Items included in the Consent Agenda:

- Minutes - March 12, 2015

Action Agenda

Consideration of Progress - Lincoln Academy of Excellence, Forrest City Junior High and Forrest City High School

Forrest City School District Superintendent Dr. Tiffany Hardrick said many of the findings from the academic distress team were aligned with the findings from her assessment of the schools. She said the district did not have a curriculum or interim assessments. The district has adopted curriculum and interim assessment for K-12. She said the teachers have worked on response to intervention. She said the district was working on improving the climate and culture. She said leadership is an action, and the professional development has been designed to support all educators. Dr. Hardrick said the school board has been very supportive of the urgency and innovation. She said the district made some reconfigurations to better meet the needs of students.

School Improvement Program Manager Dr. Richard Wilde said the ADE team conducted an onsite visit to examine validity of the school improvement specialists' weekly reports and the capacity of the Forrest City leadership team to implement the improvement plan and achieve measurable results. He said the district is hiring appropriate staff, the school board has a sense of urgency, and the district is supporting teacher leadership. The ADE encouraged the district to monitor if the taught curriculum is aligned to the written curriculum. He said the interim assessments are showing student progress. He said stability of leadership is key to sustainability.

School Improvement Specialist Mr. Zrano Bowles said the district has made noticeable improvements.

School Improvement Specialist Ms. Janie Hickman said the district and schools have been diligent about meeting the expectations of the 45-day plans.

Public School Accountability Coordinator Mr. Elbert Harvey said the ADE is transitioning tools for districts. He said the IMO report would become the 45-day plan. He said the Indistar system would become the ACSIP tool.

Forrest City School Board President Mr. Joey Astin said the school board is supportive of Dr. Hardrick's leadership. He said his daughter is in the right school.

The committee members expressed their support for the collaboration between the school board and the district leadership.

Adjournment

The meeting adjourned at 12:07 p.m.

Minutes recorded by Deborah Coffman.

To: State Board of Education

From: Committee on Pulaski County School District Boundaries (Jay Barth, chair; Kim Davis, Sam Ledbetter, and Diane Zook)

At its special meeting on 28 January 2015, the State Board of Education (SBE) established a committee “charged with studying the appropriate school district lines within Pulaski County, taking into account communities of interest, student demographics, facilities, and property tax base with a report due back to the State Board no later than the June 2015 regularly scheduled meeting.” This represents that report.

Since January, the committee held a series of five meetings during which it examined demographic and tax data across the county, heard from the superintendents of the four school districts presently operating in the county, and heard public comments from numerous individuals and entities with ties to the communities of interest in the county. (See attached committee meeting minutes.) As a result of this work, the committee has come to understand the complexity of issues surrounding the school district lines within Pulaski County.

At the outset, it should be recognized that the State Board of Education’s powers related to any alteration of the Pulaski County Special School District (PCSSD) boundaries are sharply limited at present by a series of federal court actions dating back to the 1989 federal court settlement agreement. As reiterated by rulings by the federal court in 2003 and 2014, the State Board of Education may not alter the district lines of the PCSSD until that district is declared unitary by the federal court. Indeed, under the 2014 settlement agreement/consent judgment, “[t]he State will oppose the creation of any other school districts from PCSSD’s territory is declared fully unitary and is released from court supervision.” That said, as the PCSSD remains in state control because of fiscal distress, the statutory requirements that “the state board shall consolidate, annex, or reconstitute any school district that fails to remove itself from the classification of a school district in fiscal distress within five (5) consecutive school years of classification of fiscal distress status” (Ark. Code Ann. § 6-20-1908) may come into conflict with these previous agreements if the PCSSD remains in fiscal distress at the end of a five-year period. This report recognizes that federal court orders take precedence over state laws.

The committee strongly believes that the healthiest school districts are those where communities of interest (identified by municipal boundaries, among other factors) are in synchronicity with school district boundaries. That said, it is crucial that any district have the necessary tax base to appropriately serve its student population. Finally, district lines cannot be used to create racially identifiable school districts.

Driven by these principles and based on our study, at the point at which the PCSSD is declared unitary, we believe that the process through which these alterations to districts lines in Pulaski County should be considered by the SBE:

- A) South of the Arkansas River: The division of the city of Little Rock into two different school districts has undermined the health of the LRSD across recent years. Therefore, the LRSD and the city of Little Rock's boundaries should be brought together. However, once the western portion of the city of Little Rock was brought into the LRSD, a limited tax base would exist in the remainder of the PCSSD area south of the Arkansas River. Therefore, it is our sense that a single school district south of the River (perhaps named Little Rock-South Pulaski School District) be created to create cohesion and to enhance efficiency in educational offerings.

- B) Saline County Portions of PCSSD: Most of the students living in the municipality of Shannon Hills, in Saline County, attend the Bryant School District, but a handful of students in Shannon Hills live within the PCSSD and attend PCSSD schools. The committee was convinced that in the interest of maintaining community cohesion in Shannon Hills, it makes sense that that portion of Saline County, presently a part of PCSSD, be shifted to the Bryant School District. A second small portion of Saline County to the southwest (See attached map.) is also in PCSSD and, for consistency's sake, we believe that area should also be shifted to the adjoining Bryant School District.

- C) North of the Arkansas River: In addition to Jacksonville, three other identifiable communities exist north of the Arkansas River in the county (North Little Rock, Sherwood, and Maumelle). Large chunks of the municipality of North Little Rock are outside of the NLRSD and the value of creating coterminous lines between the city and NLRSD is compelling. In addition, with the Jacksonville-North Pulaski District as a precedent, the cities of Sherwood and Maumelle have established a case for separate school districts including those communities and surrounding areas. When unitary status is achieved for PCSSD, reconfiguration of the boundaries could begin as outlined in Ark. Code Ann. § 6-13-1414. Additionally, provided that a potential new district meets the eligibility criteria outlined in Ark. Code Ann. § 6-13-1501 et. seq., a detachment process could begin with negotiations among North Little Rock, Maumelle, and Sherwood to ascertain the most appropriate division of the portions of PCSSD north of the Arkansas River. In this work, of course, showing full respect for Ark. Code Ann. § 6-13-1414(f) and 6-13-1504 is vital so that racially identifiable district(s) are not created through this process. As the case of Jacksonville-North Pulaski has shown the detachment process is complicated both in design and in implementation, but there is strong

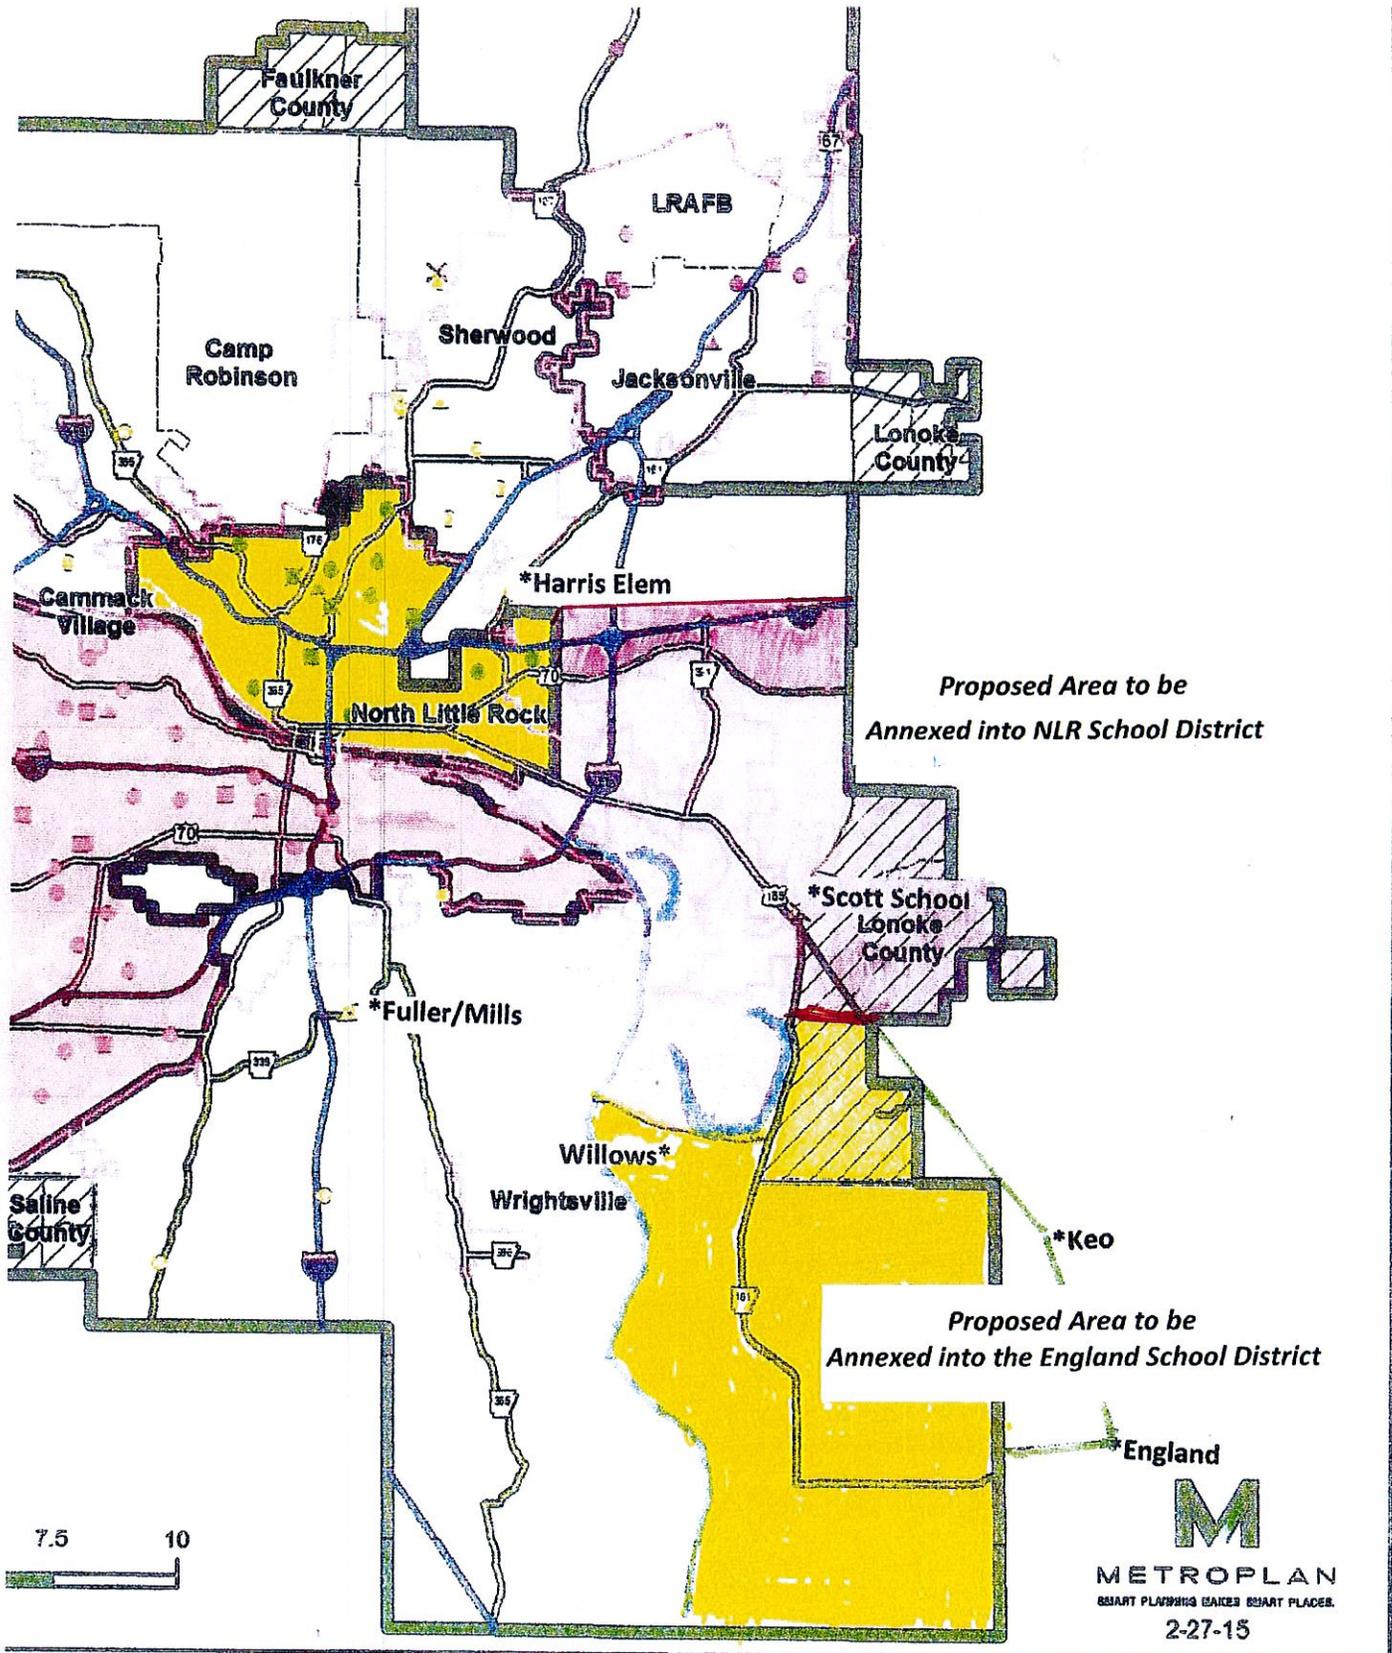

value in the development of four identifiable districts with cities as hubs north of the River.

- D) **Scott Community:** The Scott community, which is not a municipality, straddles the Pulaski and Lonoke County lines. Students in the community are split into separate school districts. Thus, while similar to the Shannon Hills case, it is different because it is not fully within one county. Based on the public comments we received, we believe that a new border should be created with areas south of Upper Steel Bend Road and south of Lower Steel Bend Road moved to the England School District in Lonoke County to maintain that community of interest while also reducing travel time for students. (See attached map.)

Finally, the recently created Jacksonville-North Pulaski School District should be allowed to operate in accordance with the district lines created as a result of the detachment approved by the SBE in 2014.

In addition, particularly if more districts are created in the county, it is clear to the committee that education in Pulaski County could be made more efficient through the utilization of an Education Service Cooperative to provide certain services across the districts of the county and through other inter-district agreements on the provision of services (e.g. transportation).

The committee asks that the SBE accept this report and endorse this approach to school district lines within Pulaski County at the point, if and when the SBE's powers over district lines in Pulaski County are restored.

Minutes
State Board of Education Special Committee
for the Pulaski County Boundaries Study
Friday, February 13, 2015

The State Board of Education Special Committee for the Pulaski County Boundaries Study met Friday, February 13, 2015, in the Auditorium of the Department of Education Building. Chairman Jay Barth called the meeting to order at 11:00 a.m.

Present: Dr. Jay Barth, Chair; Sam Ledbetter; Diane Zook; and Kim Davis

Work Session

Review the Charge of the Committee

Chairman Barth said on January 28, 2015, the State Board of Education passed a motion to establish a State Board committee charged with studying the appropriate school district lines within Pulaski County, taking into account communities of interest, student demographics, facilities, and property tax base with a report due back to the State Board no later than the June 2015, regularly scheduled meeting. State Board Chairman Sam Ledbetter appointed Dr. Jay Barth as chair. Committee members include Dr. Barth, Mr. Ledbetter, Ms. Zook, and Mr. Davis.

Department General Counsel Mr. Jeremy Lasiter said as a general matter, there are two broad ways in which the State Board of Education may change the boundary lines of a school district.

Mr. Lasiter said the first way, and the way you see most often, is through Ark. Code Ann. § 6-13-1414. That statute allows for the State Board of Education to consider a petition from a local board of directors of any school district that seeks an adjustment or change of boundary lines between its school district and an adjoining school district. Under Ark. Code Ann. § 6-13-1414, the Board may not order any change in school district boundaries that would hamper, delay, or in any manner negatively affects the desegregation efforts of the public school districts of the State.

Mr. Lasiter said the other way is more indirect. Under Arkansas laws related to the standards for accreditation, fiscal distress, academic distress, and facilities distress, the Board may consolidate, annex, or reconstitute a school district. In the Board order of consolidation or annexation, the Board may also include a provision that establishes the boundary lines of the new school districts.

Mr. Lasiter said Arkansas law states that the Board may not order any annexation or consolidation that hampers, delays, or in any manner negatively affects the desegregation efforts of a school district or school districts. Prior to entering such an order, the Board would also be required to get an advisory opinion from the Attorney General's Office concerning the desegregation issue.

Mr. Lasiter said with regard to Pulaski County, the Pulaski County Special School District remains under court supervision with regard to five areas in its desegregation plan: Discipline, Facilities, Staffing, Student Achievement, and Monitoring. Pursuant to an order issued in the early 2000s in the desegregation case, before taking any action relative to the boundaries of the Pulaski County Special School District, the Board would have to petition the presiding federal court for permission to do so. That order required any party that wanted to seek a change in the boundaries of the PCSSD to provide the court with a detailed feasibility study and specific data sufficient to allow the court to conduct an evidentiary hearing to determine whether the boundary change would substantially impact the student populations of each district and if such a change would better meet the educational needs of the students in the districts involved.

Dr. Barth said he understood that Central Arkansas Planning had mapped Pulaski County previously during the detachment process for the Jacksonville/North Pulaski School District. He said he would contact the organization for access to the maps for the next committee meeting.

Committee members discussed inviting the superintendents from the four districts in Pulaski County to provide their perspective on the current boundaries. The members also discussed inviting public comment at a later meeting.

The committee agreed to meet each month following the Friday State Board meeting with the understanding that a report is due back to the State Board by June 11, 2015. Due to a previous scheduling conflict, Dr. Barth suggested the committee select an alternative date in April.

Adjournment

The meeting adjourned at 11:12 p.m.

Minutes recorded by Deborah Coffman.

**Minutes
State Board of Education Special Committee
for the Pulaski County Boundaries Study
Wednesday, March 11, 2015**

The State Board of Education Special Committee for the Pulaski County Boundaries Study met Wednesday, March 11, 2015, in the Auditorium of the Department of Education Building. Chairman Jay Barth called the meeting to order at 2:03 p.m.

Present: Dr. Jay Barth, Chair; Sam Ledbetter; Diane Zook; and Kim Davis

Additional Board Members in Attendance: Toyce Newton and Vicki Saviers

Consent Agenda

Ms. Zook moved, seconded by Mr. Davis, to approve the consent agenda. The motion carried unanimously.

Items included in the Consent Agenda:

- Minutes – February 13, 2015

Action Agenda

A-1 Consideration of Report from Metroplan

Mr. Jim McKenzie, Executive Director of Metroplan introduced Mr. Jeff Runder Public Policy Analyst and GIS Planner. Mr. Runder said some portions of the four school districts are not in Pulaski County. He said some of the districts do not align with the city limits. He said the population issues include a difference between school age population and actual student enrollment. He said the racial composition is not consistent across the districts. Mr. Runder presented maps showing the distribution by race across the county. He also presented population changes 2000-2010 and tables of the property tax base.

The committee took no action.

A-2 Consideration of Area Superintendents' Perspectives

Mr. Kelly Rodgers, Superintendent of North Little Rock School District, said in 2012 the North Little Rock School Board voted to reorganize the district. The

plan is to have nine (9) elementary schools, one middle school, and one high school. He said the plan focused on neighborhood schools and the resources to provide a quality education for the students. He said his board was interested in economic development in North Little Rock and North Little Rock School District. He said the board was interested in securing boundaries aligned to the North Little Rock city limits. Mr. Rodgers presented a map showing the new elementary school zones. He said each elementary building was built for 500 plus students. He said all of the new buildings in NLRSD were built for growth of additional students. He showed areas on the map of where the district is interested in expansion.

Dr. Dexter Suggs, Little Rock School District Superintendent, said the west side of the city of Little Rock needs new schools to meet the growth in this area. He said the opportunity to expand to the city limits of Little Rock would assist the Little Rock School District.

Dr. Jerry Guess, Pulaski County Special School District Superintendent, said the four existing districts should remain geographically as they are. In addition, Dr. Guess recommended an alternative option to include a countywide district with one superintendent under the authority of the state commissioner of education.

Mr. Bobby Lester, Jacksonville North Pulaski School District Superintendent, provided a brief history of boundary changes in Pulaski County. He also provided a history of the efforts of the Jacksonville North Pulaski School District to detach from the Pulaski County Special School District and form a new district. He asked that the boundaries for Jacksonville North Pulaski School District remain unchanged.

The committee took no action.

Chair's Report

Chairman Barth said the committee would reach out to area legislators, area leaders and the general public to report at the next meeting.

Adjournment

The meeting adjourned at 3:16 p.m.

Minutes recorded by Deborah Coffman.

**Minutes
State Board of Education Special Committee
for the Pulaski County Boundaries Study
Wednesday, April 8, 2015**

The State Board of Education Special Committee for the Pulaski County Boundaries Study met Wednesday, April 8, 2015, in the Auditorium of the Department of Education Building. Chairman Jay Barth called the meeting to order at 10:35 a.m.

Present: Dr. Jay Barth, Chair; Sam Ledbetter; Diane Zook; and Kim Davis

Reports

Report-1 Chair's Report

No report provided.

Consent Agenda

Mr. Ledbetter moved, seconded by Mr. Davis, to approve the consent agenda. The motion carried unanimously.

Items included in the Consent Agenda:

- Minutes – March 11, 2015

Action Agenda

Consideration of Presentation from Metroplan

Presenter: Jeff Runder, GIS Planner for Metroplan

Mr. Jeff Runder, GIS Planner for Metroplan, presented maps for north of the river and south of the river. The maps included race (2010 census data) and property assessment.

Consideration of Perspective from Communities

Scott Community

Mr. Martin Gipson, Scott resident, said the PCSSD is closing the Scott Elementary. He said the Scott community is losing students because of the feeder patterns for middle school and high school. He said the community was requesting to send their students to England School District or North Little Rock School District according to the map submitted. He said the community wanted a feeder pattern that keeps the students together K-12.

Ms. Shannon Armand, parent, said her children attend a charter school. She said school options are critical to housing growth in the area.

Dr. Jerry Guess, Superintendent of the Pulaski County Special School District, said the PCSSD has future plans for a millage increase that would permit building in the district.

Shannon Hills Community

Mr. Mike Kemp, Mayor of Shannon Hills, said some of the students live in Saline County but attend PCSSD. He said these families are disenfranchised and have no representation. He said the most efficient and effective response would be to allow these students to attend the Bryant School District.

Dr. Guess said he supported this information but he would continue to serve PCSSD. He said once the district is unitary the district should be able to offer school choice.

Maumelle Community

Mr. Michael Watson, Mayor of Maumelle, said his community desired to have its own district in the future. He requested to keep the current PCSSD boundaries at this time for the Maumelle area. He said parents want choice for their students. He said he was concerned with any adjustment of the school boundaries to the city limits. Maumelle wanted to continue to include Oak Grove.

Representative Mark Lowery said Act 372 would allow Maumelle and Sherwood to detach when appropriate. He asked how the unitary status of PCSSD would be impacted by realignment and possible detachment.

Sherwood Community

Dr. Linda Remele and Ms. Beverly Williams, co-chairs of the Sherwood Public Education Foundation, said Sherwood is the fourteenth largest city in the state but does not have its own school district. Dr. Remele said the area between Jacksonville/North Pulaski School District and North Little Rock School District would be considered for the new Sherwood School District. She said the proposed district boundary would include students outside of Pulaski County. She said the feasibility study does not include the Scott community but the

foundation is willing to consider including Scott students. Ms. Williams presented tables showing a distribution of race percentages, free/reduced lunch percentages, SPED student percentages, assessment value of the Sherwood district in relation to PCSSD. She said the size of Sherwood district would compare to Russellville, Jonesboro and Benton. She asked the Special Committee to leave the current boundaries as to not harm the plan of the Sherwood Public Education Foundation to detach from PCSSD. Ms. Williams said the foundation supports the PCSSD millage increase.

Dr. Guess said a millage increase for PCSSD would provide new buildings in Sherwood. He said the PCSSD proposal for a millage increase would serve all of the students in PCSSD.

North Little Rock School District and Community

Mr. Kelly Rodgers, Superintendent of North Little Rock School District, said the NLRSD district building plan included room for growth in enrollment. He said the district staff is focused on preparing students for college and careers. He said the community, mayor, and chamber requests extending the boundaries to the city limits plus additional areas that want to come to the North Little Rock School District.

Ms. Sandy Campbell, NLRSD Board Member, said the district is working to meet the expectations of the community.

Mr. Wes Havens, Co-Chair of the NLRSD Capital Improvement Campaign (2012), said the NLRSD is providing the resources to compete. He said the millage increase, new administration, fiscal planning, facilities improvement are examples of how the district is working for the community. He said the NLRSD could be an example of a successful urban district. He asked the Special Committee to consider the data he submitted.

Mr. Isaac Henry, Special Assistant to the North Little Rock Mayor, read a prepared letter from Mayor Joe Smith, who was unable to attend the meeting. The mayor requested that the boundaries be adjusted so that students living in North Little Rock attend North Little Rock School District.

Consideration of Perspectives from Legislators

Senator Linda Chesterfield, Senate District 30, said the children must have the best education. She said she was concerned about the travel time for students. She said the students deserve state of the art educational facilities. She asked for districts that are made up of diversity. She encouraged parents and community members to be very involved in their schools.

Public Comment

Ms. Ruth Bell, League of Women Voters, said she is concerned about public input in this issue. She asked that once the committee proposal is crafted, that opportunities for public comment be considered.

Mr. Preston Lewis, Alderman for Maumelle, said he feels very positive about the working relationship between North Little Rock and Maumelle. He said this is a matter of sustainability and there are many inequities that need to be resolved. He said that he sees four options: 1.) make no change; 2.) create a county-wide district; 3.) make small changes on the margins; or 4.) take bold steps to provide local control and local participation.

Special Committee

Chairman Barth recommended that the special committee meet on May 13 at 1:00 p.m. for a committee work session and public comment. He clarified that a report is due to the State Board in June. However, the committee may need more time to construct a proposal. Committee members said that once a proposal is drafted an adequate public comment period would be provided.

Ms. Zook said this work should not interfere with the current efforts of districts to improve, pass a millage increase, and/or work for unitary status.

Adjournment

The meeting adjourned at 12:30 p.m.

Minutes recorded by Deborah Coffman.

**Minutes
State Board of Education Special Committee
for the Pulaski County Boundaries Study
Wednesday, May 13, 2015**

The State Board of Education Special Committee for the Pulaski County Boundaries Study met Wednesday, May 13, 2015, in the Board Room of the Pulaski County Special School District Administration Building. Chairman Jay Barth called the meeting to order at 1:04 p.m.

Present: Dr. Jay Barth, Chair; Diane Zook; and Kim Davis

Additional State Board Members present: Vicki Saviers

Absent: Sam Ledbetter

Reports

Chair's Report

Dr. Barth had no report.

Consent Agenda

Mr. Davis moved, seconded by Ms. Zook, to approve the consent agenda. The motion carried unanimously.

Items included in the Consent Agenda:

- Minutes - April 8, 2015

Action Agenda

Public Comment

The Special Committee heard public comments from the communities.

Little Rock

Little Rock School District Superintendent Baker Kurrus said the district needed to build a large circle of community to run the district efficiently. He said the community of interest was needed to win.

Mayor Mark Stodola said Ward 5 students attend PCSDD. He recommended

that area should be included in LRSD. He recommended that everything south of the river should be one district.

Vice Mayor Lance Hines said Ward 5 needed representation on the local school board. He recommended that everything south of the river should be one district. He recommended a new middle school and high school in west Little Rock. He said people would want to come to Little Rock if the schools are fixed.

North Little Rock

Mr. Danny Bradley, chief of staff for Mayor Joe Smith, said great cities make a great state. He said North Little Rock has a world-class school district. He recommended extending the boundaries of NLRSD to the NLR city limits. He said this would improve the economy and bring jobs to NLR. He said he does not object to extending the school district beyond the city limits.

Ms. Michelle Conner said her family moved to NLR and her children attend NLRSD. However, she said the boundary map shows two houses on her street are indicated as PCSSD. Although her children attend NLRSD, she said she could not vote in the school district or pay taxes to the district. Also, she will be unable to run for the school board. She said it would make more sense for zip codes and city limits to match the school district boundary.

Representative Eddie Armstrong said expedited recommendations would be helpful to these communities.

Scott Community

Mr. Martin Gibson said in reference to a question from last month, that he included a map of the Scott School attendance zone.

Ms. Shannon Armand said the Scott Community is concerned about PCCSD building plans. Ms. Armand lives within the NLR boundary and her children attend a public charter school because of long travel times. She said community parents want school choice for their children. She requested a quick recommendation from the subcommittee.

Mr. Harry Simmons said he lives eleven miles from England School District. He requested that his children attend the England School District. He requested to have school choice.

Representative Camille Bennett requested the committee make recommendations expeditiously.

Shannon Hills Mayor Mike Kemp said the millage vote was a vote of no confidence in the Pulaski County Special School District (PCSSD). He said it is

time for a new beginning. He said Shannon Hills students should not be bused to PCSSD. He said approximately twelve students live in Saline County but attend PCSSD.

Maumelle

Ms. Mary Peyton said she is a resident of Maumelle. She said in 1994 the city task force was tasked with bringing quality education to Maumelle. She said the Maumelle charter was approved in 2000. She said the students at Academics Plus are still attending school in portable buildings and a former strip mall. She said excellent teachers, an excellent board, and a strong superintendent is the key to success.

Alderman Preston Lewis said Maumelle is requesting to have its own district. He recommended Maumelle and Sherwood have the legal pathway to move forward with detachment. He also requested that Shannon Hills students be permitted to go to the Bryant School District. He also recommended choice for the Scott Community. He said the proposed Maumelle School District would have over 30% African American students.

Sherwood

Ms. Linda George, representing the Sherwood Public Education Foundation, said the group supported the PCSSD millage and continued to work forward toward a detachment for Sherwood.

Ms. Ruth Bell, League of Women Voters for Pulaski County, said her constituents recommended that districts should be financially adequate, including appropriate facilities, millage and assessed values; districts that can meet the needs of a diverse population of students; and districts that encourage community and involvement.

Consideration of Legal Guidance

Department Attorney Ms. Kendra Clay said there are two broad ways in which the State Board of Education may change the boundary lines of a school district. She said the first way is through Ark. Code Ann. § 6-13-1414. That statute allows for the State Board of Education to consider a petition from a local board of directors of any school district that seeks an adjustment or change or boundary lines between its school district and adjoining school district. She said under Ark. Code Ann. § 6-13-1414, the Board may not order any change in school district boundaries that would hamper, delay, or in any manner negatively affect the desegregation efforts of the public school districts of the State.

Ms. Clay said the other way is more indirect. Under Arkansas laws related to the standards for accreditation, fiscal distress, academic distress, and facilities

distress, the Board may consolidate, annex, or reconstitute a school district. In an order of consolidation or annexation, the Board would include a provision that establishes the boundary lines of the new school districts. She said Arkansas law states that the Board may not order any annexation or consolidation that hampers, delays, or in any manner negatively affects the desegregation efforts of a school district or school districts. She said prior to entering such an order, the Board would also be required to get an advisory opinion from the Attorney General's Office concerning the desegregation issue.

Ms. Clay said with regard to Pulaski County, the Pulaski County Special School District remains under court supervision with regard to five areas in its desegregation plan: Discipline, Facilities, Staffing, Student Achievement, and Monitoring. She said pursuant to an order issued in the early 2000s in the desegregation case, before taking any action relative to the boundaries of the Pulaski County Special School District, the Board would have to petition the presiding federal court for permission to do so. That order required a party that wanted to seek a change in the boundaries of the PCSSD to provide the court with a detailed feasibility study and specific data sufficient to allow the court to conduct an evidentiary hearing to determine whether the boundary change would substantially impact the student populations of each district and if such a change would better meet the educational needs of the students in the districts involved.

Representative Bennett asked for the Scott School to remain open until the opportunity is available to petition for a boundary change. She said England School District and Lonoke School District are willing to accept these students.

Mayor Kemp said the Bryant School District is willing to accept the students that live in Saline County.

Work Session

Consideration of Data

Mr. Davis said some changes make sense.

Ms. Zook said the committee has heard from communities of interest that will work for excellent schools. She recommended one district for the area south of the river.

Dr. Barth said south of the river makes sense as one district. He said north of the river could be four districts – North Little Rock School District (NLRSD) should match the North Little Rock city limits, Maumelle and Sherwood could potentially detach from PCSSD and the Jacksonville North Pulaski School District (JNPSD).

Ms. Zook said Shannon Hills and the Scott Community issues are immediate.

Mr. Scott Miller recommended a collaborative conversation between Maumelle and North Little Rock to prepare for the Maumelle detachment process.

NLRSD Superintendent Mr. Kelly Rodgers said the NLRSD would be willing to have these community conversations. He said the unincorporated areas needed to be decided upfront.

Maumelle Mayor Mike Watson said the Camp Robinson area should not be a barrier to agreements.

The Committee discussed the information received from the public comments. The committee recommended:

South of the River

One district south of the river in Pulaski County, with the recommendation that Saline County students go to the Bryant School District.

North of the River

Scott – Upper Steel Bend Road to NLR and the area below Lower Steel Bend Road would go to England.

JNPSD – no alteration to the boundaries.

NLRSD and PCSSD will collaborate on appropriate boundaries to move forward with detachment of Sherwood and Maumelle that would make boundaries that are reflective of the communities of interest (to the degree possible). Local leaders agreed to collaborate on a peaceful decision-making process.

The Committee recognized the constraints placed on the State Board by previous federal court judgments.

Dr. Barth will draft a report to be submitted to Ms. Coffman by May 22. The Committee will meet either May 26 or May 27 to finalize the report for submission to the State Board. The report will be submitted to Ms. Coffman by June 1 for entry in the State Board Meeting scheduled for June 11, 2015.

Adjournment

The meeting adjourned at 3:27 p.m.

Minutes recorded by Deborah Coffman.

**Minutes
State Board of Education Special Committee
for the Pulaski County Boundaries Study
Wednesday, May 27, 2015**

The State Board of Education Special Committee for the Pulaski County Boundaries Study met Wednesday, May 27, 2015, in the Board Room of the Pulaski County Special School District Administration Building. Chairman Jay Barth called the meeting to order at 10:41 a.m.

Present: Dr. Jay Barth, Chair; Sam Ledbetter; and Diane Zook

Present via phone: Kim Davis

Absent: none

Consent Agenda

Ms. Zook moved, seconded by Mr. Ledbetter, to approve the consent agenda. The motion carried unanimously.

Items included in the Consent Agenda:

- Minutes – May 13, 2015

Action Agenda

Public Comment

Dr. Barth said the committee received a resolution from the England School District and it was included on the agenda.

Pulaski County Special School District Superintendent Dr. Jerry Guess said the Pulaski County Special School District is a result of many small school districts merging into one district. He said it is difficult to determine what is fair when determining district boundaries. He said any changes to the PCSSD boundary would affect the stability of the PCSSD. He said the local districts need to operate peacefully, without litigation and turmoil, for a period of time before consideration of future boundary changes.

Consideration of Report to the State Board

Dr. Barth asked the Special Committee to review a draft report and make

revisions for submission to the State Board at the next meeting, scheduled for June 11, 2015.

Dr. Barth said the third paragraph addressed the limitations of the report. He said the next to last paragraph addressed additional recommendations that he had added.

Mr. Ledbetter said all changes to school district boundaries are complex. He said the report to the Board should emphasize that this report is information that should be considered at the appropriate time. He said diverse communities should have diverse schools. He said equitable funding of districts was a concern.

Mr. Davis said equity across districts was a concern.

Ms. Zook said she is concerned about students staying in public schools. She said she is concerned about equity and quality of education.

North Little Rock School District Superintendent Mr. Kelly Rodgers said the North Little Rock School District joined the Arch Ford Education Service Cooperative. He said the partnership has been very beneficial to the district.

Dr. Guess said co-ops are beneficial for a broader view of educational ideas.

Draft Report with Revisions:

To: State Board of Education

From: Committee on Pulaski County School District Boundaries (Jay Barth, chair; Kim Davis, Sam Ledbetter, and Diane Zook)

At its special meeting on 28 January 2015, the State Board of Education (SBE) established a committee "charged with studying the appropriate school district lines within Pulaski County, taking into account communities of interest, student demographics, facilities, and property tax base with a report due back to the State Board no later than the June 2015 regularly scheduled meeting." This represents that report.

Since January, the committee held a series of five meetings during which it examined demographic and tax data across the county, heard from the superintendents of the four school districts presently operating in the county, and heard public comments from numerous individuals and entities with ties to the communities of interest in the county. (See attached committee meeting minutes.) As a result of this work, the committee has come to understand the complexity of issues surrounding the school district lines within Pulaski County.

At the outset, it should be recognized that the State Board of Education's powers related to any alteration of the Pulaski County Special School District (PCSSD) boundaries are sharply limited at present by a series of federal court actions dating back to the 1989 federal court settlement agreement. As reiterated by rulings by the federal court in 2003 and 2014, the State Board of Education may not alter the district lines of the PCSSD until that district is declared unitary by the federal court. Indeed, under the 2014 settlement agreement/consent judgment, "[t]he State will oppose the creation of any other school districts from PCSSD's territory is declared fully unitary and is released from court supervision." That said, as the PCSSD remains in state control because of fiscal distress, the statutory requirements that "the state board shall consolidate, annex, or reconstitute any school district that fails to remove itself from the classification of a school district in fiscal distress within five (5) consecutive school years of classification of fiscal distress status" (Ark. Code Ann. § 6-20-1908) may come into conflict with these previous agreements if the PCSSD remains in fiscal distress at the end of a five-year period. This report recognizes that federal court orders take precedence over state laws.

The committee strongly believes that the healthiest school districts are those where communities of interest (identified by municipal boundaries, among other factors) are in synchronicity with school district boundaries. That said, it is crucial that any district have the necessary tax base to appropriately serve its student population. Finally, district lines cannot be used to create racially identifiable school districts.

Driven by these principles and based on our study, at the point at which the PCSSD is declared unitary, we believe that the process through which these alterations to districts lines in Pulaski County should be ~~undertaken~~ considered by the SBE:

- A) South of the Arkansas River: The division of the city of Little Rock into two different school districts has undermined the health of the LRSD across recent years. Therefore, the LRSD and the city of Little Rock's boundaries should be brought together. However, once the western portion of the city of Little Rock was brought into the LRSD, a limited tax base would exist in the remainder of the PCSSD area south of the Arkansas River. Therefore, it is our sense that a single school district south of the River (perhaps named Little Rock-South Pulaski School District) be created to create cohesion and to enhance efficiency in educational offerings.*

- B) Saline County Portions of PCSSD: Most of the students living in the municipality of Shannon Hills, in Saline County, attend the Bryant School District, but a handful of students in Shannon Hills live within the PCSSD and attend PCSSD schools. The committee was convinced that in the interest of maintaining community cohesion in Shannon Hills, it makes*

sense that that portion of Saline County, presently a part of PCSSD, be shifted to the Bryant School District. A second small portion of Saline County to the southwest (See attached map.) is also in PCSSD and, for consistency's sake, we believe that area should also be shifted to the adjoining Bryant School District.

C) North of the Arkansas River: In addition to Jacksonville, three other identifiable communities exist north of the Arkansas River in the county (North Little Rock, Sherwood, and Maumelle). Large chunks of the municipality of North Little Rock are outside of the NLRSD and the value of creating coterminous lines between the city and NLRSD is compelling. In addition, with the Jacksonville-North Pulaski District as a precedent, the cities of Sherwood and Maumelle have established a case for separate school districts including those communities and surrounding areas. When unitary status is achieved for PCSSD, reconfiguration of the boundaries could begin as outlined in Ark. Code Ann. § 6-13-1414. Additionally, provided that a potential new district meets the eligibility criteria outlined in Ark. Code Ann. § 6-13-1501 et. seq., a detachment process could begin with negotiations among North Little Rock, Maumelle, and Sherwood to ascertain the most appropriate division of the portions of PCSSD north of the Arkansas River. In this work, of course, showing full respect for Ark. Code Ann. § 6-13-1414(f) and 6-13-1504 is vital so that racially identifiable district(s) are not created through this process. As the case of Jacksonville-North Pulaski has shown the detachment process is complicated both in design and in implementation, but there is strong value in the development of four identifiable districts with cities as hubs north of the River.

D) Scott Community: The Scott community, which is not a municipality, straddles the Pulaski and Lonoke County lines. Students in the community are split into separate school districts. Thus, while similar to the Shannon Hills case, it is different because it is not fully within one county. Based on the public comments we received, we believe that a new border should be created with areas south of Upper Steel Bend Road and south of Lower Steel Bend Road moved to the England School District in Lonoke County to maintain that community of interest while also reducing travel time for students. (See attached map.)

Finally, the recently created Jacksonville-North Pulaski School District should be allowed to operate in accordance with the district lines created as a result of the detachment approved by the SBE in 2014.

In addition, particularly if more districts are created in the county, it is clear to the committee that education in Pulaski County could be made more efficient through the recreation utilization of an Education Service Cooperative to provide certain

services across the districts of the county and through other inter-district agreements on the provision of services (e.g. transportation).

The committee asks that the SBE accept this report and endorse this approach to school district lines within Pulaski County at the point, if and when the SBE's powers over district lines in Pulaski County are restored.

Ms. Zook moved, seconded by Mr. Davis, to approve the report with the underlined changes and that the report be submitted to the State Board at the June meeting as an action item. The motion carried unanimously.

The Committee agreed for Mr. Ledbetter to work on more language regarding equity.

Adjournment

The meeting adjourned at 11:32 a.m.

Minutes recorded by Deborah Coffman.

Mr. Brian Cossey, Superintendent
Guy-Perkins School District
P.O. Box 300
Guy, AR 72061

Dear Mr. Cossey:

Pursuant to Ark. Code Ann. § 6-20-1905, this letter is to provide notice that the Guy-Perkins School District has been identified by the Arkansas Department of Education (Department) as a school district in Fiscal Distress. According to Ark. Code Ann. § 6-20-1904, Guy-Perkins School District meets one (1) or more of the criteria necessary to be identified as a school district in Fiscal Distress, including:

- A declining balance determined to jeopardize the fiscal integrity of the school district.

The Department will request that the State Board of Education (SBE) classify the Guy-Perkins School District as being in Fiscal Distress at its meeting on May 14-15, 2015. The meeting will begin at 10:00 a.m. in the Auditorium of the Arch Ford Education Building, Four Capitol Mall in Little Rock, Arkansas.

Please find included in this mailing a copy of Arkansas Fiscal Assessment and Accountability Program. It provides the process by which a district may appeal the classification of Fiscal Distress to the SBE. An appeal would be heard at the same May 14-15, 2015, SBE Meeting. Additional information may be found in Arkansas Code Ann. § 6-20-1901 et seq.

Ark. Code Ann. §6-20-1907 states no school district identified in Fiscal Distress may incur any debt without prior written approval of the Department of Education. "Any debt" includes any employment contract, vendor contract, lease, loan, purchase, or any other obligation that will increase the district's financial obligations, accounts payable, or its liabilities. The district is required to obtain prior written approval from the Department, effective with its receipt of this letter. Please retain this notice in your District audit file.

RE: Appeal of Fiscal Distress Services

To: Johnny Key, Mike Hernandez, Eric Saunders and Scott McRae

From: Brian Cossey, Superintendent

Gentlemen,

On behalf of the Guy-Perkins School District, I would like to formally appeal the classification of our school being placed in 'fiscal distress'. The primary reason we have been identified is a decreasing unrestricted fund balance over the past few years. We do not believe that this will occur this year, or any year in the foreseeable future. Furthermore, we have already consumed four positions through attrition and will either RIF or consume a few more by year's end. Our school district has an enrollment today of about 395 students. Our current projection is to end the year with about \$525,000 unrestricted. Last year we ended with \$521,000. Even if we miss the 521K mark by a marginal amount, I can personally guarantee that we will not be deficit spending any time in the next few years.

The most difficult part of budgeting is the fact that counties are on a Jan1-Dec31 fiscal year while we are on a Jul1-Jun30 fiscal year. Due to the fact that the prior superintendent did not accrue July revenue from June collections back in 2010 when the memo came out, we do not have that option. The only scenario in which we will deficit spend this year will be if April and May collections are low and June collections are high, which has happened once in the past six years at Guy-Perkins.

I do not understand why the fiscal distress watch list was not an option. Is a carry-over of a half-million dollars not substantial for a school district of less than 400 kids? My suggestion would be to place us on the watch list. Then, you could monitor year's end, scrutinize our budget and subsequent spending for several months, and then see where we are. If any of you have any questions for me, my cell is 501-472-3246.

For the kids,

Brian Cossey

State Board
of Education

Sam Ledbetter
Little Rock
Chair

Mr. Brian Cossey, Superintendent
Guy-Perkins School District
P.O. Box 300
Guy, AR 72061

Toyce Newton
Crossett
Vice Chair

Dear Mr. Cossey:

Dr. Jay Barth
Little Rock

Pursuant to Ark. Code Ann. §6-20-1905 on March 10, 2015, the Arkansas Department of Education (Department) provided notice via certified mail that the Guy-Perkins School District had been identified as a school in fiscal distress. The Department determined that the Guy-Perkins School District had a declining balance determined to jeopardize the fiscal integrity of the school district pursuant to Ark. Code Ann. § 6-20-1904. The return receipt indicates the district received this notification on March 12, 2015.

Joe Black
Newport

Pursuant to Ark. Code Ann. §6-20-1905 (b) "Any school district identified in fiscal distress status may appeal to the State Board of Education by filing a written appeal with the office of the Commissioner of Education by certified mail, return receipt requested, within thirty (30) days of receipt of notice of identified fiscal distress status from the department."

Kim Davis
Fayetteville

Alice Mahony
El Dorado

Mireya Reith
Fayetteville

Vicki Saviers
Little Rock

In accordance with the above stated law, the deadline for Guy-Perkins School District to appeal the fiscal distress notice was April 11, 2015. On April 15, 2015, the Department received notice that the Guy-Perkins School District would appeal the fiscal distress classification. The notice was dated April 13, 2015, which was not within the 30 days allowed by law to file an appeal. Therefore, the Guy-Perkins School District did not comply with the provisions Ark. Code Ann. §6-20-1905(b).

Diane Zook
Melbourne

The State Board of Education will consider whether to classify the Guy-Perkins School District as a school district in fiscal distress during its meeting scheduled for **May 14, 2015 at 10:00 a.m.** The State Board meeting will take place at the Pulaski County Special School District Administration Building, which is located at **925 East Dixon Road, Little Rock, Arkansas**. The State Board of Education will consider this matter pursuant to the authority of Ark. Code Ann. §§ 6-20-1905-1906 and the Arkansas Department of Education Rules Governing the Arkansas Fiscal Assessment and Accountability Program. Representatives from the Guy-Perkins School District should attend the State Board of Education meeting and be prepared to answer questions posed by the State Board. Thank you for your attention to this matter.

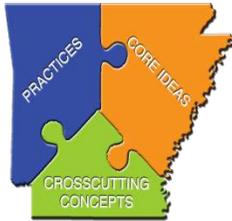

Sincerely,

Four Capitol Mall

ENGINEERING, TECHNOLOGY, and APPLICATIONS of SCIENCE 3-4. Engineering Design				

Science K-4

The *Arkansas K-12 Science Standards* for Grades K-4 is a curriculum framework of grade level student performance expectations based on the core ideas of the physical sciences (PS), life sciences (LS), earth and space sciences (ESS), and engineering (ETS) from *A Framework for K-12 Science Education* (NRC 2012). The performance expectations build logically from Grades K-4 to Grades 5-8. The performance expectations clarify what students need to know and be able to do at the end of each grade. Student performance expectations consist of three dimensions: science and engineering practices, disciplinary core ideas, and crosscutting concepts. Engineering performance expectations are meant to be integrated into science instruction to support the learning of science phenomena at all levels from Kindergarten to Grade 12.

As part of teaching the Arkansas K-12 Science Standards, it will be important to instruct and guide students in adopting appropriate safety precautions for their student-directed science investigations. Reducing risk and preventing accidents in science classrooms begin with planning. There are four recommended steps in carrying out a hazard and risk assessment for any planned lab investigation.

- 1) Identify all hazards. Hazards may be physical, chemical, health, or environmental.
- 2) Evaluate the type of risk associated with each hazard.
- 3) Write the procedure and all necessary safety precautions in such a way as to eliminate or reduce the risk associated with each hazard.
- 4) Prepare for any emergency that might arise in spite of all of the required safety precautions.

According to Arkansas Code Annotated § 6-10-113 (2012) for eye protection, every student and teacher in public schools participating in any chemical or combined chemical-physical laboratories involving caustic or explosive chemicals or hot liquids or solids is required to wear industrial-quality eye protective devices (eye goggles) at all times while participating in science investigations.

Notes:

1. Student Performance Expectations (PEs) may be taught in any sequence or grouping within a grade level.
2. An asterisk (*) indicates an engineering connection to a practice, core idea, or crosscutting concept.
3. The Clarification Statements are examples and additional guidance for the instructor. **AR** indicates Arkansas-specific Clarification Statements.
4. The Assessment Boundaries delineate content that may be taught but not assessed in large-scale assessments. **AR** indicates Arkansas-specific Assessment Boundaries.
5. The examples given (e.g.,) are suggestions for the instructor.
6. Throughout this document, connections are provided to the nature of science as defined by *A Framework for K-12 Science Education* (NRC 2012).
7. Throughout this document, connections are provided to Engineering, Technology, and Applications of Science as defined by *A Framework for K-12 Science Education* (NRC 2012).
8. Each set of PEs lists connections to other disciplinary core ideas (DCIs) within the Arkansas K-12 Science Standards and to the Common Core State Standards (CCSS) in English Language Arts (ELA)/Literacy and Mathematics.

How to Read Arkansas K-12 Science Standards

An asterisk indicates an engineering connection to a practice or disciplinary core idea.

GRADE TWO

Assessable Component

Interdependent Relationships in Ecosystems	
Students who demonstrate understanding can:	
2-LS2-1 Plan and conduct an investigation that provides evidence to answer a question about what plants need to grow. [Assessment Boundary: Assessment does not include specific animal and plant names in specific habitats.]	one if plants need sunlight and water to grow. [Assessment Boundary: Assessment does not include specific animal and plant names in specific habitats.]
2-LS2-2 Develop a simple model to represent an animal in dispersing seeds or pollinating plants. [Assessment Boundary: Assessment does not include specific animal and plant names in specific habitats.]	tion of an animal in dispersing seeds or pollinating plants. [Assessment Boundary: Assessment does not include specific animal and plant names in specific habitats.]
2-LS4-1 Make observations to provide evidence about patterns in the distribution of life in different habitats. [Assessment Boundary: Assessment does not include specific animal and plant names in specific habitats.]	compare the diversity of life in different habitats. [Assessment Boundary: Assessment does not include specific animal and plant names in specific habitats.]
The performance expectations above were developed using the following elements from the NRC document <i>A Framework for K-12 Science Education</i> :	

Performance Expectations (PEs)

Forces and Interactions: Pushes and Pulls

Students who demonstrate understanding can:

- K-PS2-1** Plan and conduct an investigation to compare the effects of different strengths or different directions of pushes and pulls on the motion of an object. [Clarification Statement: Examples of pushes or pulls could include a string attached to an object being pulled, a person pushing an object, a person stopping a rolling ball, and two objects colliding and pushing on each other.] [Assessment Boundary: Assessment is limited to different relative strengths or different directions, but not both at the same time. Assessment does not include non-contact pushes or pulls such as those produced by magnets.]
- K-PS2-2** Analyze data to determine if a design solution works as intended to change the speed or direction of an object with a push or a pull.* [Clarification Statement: Examples of problems requiring a solution could include having a marble or other object move a certain distance, follow a particular path, and knock down other objects. Examples of solutions could include tools such as a ramp to increase the speed of the object and a structure that would cause an object such as a marble or ball to turn.] [Assessment Boundary: Assessment does not include friction as a mechanism for change in speed.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts

(K-ESS3-2)

Obtaining, Evaluating, and Communicating Information

Obtaining, evaluating, and communicating information in K–2 builds on prior experiences and uses observations and texts to communicate new information.

- Read grade-appropriate texts and/or use media to obtain scientific information to describe patterns in the natural world. (K-ESS3-2)

Connections to Nature of Science

Scientific Investigations Use a Variety of Methods

- Scientists use different ways to study the world. (K-PS3-1)

Science Knowledge is Based on Empirical Evidence

- Scientists look for patterns and order when making observations about the world. (K-ESS2-1)

Connections to other DCIs in Kindergarten: **K-2.ETS1.A** (K-PS3-2, K-ESS3-2); **K-2.ETS1.B** (K-PS3-2)

Connections to other DCIs across grade levels: **1.PS4.B** (K-PS3-1, K-PS3-2); **2.ESS1.C** (K-ESS3-2); **2.ESS2.A** (K-ESS2-1); **K-2.ETS1.B** (K-PS3-2); **3.ESS2.D** (K-PS3-1, K-ESS2-1); **3.ESS3.B** (K-ESS3-2); **4.ESS2.A** (K-ESS2-1); **4.ESS3.B** (K-ESS3-2); **4.ESS2.E** (K-ESS2-2); **3-5.ETS1.A** (K-PS3-2)

Common Core State Standards Connections:

ELA/Literacy –

- RI.K.1** With prompting and support, ask and answer questions about key details in a text. (K-ESS3-2)
- W.K.7** Participate in shared research and writing projects (e.g., explore a number of books by a favorite author and express opinions about them). (K-PS3-1, K-PS3-2, K-ESS2-1)
- SL.K.3** Ask and answer questions in order to seek help, get information, or clarify something that is not understood. (K-ESS3-2)

Mathematics –

- MP.2** Reason abstractly and quantitatively. (K-ESS2-1)
- MP.4** Model with mathematics. (K-ESS2-1) (K-ESS3-2)
- K.CC** Counting and Cardinality (K-ESS3-2)
- K.CC.A** Know number names and the count sequence. (K-ESS2-1)
- K.MD.A.1** Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object. (K-ESS2-1)
- K.MD.A.2** Directly compare two objects with a measurable attribute in common, to see which object has “more of” / “less of” the attribute, and describe the difference. (K-PS3-1, K-PS3-2)
- K.MD.B.3** Classify objects into given categories; count the number of objects in each category and sort the categories by count. (K-ESS2-1)

KINDERGARTEN

Interdependent Relationships in Ecosystems: Animals, Plants, and Their Environment

Students who demonstrate understanding can:

- K-LS1-1 Use observations to describe patterns of what plants and animals (including humans) need to survive.**
[Clarification Statement: Examples of patterns could include that animals need to take in food but plants do not; the different kinds of food needed by different types of animals; the requirement of plants to have light; and that all living things need water.]
- K-ESS2-1 Construct an argument supported by evidence for how plants and animals (including humans) can change the environment to meet their needs.** [Clarification Statement: Examples of plants and animals changing their environment could include squirrels digging in the ground to hide food and tree roots breaking concrete.]
- K-ESS3-1 Use a model to represent the relationship between the needs of different plants or animals (including humans) and the places they live.** [Clarification Statement: Examples of relationships could include that deer eat buds and leaves, therefore, they usually live in forested areas; and grasses need sunlight so they often grow in meadows. Plants, animals, and their surroundings make up a system.]
- K-ESS3-3 Communicate solutions that will reduce the impact of humans on the land, water, air, and/or other living things in the local environment.*** [Clarification Statement: Examples of human impact on the land could include cutting trees to produce paper and using resources to produce bottles. Examples of solutions could include reusing paper and recycling cans and bottles.]

Common Core State Standards Connections:

ELA/Literacy –

- RI.2.1** Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text. (K-ETS1-1)
- W.2.6** With guidance and support from adults, use a variety of digital tools to produce and publish writing, including in collaboration with peers. (K-ETS1-1, K-ETS1-3)
- W.2.8** Recall information from experiences or gather information from provided sources to answer a question. (K-ETS1-1, K-ETS1-3)
- SL.2.5** Create audio recordings of stories or poems; add drawings or other visual displays to stories or recounts of experiences when appropriate to clarify ideas, thoughts, and feelings. (K-ETS1-2)

Mathematics –

- MP.2** Reason abstractly and quantitatively. (K-ETS1-1, K-ETS1-3)
- MP.4** Model with mathematics. (K-ETS1-1, K-ETS1-3)
- MP.5** Use appropriate tools strategically. (K-ETS1-1, K-ETS1-3)
- 2.MD.D.10** Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph. (K-ETS1-1, K-ETS1-3)

GRADE ONE

Waves: Light and Sound	
Students who demonstrate understanding can:	
1-PS4-1	Plan and conduct investigations to provide evidence that vibrating materials can make sound and that sound can make materials vibrate. [Clarification Statement: Examples of vibrating materials that make sound could include striking a tuning fork and plucking a stretched string. Examples of how sound can make matter vibrate could include holding a piece of paper near a speaker making sound and holding an object near a vibrating tuning fork.]
1-PS4-2	Make observations to construct an evidence-based account that objects can be seen only when illuminated. [Clarification Statement: Examples of observations could include those made in a completely dark room, a pinhole box, and a video of a cave explorer with a flashlight. Illumination could be from an external light source or by an object giving off its own light.]
1-PS4-3	Plan and conduct an investigation to determine the effect of placing objects made with different materials in the path of a beam of light. [Clarification Statement: Examples of materials could include those that are transparent (such as clear plastic), translucent (such as wax paper), opaque (such as cardboard), or reflective (such as a mirror).] [Assessment Boundary: Assessment does not include the speed of light.]
1-PS4-4	Use tools and materials to design and build a device that uses light or sound to solve the problem of communicating over a distance.* [Clarification Statement: Examples of devices could include a light source to send signals, paper cup and string “telephones”, and a pattern of drum beats.] [Assessment Boundary: Assessment does not include technological details for how communication devices work.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Planning and Carrying Out Investigations Planning and carrying out investigations to answer questions or test solutions to problems in K–2 builds on prior experiences and progresses to simple investigations, based on fair tests, which provide data to support explanations or design solutions.</p> <ul style="list-style-type: none"> Plan and conduct investigations collaboratively to produce data to serve as the basis for evidence to answer a question. (1-PS4-1, 1-PS4-3) <p>Constructing Explanations and Designing Solutions Constructing explanations and designing solutions in K–2 builds on prior experiences and progresses to the use of evidence and ideas in constructing evidence-based accounts of natural phenomena and designing solutions.</p> <ul style="list-style-type: none"> Make observations (firsthand or from media) to construct an evidence-based account for natural phenomena (1-PS4-2) Use tools and materials provided to design a device that solves a specific problem. (1-PS4-4)</p>		

DRAFT

GRADE ONE

Structure, Function, and Information Processing	
Students who demonstrate understanding can:	
1-LS1-1	Use materials to design a solution to a human problem by mimicking how plants and/or animals use their external parts to help them survive, grow, and meet their needs.* [Clarification Statement: Examples of human problems that can be solved by mimicking plant or animal solutions could include designing clothing or equipment to protect bicyclists by mimicking turtle shells, acorn shells, and animal scales; stabilizing structures by mimicking animal tails and roots on plants; keeping out intruders by mimicking thorns on branches and animal quills; and detecting intruders by mimicking eyes or ears.]
1-LS1-2	Read texts and use media to determine patterns in behavior of parents and offspring that help offspring survive. [Clarification Statement: Examples of patterns of behaviors could include the signals that offspring make (such as crying, cheeping, and other vocalizations) or the responses of the parents (such as feeding, comforting, and protecting the offspring).]
1-LS3-1	Make observations to construct an evidence-based account that young plants and animals are like, but not exactly like, their parents. [Clarification Statement: Examples of patterns could include features plants or animals share. Examples of observations could include leaves from the same kind of plant are the same shape but can differ in size; and, a particular breed of dog looks like its parents but is not exactly the same.] [Assessment Boundary: Assessment does not include inheritance, animals that undergo metamorphosis or hybrids.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

(1-LS1-1, 1-LS3-1)</p> <p>W.1.8 With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question. (1-LS3-1)</p> <p><i>Mathematics –</i></p> <p>MP.2 Reason abstractly and quantitatively. (1-LS3-1)</p> <p>MP.5 Use appropriate tools strategically. (1-LS3-1)</p> <p>1.NBT.B.3 Compare two two-digit numbers based on the meanings of the tens and one digits, recording the results of comparisons with the symbols $>$, $=$, and $<$. (1-LS1-2)</p> <p>1.NBT.C.4 Add within 100, including adding a two-digit number and a one-digit number, and adding a two-digit number and a multiple of 10, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning uses. Understand that in adding two-digit numbers, one adds tens and tens, ones and ones; and sometimes it is necessary to compose a ten. (1-LS1-2)</p> <p>1.NBT.C.5 Given a two-digit number, mentally find 10 more or 10 less than the number, without having to count; explain the reasoning used. (1-LS1-2)</p> <p>1.NBT.C.6 Subtract multiples of 10 in the range 10-90 from multiples of 10 in the range 10-90 (positive or zero differences), using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used. (1-LS1-2)</p> <p>1.MD.A.1 Order three objects by length; compare the lengths of two objects indirectly by using a third object. (1-LS3-1)</p>		

GRADE ONE

Space Systems: Patterns and Cycles

Students who demonstrate understanding can:

- 1-ESS1-1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.** [Clarification Statement: Examples of patterns could include that the sun and moon appear to rise in one part of the sky, move across the sky, and set; and stars, other than our sun, are visible at night but not during the day.] [Assessment Boundary: Assessment of star patterns is limited to stars being seen at night and not during the day.]
- 1-ESS1-2 Make observations at different times of year to relate the amount of daylight to the time of year.** [Clarification Statement: Emphasis is on relative comparisons of the amount of daylight in the winter to the amount in the spring or fall.] [Assessment Boundary: Assessment is limited to relative amounts of daylight, not quantifying the hours or time of daylight.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Planning and Carrying Out Investigations Planning and carrying out investigations to answer questions or test solutions to problems in K–2 builds on prior experiences and progresses to simple investigations, based on fair tests, which provide data to support explanations or design solutions.</p> <ul style="list-style-type: none"> Make observations (firsthand or from media) to collect data that can be used to make comparisons. - MP.5** Use appropriate tools strategically. (1-ESS1-2)
- 1.OA.A.1** Use addition and subtraction within 20 to solve word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using objects, drawings, and equations to represent the problem. (1-ESS1-2)
- 1.MD.C.4** Organize, represent, and interpret data with up to three categories; ask and answer questions about the total number of data points, how many in each category, and how many more or less are in one category than in another. (1-ESS1-2)

GRADE ONE

Engineering, Technology, and Applications of Science	
Students who demonstrate understanding can:	
1-ETS1-1	Ask questions, make observations, and gather information about a situation people want to change to define a simple problem that can be solved through the development of a new or improved object or tool.
1-ETS1-2	Develop a simple sketch, drawing, or physical model to illustrate how the shape of an object helps it function as needed to solve a given problem.
1-ETS1-3	Analyze data from tests of two objects designed to solve the same problem to compare the strengths and weaknesses of how each performs.

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Asking Questions and Defining Problems Asking questions and defining problems in K–2 builds on prior experiences and progresses to simple descriptive questions.</p> <ul style="list-style-type: none"> Ask questions based on observations to find more information about the natural and/or designed world. (1-ETS1-1) Define a simple problem that can be solved through the development of a new or improved object or tool. (1-ETS1-1) <p>Developing and Using Models Modeling in K–2 builds on prior experiences and progresses to include using and developing models (i.e., diagram, drawing, physical replica, diorama, dramatization, or storyboard) that represent concrete events or design solutions.</p> <ul style="list-style-type: none"> Develop a simple model based on evidence to represent a proposed object or tool. Common Core State Standards Connections:

ELA/Literacy –

- RI.2.1** Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text. (1-ETS1-1)
- W.2.6** With guidance and support from adults, use a variety of digital tools to produce and publish writing, including in collaboration with peers. (1-ETS1-1, 1-ETS1-3)
- W.2.8** Recall information from experiences or gather information from provided sources to answer a question. (1-ETS1-1,1-ETS1-3)
- SL.2.5** Create audio recordings of stories or poems; add drawings or other visual displays to stories or recounts of experiences when appropriate to clarify ideas, thoughts, and feelings. (1-ETS1-2)

Mathematics –

- MP.2** Reason abstractly and quantitatively. (1-ETS1-1, 1-ETS1-3)
- MP.4** Model with mathematics. (1-ETS1-1, 1-ETS1-3)
- MP.5** Use appropriate tools strategically. (1-ETS1-1, 1-ETS1-3)
- 2.MD.D.10** Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph. (1-ETS1-1, 1-ETS1-3)

GRADE TWO

Structure and Properties of Matter

Students who demonstrate understanding can:

- 2-PS1-1** Plan and conduct an investigation to describe and classify different kinds of materials by their observable properties. [Clarification Statement: Observations could include color, texture, hardness, and flexibility. Patterns could include the similar properties that different materials share.]
- 2-PS1-2** Analyze data obtained from testing different materials to determine which materials have the properties that are best suited for an intended purpose.* [Clarification Statement: Examples of properties could include, strength, flexibility, hardness, texture, and absorbency.] [Assessment Boundary: Assessment of quantitative measurements is limited to length.]
- 2-PS1-3** Make observations to construct an evidence-based account of how an object made of a small set of pieces can be disassembled and made into a new object. [Clarification Statement: Examples of pieces could include blocks, building bricks, or other assorted small objects.]
- 2-PS1-4** Construct an argument with evidence that some changes caused by heating or cooling can be reversed and some cannot. [Clarification Statement: Examples of reversible changes could include materials such as water or butter at different temperatures. Examples of irreversible changes could include cooking an egg, freezing a plant leaf, and heating paper.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Planning and Carrying Out Investigations Planning and carrying out investigations to answer questions or test solutions to problems in K–2 builds on prior experiences and progresses to simple investigations, based on fair tests, which provide data to support explanations or design solutions.</p> <ul style="list-style-type: none"> ▪ Plan and conduct an investigation collaboratively to produce data to serve as the basis for evidence to answer a question. - 2.NBT.A.3** Read and write numbers to 1000 using base-ten numerals, number names, and expanded form. (2-ESS2-2)
- 2.MD.B.5** Use addition and subtraction within 100 to solve word problems involving lengths that are given in the same units, e.g., by using drawings (such as drawings of rulers) and equations with a symbol for the unknown number to represent the problem. (2-ESS2-1)

GRADE TWO

Engineering, Technology, and Applications of Science		
<p>Students who demonstrate understanding can:</p> <p>2-ETS1-1 Ask questions, make observations, and gather information about a situation people want to change to define a simple problem that can be solved through the development of a new or improved object or tool.</p> <p>2-ETS1-2 Develop a simple sketch, drawing, or physical model to illustrate how the shape of an object helps it function as needed to solve a given problem.</p> <p>2-ETS1-3 Analyze data from tests of two objects designed to solve the same problem to compare the strengths and weaknesses of how each performs.</p>		
<p>The performance expectations above were developed using the following elements from the NRC document <i>A Framework for K-12 Science Education</i>:</p>		
Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Asking Questions and Defining Problems Asking questions and defining problems in K–2 builds on prior experiences and progresses to simple descriptive questions.</p> <ul style="list-style-type: none"> Ask questions based on observations to find more information about the natural and/or designed world. (2-ETS1-1) Define a simple problem that can be solved through the development of a new or improved object or tool. (2-ETS1-1) <p>Developing and Using Models Modeling in K–2 builds on prior experiences and progresses to include using and developing models (i.e., diagram, drawing, physical replica, diorama, dramatization, or storyboard) that represent concrete events or design solutions.</p> <ul style="list-style-type: none"> Develop a simple model based on evidence to represent a proposed object or tool. (2-ETS1-2) <p>Analyzing and Interpreting Data Analyzing data in K–2 builds on prior experiences and progresses to collecting, recording, and sharing observations.</p> <ul style="list-style-type: none"> Analyze data from tests of an object or tool to determine if it works as intended. (2-ETS1-3) 	<p>ETS1.A: Defining and Delimiting Engineering Problems</p> <ul style="list-style-type: none"> A situation that people want to change or create can be approached as a problem to be solved through engineering. (2-ETS1-1) Asking questions, making observations, and gathering information are helpful in thinking about problems. (2-ETS1-1) Before beginning to design a solution, it is important to clearly understand the problem. (2-ETS1-1) <p>ETS1.B: Developing Possible Solutions</p> <ul style="list-style-type: none"> Designs can be conveyed through sketches, drawings, or physical models. These representations are useful in communicating ideas for a problem’s solutions to other people. (2-ETS1-2) <p>ETS1.C: Optimizing the Design Solution</p> <ul style="list-style-type: none"> Because there is always more than one possible solution to a problem, it is useful to compare and test designs. (2-ETS1-3) 	<p>Structure and Function</p> <ul style="list-style-type: none"> The shape and stability of structures of natural and designed objects are related to their function(s). (2-ETS1-2)
<p><i>Connections to K-2-ETS1.A: Defining and Delimiting Engineering Problems include: Kindergarten: (K-PS2-2, K-ESS3-2)</i></p> <p><i>Connections to K-2-ETS1.B: Developing Possible Solutions to Problems include: Kindergarten: (K-ESS3-3);</i></p> <p>First Grade: (1-PS4-4); Second Grade: (2-LS2-2)</p> <p><i>Connections to K-2-ETS1.C: Optimizing the Design Solution include: Second Grade: (2-ESS2-1)</i></p>		
<p><i>Connections to other DCIs across grade levels: 3-5.ETS1.A (2-ETS1-1, 2-ETS1-2, 2-ETS1-3); 3-5.ETS1.B (2-ETS1-2, 2-ETS1-3); 3-5.ETS1.C (2-ETS1-1, 2-ETS1-2, 2-ETS1-3)</i></p>		

Common Core State Standards Connections:

ELA/Literacy –

- RI.2.1** Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text. (2-ETS1-1)
- W.2.6** With guidance and support from adults, use a variety of digital tools to produce and publish writing, including in collaboration with peers. (2-ETS1-1, 2-ETS1-3)
- W.2.8** Recall information from experiences or gather information from provided sources to answer a question. (2-ETS1-1, 2-ETS1-3)
- SL.2.5** Create audio recordings of stories or poems; add drawings or other visual displays to stories or recounts of experiences when appropriate to clarify ideas, thoughts, and feelings. (2-ETS1-2)

Mathematics –

- MP.2** Reason abstractly and quantitatively. (2-ETS1-1, 2-ETS1-3)
- MP.4** Model with mathematics. (2-ETS1-1, 2-ETS1-3)
- MP.5** Use appropriate tools strategically. (2-ETS1-1, 2-ETS1-3)
- 2.MD.D.10** Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph. (2-ETS1-1, 2-ETS1-3)

GRADE THREE

Forces and Interactions

Students who demonstrate understanding can:

- 3-PS2-1 Plan and conduct an investigation to provide evidence of the effects of balanced and unbalanced forces on the motion of an object.** [AR Clarification Statement: Examples could include an unbalanced force on one side of a box can make it start moving or balanced forces pushing on a box from both sides will not produce any motion at all.] [Assessment Boundary: Assessment is limited to one variable at a time: number, size, or direction of forces. Assessment does not include quantitative force size, only qualitative and relative. Assessment is limited to gravity being addressed as a force that pulls objects down.]
- 3-PS2-2 Make observations and/or measurements of an object’s motion to provide evidence that a pattern can be used to predict future motion.** [Clarification Statement: Examples of motion with a predictable pattern could include a child swinging in a swing, a ball rolling back and forth in a bowl, and two children on a see-saw.] [Assessment Boundary: Assessment does not include technical terms such as period and frequency.]
- 3-PS2-3 Ask questions to determine cause and effect relationships of electric or magnetic interactions between two objects not in contact with each other.** [Clarification Statement: Examples of an electric force could include the force on hair from an electrically charged balloon or the electrical forces between a charged rod and pieces of paper; examples of a magnetic force could include the force between two permanent magnets, the force between an electromagnet and steel paperclips, and the force exerted by one magnet versus the force exerted by two magnets. Examples of cause and effect relationships could include how the distance between objects affects strength of the force or how the orientation of magnets affects the direction of the magnetic force.] [Assessment Boundary: Assessment is limited to forces produced by objects that can be manipulated by students, and electrical interactions are limited to static electricity.]
- 3-PS2-4 Define a simple design problem that can be solved by applying scientific ideas about magnets.*** [Clarification Statement: Examples of problems could include constructing a latch to keep a door shut and creating a device to keep two moving objects from touching each other.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Asking Questions and Defining Problems Asking questions and defining problems in grades 3–5 builds on grades K–2 experiences and progresses to specifying qualitative relationships.</p> <ul style="list-style-type: none"> Ask questions that can be investigated based on patterns such as cause and effect relationships. (3-PS2-3) Define a simple problem that can be solved through the development of a new or improved object or tool. (3-PS2-4) <p>Planning and Carrying Out Investigations Planning and carrying out investigations to answer questions or test solutions to problems in 3–5 builds on K–2 experiences and progresses to include investigations that control variables and provide evidence to support explanations or design solutions.</p> <ul style="list-style-type: none"> Plan and conduct an investigation collaboratively to produce data to serve as the basis for evidence, using fair tests in which variables are controlled and the number of trials considered. (3-PS2-1) Make observations and/or measurements to produce data to serve as the basis for evidence for an explanation of a phenomenon or test a design solution. (3-PS2-2) 	<p>PS2.A: Forces and Motion</p> <ul style="list-style-type: none"> Each force acts on one particular object and has both strength and a direction. An object at rest typically has multiple forces acting on it, but they add to give zero net force on the object. Forces that do not sum to zero can cause changes in the object’s speed or direction of motion. (Boundary: Qualitative and conceptual, but not quantitative addition of forces are used at this level.) (3-PS2-1) The patterns of an object’s motion in various situations can be observed and measured; when that past motion exhibits a regular pattern, future motion can be predicted from it. (Boundary: Technical terms, such as magnitude, velocity, momentum, and vector quantity, are not introduced at this level, but the concept that some quantities need both size and direction to be described is developed.) (3-PS2-2) 	<p>Patterns</p> <ul style="list-style-type: none"> Patterns of change can be used to make predictions. (3-PS2-2) <p>Cause and Effect</p> <ul style="list-style-type: none"> Cause and effect relationships are routinely identified. (3-PS2-1) Cause and effect relationships are routinely identified, tested, and used to explain change. (3-PS2-3)

<p style="text-align: center;">Connections to Nature of Science</p> <p>Science Knowledge is Based on Empirical Evidence</p> <ul style="list-style-type: none"> Science findings are based on recognizing patterns. (3-PS2-2) <p>Scientific Investigations Use a Variety of Methods</p> <ul style="list-style-type: none"> Science investigations use a variety of methods, tools, and techniques. (3-PS2-1) 	<p>PS2.B: Types of Interactions</p> <ul style="list-style-type: none"> Objects in contact exert forces on each other. (3-PS2-1) Electric and magnetic forces between a pair of objects do not require that the objects be in contact. The sizes of the forces in each situation depend on the properties of the objects and their distances apart and, for forces between two magnets, on their orientation relative to each other. (3-PS2-3, 3-PS2-4) 	<p style="text-align: center;">Connections to Engineering, Technology, and Applications of Science</p> <p>Interdependence of Science, Engineering, and Technology</p> <ul style="list-style-type: none"> Scientific discoveries about the natural world can often lead to new and improved technologies, which are developed through the engineering design process. (3-PS2-4)

<p><i>Common Core State Standards Connections:</i></p> <p><i>ELA/Literacy –</i></p> <p>RI.3.1 Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers. (3-PS2-1, 3-PS2-3)</p> <p>RI.3.3 Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect. (3-PS2-3)</p> <p>RI.3.8 Describe the logical connection between particular sentences and paragraphs in a text (e.g., comparison, cause/effect, first/second/third in a sequence). (3-PS2-3)</p> <p>W.3.7 Conduct short research projects that build knowledge about a topic. (3-PS2-1, 3-PS2-2)</p> <p>W.3.8 Recall information from experiences or gather information from print and digital sources; take brief notes on sources and sort evidence into provided categories. (3-PS2-1, 3-PS2-2)</p> <p>SL.3.3 Ask and answer questions about information from a speaker, offering appropriate elaboration and detail. (3-PS2-3)</p> <p><i>Mathematics –</i></p> <p>MP.2 Reason abstractly and quantitatively. (3-PS2-1)</p> <p>MP.5 Use appropriate tools strategically. (3-PS2-1)</p> <p>3.MD.A.2 Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (l). Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units, e.g., by using drawings (such as a beaker with a measurement scale) to represent the problem. (3-PS2-1)</p>		

GRADE THREE

Interdependent Relationships in Ecosystems

Students who demonstrate understanding can:

- 3-LS2-1 Construct an argument that some animals form groups that help members survive.** [AR Clarification Statement: Examples could include ant colonies, herds of bison, or hives of bees.]
- 3-LS4-1 Analyze and interpret data from fossils to provide evidence of the organisms and the environments in which they lived long ago.** [Clarification Statement: Examples of data could include type, size, and distributions of fossilized organisms. Examples of fossils and environments could include marine fossils found on dry land, tropical plant fossils found in Arctic areas, and fossils of extinct organisms.] [Assessment Boundary: Assessment does not include identification of specific fossils or living plants and animals. Assessment is limited to major fossil types and relative ages.]
- 3-LS4-3 Construct an argument with evidence that in a particular habitat some organisms can survive well, some survive less well, and some cannot survive at all.** [AR Clarification Statement: Examples of evidence could include needs and characteristics of the organisms and habitats involved. The organisms and their habitat make up a system in which the parts depend on each other for survival.]
- 3-LS4-4 Make a claim about the merit of a solution to a problem caused when the environment changes and the types of plants and animals that live there may change.*** [Clarification Statement: Examples of environmental changes could include changes in land characteristics, water distribution, temperature, food, and other organisms.] [Assessment Boundary: Assessment is limited to a single environmental change. Assessment does not include the greenhouse effect or climate change.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices

Analyzing and Interpreting Data

Analyzing data in 3–5 builds on K–2 experiences and progresses to introducing quantitative approaches to collecting data and conducting multiple trials of qualitative observations. When possible and feasible, digital tools should be used.

- Analyze and interpret data to make sense of phenomena using logical reasoning. (3-LS4-1)

Engaging in Argument from Evidence

Engaging in argument from evidence in 3–5 builds on K–2 experiences and progresses to critiquing the scientific explanations or solutions proposed by peers by citing relevant evidence about the natural and designed worlds.

- Construct an argument with evidence, data, and/or a model. (3-LS2-1)
- Construct an argument with evidence. (3-LS4-3)
- Make a claim about the merit of a solution to a problem by citing relevant evidence about how it meets the criteria and constraints of the problem. (3-LS4-4)

Disciplinary Core Ideas

LS2.C: Ecosystem Dynamics, Functioning, and Resilience

- When the environment changes in ways that affect a place’s physical characteristics, temperature, or availability of resources, some organisms survive and reproduce, others move to new locations, yet others move into the transformed environment, and some die. (3-LS4-4)

LS2.D: Social Interactions and Group Behavior

- Being part of a group helps animals obtain food, defend themselves, and cope with changes. Groups may serve different functions and vary dramatically in size. (3-LS2-1)

LS4.A: Evidence of Common Ancestry and Diversity

- Some kinds of plants and animals that once lived on Earth are no longer found anywhere. (3-LS4-1)
- Fossils provide evidence about the types of organisms that lived long ago and also about the nature of their environments. (3-LS4-1)

LS4.C: Adaptation

- For any particular environment, some kinds of organisms survive well, some survive less well, and some cannot survive at all. (3-LS4-3)

Crosscutting Concepts

Cause and Effect

- Cause and effect relationships are routinely identified and used to explain change. (3-LS2-1, 3-LS4-3)

Scale, Proportion, and Quantity

- Observable phenomena exist from very short to very long time periods. (3-LS4-1)

Systems and System Models

- A system can be described in terms of its components and their interactions. (3-LS4-4)

Connections to Engineering, Technology, and Applications of Science

Interdependence of Science, Engineering, and Technology

- Knowledge of relevant scientific concepts and research findings is important in engineering. (3-LS4-4)

	<p>LS4.D: Biodiversity and Humans</p> <ul style="list-style-type: none"> Populations live in a variety of habitats, and change in those habitats affects the organisms living there. (3-LS4-4) 	<p>Connections to Nature of Science</p> <p>Scientific Knowledge Assumes an Order and Consistency in Natural Systems</p> <ul style="list-style-type: none"> Science assumes consistent patterns in natural systems. (3-LS4-1)

<p><i>Connections to other DCIs across grade levels:</i> K.ESS3.A (3-LS4-3, 3-LS4-4); K-2.ETS1.A (3-LS4-4); 1.LS1.B (3-LS2-1); 2.LS2.A (3-LS4-3, 3-LS4-4); 2.LS4.D (3-LS4-3, 3-LS4-4); 4.ESS1.C (3-LS4-1); 4.ESS3.B (3-LS4-4); 3-5.ETS1.A (3-LS4-4); 6.ESS3.C (3-LS4-4); 7.LS2.A (3-LS2-1, 3-LS4-1, 3-LS4-3, 3-LS4-4); 7.LS2.C (3-LS4-4); 7.ESS2.B (3-LS4-1); 8.LS4.A (3-LS4-1); 8.LS4.B (3-LS4-3); 8.LS4.C (3-LS4-3, 3-LS4-4); 8.ESS1.C (3-LS4-1, 3-LS4-3, 3-LS4-4)</p>		
<p><i>Common Core State Standards Connections:</i></p> <p><i>ELA/Literacy –</i></p> <p>RI.3.1 Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers. (3-LS2-1, 3-LS4-1, 3-LS4-3, 3-LS4-4)</p> <p>RI.3.2 Determine the main idea of a text; recount the key details and explain how they support the main idea. (3-LS4-1, 3-LS4-3, 3-LS4-4)</p> <p>RI.3.3 Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect. (3-LS2-1, 3-LS4-1, 3-LS4-3, 3-LS4-4)</p> <p>W.3.1 Write opinion pieces on topics or texts, supporting a point of view with reasons. (3-LS2-1, 3-LS4-1, 3-LS4-3, 3-LS4-4)</p> <p>W.3.2 Write informative/explanatory texts to examine a topic and convey ideas and information clearly. (3-LS4-1, 3-LS4-3, 3-LS4-4)</p> <p>W.3.8 Recall information from experiences or gather information from print and digital sources; take brief notes on sources and sort evidence into provided categories. (3-LS4-1)</p> <p>SL.3.4 Report on a topic or text, tell a story, or recount an experience with appropriate facts and relevant, descriptive details, speaking clearly at an understandable pace. (3-LS4-3, 3-LS4-4)</p> <p><i>Mathematics –</i></p> <p>MP.2 Reason abstractly and quantitatively. (3-LS4-1, 3-LS4-3, 3-LS4-4)</p> <p>MP.4 Model with mathematics. (3-LS2-1, 3-LS4-1, 3-LS4-3, 3-LS4-4)</p> <p>MP.5 Use appropriate tools strategically. (3-LS4-1)</p> <p>3.NBT Number and Operations in Base Ten (3-LS2-1)</p> <p>3.MD.B.3 Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step “how many more” and “how many less” problems using information presented in scaled bar graphs. (3-LS4-3)</p> <p>3.MD.B.4 Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Show the data by making a line plot, where the horizontal scale is marked off in appropriate units—whole numbers, halves, or quarters. (3-LS4-1)</p>		

GRADE THREE

Inheritance and Variation of Traits: Life Cycles and Traits

Students who demonstrate understanding can:

- 3-LS1-1** **Develop models to describe that organisms have unique and diverse life cycles but all have in common birth, growth, reproduction, and death.** [Clarification Statement: Changes organisms go through during their life form a pattern.] [Assessment Boundary: Assessment of plant life cycles is limited to those of flowering plants. Assessment does not include details of human reproduction.]
- 3-LS3-1** **Analyze and interpret data to provide evidence that plants and animals have traits inherited from parents and that variation of these traits exists in a group of similar organisms.** [Clarification Statement: Patterns are the similarities and differences in traits shared between offspring and their parents, or among siblings. Emphasis is on organisms other than humans.] [Assessment Boundary: Assessment does not include genetic mechanisms of inheritance and prediction of traits. Assessment is limited to non-human examples.]
- 3-LS3-2** **Use evidence to support the explanation that traits can be influenced by the environment.** [Clarification Statement: Examples of the environment affecting a trait could include insufficient water stunting normally tall plants ; and, a pet dog becoming overweight that is given too much food and too little exercise.]
- 3-LS4-2** **Use evidence to construct an explanation for how the variations in characteristics among individuals of the same species may provide advantages in surviving, finding mates, and reproducing.** [AR Clarification Statement: Examples of cause and effect relationships could be plants of the same species with larger thorns may be less likely to be eaten by predators; and, animals of the same species with more effective camouflage or coloration may be more likely to survive and produce offspring.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Developing and Using Models Modeling in 3–5 builds on K–2 experiences and progresses to building and revising simple models and using models to represent events and design solutions.</p> <ul style="list-style-type: none"> ▪ Develop models to describe phenomena. Connections to other DCIs across grade levels: **K.ESS2.D** (3-ESS2-1); **K.ESS3.B** (3-ESS3-1); **K-2.ETS1.A** (3-ESS3-1); **4.ESS2.A** (3-ESS2-1); **4.ESS3.B** (3-ESS3-1); **3-5.ETS1.A** (3-ESS3-1); **5.ESS2.A** (3-ESS2-1); **6.ESS2.D** (3-ESS2-1, 3-ESS2-2); **7.ESS2.C** (3-ESS2-1, 3-ESS2-2); **7.ESS3.B** (3-ESS3-1)

Common Core State Standards Connections:

ELA/Literacy –

- RI.3.1** Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers. (3-ESS2-2)
- RI.3.9** Compare and contrast the most important points and key details presented in two texts on the same topic. (3-ESS2-2)
- W.3.1** Write opinion pieces on topics or texts, supporting a point of view with reasons. (3-ESS3-1)
- W.3.7** Conduct short research projects that build knowledge about a topic. (3-ESS3-1)
- W.3.8** Recall information from experiences or gather information from print and digital sources; take brief notes on sources and sort evidence into provided categories. (3-ESS2-2)

Mathematics –

- MP.2** Reason abstractly and quantitatively. (3-ESS2-1, 3-ESS2-2, 3-ESS3-1)
- MP.4** Model with mathematics. (3-ESS2-1, 3-ESS2-2, 3-ESS3-1)
- MP.5** Use appropriate tools strategically. (3-ESS2-1)
- 3.MD.A.2** Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (l). Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units, e.g., by using drawings (such as a beaker with a measurement scale) to represent the problem. (3-ESS2-1)
- 3.MD.B.3** Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step “how many more” and “how many less” problems using information presented in bar graphs. (3-ESS2-1)

GRADE THREE

Engineering, Technology, and Applications of Science

Students who demonstrate understanding can:

- 3-ETS1-1** Define a simple design problem reflecting a need or a want that includes specified criteria for success and constraints on materials, time, or cost.
- 3-ETS1-2** Generate and compare multiple possible solutions to a problem based on how well each is likely to meet the criteria and constraints of the problem.
- 3-ETS1-3** Plan and carry out fair tests in which variables are controlled and failure points are considered to identify aspects of a model or prototype that can be improved.

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Asking Questions and Defining Problems</p> <p>Asking questions and defining problems in 3–5 builds on grades K–2 experiences and progresses to specifying qualitative relationships.</p> <ul style="list-style-type: none"> Define a simple design problem that can be solved through the development of an object, tool, process, or system and includes several criteria for success and constraints on materials, time, or cost. (3-ETS1-1) <p>Planning and Carrying Out Investigations</p> <p>Planning and carrying out investigations to answer questions or test solutions to problems in 3–5 builds on K–2 experiences and progresses to include investigations that control variables and provide evidence to support explanations or design solutions.</p> <ul style="list-style-type: none"> Plan and conduct an investigation collaboratively to produce data to serve as the basis for evidence, using fair tests in which variables are controlled and the number of trials considered. (3-ETS1-3) <p>Constructing Explanations and Designing Solutions</p> <p>Constructing explanations and designing solutions in 3–5 builds on K–2 experiences and progresses to the use of evidence in constructing explanations that specify variables that describe and predict phenomena and in designing multiple solutions to design problems.</p> <ul style="list-style-type: none"> Generate and compare multiple solutions to a problem based on how well they meet the criteria and constraints of the design problem. (3-ETS1-2) 	<p>ETS1.A: Defining and Delimiting Engineering Problems</p> <ul style="list-style-type: none"> Possible solutions to a problem are limited by available materials and resources (constraints). The success of a designed solution is determined by considering the desired features of a solution (criteria). Different proposals for solutions can be compared on the basis of how well each one meets the specified criteria for success or how well each takes the constraints into account. (3-ETS1-1) <p>ETS1.B: Developing Possible Solutions</p> <ul style="list-style-type: none"> Research on a problem should be carried out before beginning to design a solution. Testing a solution involves investigating how well it performs under a range of likely conditions. (3-ETS1-2) At whatever stage, communicating with peers about proposed solutions is an important part of the design process, and shared ideas can lead to improved designs. (3-ETS1-2) Tests are often designed to identify failure points or difficulties, which suggest the elements of the design that need to be improved. (3-ETS1-3) <p>ETS1.C: Optimizing the Design Solution</p> <ul style="list-style-type: none"> Different solutions need to be tested in order to determine which of them best solves the problem, given the criteria and the constraints. (3-ETS1-3) 	<p>Influence of Science, Engineering, and Technology on Society and the Natural World</p> <ul style="list-style-type: none"> People’s needs and wants change over time, as do their demands for new and improved technologies. (3-ETS1-1) Engineers improve existing technologies or develop new ones to increase their benefits, decrease known risks, and meet societal demands. (3-ETS1-2)

Connections to 3-5-ETS1.A: *Defining and Delimiting Engineering Problems include: Fourth Grade: (4-PS3-4)*

Connections to 3-5-ETS1.B: *Designing Solutions to Engineering Problems include: Fourth Grade: (4-ESS3-2)*

Connections to 3-5-ETS1.C: *Optimizing the Design Solution include: Fourth Grade: (4-PS4-3)*

Connections to other DCIs across grade levels: **K-2.ETS1.A** (3-ETS1-1, 3-ETS1-2, 3-ETS1-3); **K-2.ETS1.B** (3-ETS1-2); **K-2.ETS1.C** (3-ETS1-2, 3-ETS1-3); **6-8.ETS1.A** (3-ETS1-1); **6-8.ETS1.B** (3-ETS1-1, 3-ETS1-2, 3-ETS1-3); **6-8.ETS1.C** (3-ETS1-2, 3-ETS1-3)

Common Core State Standards Connections:

ELA/Literacy –

- RI.5.1** Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text. (3-ETS1-2)
- RI.5.7** Draw on information from multiple print or digital sources, demonstrating the ability to locate an answer to a question quickly or to solve a problem efficiently. (3-ETS1-2)
- RI.5.9** Integrate information from several texts on the same topic in order to write or speak about the subject knowledgeably. (3-ETS1-2)
- W.5.7** Conduct short research projects that use several sources to build knowledge through investigation of different aspects of a topic. (3-ETS1-1, 3-ETS1-3)
- W.5.8** Recall relevant information from experiences or gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work, and provide a list of sources. (3-ETS1-1, 3-ETS1-3)
- W.5.9** Draw evidence from literary or informational texts to support analysis, reflection, and research. (3-ETS1-1, 3-ETS1-3)

Mathematics –

- MP.2** Reason abstractly and quantitatively. (3-ETS1-1, 3-ETS1-2, 3-ETS1-3)
- MP.4** Model with mathematics. (3-ETS1-1, 3-ETS1-2, 3-ETS1-3)
- MP.5** Use appropriate tools strategically. (3-ETS1-1, 3-ETS1-2, 3-ETS1-3)
- 3-5.OA** Operations and Algebraic Thinking (3-ETS1-1, 3-ETS1-2)

GRADE FOUR

Structure, Function, and Information Processing

Students who demonstrate understanding can:

- 4-PS4-2** **Develop a model to describe that light reflecting from objects and entering the eye allows objects to be seen.** [Assessment Boundary: Assessment does not include knowledge of specific colors reflected or seen, the cellular mechanisms of vision, or how the retina works.]
- 4-LS1-1** **Construct an argument that plants and animals have internal and external structures that function to support survival, growth, behavior, and reproduction.** [AR Clarification Statement: Examples of structures for survival could include thorns and teeth. Examples of structures for growth could include stems and the stomach. Examples of structures for behavior could include stomata and the brain. Examples of reproduction could include pistils, stamens, and eggs.] [Assessment Boundary: Assessment is limited to macroscopic structures within plant and animal systems.]
- 4-LS1-2** **Use a model to describe that animals receive different types of information through their senses, process the information in their brain, and respond to the information in different ways.** [Clarification Statement: Emphasis is on systems of information transfer. Use of models could include diagrams, computer simulations, and physical models.] [Assessment Boundary: Assessment does not include the mechanisms by which the brain stores and recalls information or the mechanisms of how sensory receptors function.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Developing and Using Models Modeling in 3–5 builds on K–2 experiences and progresses to building and revising simple models and using models to represent events and design solutions.</p> <ul style="list-style-type: none"> ▪ Develop a model to describe phenomena. (4-PS4-2) ▪ Use a model to test interactions concerning the functioning of a natural system. (4-LS1-2) <p>Engaging in Argument from Evidence Engaging in argument from evidence in 3–5 builds on K–2 experiences and progresses to critiquing the scientific explanations or solutions proposed by peers by citing relevant evidence about the natural and designed world(s).</p> <ul style="list-style-type: none"> ▪ Construct an argument with evidence, data, and/or a model. Connections to other DCIs across grade levels: **1.PS4.B** (4-PS4-2); **1.LS1.A** (4-LS1-1); **1.LS1.D** (4-LS1-2); **3.LS3.B** (4-LS1-1); **6.LS1.A** (4-LS1-1, 4-LS1-2); **6.LS1.D** (4-PS4-2, 4-LS1-2); **8.PS4.B** (4-PS4-2)

Common Core State Standards Connections:

ELA/Literacy –

W.4.1 Write opinion pieces on topics or texts, supporting a point of view with reasons and information. (4-LS1-1)

SL.4.5 Add audio recordings and visual displays to presentations when appropriate to enhance the development of main ideas or themes. (4-PS4-2, 4-LS1-2)

Mathematics –

MP.4 Model with mathematics. (4-PS4-2)

4.G.A.1 Draw points, lines, line segments, rays, angles (right, acute, obtuse), and perpendicular and parallel lines. Identify these in two-dimensional figures. (4-PS4-2)

4.G.A.3 Recognize a line of symmetry for a two-dimensional figure as a line across the figure such that the figure can be folded across the line into matching parts. Identify line-symmetric figures and draw lines of symmetry. (4-LS1-1)

GRADE FOUR

Waves: Waves and Information

Students who demonstrate understanding can:

- 4-PS4-1** **Develop a model of waves to describe patterns in terms of amplitude and wavelength and that waves can cause objects to move.** [Clarification Statement: Examples of models could include diagrams, analogies, and physical models using wire to illustrate wavelength and amplitude of waves.] [Assessment Boundary: Assessment does not include interference effects, electromagnetic waves, non-periodic waves, or quantitative models of amplitude and wavelength.]
- 4-PS4-3** **Generate and compare multiple solutions that use patterns to transfer information.*** [Clarification Statement: Examples of solutions could include drums sending coded information through sound waves, using a grid of 1s and 0s representing black and white to send information about a picture, or using Morse code to send text.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Developing and Using Models Modeling in 3–5 builds on K–2 experiences and progresses to building and revising simple models and using models to represent events and design solutions.</p> <ul style="list-style-type: none"> Develop a model using an analogy, example, or abstract representation to describe a scientific principle. (4-PS4-1) <p>Constructing Explanations and Designing Solutions Constructing explanations and designing solutions in 3–5 builds on K–2 experiences and progresses to the use of evidence in constructing explanations that specify variables that describe and predict phenomena and in designing multiple solutions to design problems.</p> <ul style="list-style-type: none"> Generate and compare multiple solutions to a problem based on how well they meet the criteria and constraints of the design solution. - 4.G.A.1** Draw points, lines, line segments, rays, angles (right, acute, obtuse), and perpendicular and parallel lines. Identify these in two-dimensional figures. (4-PS4-1)

GRADE FOUR

Energy	
Students who demonstrate understanding can:	
4-PS3-1	Use evidence to construct an explanation relating the speed of an object to the energy of that object. [Assessment Boundary: Assessment does not include quantitative measures of changes in the speed of an object or on any precise or quantitative definition of energy.]
4-PS3-2	Make observations to provide evidence that energy can be transferred from place to place by sound, light, heat, and electric currents. [Assessment Boundary: Assessment does not include quantitative measurements of energy.]
4-PS3-3	Ask questions and predict outcomes about the changes in energy that occur when objects collide. [Clarification Statement: Emphasis is on the change in the energy due to the change in speed, not on the forces, as objects interact.] [Assessment Boundary: Assessment does not include quantitative measurements of energy.]
4-PS3-4	Apply scientific ideas to design, test, and refine a device that converts energy from one form to another.* [Clarification Statement: Examples of devices could include electric circuits that convert electrical energy into motion, light, or sound energy; or, a passive solar heater that converts light into heat. Examples of constraints could include the materials, cost, and time to design the device.] [Assessment Boundary: Devices should be limited to those that convert motion energy to electric energy or use stored energy to cause motion or produce light or sound.]
4-ESS3-1	Obtain and combine information to describe that energy and fuels are derived from natural resources and their uses affect the environment. [Clarification Statement: Examples of renewable energy resources could include wind energy, water behind dams, or sunlight; non-renewable energy resources are fossil fuels or fissile materials. Examples of environmental effects could include loss of habitat due to dams, loss of habitat due to surface mining, and air pollution from the burning of fossil fuels.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Asking Questions and Defining Problems Asking questions and defining problems in grades 3–5 builds on grades K–2 experiences and progresses to specifying qualitative relationships.</p> <ul style="list-style-type: none"> Ask questions that can be investigated and predict reasonable outcomes based on patterns such as cause and effect relationships. (4-PS3-3) <p>Planning and Carrying Out Investigations Planning and carrying out investigations to answer questions or test solutions to problems in 3–5 builds on K–2 experiences and progresses to include investigations that control variables and provide evidence to support explanations or design solutions.</p> <ul style="list-style-type: none"> Make observations to produce data to serve as the basis for evidence for an explanation of a phenomenon or test a design solution. (4-PS3-2) 	<p>PS3.A: Definitions of Energy</p> <ul style="list-style-type: none"> The faster a given object is moving, the more energy it possesses. (4-PS3-1) Energy can be moved from place to place by moving objects or through sound, light, or electric currents. (4-PS3-2, 4-PS3-3) <p>PS3.B: Conservation of Energy and Energy Transfer</p> <ul style="list-style-type: none"> Energy is present whenever there are moving objects, sound, light, or heat. When objects collide, energy can be transferred from one object to another, thereby changing their motion. In such collisions, some energy is typically also transferred to the surrounding air; as a result, the air gets heated and sound is produced. (4-PS3-2, 4-PS3-3) Light also transfers energy from place to place. (4-PS3-2) Energy can also be transferred from place to place by electric currents, which can then be used locally to produce motion, sound, heat, or light. The currents may have been produced to begin with by transforming the energy of motion into electrical energy. (4-PS3-2, 4-PS3-4) 	<p>Cause and Effect</p> <ul style="list-style-type: none"> Cause and effect relationships are routinely identified and used to explain change. Mathematics –

MP.2 Reason abstractly and quantitatively. (4-ESS3-1)

MP.4 Model with mathematics. (4-ESS3-1)

4.OA.A.1 Interpret a multiplication equation as a comparison, e.g., interpret $35 = 5 \times 7$ as a statement that 35 is 5 times as many as 7 and 7 times as many as 5. Represent verbal statements of multiplicative comparisons as multiplication equations. (4-ESS3-1)

4.OA.A.3 Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding. (4-PS3-4)

DRAFT

GRADE FOUR

Earth's Systems: Processes that Shape the Earth

Students who demonstrate understanding can:

- 4-ESS1-1 Identify evidence from patterns in rock formations and fossils in rock layers to support an explanation for changes in a landscape over time.** [Clarification Statement: Examples of evidence from patterns could include rock layers with marine shell fossils above rock layers with plant fossils and no shells, indicating a change from land to water over time; and, a canyon with different rock layers in the walls and a river in the bottom, indicating that over time a river cut through the rock.] [Assessment Boundary: Assessment does not include specific knowledge of the mechanism of rock formation or memorization of specific rock formations and layers. Assessment is limited to relative time.]
- 4-ESS2-1 Make observations and/or measurements to provide evidence of the effects of weathering or the rate of erosion by water, ice, wind, or vegetation.** [Clarification Statement: Examples of variables to test could include angle of slope in the downhill movement of water, amount of vegetation, speed of wind, relative rate of deposition, cycles of freezing and thawing of water, cycles of heating and cooling, or volume of water flow.] [Assessment Boundary: Assessment is limited to a single form of weathering or erosion.]
- 4-ESS2-2 Analyze and interpret data from maps to describe patterns of Earth's features.** [Clarification Statement: Maps can include topographic maps of Earth's land and ocean floor, as well as maps of the locations of mountains, continental boundaries, volcanoes, and earthquakes.]
- 4-ESS3-2 Generate and compare multiple solutions to reduce the impacts of natural Earth processes on humans.*** [Clarification Statement: Examples of solutions could include designing an earthquake resistant building or improving monitoring of volcanic activity.] [Assessment Boundary: Assessment is limited to earthquakes, floods, tsunamis, and volcanic eruptions.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices

Planning and Carrying Out Investigations

Planning and carrying out investigations to answer questions or test solutions to problems in 3–5 builds on K–2 experiences and progresses to include investigations that control variables and provide evidence to support explanations or design solutions.

- Make observations and/or measurements to produce data to serve as the basis for evidence for an explanation of a phenomenon. (4-ESS2-1)

Analyzing and Interpreting Data

Analyzing data in 3–5 builds on K–2 experiences and progresses to introducing quantitative approaches to collecting data and conducting multiple trials of qualitative observations. When possible and feasible, digital tools should be used.

- Analyze and interpret data to make sense of phenomena using logical reasoning. (4-ESS2-2)

Disciplinary Core Ideas

ESS1.C: The History of Planet Earth

- Local, regional, and global patterns of rock formations reveal changes over time due to earth forces, such as earthquakes. The presence and location of certain fossil types indicate the order in which rock layers were formed. (4-ESS1-1)

ESS2.A: Earth Materials and Systems

- Rainfall helps to shape the land and affects the types of living things found in a region. Water, ice, wind, living organisms, and gravity break rocks, soils, and sediments into smaller particles and move them around. (4-ESS2-1)

ESS2.B: Plate Tectonics and Large-Scale System Interactions

- The locations of mountain ranges, deep ocean trenches, ocean floor structures, earthquakes, and volcanoes occur in patterns. Most earthquakes and volcanoes occur in bands that are often along the boundaries between continents and oceans. Major mountain chains form inside continents or near their edges. Maps can help locate the different land and water features areas of Earth. (4-ESS2-2)

ESS2.E: Biogeology

- Living things affect the physical characteristics of their regions. (4-ESS2-1)

Crosscutting Concepts

Patterns

- Patterns can be used as evidence to support an explanation. (4-ESS1-1, 4-ESS2-2)

Cause and Effect

- Cause and effect relationships are routinely identified, tested, and used to explain change. (4-ESS2-1, 4-ESS3-2)

Connections to Engineering, Technology, and Applications of Science

Influence of Engineering, Technology, and Science on Society and the Natural World

- Engineers improve existing technologies or develop new ones to increase their benefits, to decrease known risks, and to meet societal demands. (4-ESS3-2)

<p>Constructing Explanations and Designing Solutions Constructing explanations and designing solutions in 3–5 builds on K–2 experiences and progresses to the use of evidence in constructing explanations that specify variables that describe and predict phenomena and in designing multiple solutions to design problems.</p> <ul style="list-style-type: none"> Identify the evidence that supports particular points in an explanation. (4-ESS1-1) Generate and compare multiple solutions to a problem based on how well they meet the criteria and constraints of the design solution. (4-ESS3-2) 	<p>ESS3.B: Natural Hazards</p> <ul style="list-style-type: none"> A variety of hazards result from natural processes (e.g., earthquakes, tsunamis, volcanic eruptions). Humans cannot eliminate the hazards but can take steps to reduce their impacts. (4-ESS3-2) <p>ETS1.B: Designing Solutions to Engineering Problems</p> <ul style="list-style-type: none"> Testing a solution involves investigating how well it performs under a range of likely conditions. 	<p>Connections to Nature of Science</p> <p>Scientific Knowledge Assumes an Order and Consistency in Natural Systems</p> <ul style="list-style-type: none"> Science assumes consistent patterns in natural systems. (4-ESS1-1)</p> <p><i>Mathematics –</i></p> <p>MP.2 Reason abstractly and quantitatively. (4-ESS1-1, 4-ESS2-1, 4-ESS3-2)</p> <p>MP.4 Model with mathematics. (4-ESS1-1, 4-ESS2-1, 4-ESS3-2)</p> <p>MP.5 Use appropriate tools strategically. (4-ESS2-1)</p> <p>4.MD.A.1 Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb, oz.; l, ml; hr, min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two-column table. (4-ESS1-1, 4-ESS2-1)</p> <p>4.MD.A.2 Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale. (4-ESS2-1, 4-ESS2-2)</p> <p>4.OA.A.1 Interpret a multiplication equation as a comparison, e.g., interpret $35 = 5 \times 7$ as a statement that 35 is 5 times as many as 7 and 7 times as many as 5. Represent verbal statements of multiplicative comparisons as multiplication equations. (4-ESS3-2)</p>		

GRADE FOUR

Engineering, Technology, and Applications of Science		
Students who demonstrate understanding can:		
4-ETS1-1 Define a simple design problem reflecting a need or a want that includes specified criteria for success and constraints on materials, time, or cost.		
4-ETS1-2 Generate and compare multiple possible solutions to a problem based on how well each is likely to meet the criteria and constraints of the problem.		
4-ETS1-3 Plan and carry out fair tests in which variables are controlled and failure points are considered to identify aspects of a model or prototype that can be improved.		
The performance expectations above were developed using the following elements from the NRC document <i>A Framework for K-12 Science Education</i> :		
<p style="text-align: center;">Science and Engineering Practices</p> <p>Asking Questions and Defining Problems Asking questions and defining problems in 3–5 builds on grades K–2 experiences and progresses to specifying qualitative relationships.</p> <ul style="list-style-type: none"> Define a simple design problem that can be solved through the development of an object, tool, process, or system and includes several criteria for success and constraints on materials, time, or cost. (4-ETS1-1) <p>Planning and Carrying Out Investigations Planning and carrying out investigations to answer questions or test solutions to problems in 3–5 builds on K–2 experiences and progresses to include investigations that control variables and provide evidence to support explanations or design solutions.</p> <ul style="list-style-type: none"> Plan and conduct an investigation collaboratively to produce data to serve as the basis for evidence, using fair tests in which variables are controlled and the number of trials considered. (4-ETS1-3) <p>Constructing Explanations and Designing Solutions Constructing explanations and designing solutions in 3–5 builds on K–2 experiences and progresses to the use of evidence in constructing explanations that specify variables that describe and predict phenomena and in designing multiple solutions to design problems.</p> <ul style="list-style-type: none"> Generate and compare multiple solutions to a problem based on how well they meet the criteria and constraints of the design problem. (4-ETS1-2) 	<p style="text-align: center;">Disciplinary Core Ideas</p> <p>ETS1.A: Defining and Delimiting Engineering Problems</p> <ul style="list-style-type: none"> Possible solutions to a problem are limited by available materials and resources (constraints). The success of a designed solution is determined by considering the desired features of a solution (criteria). Different proposals for solutions can be compared on the basis of how well each one meets the specified criteria for success or how well each takes the constraints into account. (4-ETS1-1) <p>ETS1.B: Developing Possible Solutions</p> <ul style="list-style-type: none"> Research on a problem should be carried out before beginning to design a solution. Testing a solution involves investigating how well it performs under a range of likely conditions. (4-ETS1-2) At whatever stage, communicating with peers about proposed solutions is an important part of the design process, and shared ideas can lead to improved designs. (4-ETS1-2) Tests are often designed to identify failure points or difficulties, which suggest the elements of the design that need to be improved. (4-ETS1-3) <p>ETS1.C: Optimizing the Design Solution</p> <ul style="list-style-type: none"> Different solutions need to be tested in order to determine which of them best solves the problem, given the criteria and the constraints. (4-ETS1-3) 	<p style="text-align: center;">Crosscutting Concepts</p> <p>Influence of Science, Engineering, and Technology on Society and the Natural World</p> <ul style="list-style-type: none"> People’s needs and wants change over time, as do their demands for new and improved technologies. (4-ETS1-1) Engineers improve existing technologies or develop new ones to increase their benefits, decrease known risks, and meet societal demands. (4-ETS1-2)
<p><i>Connections to 3-5-ETS1.A: Defining and Delimiting Engineering Problems include: Fourth Grade: (4-PS3-4)</i></p> <p><i>Connections to 3-5-ETS1.B: Designing Solutions to Engineering Problems include: Fourth Grade: (4-ESS3-2)</i></p> <p><i>Connections to 3-5-ETS1.C: Optimizing the Design Solution include: Fourth Grade: (4-PS4-3)</i></p>		

Connections to other DCIs across grade levels: **K-2.ETS1.A** (4-ETS1-1, 4-ETS1-2, 4-ETS1-3); **K-2.ETS1.B** (4-ETS1-2); **K-2.ETS1.C** (4-ETS1-2, 4-ETS1-3); **6-8.ETS1.A** (4-ETS1-1); **6-8.ETS1.B** (4-ETS1-1, 4-ETS1-2, 4-ETS1-3); **6-8.ETS1.C** (4-ETS1-2, 4-ETS1-3)

Common Core State Standards Connections:

ELA/Literacy –

- RI.5.1** Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text. (3-ETS1-2)
- RI.5.7** Draw on information from multiple print or digital sources, demonstrating the ability to locate an answer to a question quickly or to solve a problem efficiently. (4-ETS1-2)
- RI.5.9** Integrate information from several texts on the same topic in order to write or speak about the subject knowledgeably. (4-ETS1-2)
- W.5.7** Conduct short research projects that use several sources to build knowledge through investigation of different aspects of a topic. (4-ETS1-1, 4-ETS1-3)
- W.5.8** Recall relevant information from experiences or gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work, and provide a list of sources. (4-ETS1-1, 4-ETS1-3)
- W.5.9** Draw evidence from literary or informational texts to support analysis, reflection, and research. (4-ETS1-1, 4-ETS1-3)

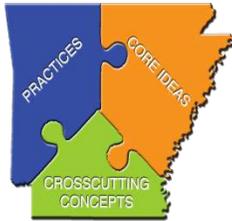

Mathematics –

- MP.2** Reason abstractly and quantitatively. (4-ETS1-1, 4-ETS1-2, 4-ETS1-3)
- MP.4** Model with mathematics. (4-ETS1-1, 4-ETS1-2, 4-ETS1-3)
- MP.5** Use appropriate tools strategically. (4-ETS1-1, 4-ETS1-2, 4-ETS1-3)
- 3-5.OA** Operations and Algebraic Thinking (4-ETS1-1, 4-ETS1-2)

ENGINEERING, TECHNOLOGY, and APPLICATIONS of SCIENCE 6-8. Engineering Design							

Science 5-8

The *Arkansas K-12 Science Standards* for Grades 5-8 is a curriculum framework of grade level student performance expectations based on the core ideas of the physical sciences (PS), life sciences (LS), earth and space sciences (ESS), and engineering (ETS) from *A Framework for K-12 Science Education* (NRC 2012). The performance expectations build logically from Grades K-4 to Grades 5-8. The performance expectations clarify what students need to know and be able to do at the end of each grade. Student performance expectations consist of three dimensions: science and engineering practices, disciplinary core ideas, and crosscutting concepts. Engineering performance expectations are meant to be integrated into science instruction to support the learning of science phenomena at all levels from Kindergarten to Grade 12.

As part of teaching the Arkansas K-12 Science Standards, it will be important to instruct and guide students in adopting appropriate safety precautions for their student-directed science investigations. Reducing risk and preventing accidents in science classrooms begin with planning. There are four recommended steps in carrying out a hazard and risk assessment for any planned lab investigation.

- 1) Identify all hazards. Hazards may be physical, chemical, health, or environmental.
- 2) Evaluate the type of risk associated with each hazard.
- 3) Write the procedure and all necessary safety precautions in such a way as to eliminate or reduce the risk associated with each hazard.
- 4) Prepare for any emergency that might arise in spite of all of the required safety precautions.

According to Arkansas Code Annotated § 6-10-113 (2012) for eye protection, every student and teacher in public schools participating in any chemical or combined chemical-physical laboratories involving caustic or explosive chemicals or hot liquids or solids is required to wear industrial-quality eye protective devices (eye goggles) at all times while participating in science investigations.

Notes:

1. Student Performance Expectations (PEs) may be taught in any sequence or grouping within a grade level.
2. An asterisk (*) indicates an engineering connection to a practice, core idea, or crosscutting concept.
3. The Clarification Statements are examples and additional guidance for the instructor. **AR** indicates Arkansas-specific Clarification Statements.
4. The Assessment Boundaries delineate content that may be taught but not assessed in large-scale assessments. **AR** indicates Arkansas-specific Assessment Boundaries.
5. The examples given (e.g.,) are suggestions for the instructor.
6. Throughout this document, connections are provided to the nature of science as defined by *A Framework for K-12 Science Education* (NRC 2012).
7. Throughout this document, connections are provided to Engineering, Technology, and Applications of Science as defined by *A Framework for K-12 Science Education* (NRC 2012).
8. Each set of PEs lists connections to other disciplinary core ideas (DCIs) within the Arkansas K-12 Science Standards and to the Common Core State Standards (CCSS) in English Language Arts (ELA)/Literacy and Mathematics.

How to Read Arkansas K-12 Science Standards

An asterisk indicates an engineering connection to a practice or disciplinary core idea.

GRADE TWO

Assessable Component

Interdependent Relationships in Ecosystems		
Students who demonstrate understanding can:		
2-LS2-1	Plan and conduct an investigation that provides evidence to support an explanation or design solution.	...one if plants need sunlight and water to grow. [Assessment variable at a time.]
2-LS2-2	Develop a simple model to represent a proposed object or tool.	...tion of an animal in dispersing seeds or pollinating plants.
2-LS4-1	Make observations and measurements to identify materials in a variety of habitats.	...compare the diversity of life in different habitats. [Clarification: ...things in a variety of habitats.] [Assessment Boundary: Assessment does not include specific animal and plant names in specific habitats.]

Performance Expectations (PEs)

*

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Foundation Boxes

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
Developing and Using Models Modeling in K-2 builds on prior experiences and progresses to include developing models (physical, conceptual, physical replica, diagram, storyboard) that represent design solutions. <ul style="list-style-type: none"> Develop a simple model based on evidence to represent a proposed object or tool. (2-LS2-2) 	LS2.A: Interdependent Relationships in Ecosystems Plants depend on water and light to grow. (2-LS2-1) Plants depend on animals for pollination or to move their seeds around. (2-LS2-2) 4.D: Biodiversity and Humans There are many different kinds of living things in any area, and they exist in different places on land and in water. (2-LS4-1)	Cause and Effect Events have causes that generate observable patterns. (2-LS2-1) Structure and Function The shape and stability of structures of natural and designed objects are related to their function(s). (2-LS2-2)
Planning and Carrying Out Investigations Planning and carrying out investigations to answer questions or test solutions to problems in K-2 builds on prior experiences and progresses to simple investigations, based on fair tests, which provide data to support explanations or design solutions. <ul style="list-style-type: none"> Plan and conduct an investigation collaboratively to produce data to serve as the basis for evidence to answer a question. (2-LS2-1) Make observations (firsthand or from media) to collect data that can be used to make comparisons. (2-LS4-1) 	ETS1.B: Developing Possible Solutions Designs can be conveyed through sketches, drawings, or physical models. These representations are useful in communicating ideas for a problem's solutions to other people. (2-LS2-2)	

Designates which PE uses this practice

Designates which PE incorporates this disciplinary core idea (DCI)

Designates which PE incorporates this crosscutting concept (CC)

Connections to the Nature of Science

Connections to Nature of Science
Scientific Knowledge is Based on Empirical Evidence
 Scientists look for patterns and order when making observations about the world. (2-LS4-1)

Connection Boxes

GRADE FIVE

Earth's Systems		
<p>Students who demonstrate understanding can:</p> <p>5-ESS2-1 Develop a model using an example to describe ways the geosphere, biosphere, hydrosphere, and/or atmosphere interact. [Clarification Statement: Examples could include the influence of the ocean on ecosystems, landform shape, and climate; the influence of the atmosphere on landforms and ecosystems through weather and climate; or the influence of mountain ranges on winds and clouds in the atmosphere. The geosphere, hydrosphere, atmosphere, and biosphere are each a system.] [Assessment Boundary: Assessment is limited to the interactions of two systems at a time.]</p> <p>5-ESS2-2 Describe and graph the amounts of salt water and fresh water in various reservoirs to provide evidence about the distribution of water on Earth. [Assessment Boundary: Assessment is limited to oceans, lakes, rivers, glaciers, ground water, and polar ice caps, and does not include the atmosphere.]</p> <p>5-ESS3-1 Obtain and combine information about ways individual communities use science ideas to protect the Earth's resources and environment.</p>		
<p>The performance expectations above were developed using the following elements from the NRC document <i>A Framework for K-12 Science Education</i>:</p>		
<p style="text-align: center;">Science and Engineering Practices</p> <p>Developing and Using Models Modeling in 3–5 builds on K–2 experiences and progresses to building and revising simple models and using models to represent events and design solutions.</p> <ul style="list-style-type: none"> Develop a model using an example to describe a scientific principle. (5-ESS2-1) <p>Using Mathematics and Computational Thinking Mathematical and computational thinking in 3–5 builds on K–2 experiences and progresses to extending quantitative measurements to a variety of physical properties and using computation and mathematics to analyze data and compare alternative design solutions.</p> <ul style="list-style-type: none"> Describe and graph quantities such as area and volume to address scientific questions. (5-ESS2-2) <p>Obtaining, Evaluating, and Communicating Information Obtaining, evaluating, and communicating information in 3–5 builds on K–2 experiences and progresses to evaluating the merit and accuracy of ideas and methods.</p> <ul style="list-style-type: none"> Obtain and combine information from books and/or other reliable media to explain phenomena or solutions to a design problem. (5-ESS3-1) 	<p style="text-align: center;">Disciplinary Core Ideas</p> <p>ESS2.A: Earth Materials and Systems</p> <ul style="list-style-type: none"> Earth's major systems are the geosphere (solid and molten rock, soil, and sediments), the hydrosphere (water and ice), the atmosphere (air), and the biosphere (living things, including humans). These systems interact in multiple ways to affect Earth's surface materials and processes. The ocean supports a variety of ecosystems and organisms, shapes landforms, and influences climate. Winds and clouds in the atmosphere interact with the landforms to determine patterns of weather. (5-ESS2-1) <p>ESS2.C: The Roles of Water in Earth's Surface Processes</p> <ul style="list-style-type: none"> Nearly all of Earth's available water is in the ocean. Most fresh water is in glaciers or underground; only a tiny fraction is in streams, lakes, wetlands, and the atmosphere. (5-ESS2-2) <p>ESS3.C: Human Impacts on Earth Systems</p> <ul style="list-style-type: none"> Human activities in agriculture, industry, and everyday life have had major effects on the land, vegetation, streams, ocean, air, and even outer space. But individuals and communities are doing things to help protect Earth's resources and environments. (5-ESS3-1) 	<p style="text-align: center;">Crosscutting Concepts</p> <p>Scale, Proportion, and Quantity</p> <ul style="list-style-type: none"> Standard units are used to measure and describe physical quantities such as weight, and volume. (5-ESS2-2) <p>Systems and System Models</p> <ul style="list-style-type: none"> A system can be described in terms of its components and their interactions. (5-ESS2-1, 5-ESS3-1) <p style="text-align: center;">-----</p> <p style="text-align: center;">Connections to Nature of Science</p> <p>Science Addresses Questions About the Natural and Material World</p> <ul style="list-style-type: none"> Science findings are limited to questions that can be answered with empirical evidence. (5-ESS3-1)

Common Core State Standards Connections:

ELA/Literacy –

- RI.5.1** Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text. (5-ESS3-1)
- RI.5.7** Draw on information from multiple print or digital sources, demonstrating the ability to locate an answer to a question quickly or to solve a problem efficiently. (5-ESS2-1, 5-ESS2-2, 5-ESS3-1)
- RI.5.9** Integrate information from several texts on the same topic in order to write or speak about the subject knowledgeably. (5-ESS3-1)
- W.5.8** Recall relevant information from experiences or gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work, and provide a list of sources. (5-ESS2-2, 5-ESS3-1)
- W.5.9** Draw evidence from literary or informational texts to support analysis, reflection, and research. (5-ESS3-1)
- SL.5.5** Include multimedia components (e.g., graphics, sound) and visual displays in presentations when appropriate to enhance the development of main ideas or themes. (5-ESS2-1, 5-ESS2-2)

Mathematics –

- MP.2** Reason abstractly and quantitatively. (5-ESS2-1, 5-ESS2-2, 5-ESS3-1)
- MP.4** Model with mathematics. (5-ESS2-1, 5-ESS2-2, 5-ESS3-1)
- 5.G.2** Represent real world and mathematical problems by graphing points in the first quadrant of the coordinate plane, and interpret coordinate values of points in the context of the situation. (5-ESS2-1)

GRADE FIVE

Space Systems

Students who demonstrate understanding can:

- 5-PS2-1** Support an argument that the gravitational force exerted by Earth on objects is directed down. [Clarification Statement: “Down” is a local description of the direction that points toward the center of the spherical Earth.] [Assessment Boundary: Assessment does not include mathematical representation of gravitational force.]
- 5-ESS1-1** Support an argument that differences in the apparent brightness of the sun compared to other stars is due to their relative distances from Earth. [Assessment Boundary: Assessment is limited to relative distances rather than sizes of stars. Assessment does not include other factors that affect apparent brightness (such as stellar masses, age, or stage).]
- 5-ESS1-2** Represent data in graphical displays to reveal patterns of daily changes in length and direction of shadows, day and night, and the seasonal appearance of some stars in the night sky. [Clarification Statement: Examples of patterns could include the position and motion of Earth with respect to the sun and select stars that are visible only in particular months.] [Assessment Boundary: Assessment does not include causes of seasons.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices

Analyzing and Interpreting Data

Analyzing data in 3–5 builds on K–2 experiences and progresses to introducing quantitative approaches to collecting data and conducting multiple trials of qualitative observations. When possible and feasible, digital tools should be used.

- Represent data in graphical displays (bar graphs, pictographs and/or pie charts) to reveal patterns that indicate relationships. (5-ESS1-2)

Engaging in Argument from Evidence

Engaging in argument from evidence in 3–5 builds on K–2 experiences and progresses to critiquing the scientific explanations or solutions proposed by peers by citing relevant evidence about the natural and designed world(s).

- Support an argument with evidence, data, or a model. (5-PS2-1, 5-ESS1-1)

Disciplinary Core Ideas

PS2.B: Types of Interactions

- The gravitational force of Earth acting on an object near Earth’s surface pulls that object toward the planet’s center. (5-PS2-1)

ESS1.A: The Universe and its Stars

- The sun is a star that appears larger and brighter than other stars because it is closer. Stars range greatly in their distance from Earth. (5-ESS1-1)

ESS1.B: Earth and the Solar System

- The orbits of Earth around the sun and of the moon around Earth, together with the rotation of Earth about an axis between its North and South poles, cause observable patterns. These include day and night; daily changes in the length and direction of shadows; and different positions of the sun, moon, and stars at different times of the day, month, and year. (5-ESS1-2)

Crosscutting Concepts

Patterns

- Similarities and differences in patterns can be used to sort, classify, communicate and analyze simple rates of change for natural phenomena. (5-ESS1-2)

Cause and Effect

- Cause and effect relationships are routinely identified and used to explain change. (5-PS2-1)

Scale, Proportion, and Quantity

- Natural objects exist from the very small to the immensely large. (5-ESS1-1)

Connections to other DCIs in fifth grade: N/A

Connections to other DCIs across grade levels: **1.ESS1.A** (5-ESS1-2); **1.ESS1.B** (5-ESS1-2); **3.PS2.A** (5-PS2-1, 5-ESS1-2); **3.PS2.B** (5-PS2-1); **8.PS2.B** (5-PS2-1); **8.ESS1.A** (5-ESS1-1, 5-ESS1-2); **8.ESS1.B** (5-PS2-1, 5-ESS1-1, 5-ESS1-2); **7.ESS2.C** (5-PS2-1)

Common Core State Standards Connections:

ELA/Literacy –

- RI.5.1** Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text. (5-PS2-1, 5-ESS1-1)
- RI.5.7** Draw on information from multiple print or digital sources, demonstrating the ability to locate an answer to a question quickly or to solve a problem efficiently. (5-ESS1-1)
- RI.5.8** Explain how an author uses reasons and evidence to support particular points in a text, identifying which reasons and evidence support which point(s). (5-ESS1-1)
- RI.5.9** Integrate information from several texts on the same topic in order to write or speak about the subject knowledgeably. (5-PS2-1, 5-ESS1-1)
- W.5.1** Write opinion pieces on topics or texts, supporting a point of view with reasons and information. (5-PS2-1, 5-ESS1-1)
- SL.5.5** Include multimedia components (e.g., graphics, sound) and visual displays in presentations when appropriate to enhance the development of main ideas or themes. (5-ESS1-2)

Mathematics –

<p>MP.5 Use appropriate tools strategically. (5-PS1-2, 5-PS1-3)</p>		
<p>5.NBT.A.1 Explain patterns in the number of zeros of the product when multiplying a number by powers of 10, and explain patterns in the placement of the decimal point when a decimal is multiplied or divided by a power of 10. Use whole-number exponents to denote powers of 10. (5-PS1-1)</p>		
<p>5.NF.B.7 Apply and extend previous understandings of division to divide unit fractions by whole numbers and whole numbers by unit fractions. (5-PS1-1)</p>		
<p>5.MD.A.1 Convert among different-sized standard measurement units within a given measurement system (e.g., convert 5 cm to 0.05 m), and use these conversions in solving multi-step, real-world problems. (5-PS1-2)</p>		
<p>5.MD.C.3 Recognize volume as an attribute of solid figures and understand concepts of volume measurement. (5-PS1-1)</p>		
<p>5.MD.C.4 Measure volumes by counting unit cubes, using cubic cm., cubic in., cubic ft., and improvised units. (5-PS1-1)</p>		

Matter and Energy in Organisms and Ecosystems

Students who demonstrate understanding can:

- 5-PS3-1** Use models to describe that energy in animals’ food (used for body repair, growth, motion, and to maintain body warmth) was once energy from the sun. [Clarification Statement: Examples of models could include diagrams and flow charts.]
- 5-LS1-1** Support an argument that plants get the materials they need for growth chiefly from air and water. [Clarification Statement: Emphasis is on the idea that plant matter comes mostly from air and water, not from the soil.]
- 5-LS2-1** Develop a model to describe the movement of matter among plants, animals, decomposers, and the environment. [Clarification Statement: Emphasis is on the idea that matter that is not food (air, water, decomposed materials in soil) is changed by plants into matter that is food. Examples of systems could include organisms, ecosystems, and the Earth.] [Assessment Boundary: Assessment does not include molecular explanations.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Developing and Using Models Modeling in 3–5 builds on K–2 experiences and progresses to building and revising simple models and using models to represent events and design solutions.</p> <ul style="list-style-type: none"> ▪ Use models to describe phenomena. GRADE FIVE

Engineering, Technology, and Applications of Science

Students who demonstrate understanding can:

5-ETS1-1 Define a simple design problem reflecting a need or a want that includes specified criteria for success and constraints on materials, time, or cost.

5-ETS1-2 Generate and compare multiple possible solutions to a problem based on how well each is likely to meet the criteria and constraints of the problem.

5-ETS1-3 Plan and carry out fair tests in which variables are controlled and failure points are considered to identify aspects of a model or prototype that can be improved.

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Asking Questions and Defining Problems</p> <p>Asking questions and defining problems in 3–5 builds on grades K–2 experiences and progresses to specifying qualitative relationships.</p> <ul style="list-style-type: none"> Define a simple design problem that can be solved through the development of an object, tool, process, or system and includes several criteria for success and constraints on materials, time, or cost. (5-ETS1-1) <p>Planning and Carrying Out Investigations</p> <p>Planning and carrying out investigations to answer questions or test solutions to problems in 3–5 builds on K–2 experiences and progresses to include investigations that control variables and provide evidence to support explanations or design solutions.</p> <ul style="list-style-type: none"> Plan and conduct an investigation collaboratively to produce data to serve as the basis for evidence, using fair tests in which variables are controlled and the number of trials considered. ELA/Literacy –

- RI.5.1** Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text. (5-ETS1-2)
- RI.5.7** Draw on information from multiple print or digital sources, demonstrating the ability to locate an answer to a question quickly or to solve a problem efficiently. (5-ETS1-2)
- RI.5.9** Integrate information from several texts on the same topic in order to write or speak about the subject knowledgeably. (5-ETS1-2)
- W.5.7** Conduct short research projects that use several sources to build knowledge through investigation of different aspects of a topic. (5-ETS1-1, 5-ETS1-3)
- W.5.8** Recall relevant information from experiences or gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work, and provide a list of sources. (5-ETS1-1, 5-ETS1-3)
- W.5.9** Draw evidence from literary or informational texts to support analysis, reflection, and research. (5-ETS1-1, 5-ETS1-3)

Mathematics –

- 3.OA** Operations and Algebraic Thinking (3-ETS1-1, 3-ETS1-2)
- MP.2** Reason abstractly and quantitatively. (5-ETS1-1, 5-ETS1-2, 5-ETS1-3)
- MP.4** Model with mathematics. (5-ETS1-1, 5-ETS1-2, 5-ETS1-3)
- MP.5** Use appropriate tools strategically. (5-ETS1-1, 5-ETS1-2, 5-ETS1-3)
- 3-5.OA** Operations and Algebraic Thinking (5-ETS1-1, 5-ETS1-2)

GRADE SIX

Energy

Students who demonstrate understanding can:

- 6-PS3-3** Apply scientific principles to design, construct, and test a device that either minimizes or maximizes thermal energy transfer.* [Clarification Statement: Examples of devices could include an insulated box, a solar cooker, and a polystyrene foam cup.] [Assessment Boundary: Assessment does not include calculating the total amount of thermal energy transferred.]
- 6-PS3-4** Plan an investigation to determine the relationships among the energy transferred, the type of matter, the mass, and the change in the average kinetic energy of the particles as measured by the temperature of the sample. [Clarification Statement: Examples of experiments could include comparing final water temperatures after different masses of ice have melted in the same volume of water with the same initial temperature, the temperature change of samples of different materials with the same mass as they cool or heat in the environment, or the same material with different masses when a specific amount of energy is added.] [Assessment Boundary: Assessment does not include calculating the total amount of thermal energy transferred.]
- 6-PS3-5** Construct, use, and present arguments to support the claim that when the kinetic energy of an object changes, energy is transferred to or from the object. [AR Clarification Statement: Examples of empirical evidence used in arguments could include a diagram, flowchart, or other representation of the energy before and after the transfer in the form of temperature changes or motion of an object.] [Assessment Boundary: Assessment does not include calculations of energy.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices

Planning and Carrying Out Investigations

Planning and carrying out investigations to answer questions or test solutions to problems in 6–8 builds on K–5 experiences and progresses to include investigations that use multiple variables and provide evidence to support explanations or design solutions.

- Plan an investigation individually and collaboratively, and in the design: identify independent and dependent variables and controls, what tools are needed to do the gathering, how measurements will be recorded, and how many data are needed to support a claim. (6-PS3-4)

Constructing Explanations and Designing Solutions

Constructing explanations and designing solutions in 6–8 builds on K–5 experiences and progresses to include constructing explanations and designing solutions supported by multiple sources of evidence consistent with scientific ideas, principles, and theories.

- Apply scientific ideas or principles to design, construct, and test a design of an object, tool, process or system. (6-PS3-3)

Engaging in Argument from Evidence

Engaging in argument from evidence in 6–8 builds on K–5 experiences and progresses to constructing a convincing argument that supports or refutes claims for either explanations or solutions about the natural and designed worlds.

- Construct, use, and present oral and written arguments supported by empirical evidence and scientific reasoning to support or refute an explanation or a model for a phenomenon. (6-PS3-5)

Disciplinary Core Ideas

PS3.A: Definitions of Energy

- Temperature is a measure of the average kinetic energy of particles of matter. The relationship between the temperature and the total energy of a system depends on the types, states, and amounts of matter present. (6-PS3-3, 6-PS3-4)

PS3.B: Conservation of Energy and Energy Transfer

- When the motion energy of an object changes, there is inevitably some other change in energy at the same time. (6-PS3-5)
- The amount of energy transfer needed to change the temperature of a matter sample by a given amount depends on the nature of the matter, the size of the sample, and the environment. (6-PS3-4)
- Energy is spontaneously transferred out of hotter regions or objects and into colder ones. (6-PS3-3)

Crosscutting Concepts

Scale, Proportion, and Quantity

- Proportional relationships (e.g. speed as the ratio of distance traveled to time taken) among different types of quantities provide information about the magnitude of properties and processes. (6-PS3-4)

Energy and Matter

- Energy may take different forms (e.g. energy in fields, thermal energy, and energy of motion). (6-PS3-5)
- The transfer of energy can be tracked as energy flows through a designed or natural system. (6-PS3-3)

<p style="text-align: center;">----- Connections to Nature of Science</p> <p>Scientific Knowledge is Based on Empirical Evidence</p> <ul style="list-style-type: none"> Science knowledge is based upon logical and conceptual connections between evidence and explanations (6-PS3-4, 6-PS3-5) 	<p>ETS1.A: Defining and Delimiting an Engineering Problem</p> <ul style="list-style-type: none"> The more precisely a design task's criteria and constraints can be defined, the more likely it is that the designed solution will be successful. Specification of constraints includes consideration of scientific principles and other relevant knowledge that is likely to limit possible solutions. (6-PS3-3) <p>ETS1.B: Developing Possible Solutions</p> <ul style="list-style-type: none"> A solution needs to be tested, and then modified on the basis of the test results in order to improve it. There are systematic processes for evaluating solutions with respect to how well they meet criteria and constraints of a problem. (6-PS3-3)

GRADE SIX

Structure, Function, and Information Processing	
Students who demonstrate understanding can:	
6-LS1-1	Conduct an investigation to provide evidence that living things are made of cells; either one cell or many different numbers and types of cells. [Clarification Statement: Emphasis is on gathering evidence that living things are made of cells, distinguishing between living and non-living things, and understanding that living things may be made of one cell or many and varied cells.]
6-LS1-2	Develop and use a model to describe the function of a cell as a whole and ways parts of cells contribute to the function. [Clarification Statement: Emphasis is on the cell functioning as a whole system and the primary role of identified parts of the cell, specifically the nucleus, chloroplasts, mitochondria, cell membrane, and cell wall.] [Assessment Boundary: Assessment of organelle structure/function relationships is limited to the cell wall and cell membrane. Assessment of the function of the other organelles is limited to their relationship to the whole cell. Assessment does not include the biochemical function of cells or cell parts.]
6-LS1-3	Use argument supported by evidence for how the body is a system of interacting subsystems composed of groups of cells. [Clarification Statement: Emphasis is on the conceptual understanding that cells form tissues and tissues form organs specialized for particular body functions. Examples could include the interaction of subsystems within a system and the normal functioning of those systems.] [Assessment Boundary: Assessment is limited to circulatory, excretory, digestive, respiratory, muscular, and nervous systems. Assessment does not include the mechanism of one body system independent of others.]
6-LS1-8	Gather and synthesize information that sensory receptors respond to stimuli by sending messages to the brain for immediate behavior or storage as memories. [Assessment Boundary: Assessment does not include mechanisms for the transmission of this information.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Common Core State Standards Connections:

ELA/Literacy –

- RST.6-8.1** Cite specific textual evidence to support analysis of science and technical texts. (6-LS1-3)
- RI.6.8** Trace and evaluate the argument and specific claims in a text, distinguishing claims that are supported by reasons and evidence from claims that are not. (6-LS1-3)
- WHST.6-8.1** Write arguments focused on discipline content. (6-LS1-3)
- WHST.6-8.7** Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration. (6-LS1-1)
- WHST.6-8.8** Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation. (6-LS1-8)
- SL.8.5** Integrate multimedia and visual displays into presentations to clarify information, strengthen claims and evidence, and add interest. (6-LS1-2)

Mathematics –

- 6.EE.C.9** Use variables to represent two quantities in a real-world problem that change in relationship to one another; write an equation to express one quantity, thought of as the dependent variable, in terms of the other quantity, thought of as the independent variable. Analyze the relationship between the dependent and independent variables using graphs and tables, and relate these to the equation. (6-LS1-1, 6-LS1-2, 6-LS1-3)

GRADE SIX

Growth, Development, and Reproduction of Organisms

- Students who demonstrate understanding can:
- 6-LS1-4 Use argument based on empirical evidence and scientific reasoning to support an explanation for how characteristic animal behaviors and specialized plant structures affect the probability of successful reproduction of animals and plants respectively.** [Clarification Statement: Examples of behaviors that affect the probability of animal reproduction could include nest building to protect young from cold, herding of animals to protect young from predators, and vocalization of animals and colorful plumage to attract mates for breeding. Examples of animal behaviors that affect the probability of plant reproduction could include transferring pollen or seeds, and creating conditions for seed germination and growth. Examples of plant structures could include bright flowers attracting butterflies that transfer pollen, flower nectar and odors that attract insects that transfer pollen, and hard shells on nuts that squirrels bury.]
 - 6-LS1-5 Construct a scientific explanation based on evidence for how environmental and genetic factors influence the growth of organisms.** [Clarification Statement: Examples of local environmental conditions could include availability of food, light, space, and water. Examples of genetic factors could include large breed cattle and species of grass affecting growth of organisms. Examples of evidence could include drought decreasing plant growth, fertilizer increasing plant growth, different varieties of plant seeds growing at different rates in different conditions, and fish growing larger in large ponds than they do in small ponds.] [Assessment Boundary: Assessment does not include genetic mechanisms, gene regulation, or biochemical processes.]
 - 6-LS3-2 Develop and use a model to describe why asexual reproduction results in offspring with identical genetic information and sexual reproduction results in offspring with genetic variation.** [Clarification Statement: Emphasis is on using models such as Punnett squares, diagrams, and simulations to describe the cause and effect relationship of gene transmission from parent(s) to offspring and resulting genetic variation.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

GRADE SIX

Human Impacts

Students who demonstrate understanding can:

- 6-ESS3-3 Apply scientific principles to design a method for monitoring and minimizing a human impact on the environment.*** [Clarification Statement: Examples of the design process could include examining human environmental impacts, assessing the kinds of solutions that are feasible, and designing and evaluating solutions that could reduce that impact. Examples of human impacts could include water usage (such as the withdrawal of water from streams and aquifers or the construction of dams and levees), land usage (such as urban development, agriculture, or the removal of wetlands), and pollution (such as of the air, water, or land).]
- 6-ESS3-4 Construct an argument supported by evidence for how increases in human population and per-capita consumption of natural resources impact Earth’s systems.** [Clarification Statement: Examples of evidence include grade-appropriate databases on human populations or the rates of consumption of food and natural resources (such as freshwater, minerals, or energy). Examples of impacts could include changes to the appearance, composition, or structure of Earth’s systems as well as the rates at which they change. The consequences of increases in human populations and consumption of natural resources are described by science, but science does not make the decisions for the actions society takes.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices

Constructing Explanations and Designing Solutions

Constructing explanations and designing solutions in 6–8 builds on K–5 experiences and progresses to include constructing explanations and designing solutions supported by multiple sources of evidence consistent with scientific ideas, principles, and theories.

- Apply scientific principles to design an object, tool, process or system. (6-ESS3-3)

Engaging in Argument from Evidence

Engaging in argument from evidence in 6–8 builds on K–5 experiences and progresses to constructing a convincing argument that supports or refutes claims for either explanations or solutions about the natural and designed world(s).

- Construct an oral and written argument supported by empirical evidence and scientific reasoning to support or refute an explanation or a model for a phenomenon or a solution to a problem. (6-ESS3-4)

Disciplinary Core Ideas

ESS3.C: Human Impacts on Earth Systems

- Human activities have significantly altered the biosphere, sometimes damaging or destroying natural habitats and causing the extinction of other species. But changes to Earth’s environments can have different impacts (negative and positive) for different living things. (6-ESS3-3)
- Typically as human populations and per-capita consumption of natural resources increase, so do the negative impacts on Earth unless the activities and technologies involved are engineered otherwise. (6-ESS3-3, 6-ESS3-4)

Crosscutting Concepts

Cause and Effect

- Relationships can be classified as causal or correlational, and correlation does not necessarily imply causation. (6-ESS3-3)
- Cause and effect relationships may be used to predict phenomena in natural or designed systems. (6-ESS3-4)

Connections to Engineering, Technology, and Applications of Science

Influence of Science, Engineering, and Technology on Society and the Natural World

- All human activity draws on natural resources and has both short and long-term consequences, positive as well as negative, for the health of people and the natural environment. (6-ESS3-4)
- The uses of technologies and any limitations on their use are driven by individual or societal needs, desires, and values; by the findings of scientific research; and by differences in such factors as climate, natural resources, and economic conditions. Thus technology use varies from region to region and over time. (6-ESS3-3)

GRADE SIX

Weather and Climate

Students who demonstrate understanding can:

- 6-ESS2-5** **Collect data to provide evidence for how the motions and complex interactions of air masses results in changes in weather conditions.** [Clarification Statement: Emphasis is on how air masses flow from regions of high pressure to low pressure, causing weather (defined by temperature, pressure, humidity, precipitation, and wind) at a fixed location to change over time, and how sudden changes in weather can result when different air masses collide. Emphasis is on how weather can be predicted within probabilistic ranges. Examples of data can be provided to students (such as weather maps, diagrams, or visualizations) or obtained through laboratory experiments (such as with condensation).] [Assessment Boundary: Assessment does not include recalling the names of cloud types or weather symbols used on weather maps or the reported diagrams from weather stations.]
- 6-ESS2-6** **Develop and use a model to describe how unequal heating and rotation of the Earth cause patterns of atmospheric and oceanic circulation that determine regional climates.** [Clarification Statement: Emphasis is on how patterns vary by latitude, altitude, and geographic land distribution. Emphasis of atmospheric circulation is on the sunlight-driven latitudinal banding, the Coriolis effect, and resulting prevailing winds; emphasis of ocean circulation is on the transfer of heat by the global ocean convection cycle, which is constrained by the Coriolis effect and the outlines of continents. Examples of models could be diagrams, maps and globes, or digital representations.] [Assessment Boundary: Assessment does not include the dynamics of the Coriolis effect.]
- 6-ESS3-5** **Ask questions to clarify evidence of the factors that have caused the rise in global temperatures over the past century.** [Clarification Statement: Examples of factors include human activities (such as fossil fuel combustion, cement production, or agricultural activity) and natural processes (such as changes in incoming solar radiation or volcanic activity). Examples of evidence could include tables, graphs, and maps of global and regional temperatures, atmospheric levels of gases such as carbon dioxide or methane, and the rates of human activities. Emphasis is on the major role that human activities play in causing the rise in global temperatures.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices

Asking Questions and Defining Problems

Asking questions and defining problems in 6–8 builds on K–5 experiences and progresses to specifying relationships between variables, and clarifying arguments and models.

- Ask questions to identify and clarify evidence of an argument. (6-ESS3-5)

Developing and Using Models

Modeling in 6–8 builds on K–5 experiences and progresses to developing, using, and revising models to describe, test, and predict more abstract phenomena and design systems.

- Develop and use a model to describe phenomena. (6-ESS2-6)

Planning and Carrying Out Investigations

Planning and carrying out investigations in 6–8 builds on K–5 experiences and progresses to include investigations that use multiple variables and provide evidence to support explanations or solutions.

- Collect data to produce data to serve as the basis for evidence to answer scientific questions or test design solutions under a range of conditions. (6-ESS2-5)

Disciplinary Core Ideas

ESS2.C: The Roles of Water in Earth’s Surface Processes

- The complex patterns of the changes and the movement of water in the atmosphere, determined by winds, landforms, and ocean temperatures and currents, are major determinants of local weather patterns. (6-ESS2-5)
- Variations in density due to variations in temperature and salinity drive a global pattern of interconnected ocean currents. (6-ESS2-6)

ESS2.D: Weather and Climate

- Weather and climate are influenced by interactions involving sunlight, the ocean, the atmosphere, ice, landforms, and living things. These interactions vary with latitude, altitude, and local and regional geography, all of which can affect oceanic and atmospheric flow patterns. (6-ESS2-6)
- Because these patterns are so complex, weather can only be predicted probabilistically. (6-ESS2-5)

Crosscutting Concepts

Cause and Effect

- Cause and effect relationships may be used to predict phenomena in natural or designed systems. (6-ESS2-5)

Systems and System Models

- Models can be used to represent systems and their interactions—such as inputs, processes and outputs—and energy, matter, and information flows within systems. (6-ESS2-6)

Stability and Change

- Stability might be disturbed either by sudden events or gradual changes that accumulate over time. (6-ESS3-5)

	<ul style="list-style-type: none"> ▪ The ocean exerts a major influence on weather and climate by absorbing energy from the sun, releasing it over time, and globally redistributing it through ocean currents. (6-ESS2-6) <p>ESS3.D: Global Climate Change</p> <ul style="list-style-type: none"> ▪ Human activities, such as the release of greenhouse gases from burning fossil fuels, are major factors in the current rise in Earth’s mean surface temperature (global warming). Reducing the level of climate change and reducing human vulnerability to whatever climate changes do occur depend on the understanding of climate science, engineering capabilities, and other kinds of knowledge, such as understanding of human behavior and on applying that knowledge wisely in decisions and activities. (6-ESS3-5)

Connections to other DCIs across grade levels: **3.PS2.A** (6-ESS2-6); **3.ESS2.D** (6-ESS2-5),(6-ESS2-6); **5.ESS2.A** (6-ESS2-5, 6-ESS2-6); **7.ESS2.A** (6-ESS2-6, 6-ESS3-5); **7.ESS2.C** (6-ESS2-5); **8.PS2.B** (6-ESS2-6); **8.PS3.B** (6-ESS2-6, 6-ESS3-5); **8.PS4.B** (6-ESS3-5); **8.ESS1.B** (6-ESS2-6)

Common Core State Standards Connections:

ELA/Literacy –

- RST.6-8.1** Cite specific textual evidence to support analysis of science and technical texts. (6-ESS2-5, 6-ESS3-5)
- RST.6-8.9** Compare and contrast the information gained from experiments, simulations, video or multimedia sources with that gained from reading a text on the same topic. (6-ESS2-5)
- WHST.6-8.8** Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation. (6-ESS2-5)
- SL.8.5** Integrate multimedia and visual displays into presentations to clarify information, strengthen claims and evidence, and add interest. (6-ESS2-6)

Mathematics –

- MP.2** Reason abstractly and quantitatively. (6-ESS2-5, 6-ESS3-5)
- 6.NS.C.5** Understand that positive and negative numbers are used together to describe quantities having opposite directions or values (e.g., temperature above/below zero, elevation above/below sea level, credits/debits, positive/negative electric charge); use positive and negative numbers to represent quantities in real-world contexts, explaining the meaning of 0 in each situation. (6-ESS2-5)
- 6.EE.B.6** Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set. (6-ESS3-5)
- 7.EE.B.4** Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities. (6-ESS3-5)

GRADE SIX

Engineering, Technology, and Applications of Science

Students who demonstrate understanding can:

- 6-ETS1-1** Define the criteria and constraints of a design problem with sufficient precision to ensure a successful solution, taking into account relevant scientific principles and potential impacts on people and the natural environment that may limit possible solutions.

- 6-ETS1-2** Evaluate competing design solutions using a systematic process to determine how well they meet the criteria and constraints of the problem.

- 6-ETS1-3** Analyze data from tests to determine similarities and differences among several design solutions to identify the best characteristics of each that can be combined into a new solution to better meet the criteria for success.

- 6-ETS1-4** Develop a model to generate data for iterative testing and modification of a proposed object, tool, or process such that an optimal design can be achieved.

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Asking Questions and Defining Problems Asking questions and defining problems in grades 6–8 builds on grades K–5 experiences and progresses to specifying relationships between variables, and clarifying arguments and models.</p> <ul style="list-style-type: none"> ▪ Define a design problem that can be solved through the development of an object, tool, process or system and includes multiple criteria and constraints, including scientific knowledge that may limit possible solutions. (6-ETS1-1) <p>Developing and Using Models Modeling in 6–8 builds on K–5 experiences and progresses to developing, using, and revising models to describe, test, and predict more abstract phenomena and design systems.</p> <ul style="list-style-type: none"> ▪ Develop a model to generate data to test ideas about designed systems, including those representing inputs and outputs. (6-ETS1-4) <p>Analyzing and Interpreting Data Analyzing data in 6–8 builds on K–5 experiences and progresses to extending quantitative analysis to investigations, distinguishing between correlation and causation, and basic statistical techniques of data and error analysis.</p> <ul style="list-style-type: none"> ▪ Analyze and interpret data to determine similarities and differences in findings. (6-ETS1-3) 	<p>ETS1.A: Defining and Delimiting Engineering Problems</p> <ul style="list-style-type: none"> ▪ The more precisely a design task’s criteria and constraints can be defined, the more likely it is that the designed solution will be successful. Specification of constraints includes consideration of scientific principles and other relevant knowledge that are likely to limit possible solutions. (6-ETS1-1) <p>ETS1.B: Developing Possible Solutions</p> <ul style="list-style-type: none"> ▪ A solution needs to be tested, and then modified on the basis of the test results, in order to improve it. (6-ETS1-4) ▪ There are systematic processes for evaluating solutions with respect to how well they meet the criteria and constraints of a problem. (6-ETS1-2, 6-ETS1-3) ▪ Sometimes parts of different solutions can be combined to create a solution that is better than any of its predecessors. (6-ETS1-3) ▪ Models of all kinds are important for testing solutions. (6-ETS1-4) <p>ETS1.C: Optimizing the Design Solution</p> <ul style="list-style-type: none"> ▪ Although one design may not perform the best across all tests, identifying the characteristics of the design that performed the best in each test can provide useful information for the redesign process, some of those characteristics may be incorporated into the new design. (6-ETS1-3) 	<p>Influence of Science, Engineering, and Technology on Society and the Natural World</p> <ul style="list-style-type: none"> ▪ All human activity draws on natural resources and has both short and long-term consequences, positive as well as negative, for the health of people and the natural environment. (6-ETS1-1) ▪ The uses of technologies and limitations on their use are driven by individual or societal needs, desires, and values; by the findings of scientific research; and by differences in such factors as climate, natural resources, and economic conditions. (6-ETS1-1)

<p>Engaging in Argument from Evidence Engaging in argument from evidence in 6–8 builds on K–5 experiences and progresses to constructing a convincing argument that supports or refutes claims for either explanations or solutions about the natural and designed world.</p> <ul style="list-style-type: none"> Evaluate competing design solutions based on jointly developed and agreed-upon design criteria. (6-ETS1-2) 	<ul style="list-style-type: none"> The iterative process of testing the most promising solutions and modifying what is proposed on the basis of the test results leads to greater refinement and ultimately to an optimal solution. Compare probabilities from a model to observed frequencies; if the agreement is not good, explain possible sources of the discrepancy. (6-ETS1-4)</p>		

GRADE SEVEN

Structure and Properties of Matter		
Students who demonstrate understanding can:		
<p>7-PS1-1 Develop models to describe the atomic composition of simple molecules and extended structures. [Clarification Statement: Emphasis is on developing models of molecules that vary in complexity. Examples of simple molecules could include ammonia and methanol. Examples of extended structures could include sodium chloride or diamonds. Examples of molecular-level models could include drawings, 3-D ball and stick structures, or computer representations showing different molecules with different types of atoms.] [Assessment Boundary: Assessment does not include valence electrons and bonding energy, discussing the ionic nature of subunits of complex structures, or a complete depiction of all individual atoms in a complex molecule or extended structure.]</p> <p>7-PS1-3 Gather and make sense of information to describe that synthetic materials come from natural resources and impact society. [Clarification Statement: Emphasis is on natural resources that undergo a chemical process to form a synthetic material. Examples of new materials could include new medicine, foods, and alternative fuels.] [Assessment Boundary: Assessment is limited to qualitative information.]</p> <p>7-PS1-4 Develop a model that predicts and describes changes in particle motion, temperature, and state of a pure substance when thermal energy is added or removed. [Clarification Statement: Emphasis is on qualitative molecular-level models of solids, liquids, and gases to show that adding or removing thermal energy increases or decreases kinetic energy of the particles until a change of state occurs. Examples of models could include drawings or diagrams. Examples of particles could include molecules or inert atoms. Examples of pure substances could include water, carbon dioxide, and helium.]</p>		
The performance expectations above were developed using the following elements from the NRC document <i>A Framework for K-12 Science Education</i> :		
<p style="text-align: center;">Science and Engineering Practices</p> <p>Developing and Using Models Modeling in 6–8 builds on K–5 and progresses to developing, using and revising models to describe, test, and predict more abstract phenomena and design systems.</p> <ul style="list-style-type: none"> ▪ Develop a model to predict and/or describe phenomena. (7-PS1-1, 7-PS1-4) <p>Obtaining, Evaluating, and Communicating Information Obtaining, evaluating, and communicating information in 6–8 builds on K–5 and progresses to evaluating the merit and validity of ideas and methods.</p> <ul style="list-style-type: none"> ▪ Gather, read, and synthesize information from multiple appropriate sources and assess the credibility, accuracy, and possible bias of each publication and methods used, and describe how they are supported or not supported by evidence. (7-PS1-3) 	<p style="text-align: center;">Disciplinary Core Ideas</p> <p>PS1.A: Structure and Properties of Matter</p> <ul style="list-style-type: none"> ▪ Substances are made from different types of atoms, which combine with one another in various ways. Atoms form molecules that range in size from two to thousands of atoms. (7-PS1-1) ▪ Each pure substance has characteristic physical and chemical properties (for any bulk quantity under given conditions) that can be used to identify it. (7-PS1-3) ▪ Gases and liquids are made of molecules or inert atoms that are moving about relative to each other. (7-PS1-4) ▪ In a liquid, the molecules are constantly in contact with others; in a gas, they are widely spaced except when they happen to collide. In a solid, atoms are closely spaced and may vibrate in position but do not change relative locations. (7-PS1-4) ▪ Solids may be formed from molecules, or they may be extended structures with repeating subunits (e.g., crystals). (7-PS1-1) ▪ The changes of state that occur with variations in temperature or pressure can be described and predicted using these models of matter. (7-PS1-4) 	<p style="text-align: center;">Crosscutting Concepts</p> <p>Cause and Effect</p> <ul style="list-style-type: none"> ▪ Cause and effect relationships may be used to predict phenomena in natural or designed systems. (7-PS1-4) <p>Scale, Proportion, and Quantity</p> <ul style="list-style-type: none"> ▪ Time, space, and energy phenomena can be observed at various scales using models to study systems that are too large or too small. (7-PS1-1) <p>Structure and Function</p> <ul style="list-style-type: none"> ▪ Structures can be designed to serve particular functions by taking into account properties of different materials, and how materials can be shaped and used. (7-PS1-3)

	<p>PS1.B: Chemical Reactions</p> <ul style="list-style-type: none"> Substances react chemically in characteristic ways. In a chemical process, the atoms that make up the original substances are regrouped into different molecules, and these new substances have different properties from those of the reactants. (7-PS1-3) <p>PS3.A: Definitions of Energy</p> <ul style="list-style-type: none"> The term “heat” as used in everyday language refers both to thermal energy (the motion of atoms or molecules within a substance) and the transfer of that thermal energy from one object to another. In science, heat is used only for this second meaning; it refers to the energy transferred due to the temperature difference between two objects. (secondary to 7-PS1-4) The temperature of a system is proportional to the average internal kinetic energy and potential energy per atom or molecule (whichever is the appropriate building block for the system’s material). The details of that relationship depend on the type of atom or molecule and the interactions among the atoms in the material. Temperature is not a direct measure of a system’s total thermal energy. The total thermal energy (sometimes called the total internal energy) of a system depends jointly on the temperature, the total number of atoms in the system, and the state of the material. (7-PS1-4) 	<p>Connections to Engineering, Technology, and Applications of Science</p> <p>Interdependence of Science, Engineering, and Technology</p> <ul style="list-style-type: none"> Engineering advances have led to important discoveries in virtually every field of science, and scientific discoveries have led to the development of entire industries and engineered systems. (7-PS1-3) <p>Influence of Science, Engineering and Technology on Society and the Natural World</p> <ul style="list-style-type: none"> The uses of technologies and any limitations on their use are driven by individual or societal needs, desires, and values; by the findings of scientific research; and by differences in such factors as climate, natural resources, and economic conditions. Thus technology use varies from region to region and over time. (7-PS1-3)

Common Core State Standards Connections:

ELA/Literacy –

- RST.6-8.1** Cite specific textual evidence to support analysis of science and technical texts. (7-LS2-2)
- RST.6-8.8** Distinguish among facts, reasoned judgment based on research findings, and speculation in a text. (7-LS2-5)
- RI.8.8** Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims. (7-LS2-5)
- WHST.6-8.2** Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content. (7-LS2-2)
- WHST.6-8.9** Draw evidence from literary or informational texts to support analysis, reflection, and research. (7-LS2-2)
- SL.8.1** Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly. (7-LS2-2)
- SL.8.4** Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation. (7-LS2-2)

Mathematics –

- MP.4** Model with mathematics. (7-LS2-5)
- 6.RP.A.3** Use ratio and rate reasoning to solve real-world and mathematical problems. (7-LS2-5)
- 6.SP.B.5** Summarize numerical data sets in relation to their context. (7-LS2-2)

GRADE SEVEN

Matter and Energy in Organisms and Ecosystems

Students who demonstrate understanding can:

- 7-LS1-6** Construct a scientific explanation based on evidence for the role of photosynthesis in the cycling of matter and flow of energy into and out of organisms. [Clarification Statement: Emphasis is on tracing movement of matter and flow of energy.] [Assessment Boundary: Assessment does not include the biochemical mechanisms of photosynthesis.]
- 7-LS1-7** Develop a model to describe how food is rearranged through chemical reactions forming new molecules that support growth and/or release energy as this matter moves through an organism. [Clarification Statement: Emphasis is on describing that molecules are broken apart and put back together and that in this process, energy is released.] [Assessment Boundary: Assessment does not include details of the chemical reactions for photosynthesis or respiration.]
- 7-LS2-1** Analyze and interpret data to provide evidence for the effects of resource availability on organisms and populations of organisms in an ecosystem. [Clarification Statement: Emphasis is on cause and effect relationships between resources and growth of individual organisms and the numbers of organisms in ecosystems during periods of abundant and scarce resources.]
- 7-LS2-3** Develop a model to describe the cycling of matter and flow of energy among living and nonliving parts of an ecosystem. [Clarification Statement: Emphasis is on describing the conservation of matter and flow of energy into and out of various ecosystems, and on defining the boundaries of the system.] [Assessment Boundary: Assessment does not include the use of chemical reactions to describe the processes.]
- 7-LS2-4** Construct an argument supported by empirical evidence that changes to physical or biological components of an ecosystem affect populations. [Clarification Statement: Emphasis is on recognizing patterns in data and making warranted inferences about changes in populations, and on evaluating empirical evidence supporting arguments about changes to ecosystems.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Developing and Using Models Modeling in 6–8 builds on K–5 experiences and progresses to developing, using, and revising models to describe, test, and predict more abstract phenomena and design systems.</p> <ul style="list-style-type: none"> ▪ Develop a model to describe phenomena. (7-LS2-1) 	<p>LS1.C: Organization for Matter and Energy Flow in Organisms</p> <ul style="list-style-type: none"> ▪ Plants, algae (including phytoplankton), and many microorganisms use the energy from light to make sugars (food) from carbon dioxide from the atmosphere and water through the process of photosynthesis, which also releases oxygen. These sugars can be used immediately or stored for growth or later use. (7-LS1-6) ▪ Within individual organisms, food moves through a series of chemical reactions in which it is broken down and rearranged to form new molecules, to support growth, or to release energy. (7-LS1-7) <p>LS2.A: Interdependent Relationships in Ecosystems</p> <ul style="list-style-type: none"> ▪ Organisms, and populations of organisms, are dependent on their environmental interactions both with other living things and with nonliving factors. (7-LS2-1) ▪ In any ecosystem, organisms and populations with similar requirements for food, water, oxygen, or other resources may compete with each other for limited resources, access to which consequently constrains their growth and reproduction. (7-LS2-1) ▪ Growth of organisms and population increases are limited by access to resources. (7-LS2-1) 	<p>Cause and Effect</p> <ul style="list-style-type: none"> ▪ Cause and effect relationships may be used to predict phenomena in natural or designed systems. (7-LS2-1) <p>Energy and Matter</p> <ul style="list-style-type: none"> ▪ Matter is conserved because atoms are conserved in physical and chemical processes. (7-LS1-7) ▪ Within a natural system, the transfer of energy drives the motion and/or cycling of matter. (7-LS1-6) ▪ The transfer of energy can be tracked as energy flows through a natural system. (7-LS2-3) <p>Stability and Change</p> <ul style="list-style-type: none"> ▪ Small changes in one part of a system might cause large changes in another part. (7-LS2-4)

Constructing Explanations and Designing Solutions

Constructing explanations and designing solutions in 6–8 builds on K–5 experiences and progresses to include constructing explanations and designing solutions supported by multiple sources of evidence consistent with scientific knowledge, principles, and theories.

- Construct a scientific explanation based on valid and reliable evidence obtained from sources (including the students’ own experiments) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (7-LS1-6)

Engaging in Argument from Evidence

Engaging in argument from evidence in 6–8 builds on K–5 experiences and progresses to constructing a convincing argument that supports or refutes claims for either explanations or solutions about the natural and designed world(s).

- Construct an oral and written argument supported by empirical evidence and scientific reasoning to support or refute an explanation or a model for a phenomenon or a solution to a problem. (7-LS2-4)

Connections to Nature of Science

Scientific Knowledge is Based on Empirical Evidence

- Science knowledge is based upon logical connections between evidence and explanations. (7-LS1-6)
- Science disciplines share common rules of obtaining and evaluating empirical evidence. (7-LS2-4)

LS2.B: Cycle of Matter and Energy Transfer in Ecosystems

- Food webs are models that demonstrate how matter and energy is transferred between producers, consumers, and decomposers as the three groups interact within an ecosystem. Transfers of matter into and out of the physical environment occur at every level. Decomposers recycle nutrients from dead plant or animal matter back to the soil in terrestrial environments or to the water in aquatic environments. The atoms that make up the organisms in an ecosystem are cycled repeatedly between the living and nonliving parts of the ecosystem. (7-LS2-3)

LS2.C: Ecosystem Dynamics, Functioning, and Resilience

- Ecosystems are dynamic in nature; their characteristics can vary over time. Disruptions to any physical or biological component of an ecosystem can lead to shifts in all its populations. (7-LS2-4)

PS3.D: Energy in Chemical Processes and Everyday Life

- The chemical reaction by which plants produce complex food molecules (sugars) requires an energy input (i.e., from sunlight) to occur. In this reaction, carbon dioxide and water combine to form carbon-based organic molecules and release oxygen. (7-LS1-6)
- Cellular respiration in plants and animals involve chemical reactions with oxygen that release stored energy. In these processes, complex molecules containing carbon react with oxygen to produce carbon dioxide and other materials. (7-LS1-7)

Connections to Nature of Science

Scientific Knowledge Assumes an Order and Consistency in Natural Systems

- Science assumes that objects and events in natural systems occur in consistent patterns that are understandable through measurement and observation. (7-LS2-3)

Connections to other DCIs in seventh grade: **7.PS1.B** (7-LS1-6, 7-LS1-7, 7-LS2-3); **7.ESS2.A** (7-LS1-6, 7-LS2-3, 7-LS2-4); **7.ESS3.A** (7-LS2-1, 7-LS2-4)

Connections to other DCIs across grade levels: **3.LS2.C** (7-LS2-1, 7-LS2-4); **3.LS4.D** (7-LS2-1, 7-LS2-4); **5.PS3.D** (7-LS1-6, 7-LS1-7); **5.LS1.C** (7-LS1-6, 7-LS1-7); **5.LS2.A** (7-LS1-6, 7-LS2-1, 7-LS2-3); **5.LS2.B** (7-LS1-6, 7-LS1-7, 7-LS2-3); **6.LS1.C** (7-LS1-6, 7-LS1-7, 7-LS2-3); **6.ESS2.D** (7-LS1-6); **6.ESS2.E** (7-LS2-4); **6.ESS3.C** (7-LS2-4); **8.PS3.B** (7-LS2-3); **8.LS4.C** (7-LS2-1, 7-LS2-4); **8.LS4.D** (7-LS2-1, 7-LS2-4)

Common Core State Standards Connections:

ELA/Literacy –

- RST.6-8.1** Cite specific textual evidence to support analysis of science and technical texts. (7-LS1-6, 7-LS2-1, 7-LS2-4)
- RST.6-8.2** Determine the central ideas or conclusions of a text; provide an accurate summary of the text distinct from prior knowledge or opinions. (7-LS1-6)
- RST.6-8.7** Integrate quantitative or technical information expressed in words in a text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table). (7-LS2-1)
- RI.8.8** Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims. (7-LS2-4)
- WHST.6-8.1** Write arguments to support claims with clear reasons and relevant evidence. (7-LS2-4)
- WHST.6-8.2** Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content. (7-LS1-6)
- WHST.6-8.9** Draw evidence from informational texts to support analysis, reflection, and research. (7-LS1-6, 7-LS2-4)
- SL.8.5** Integrate multimedia and visual displays into presentations to clarify information, strengthen claims and evidence, and add interest. (7-LS1-7, 7-LS2-3)

Mathematics –

- 6.EE.C.9** Use variables to represent two quantities in a real-world problem that change in relationship to one another; write an equation to express one quantity, thought of as the dependent variable, in terms of the other quantity, thought of as the independent variable. Analyze the relationship between the dependent and independent variables using graphs and tables, and relate these to the equation. (7-LS1-6, 7-LS2-3)

GRADE SEVEN

Earth's Systems

Students who demonstrate understanding can:

- 7-ESS2-1** **Develop a model to describe the cycling of Earth's materials and the flow of energy that drives this process.** [AR Clarification Statement: Emphasis is on the processes of melting, crystallization, weathering, deformation, and sedimentation, which act together to form minerals and rocks through the cycling of Earth's materials. Arkansas specific examples are Karst topography, bauxite, and diamonds.] [Assessment Boundary: Assessment does not include the identification and naming of minerals.]
- 7-ESS3-1** **Construct a scientific explanation based on evidence for how the uneven distributions of Earth's mineral, energy, and groundwater resources are the result of past and current geoscience processes.** [Clarification Statement: Emphasis is on how these resources are limited and typically non-renewable, and how their distributions are significantly changing as a result of removal by humans. Examples of uneven distributions of resources as a result of past processes include but are not limited to petroleum (locations of the burial of organic marine sediments and subsequent geologic traps), metal ores (locations of past volcanic and hydrothermal activity associated with subduction zones), and soil (locations of active weathering and/or deposition of rock).]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices

Developing and Using Models

Modeling in 6–8 builds on K–5 experiences and progresses to developing, using, and revising models to describe, test, and predict more abstract phenomena and design systems.

- Develop and use a model to describe phenomena. (7-ESS2-1)

Constructing Explanations and Designing Solutions

Constructing explanations and designing solutions in 6–8 builds on K–5 experiences and progresses to include constructing explanations and designing solutions supported by multiple sources of evidence consistent with scientific ideas, principles, and theories.

- Construct a scientific explanation based on valid and reliable evidence obtained from sources (including the students' own experiments) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (7-ESS3-1)

Disciplinary Core Ideas

ESS2.A: Earth's Materials and Systems

- All Earth processes are the result of energy flowing and matter cycling within and among the planet's systems. This energy is derived from the sun and Earth's hot interior. The energy that flows and matter that cycles produce chemical and physical changes in Earth's materials and living organisms. (7-ESS2-1)

ESS3.A: Natural Resources

- Humans depend on Earth's land, ocean, atmosphere, and biosphere for many different resources. Minerals, fresh water, and biosphere resources are limited, and many are not renewable or replaceable over human lifetimes. These resources are distributed unevenly around the planet as a result of past geologic processes. (7-ESS3-1)

Crosscutting Concepts

Cause and Effect

- Cause and effect relationships may be used to predict phenomena in natural or designed systems. (7-ESS3-1)

Stability and Change

- Explanations of stability and change in natural or designed systems can be constructed by examining the changes over time and processes at different scales, including the atomic scale. (7-ESS2-1)

Connections to Engineering, Technology, and Applications of Science

Influence of Science, Engineering, and Technology on Society and the Natural World

- All human activity draws on natural resources and has both short and long-term consequences, positive as well as negative, for the health of people and the natural environment. (7-ESS3-1)

Connections to other DCIs in seventh grade: **7.PS1.A** (7-ESS2-1, 7-ESS3-1); **7.PS1.B** (7-ESS2-1, 7-ESS3-1); **7.LS2.B** (7-ESS2-1); **7.LS2.C** (7-ESS2-1)

Connections to other DCIs across grade levels: **4.PS3.B** (7-ESS2-1); **4.PS3.D** (7-ESS3-1); **4.ESS2.A** (7-ESS2-1);

4.ESS3.A (7-ESS3-1); **5.ESS2.A** (7-ESS2-1); **6.LS1.C** (7-ESS2-1, 7-ESS3-1); **6.ESS2.E** (7-ESS2-1); **8.PS3.B** (7-ESS2-1, 7-ESS3-1); **8.PS4.B** (7-ESS2-4)

Common Core State Standards Connections:

ELA/Literacy –

- WHST.6-8.2** Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content. (7-ESS3-1)
- WHST.6-8.9** Draw evidence from informational texts to support analysis, reflection, and research. (7-ESS3-1)
- SL.8.5** Integrate multimedia and visual displays into presentations to clarify information, strengthen claims and evidence, and add interest. (7-ESS2-1)

Mathematics –

- 6.EE.B.6** Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set. (7-ESS3-1)
- 7.EE.B.4** Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities. (7-ESS3-1)

GRADE SEVEN

History of Earth

Students who demonstrate understanding can:

- 7-ESS2-2** **Construct an explanation based on evidence for how geoscience processes have changed Earth’s surface at varying time and spatial scales.** [Clarification Statement: Emphasis is on how processes change Earth’s surface at time and spatial scales that can be large (such as slow plate motions or the uplift of large mountain ranges) or small (such as rapid landslides or microscopic geochemical reactions), and how many geoscience processes (such as earthquakes, volcanoes, and meteor impacts) usually behave gradually but are punctuated by catastrophic events. Examples of geoscience processes include surface weathering and deposition by the movements of water, ice, and wind. Emphasis is on geoscience processes that shape local geographic features, where appropriate.]
- 7-ESS2-3** **Analyze and interpret data on the distribution of fossils and rocks, continental shapes, and seafloor structures to provide evidence of the past plate motions.** [Clarification Statement: Examples of data include similarities of rock and fossil types on different continents, the shapes of the continents (including continental shelves), and the locations of ocean structures (such as ridges, fracture zones, or trenches).] [Assessment Boundary: Paleomagnetic anomalies in oceanic and continental crust are not assessed.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices

Analyzing and Interpreting Data

Analyzing data in 6–8 builds on K–5 and progresses to extending quantitative analysis to investigations, distinguishing between correlation and causation, and basic statistical techniques of data and error analysis.

- Analyze and interpret data to provide evidence for phenomena. (7-ESS2-3)

Constructing Explanations and Designing Solutions

Constructing explanations and designing solutions in 6–8 builds on K–5 experiences and progresses to include constructing explanations and designing solutions supported by multiple sources of evidence consistent with scientific ideas, principles, and theories.

- Construct a scientific explanation based on valid and reliable evidence obtained from sources (including the students’ own experiments) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (7-ESS2-2)

Connections to Nature of Science

Scientific Knowledge is Open to Revision in Light of New Evidence

- Science findings are frequently revised and/or reinterpreted based on new evidence. (7-ESS2-3)

Disciplinary Core Ideas

ESS1.C: The History of Planet Earth

- Tectonic processes continually generate new ocean sea floor at ridges and destroy old sea floor at trenches. (7-ESS2-3)

ESS2.A: Earth’s Materials and Systems

- The planet’s systems interact over scales that range from microscopic to global in size, and they operate over fractions of a second to billions of years. These interactions have shaped Earth’s history and will determine its future. (7-ESS2-2)

ESS2.B: Plate Tectonics and Large-Scale System Interactions

- Maps of ancient land and water patterns, based on investigations of rocks and fossils, make clear how Earth’s plates have moved great distances, collided, and spread apart. (7-ESS2-3)

ESS2.C: The Roles of Water in Earth’s Surface Processes

- Water’s movements—both on the land and underground—cause weathering and erosion, which change the land’s surface features and create underground formations. (7-ESS2-2)

Crosscutting Concepts

Patterns

- Patterns in rates of change and other numerical relationships can provide information about natural systems. (7-ESS2-3)

Scale Proportion and Quantity

- Time, space, and energy phenomena can be observed at various scales using models to study systems that are too large or too small. (7-ESS2-2)

Connections to other DCIs in seventh grade: **7.PS1.B** (7-ESS2-2); **7.LS2.B** (7-ESS2-2)

- 6.EE.B.6** Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set. (7-ESS2-2, 7-ESS2-3)
- 7.EE.B.4** Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities. (7-ESS1-4, 7-ESS2-2, 7-ESS2-3)

GRADE SEVEN

Human Impacts

Students who demonstrate understanding can:

7-ESS3-2 Analyze and interpret data on natural hazards to forecast future catastrophic events and inform the development of technologies to mitigate their effects. [Clarification Statement: Emphasis is on how some natural hazards, such as volcanic eruptions and severe weather, are preceded by phenomena that allow for reliable predictions, but others, such as earthquakes, occur suddenly and with no notice, and thus are not yet predictable. Examples of natural hazards can be taken from interior processes (such as earthquakes and volcanic eruptions), surface processes (such as mass wasting and tsunamis), or severe weather events (such as hurricanes, tornadoes, and floods). Examples of data can include the locations, magnitudes, and frequencies of the natural hazards. Examples of technologies can be global (such as satellite systems to monitor hurricanes or forest fires) or local (such as building basements in tornado-prone regions or reservoirs to mitigate droughts).]

GRADE SEVEN

Engineering, Technology, and Applications of Science

Students who demonstrate understanding can:

- 7-ETS1-1** Define the criteria and constraints of a design problem with sufficient precision to ensure a successful solution, taking into account relevant scientific principles and potential impacts on people and the natural environment that may limit possible solutions.
- 7-ETS1-2** Evaluate competing design solutions using a systematic process to determine how well they meet the criteria and constraints of the problem.
- 7-ETS1-3** Analyze data from tests to determine similarities and differences among several design solutions to identify the best characteristics of each that can be combined into a new solution to better meet the criteria for success.
- 7-ETS1-4** Develop a model to generate data for iterative testing and modification of a proposed object, tool, or process such that an optimal design can be achieved.

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Asking Questions and Defining Problems Asking questions and defining problems in grades 6–8 builds on grades K–5 experiences and progresses to specifying relationships between variables, and clarifying arguments and models.</p> <ul style="list-style-type: none"> ▪ Define a design problem that can be solved through the development of an object, tool, process or system and includes multiple criteria and constraints, including scientific knowledge that may limit possible solutions. GRADE EIGHT

Waves and Electromagnetic Radiation

Students who demonstrate understanding can:

- 8-PS4-1** Use mathematical representations to describe a simple model for waves that includes how the amplitude of a wave is related to the energy in a wave. [Clarification Statement: Emphasis is on describing waves applying both qualitative and quantitative thinking.] [Assessment Boundary: Assessment does not include electromagnetic waves and is limited to standard repeating waves.]
- 8-PS4-2** Develop and use a model to describe that waves are reflected, absorbed, or transmitted through various materials. [Clarification Statement: Emphasis is on both light and mechanical waves. Examples of models could include drawings, simulations, and written descriptions.] [Assessment Boundary: Assessment is limited to qualitative applications pertaining to light and mechanical waves.]
- 8-PS4-3** Integrate qualitative scientific and technical information to support the claim that digitized signals are a more reliable way to encode and transmit information than analog signals. [Clarification Statement: Emphasis is on the basic understanding that waves can be used for communication purposes. Examples could include using fiber optic cable to transmit light pulses, radio wave pulses in Wi-Fi devices, and conversion of stored binary patterns to make sound or text on a computer screen.] [Assessment Boundary: Assessment does not include binary counting. Assessment does not include the specific mechanism of any given device.]

GRADE EIGHT

Forces and Interactions

Students who demonstrate understanding can:

- 8-PS2-1 Apply Newton’s Third Law to design a solution to a problem involving the motion of two colliding objects.*** [Clarification Statement: Examples of practical problems could include the impact of collisions between two cars, between a car and stationary objects, and between a meteor and a space vehicle.] [Assessment Boundary: Assessment is limited to vertical or horizontal interactions in one dimension.]
- 8-PS2-2 Plan an investigation to provide evidence that the change in an object’s motion depends on the sum of the forces on the object and the mass of the object.** [Clarification Statement: Emphasis is on balanced (Newton’s First Law) and unbalanced forces in a system, qualitative comparisons of forces, mass and changes in motion (Newton’s Second Law), frame of reference, and specification of units.] [Assessment Boundary: Assessment is limited to forces and changes in motion in one dimension in an inertial reference frame and to change in one variable at a time. Assessment does not include the use of trigonometry.]
- 8-PS2-3 Ask questions about data to determine the factors that affect the strength of electric and magnetic forces.** [Clarification Statement: Examples of devices that use electric and magnetic forces could include electromagnets, electric motors, and generators. Examples of data could include the effect of the number of turns of wire on the strength of an electromagnet, or the effect of increasing the number or strength of magnets on the speed of an electric motor.] [Assessment Boundary: Assessment about questions that require quantitative answers is limited to proportional reasoning and algebraic thinking.]
- 8-PS2-4 Construct and present arguments using evidence to support the claim that gravitational interactions are attractive and depend on the masses of interacting objects.** [Clarification Statement: Examples of evidence for arguments could include charts displaying mass, strength of interaction, distance from the Sun, and orbital periods of objects within the solar system or data generated from simulations or digital tools.] [Assessment Boundary: Assessment does not include Newton’s Law of Gravitation or Kepler’s Laws.]
- 8-PS2-5 Conduct an investigation and evaluate the experimental design to provide evidence that fields exist between objects exerting forces on each other even though the objects are not in contact.** [Clarification Statement: Examples of this phenomenon could include the interactions of magnets, electrically-charged strips of tape, and electrically-charged pith balls. Examples of investigations could include first-hand experiences or simulations.] [Assessment Boundary: Assessment is limited to electric and magnetic fields, and is limited to qualitative evidence for the existence of fields.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices

Asking Questions and Defining Problems

Asking questions and defining problems in grades 6–8 builds from grades K–5 experiences and progresses to specifying relationships between variables, and clarifying arguments and models.

- Ask questions that can be investigated within the scope of the classroom, outdoor environment, and museums and other public facilities with available resources and, when appropriate, frame a hypothesis based on observations and scientific principles. (8-PS2-3)

Planning and Carrying Out Investigations

Planning and carrying out investigations to answer questions or test solutions to problems in 6–8 builds on K–5 experiences and progresses to include investigations that use multiple variables and provide evidence to support explanations or design solutions.

Disciplinary Core Ideas

PS2.A: Forces and Motion

- For any pair of interacting objects, the force exerted by the first object on the second object is equal in strength to the force that the second object exerts on the first, but in the opposite direction (Newton’s third law). (8-PS2-1)
- The motion of an object is determined by the sum of the forces acting on it; if the total force on the object is not zero, its motion will change. The greater the mass of the object, the greater the force needed to achieve the same change in motion. For any given object, a larger force causes a larger change in motion. (8-PS2-2)

Crosscutting Concepts

Cause and Effect

- Cause and effect relationships may be used to predict phenomena in natural or designed systems. (8-PS2-3, 8-PS2-5)

Systems and System Models

- Models can be used to represent systems and their interactions—such as inputs, processes and outputs—and energy and matter flows within systems. (8-PS2-1, 8-PS2-4)

<ul style="list-style-type: none"> Plan an investigation individually and collaboratively, and in the design: identify independent and dependent variables and controls, what tools are needed to do the gathering, how measurements will be recorded, and how many data are needed to support a claim. (8-PS2-2) Conduct an investigation and evaluate the experimental design to produce data to serve as the basis for evidence that can meet the goals of the investigation. (8-PS2-5) <p>Constructing Explanations and Designing Solutions</p> <p>Constructing explanations and designing solutions in 6–8 builds on K–5 experiences and progresses to include constructing explanations and designing solutions supported by multiple sources of evidence consistent with scientific ideas, principles, and theories.</p> <ul style="list-style-type: none"> Apply scientific ideas or principles to design an object, tool, process or system. (8-PS2-1) <p>Engaging in Argument from Evidence</p> <p>Engaging in argument from evidence in 6–8 builds from K–5 experiences and progresses to constructing a convincing argument that supports or refutes claims for either explanations or solutions about the natural and designed world.</p> <ul style="list-style-type: none"> Construct and present oral and written arguments supported by empirical evidence and scientific reasoning to support or refute an explanation or a model for a phenomenon or a solution to a problem. (8-PS2-4) <hr/> <p>Connections to Nature of Science</p> <p>Scientific Knowledge is Based on Empirical Evidence</p> <ul style="list-style-type: none"> Science knowledge is based upon logical and conceptual connections between evidence and explanations. (8-PS2-2, 8-PS2-4) 	<ul style="list-style-type: none"> All positions of objects and the directions of forces and motions must be described in an arbitrarily chosen reference frame and arbitrarily chosen units of size. In order to share information with other people, these choices must also be shared. (8-PS2-2) <p>PS2.B: Types of Interactions</p> <ul style="list-style-type: none"> Electric and magnetic (electromagnetic) forces can be attractive or repulsive, and their sizes depend on the magnitudes of the charges, currents, or magnetic strengths involved and on the distances between the interacting objects. (8-PS2-3) Gravitational forces are always attractive. There is a gravitational force between any two masses, but it is very small except when one or both of the objects have large mass—e.g., Earth and the sun. (8-PS2-4) Forces that act at a distance (electric, magnetic, and gravitational) can be explained by fields that extend through space and can be mapped by their effect on a test object (a charged object, or a ball, respectively). (8-PS2-5) 	<p>Stability and Change</p> <ul style="list-style-type: none"> Explanations of stability and change in natural or designed systems can be constructed by examining the changes over time and forces at different scales. (8-PS2-2) <hr/> <p>Connections to Engineering, Technology, and Applications of Science</p> <p>Influence of Science, Engineering, and Technology on Society and the Natural World</p> <ul style="list-style-type: none"> The uses of technologies and any limitations on their use are driven by individual or societal needs, desires, and values; by the findings of scientific research; and by differences in such factors as climate, natural resources, and economic conditions. (8-PS2-1)

Mathematics –

MP.2	Reason abstractly and quantitatively. (8-PS2-1, 8-PS2-2, 8-PS2-3)
6.NS.C.5	Understand that positive and negative numbers are used together to describe quantities having opposite directions or values; use positive and negative numbers to represent quantities in real-world contexts, explaining the meaning of 0 in each situation. (8-PS2-1)
6.EE.A.2	Write, read, and evaluate expressions in which letters stand for numbers. (8-PS2-1, 8-PS2-2)
7.EE.B.3	Solve multi-step real-life and mathematical problems posed with positive and negative rational numbers in any form, using tools strategically. Apply properties of operations to calculate with numbers in any form; convert between forms as appropriate; and assess the reasonableness of answers using mental computation and estimation strategies. (8-PS2-1, 8-PS2-2)
7.EE.B.4	Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities. (8-PS2-1, 8-PS2-2)

GRADE EIGHT

Energy

Students who demonstrate understanding can:

- 8-PS3-1** Construct and interpret graphical displays of data to describe the relationships of kinetic energy to the mass of an object and to the speed of an object. [Clarification Statement: Emphasis is on descriptive relationships between kinetic energy and mass separately from kinetic energy and speed. Examples could include riding a bicycle at different speeds, rolling different sized rocks downhill, or getting hit by a plastic ball versus a tennis ball.]
- 8-PS3-2** Develop a model to describe that when the arrangement of objects interacting at a distance changes, different amounts of potential energy are stored in the system. [Clarification Statement: Emphasis is on relative amounts of potential energy, not on calculations of potential energy. Examples of objects within systems interacting at varying distances could include changing the direction/orientation of a magnet, a balloon with static electrical charge being brought closer to a classmate's hair, and the Earth and either a roller coaster cart at varying positions on a hill or objects at varying heights on shelves. Examples of models could include representations, diagrams, pictures, or written descriptions of systems.] [Assessment Boundary: Assessment is limited to two objects and electric, magnetic, and gravitational interactions.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices

Developing and Using Models

Modeling in 6–8 builds on K–5 and progresses to developing, using and revising models to describe, test, and predict more abstract phenomena and design systems.

- Develop a model to describe unobservable mechanisms. (8-PS3-2)

Analyzing and Interpreting Data

Analyzing data in 6–8 builds on K–5 and progresses to extending quantitative analysis to investigations, distinguishing between correlation and causation, and basic statistical techniques of data and error analysis.

- Construct and interpret graphical displays of data to identify linear and nonlinear relationships. (8-PS3-1)

Disciplinary Core Ideas

PS3.A: Definitions of Energy

- Motion energy is properly called kinetic energy; it is proportional to the mass of the moving object and grows with the square of its speed. (8-PS3-1)
- A system of objects may also contain stored (potential) energy, depending on their relative positions. (8-PS3-2)

PS3.C: Relationship Between Energy and Forces

- When two objects interact, each one exerts a force on the other that can cause energy to be transferred to or from the object. (8-PS3-2)

Crosscutting Concepts

Scale, Proportion, and Quantity

- Proportional relationships (e.g. speed as the ratio of distance traveled to time taken) among different types of quantities provide information about the magnitude of properties and processes. (8-PS3-1)

Systems and System Models

- Models can be used to represent systems and their interactions – e.g., processes, and outputs – and energy and matter flows within systems. (8-PS3-2)

Connections to other DCIs in eighth grade: **8.PS2.A** (8-PS3-1)

Connections to other DCIs across grade levels: **4.PS3.B** (8-PS3-1); **6.PS3.C** (8-PS3-2)

Common Core State Standards Connections:

ELA/Literacy –

- RST.6-8.1** Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions. (8-PS3-1)
- RST.6-8.7** Integrate quantitative or technical information expressed in words in a text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table). (8-PS3-1)
- SL.8.5** Integrate multimedia and visual displays into presentations to clarify information, strengthen claims and evidence, and add interest. (8-PS3-2)

Mathematics –

- MP.2** Reason abstractly and quantitatively. (8-PS3-1)
- 6.RP.A.1** Understand the concept of ratio and use ratio language to describe a ratio relationship between two quantities. (8-PS3-1)
- 6.RP.A.2** Understand the concept of a unit rate a/b associated with a ratio $a:b$ with $b \neq 0$, and use rate language in the context of a ratio relationship. (8-PS3-1)
- 7.RP.A.2** Recognize and represent proportional relationships between quantities. (8-PS3-1)
- 8.EE.A.1** Know and apply the properties of integer exponents to generate equivalent numerical expressions. (8-PS3-1)
- 8.EE.A.2** Use square root and cube root symbols to represent solutions to equations of the form $x^2 = p$ and $x^3 = p$, where p is a positive rational number. Evaluate square roots of small perfect squares and cube roots of small perfect cubes. Know that $\sqrt{2}$ is irrational. (8-PS3-1)
- 8.F.A.3** Interpret the equation $y = mx + b$ as defining a linear function, whose graph is a straight line; give examples of functions that are not linear. (8-PS3-1)

GRADE EIGHT

Space Systems

Students who demonstrate understanding can:

- 8-ESS1-1** **Develop and use a model of the Earth-sun-moon system to describe the cyclic patterns of lunar phases, eclipses of the sun and moon, and seasons.** [Clarification Statement: Examples of models can be physical, graphical, or conceptual.]
- 8-ESS1-2** **Develop and use a model to describe the role of gravity in the motions within galaxies and the solar system.** [Clarification Statement: Emphasis for the model is on gravity as the force that holds together the solar system and Milky Way galaxy and controls orbital motions within them. Examples of models can be physical (such as the analogy of distance along a football field or computer visualizations of elliptical orbits) or conceptual (such as mathematical proportions relative to the size of familiar objects such as students' school or state).] [Assessment Boundary: Assessment does not include Kepler's Laws of orbital motion or the apparent retrograde motion of the planets as viewed from Earth.]
- 8-ESS1-3** **Analyze and interpret data to determine scale properties of objects in the solar system.** [Clarification Statement: Emphasis is on the analysis of data from Earth-based instruments, space-based telescopes, or spacecraft to determine similarities and differences among solar system objects. Examples of scale properties include the sizes of an object's layers (such as crust or atmosphere), surface features (such as volcanoes), or orbital radius. Examples of data include statistical information, drawings and photographs, or models.] [Assessment Boundary: Assessment does not include recalling facts about properties of the planets or other solar system bodies.]

GRADE EIGHT

History of Earth

Students who demonstrate understanding can:

8-ESS1-4 Construct a scientific explanation based on evidence from rock strata for how the geologic time scale is used to organize Earth’s 4.6-billion-year-old history. [Clarification Statement: Emphasis is on how analyses of rock formations and the fossils they contain are used to establish relative ages of major events in Earth’s history. Examples of Earth’s major events could range from being very recent (such as the last Ice Age or the earliest fossils of Homo sapiens) to very old (such as the formation of Earth or the earliest evidence of life). Examples can include the formation of mountain chains or ocean basins, the evolution or extinction of particular living organisms, or significant volcanic eruptions.] [Assessment Boundary: Assessment does not include recalling the names of specific periods or epochs and events within them.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Constructing Explanations and Designing Solutions</p> <p>Constructing explanations and designing solutions in 6–8 builds on K–5 experiences and progresses to include constructing explanations and designing solutions supported by multiple sources of evidence consistent with scientific ideas, principles, and theories.</p> <ul style="list-style-type: none"> Construct a scientific explanation based on valid and reliable evidence obtained from sources (including the students’ own experiments) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (8-ESS1-4) 	<p>ESS1.C: The History of Planet Earth</p> <ul style="list-style-type: none"> The geologic time scale interpreted from rock strata provides a way to organize Earth’s history. Analyses of rock strata and the fossil record provide only relative dates, not an absolute scale. (8-ESS1-4) 	<p>Scale Proportion and Quantity</p> <ul style="list-style-type: none"> Time, space, and energy phenomena can be observed at various scales using models to study systems that are too large or too small. (8-ESS1-4)

GRADE EIGHT

Natural Selection and Adaptations

Students who demonstrate understanding can:

- 8-LS4-1** Analyze and interpret data for patterns in the fossil record that document the existence, diversity, extinction, and change of life forms throughout the history of life on Earth under the assumption that natural laws operate today as in the past. [Clarification Statement: Emphasis is on finding patterns of change in the level of complexity of anatomical structures in organisms or the chronological order of fossil appearance in the rock layers.] [Assessment Boundary: Assessment does not include the names of individual species or geological eras in the fossil record.]
- 8-LS4-2** Apply scientific ideas to construct an explanation for the anatomical similarities and differences among modern organisms and between modern and fossil organisms to infer evolutionary relationships. [Clarification Statement: Emphasis is on explanations of the evolutionary relationships among organisms in terms of similarities or differences of the gross appearance of anatomical structures.]
- 8-LS4-3** Analyze displays of pictorial data to compare patterns of similarities in the embryological development across multiple species to identify relationships not evident in the fully formed anatomy. [Clarification Statement: Emphasis is on inferring general patterns of relatedness among embryos of different organisms by comparing the macroscopic appearance of diagrams or pictures.] [Assessment Boundary: Assessment of comparisons is limited to gross appearance of anatomical structures in embryological development.]
- 8-LS4-4** Construct an explanation based on evidence that describes how genetic variations of traits in a population increase some individuals' probability of surviving and reproducing in a specific environment.
- 8-LS4-6** Use mathematical representations to support explanations of how natural selection may lead to increases and decreases of specific traits in populations over time. [Clarification Statement: Emphasis is on using mathematical models, probability statements, or proportional reasoning to support explanations of trends in changes to populations over time.] [Assessment Boundary: Assessment does not include Hardy Weinberg calculations.]

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Analyzing and Interpreting Data Analyzing data in 6–8 builds on K–5 experiences and progresses to extending quantitative analysis to investigations, distinguishing between correlation and causation, and basic statistical techniques of data and error analysis.</p> <ul style="list-style-type: none"> ▪ Analyze displays of data to identify linear and nonlinear relationships. (8-LS4-3) ▪ Analyze and interpret data to determine similarities and differences in findings. (8-LS4-1) <p>Using Mathematics and Computational Thinking Mathematical and computational thinking in 6–8 builds on K–5 experiences and progresses to identifying patterns in large data sets and using mathematical concepts to support explanations and arguments.</p> <ul style="list-style-type: none"> ▪ Use mathematical representations to support scientific conclusions and design solutions. (8-LS4-6) 	<p>LS4.A: Evidence of Common Ancestry and Diversity</p> <ul style="list-style-type: none"> ▪ The collection of fossils and their placement in chronological order (e.g., through the location of the sedimentary layers in which they are found or through radioactive dating) is known as the fossil record. It documents the existence, diversity, extinction, and change of many life forms throughout the history of life on Earth. (8-LS4-1) ▪ Anatomical similarities and differences between various organisms living today and between them and organisms in the fossil record, enable the reconstruction of evolutionary history and the inference of lines of evolutionary descent. (8-LS4-2) ▪ Comparison of the embryological development of different species also reveals similarities that show relationships not evident in the fully-formed anatomy. (8-LS4-3) 	<p>Patterns</p> <ul style="list-style-type: none"> ▪ Patterns can be used to identify cause and effect relationships. (8-LS4-2) ▪ Graphs, charts, and images can be used to identify patterns in data. (8-LS4-1, 8-LS4-3) <p>Cause and Effect</p> <ul style="list-style-type: none"> ▪ Phenomena may have more than one cause, and some cause and effect relationships in systems can only be described using probability. (8-LS4-4, 8-LS4-6)

<p>Constructing Explanations and Designing Solutions Constructing explanations and designing solutions in 6–8 builds on K–5 experiences and progresses to include constructing explanations and designing solutions supported by multiple sources of evidence consistent with scientific ideas, principles, and theories.</p> <ul style="list-style-type: none"> Apply scientific ideas to construct an explanation for real-world phenomena, examples, or events. (8-LS4-2) Construct an explanation that includes qualitative or quantitative relationships between variables that describe phenomena. GRADE EIGHT

Engineering, Technology, and Applications of Science		
Students who demonstrate understanding can:		
8-ETS1-1 Define the criteria and constraints of a design problem with sufficient precision to ensure a successful solution, taking into account relevant scientific principles and potential impacts on people and the natural environment that may limit possible solutions.		
8-ETS1-2 Evaluate competing design solutions using a systematic process to determine how well they meet the criteria and constraints of the problem.		
8-ETS1-3 Analyze data from tests to determine similarities and differences among several design solutions to identify the best characteristics of each that can be combined into a new solution to better meet the criteria for success.		
8-ETS1-4 Develop a model to generate data for iterative testing and modification of a proposed object, tool, or process such that an optimal design can be achieved.		
The performance expectations above were developed using the following elements from the NRC document <i>A Framework for K-12 Science Education</i> :		
Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Asking Questions and Defining Problems Asking questions and defining problems in grades 6–8 builds on grades K–5 experiences and progresses to specifying relationships between variables, and clarifying arguments and models.</p> <ul style="list-style-type: none"> Define a design problem that can be solved through the development of an object, tool, process or system and includes multiple criteria and constraints, including scientific knowledge that may limit possible solutions. (8-ETS1-1) <p>Developing and Using Models Modeling in 6–8 builds on K–5 experiences and progresses to developing, using, and revising models to describe, test, and predict more abstract phenomena and design systems.</p> <ul style="list-style-type: none"> Develop a model to generate data to test ideas about designed systems, including those representing inputs and outputs. (8-ETS1-4) <p>Analyzing and Interpreting Data Analyzing data in 6–8 builds on K–5 experiences and progresses to extending quantitative analysis to investigations, distinguishing between correlation and causation, and basic statistical techniques of data and error analysis.</p> <ul style="list-style-type: none"> Analyze and interpret data to determine similarities and differences in findings. (8-ETS1-3) 	<p>ETS1.A: Defining and Delimiting Engineering Problems</p> <ul style="list-style-type: none"> The more precisely a design task’s criteria and constraints can be defined, the more likely it is that the designed solution will be successful. Specification of constraints includes consideration of scientific principles and other relevant knowledge that are likely to limit possible solutions. (8-ETS1-1) <p>ETS1.B: Developing Possible Solutions</p> <ul style="list-style-type: none"> A solution needs to be tested, and then modified on the basis of the test results, in order to improve it. (8-ETS1-4) There are systematic processes for evaluating solutions with respect to how well they meet the criteria and constraints of a problem. (8-ETS1-2, 8-ETS1-3) Sometimes parts of different solutions can be combined to create a solution that is better than any of its predecessors. (8-ETS1-3) Models of all kinds are important for testing solutions. (8-ETS1-4) 	<p>Influence of Science, Engineering, and Technology on Society and the Natural World</p> <ul style="list-style-type: none"> All human activity draws on natural resources and has both short and long-term consequences, positive as well as negative, for the health of people and the natural environment. (8-ETS1-1) The uses of technologies and limitations on their use are driven by individual or societal needs, desires, and values; by the findings of scientific research; and by differences in such factors as climate, natural resources, and economic conditions. (8-ETS1-1)

<p>Engaging in Argument from Evidence Engaging in argument from evidence in 6–8 builds on K–5 experiences and progresses to constructing a convincing argument that supports or refutes claims for either explanations or solutions about the natural and designed world.</p> <ul style="list-style-type: none"> Evaluate competing design solutions based on jointly developed and agreed-upon design criteria. (8-ETS1-2) 	<p>ETS1.C: Optimizing the Design Solution</p> <ul style="list-style-type: none"> Although one design may not perform the best across all tests, identifying the characteristics of the design that performed the best in each test can provide useful information for the redesign process—that is, some of those characteristics may be incorporated into the new design. (8-ETS1-3) The iterative process of testing the most promising solutions and modifying what is proposed on the basis of the test results leads to greater refinement and ultimately to an optimal solution. HIGHLIGHTS OF EQUITABLE ACCESS TO EXCELLENT EDUCATORS PLAN

This document is a summary of Arkansas’ Equitable Access plan prior to submission on June 1, 2015. All of the work for this plan has been done in collaboration with multiple stakeholder groups. The plan will serve as a roadmap or guide to ongoing efforts to provide excellent educators for all of Arkansas’ students.

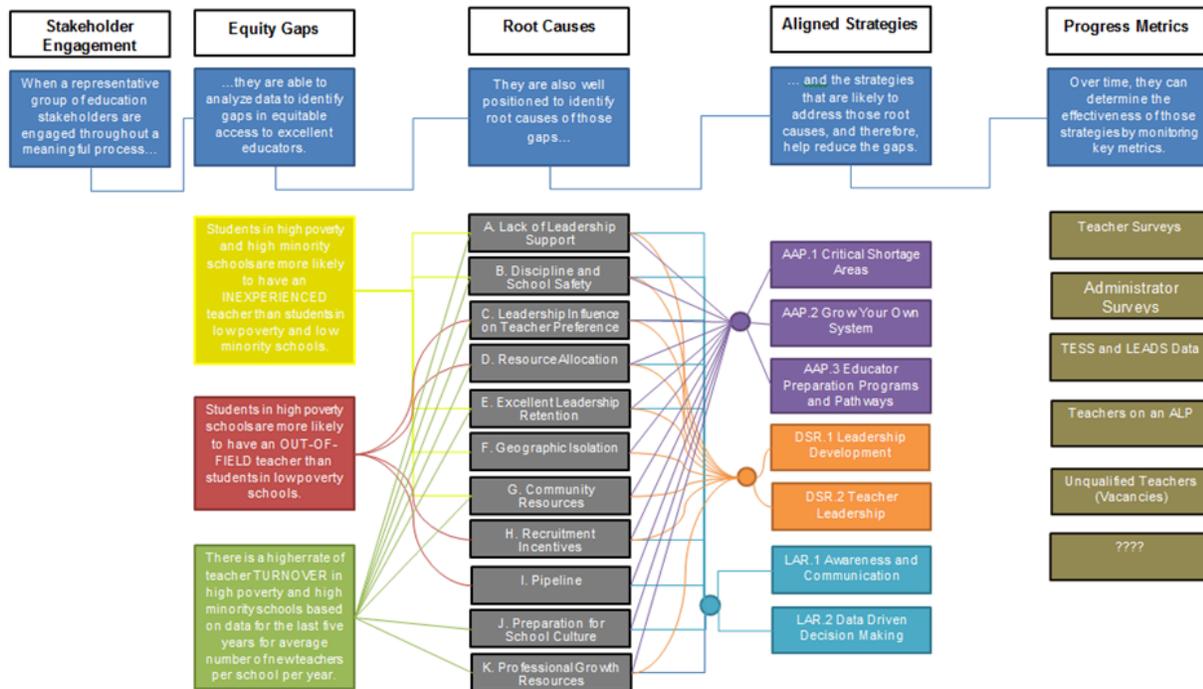

In communicating the strategies and efforts detailed in this plan, we have been asked, “What makes this different from things that we have tried in the past?” The difference is the ADE’s focused efforts to transform our educator workforce by focusing on attracting, preparing, supporting, developing and retaining the most effective educators to serve students in Arkansas. None of the strategies in this plan involve a new program or a one-shot fix to education. This plan, however, focuses on identified existing strategies that:

- (1) should be continued because they are already preventing equity gaps from increasing,
- (2) could reduce equity gaps if improved, enhanced, or expanded
- (3) or with additional research show evidenced-based strategies that are likely to reduce equity gaps by addressing the root causes previously identified

In developing the plan, the stakeholders worked from the following Theory of Action:

The work has been linked together with this Logic Model depiction:

These models will assist in the continued development of the plan and also in the ongoing process of revision.

Background:

Education Secretary Arne Duncan’s July 7, 2014, letter to SEAs, and guidance published on November 10, 2014, that

(1) under the ESEA each state’s Title I, Part A plan include information on the specific steps that the ADE will take to ensure that students from low-income families, and students of color are not taught at higher rates than other children by inexperienced, unqualified, or out-of-field teachers, and the measures that the agency will use to evaluate and publicly report the progress of the agency with respect to such steps; and

(2) that a state’s plan be revised by the SEA as data indicates changes in state’s needs.

Given the importance of strong leadership, our plan also includes the specific steps that we will take to ensure that teachers in high poverty, high minority schools are supported by excellent leaders.

Excellent Teacher -- one who:

(1) through experience and training, is an expert in his or her field, meets the proficient or distinguished designation on evaluations, and constantly improves his or her practice; and

(2) through a deep commitment to student learning, motivates student to learn, brings about the learning progress needed to close achievement gaps among students of all cultures, socioeconomic levels, and learning abilities, and cultivates higher-ordered thinking skills.

Excellent Leader -- an instructional leader with strong ethics and an unyielding commitment to students, who:

(1) through experience and training, meets the proficient or exemplary designation on evaluations and can expertly facilitate school change and improvement;

(2) through a deep commitment to the education system, advocates, nurtures, and sustains a safe and secure environment for staff and students and an instructional program that are conducive to student learning and supportive of teacher personal and professional growth; and

(3) collaborates with community members, to mobilize community resources and respond to diverse community and cultural interests and needs.

The Equitable Access to Excellent Educators (EAEE) Plan is designed to focus department resources on:

- The equity gaps that are most meaningful,
- The root causes that are most common across equity gaps,
- The strategies that will address the most root causes, and
- The metrics that will monitor progress of the most strategies.

To leverage resources and political will, the EAEE Plan is designed to begin implementation with an emphasis on:

- Improving the effectiveness of existing strategies and activities, and
- Initial implementation in districts where the greatest gains can be revealed, based on data regarding HP/HM status

Data: Poverty and Minority definitions and parameters.

		Range	Median
Poverty Measures	High Poverty Schools – Schools in the highest 25% of all schools ranked by % F/RL (269 schools, Appendix A)	78.8 - 100%	87.32%
	Low Poverty Schools – Schools in the lowest 25% of all schools ranked by % F/RL (268 schools)	0 - 42.41%	1.93%
Minority Measures	High Minority Schools – Schools in the highest 25% of all schools ranked by % non-white students* (269 schools, Appendix B)	54.35 - 100%	76.64%

Low Minority Schools – Schools in the lowest 25% of all schools ranked by % non-white students (268 schools)	0 - 8.26%	5.24%
--	-----------	-------

* Non-white = American Indian/Alaskan Native, Asian, Black, Native Hawaiian/Pacific Islander, Hispanic, 2 or more races

Definitions:

Inexperienced Teacher	A teacher with less than one year of full-time professional teaching experience; a teacher in his or her first year of teaching. Source: SIS
Out-of-field Teacher	A teacher who is teaching out of license area while on an Additional Licensure Plan (ALP) Source: AELS
Unqualified Teacher	A long-term sub waiver, licensed individual in an out-of-area position for more than 30 days during 1 school year, or an unlicensed or non-degreed substitute teacher in an out-of-area position for more than 30 consecutive days during 1 semester; i.e., Source: AELS
Teacher Turnover	Turnover was defined as the average number of inexperienced teachers (teachers in their first year of teaching) employed per school, per year, over the last 5 years. Source: SIS

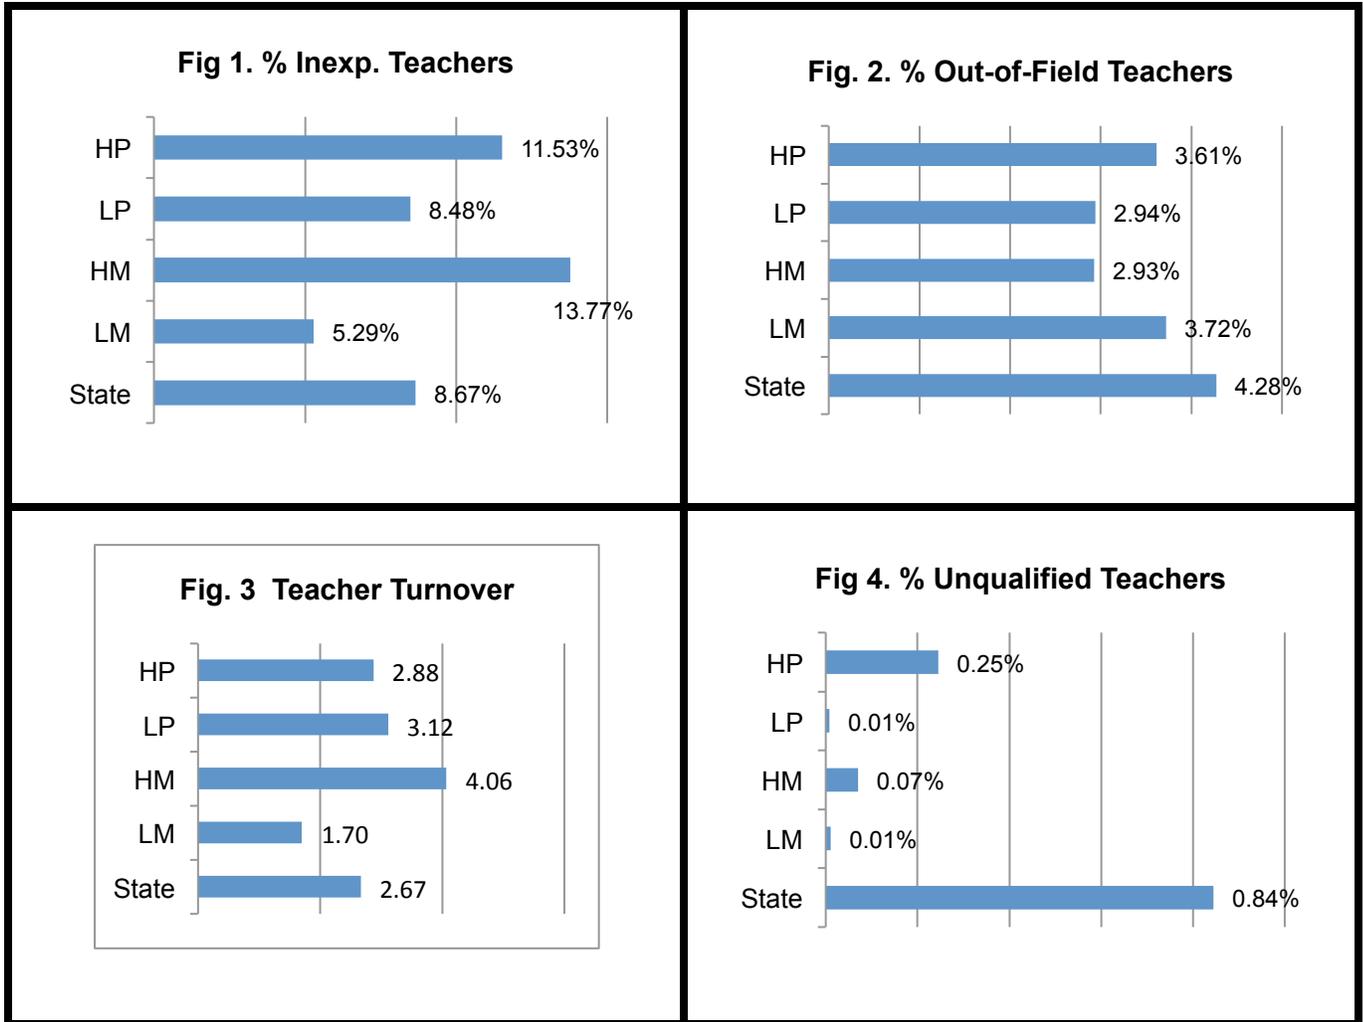

Equity Gaps

- Students in high poverty and high minority schools are more likely to have an **INEXPERIENCED** teacher than students in low poverty and low minority schools.
- Students in high poverty schools are more likely to have an **OUT-OF-FIELD** teacher than students in low poverty schools.
- There is a higher rate of teacher **TURNOVER** in high poverty and high minority schools based on data for the last five years for average number of new teachers per school per year.

Identified Equity Gaps

Category	High Poverty vs Low Poverty	High Minority vs Low Minority	High Poverty vs State Average	High Minority vs State Average
Inexperienced Teachers (Figure 1 in Table 3B.6)	HP schools have Inexperienced Teachers at a rate 1.4 times greater than LP schools.	HM schools have Inexperienced Teachers at a rate 2.6 times greater than LM schools.	HP schools have Inexperienced Teachers at a rate 1.3 times greater than the state average.	HM schools have Inexperienced Teachers at a rate 1.6 times greater than the state average.
Out-of-Field Teachers (Figure 2 in Table 3B.6)	HP schools have Out-of-Field Teachers at a rate 1.2 times greater than LP schools.			
Teacher Turnover (Figure 3 in Table 3B.6)		Over the last 5 years, HM schools had new teachers (per school per year) at a rate 2.4 times greater than LM schools.	Over the last 5 years HP schools had new teachers (per school per year) at a rate 1.1 times greater than the state average.	Over the last 5 years HM schools had new teachers (per school per year) at a rate 1.5 times greater than the state average.
Unqualified Teachers (Figure 4 in Table 3B.6)	HP schools have Unqualified Teachers at a rate 25 times greater than LP schools.	HM schools have Unqualified Teachers at a rate 7 times greater than LM schools.		

Figures reflecting the data

Root Cause Analysis:

- Root Causes Addressing Local Leadership
 - A. Lack of Local Leadership Support – Leaders are not prepared to support new teachers or to address the unique cultures of high poverty schools and high minority schools.
 - B. Discipline and School Safety – High poverty schools and high minority schools have the reputation of having more discipline issues and lack the resources to provide needed security.
 - C. Leadership Influence on Teacher Preferences – Leaders are unable to foster an environment that encourages teachers will commit to the “difficult” assignments often found in high poverty schools and high minority schools.

- D. Resource Allocation – Leaders are not prepared or are unable to direct resources to meet the most pressing needs of high poverty schools and high minority schools.
- Root Causes Addressing Recruitment and Retention
 - E. Excellent Leadership Retention – Frequent turnover of administrators in high poverty schools and high minority schools makes it difficult to establish a “Culture of Excellence.”
 - F. Geographic Isolation – The geographic isolation of many high poverty schools and high minority schools makes it difficult to recruit and retain teachers because of the lack of community resources.
 - G. Community Resources – Communities with high poverty schools and high minority schools are unable to support the needs of educators and their families.
 - H. Recruitment Incentives – Educators are unaware of or do not take advantage of incentives available for commitments to high poverty schools and high minority schools.
- Root Causes Addressing Educator Preparation and Pathways
 - I. Pipeline – Educator preparation program and pathway availability does not align to the needs of the high poverty schools and high minority schools.
 - J. Preparation for School Culture – Teacher candidates are not adequately prepared to work in the unique cultures of high poverty schools and high minority schools and to address specific issues such as wide diversity, school readiness, language proficiency, and lack of prior knowledge.
 - K. Professional Growth Resources – Educator preparation programs and pathways do not have the resources to provide ongoing support for recent graduates of the programs whose teaching assignments are with high poverty schools or high minority schools.

To achieve our state’s objective of provide equitable access to excellent teachers and leaders, the ADE has developed strategies that correspond to the root causes underlying the equity gaps. These strategies were identified through the root cause analyses previously described that were conducted both internally and externally with the stakeholder groups.

As a first step, the ADE identified existing strategies that either (1) should be continued because they are already preventing equity gaps from increasing, or (2) could reduce equity gaps if improved, enhanced, or expanded. The second step was to identify additional research- or evidenced-based strategies that are likely to reduce equity gaps by addressing the root causes previously identified.

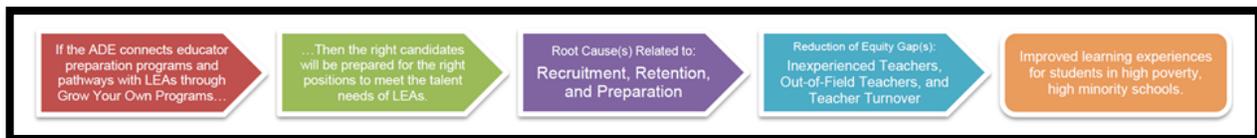

These strategies have been categorized into three strands: Attract and Prepare (AAP); Develop; Support, and Retain (DSR); and Leverage Agency Resources (LAR). The purpose of organizing the strategies into three strands is to see the interconnectedness between the strategies, which woven together will support and increase the effectiveness of one another.

Strategies within the Attract and Prepare (AAP) strand

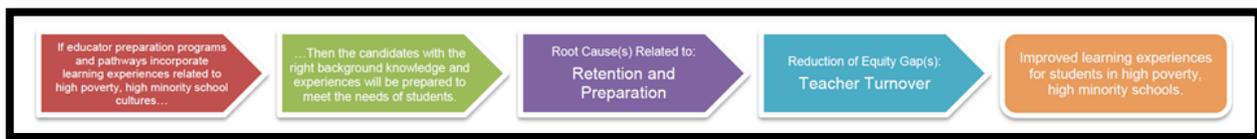

AAP.1: Educator Shortage Predictor Model

- An model to predict educator shortage is being developed to predict future shortage areas. This model will enable a data driven system to attract and effectively prepare teacher candidates to be successful in critically needed content areas, grade levels, and geographic locations. The Educator Shortage Predictor Model will enhance existing work to improve the educator talent pipeline.
- Data gained from this shortage model will be used to drive program development, student advising, planning incentives for high need areas, and recruiting teacher candidates.
- During the next two years, this model will be created and refined to provide needed data to all stakeholders and to drive discussions about how to improve the educator pipeline. Researchers who are working with Arkansas are also working with Missouri and Louisiana on similar models with the hope of collaboration among border states.

AAP.2 Grow Your Own System: Teacher Cadet; e-Stem Residency; University of Arkansas a Monticello Residency for MAT Program:

- During the next two years, The Teacher Cadet program will expand from its current eight programs in Arkansas High Schools (Conway, Marion, Lonoke, Warren, Hamburg, Paris, Clarksville and Southside [Independence County]) to twenty schools with half being from high poverty schools and high minority schools.
- eStem Residency: The creation of an intensive one-year training program for aspiring teachers with degrees in the STEM fields who have had no formal teacher training featuring:
 - A full immersion experience in an authentic school environment
 - Intensive professional development, book studies, classroom students in various instructional settings
 - An opportunity to develop a teacher preparation and induction model that can be replicated in a variety of school settings
- University Residency: provide an alternative route for paraprofessionals to become licensed in K-6 Elementary Education with UAM partnering with school districts in their service area

AAP.3 Educator Preparation Programs and Pathways: Competencies will be updated to include culturally responsive teaching, data-driven advising, professional growth resources

Strategies within the Develop, Support, and Retain (DSR) strand

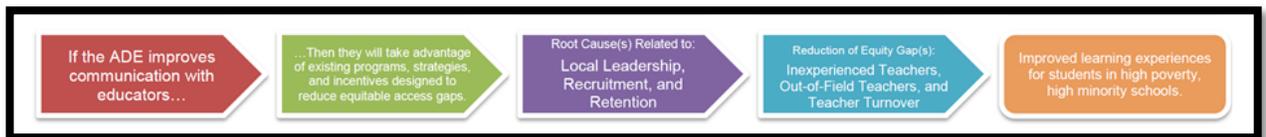

- **DSR.1 Leadership Development:** Revisit the vision of the Leadership Coordinating Council; Encourage participation in the Arkansas Superintendent Evaluation System; Continue Support for the Master Principal Institute and partner with the Leadership Academy to define “high needs schools” and to revise rules for the program to encourage more principals to take on challenging duties. The ADE also will conduct additional research to determine the barriers, or perceived barriers, that have kept leaders from these schools from applying; partner with the ALA to research the impact that Master Principals have had on student success in HP/HM schools.

- **DSR.2 Teacher Leadership Development:** Within the next two years, ADE plans to sponsor up to eight school teams to attend the Team Leadership Institute. They will participate for three years then at which time they will become the mentor model school for the new teams. The Team Leadership Institute seeks to build capacity to create learning environments, move the work of the district, school, and organization forward by improving systems within the district, and provide tools and skills to work as a team. The work of the team should significantly move the work of the system and result in increasing student increasing student achievement.

Strategies within the Leverage Agency Resources (LAR) strand

- **LAR.1 Awareness and Communication:** Existing Strategy Explanation
 - ADE has determined that many existing strategies are underutilized due to lack of awareness of their existence. This activity will focus on communicating effectively with leaders of high poverty schools and high minority schools regarding existing programs such as incentives for commitments to work in these schools. The strategy will begin with utilizing agency communication tools such as the website and social media communication through Twitter and Facebook and the monthly newsletter. The ADE will also utilize feedback from novice teacher surveys to provide Educator Preparation Programs with data about novice teacher’s preparation and experiences/challenges encountered within the first year of teaching. The ADE will also survey educators at the time or licensure renewal to gather data about retention, ongoing support, opportunities for leadership, etc.

LAR.2 Data Driven Decision Making: Data Collection and Analysis through a District, ADE and BloomBoard partnership. Districts will utilize existing TESS and LEADS data already in BloomBoard and access premium reports to engage in a cycle of instructional improvement. The ADE office of School Improvement, Office of Educator Effectiveness and Professional Development Unit will partner to support 4 districts with high populations of high poverty and minority students to use data to link professional practice with professional development and growth opportunities and to identify areas of needed improvement for individuals and schools. The ADE will provide financial support for up to two years for four districts.

Request Approval of Nominated Members for the Professional Licensure Standards Board to Replace Members Whose Terms are Expiring June 30, 2015.

Pursuant to § 6-17-422 members of the PLSB serve rotating terms. Five (5) members of the Professional Licensure Standards Board will complete their three-year terms on June 30, 2015. Nominations to fill these positions are as follows:

- Dr. Shelly Albritton, Associate Professor at the University of Central Arkansas, has been nominated for re-appointment by the Arkansas Professors of Educational Administration (ARPEA) to represent Educational Leadership.
- Dr. Greg Murry, Superintendent of Conway School District has been nominated by the Arkansas Association of Educational Administrators (AAEA) to represent Public School Superintendents.
- Todd Sellers, Principal at Bethel Middle School in the Bryant School District has been nominated by the Arkansas Association of Educational Administrators (AAEA) to represent Middle Level Building Administrators.
- Brenda Brown, Pre-K teacher at Helena-West Helena Elementary School in the Helena-West Helena School District has been re-nominated by the Arkansas Education Association (AEA) to represent Public School Classroom Teachers – Grades P-4.
- Dr. Mary B. Gunter, Director for the Center for Leadership and Learning at Arkansas Tech University has been nominated by the Arkansas Association of Supervision and Curriculum Development (AASCD) to represent Curriculum Programs.

The terms of these members will begin on July 1, 2015 and end on June 30, 2018.

Mr. Wilson

Attached is an invitation to attend the Arkansas State Board of Education meeting to be held on June 11, 2015 in the auditorium of the Pulaski County Special School District located at 925 East Dixon Road, Little Rock, AR 72206. At that time you and/or representatives from you district will be given the opportunity to present evidence concerning your appeal of the probationary status assigned to one of the schools in your district.

Copies of this invitation are also being mailed to you via certified and regular mail.

If you have any questions, please feel free to contact me at 501-682-4555.

Thank you

Johnie Walters

State Board Of Education-ADE
Office of the Commissioner
Four State Capitol Mall, Room 301-A
Little Rock, AR 72201

Dear Board Members:

My name is Tom Wilson and I am superintendent of schools at Barton-Lexa School District. I am filing an appeal concerning a standard violation of Rule 9.03.3. This standard violation concerns secondary course offerings and the district not offering Physics as part of the required 38 courses. This carries a status of Probation.

I have evidence that the course was offered in our Digital Learning Schedule. However, not one student enrolled in the course.

A new law, ACT 853 of 2015, specifically says if " the school district made the course available to students but not one student signed up to take the course" it is not a violation.

My question is:

1. Should our school district be punished by serving a probation for a previous infraction which is now irrelevant by ACT 853 beginning July 1, 2015?

Page 2

Both schools in my district received a "B" rating on the new rating system. We strive very hard to do the right thing. I am asking the Board to please accept our appeal and not continue the status of Probation past July 1, 2015 due to the new law changing the rule.

Sincerely,

A handwritten signature in black ink, appearing to read "Tom Wilson", with a long horizontal flourish extending to the right.

Tom Wilson
Superintendent
Barton-Lexa School District

Memo

To: Arkansas State Board of Education
From: Chris Goodin
CC: Tom Wilson, Johnnie Walters, Brandon Morrison
Date: May 27, 2015
Re: Appeal of Probationary Status for the Barton-Lexa School District

- Physics was offered to our students as a course option for the 2014-2015 school year. However, no students requested the course.
- As a result we chose not to schedule Physics as an on-campus course as we did last year due to the low amount of interest in the course.
- I have attached copies of our course request forms for 11th and 12th grades reflecting that Physics was offered to our students. I have also attached copies of our TRIAND Master Schedule Matrix for marking periods one and three reflecting that the course was indeed scheduled throughout the school year.
- Last year our Physics course was online through Virtual Arkansas. We have the course scheduled with Virtual Arkansas again this year although there are no students in the class. I have attached a copy of page four of the Master Schedule Matrix showing the course.
- Physics is/was readily available for any student should the need for it arise during the school year.
- I did go through the schedule using the standards checklist at the beginning of the school year and noted that all required courses were scheduled. The fact that there was no student actually enrolled in the Physics course was an oversight on my part.
- To ensure no mistakes for 2015-2016:
 - I have again checked the schedule against the standards checklist. All required courses are scheduled with students enrolled.

- My first year as a principal when the schedule was set and all students were scheduled I took all of these materials to my standards specialist at ADE and asked him review it for correctness and accuracy. I will do the same this summer.
- A genuine, good faith effort was made to provide the course as required by Standards.
- At no time and in no way was any student at any time denied access to the course.

On behalf of the Barton-Lexa School District and for the following reasons I respectfully submit and request:

- A genuine, good faith effort was made to comply with Standards requirements and no student was harmed or denied access as a result of this mistake.
- Act 853 of the 2015 Legislative Session provides a process for a school district to avoid a probationary citation in the event that it is faced with this same circumstance in the future.
- Act 853 will become effective on July 22, 2015 prior to the beginning of the 2015-2016 school year meaning that school districts may be exempted from certain standards as early as the upcoming school year.
- With these circumstances in mind I request that the probationary status for Barton High School and the Barton-Lexa School District be nullified for the 2015-2016 school year.

I will be happy to attempt to provide you with any additional information you desire or answer any questions that you may have.

Respectfully,

Chris Goodin

ACTION AGENDA ITEM

Title: England School District – Appeal of Probationary Status
Not teaching required 38 Units for the 2014-15
school year.

Agenda Category: Action Agenda

Full Item Title: England School District – Appeal of Probationary Status
Not teaching required 38 Units for the 2014-15
school year.

Attachments: Appeal Letter, Evidence submitted by district

Background Information

England School District requests a waiver from Standards Rules 9.03.4.1 (Drama – 1/2 unit) and 9.03.4.2 (Physics – 1 unit).

The district did not provide a Drama (1/2 unit) course in their 2014-15 schedule.

The district had two (2) student enrolled in Physics until the end of the first semester when they dropped the course.

The district is requesting Accredited-probationary status not be upheld and a status of Accredited-cited be applied to England High School.

England School District

**ENGLAND SCHOOL DISTRICT

(501)842-3698/FAX**

Eddie Johnson, Superintendent

May 5, 2015

Office of the Commissioner
Arkansas Department of Education
Four State Capitol Mall Room 304-A
Little Rock, AR 72201

To whom it may concern,

Please consider this letter as the England School District's notice of written appeal that ADE has improperly determined that England High School has failed to meet Standards for Accreditation. England High School has been given a probationary status for no students taking oral communication/ drama and physics, Rule (9.03.3).

We had two students enrolled in physics through Virtual Arkansas until both students failed the first semester and dropped the course. Virtual Arkansas does not offer the first semester of physics in the spring semester so that left us with no students in physics.

Also, Virtual Arkansas had drama on their selection sheet for the 2014-2015 school year but they were unable to provide the course. We did have students signed up to take the course but it was August when we found out that Virtual Arkansas could not offer the course. We did not have a teacher with drama certification to teach the ½ drama unit to go along with the ½ unit of oral communication. Our high school counselor contacted all of the other state approved vendors for online courses and they did not offer drama.

This appeal is being made based upon the new legislation, ACT 853, which ensures that a school district is not in violation of the standards of accreditation if the school district offers a course and no students take the course.

Sincerely,

Eddie Johnson
Superintendent, England School District

ACT

Where AR Kids are Our Kids!

May 13, 2014

To Whom It May Concern:

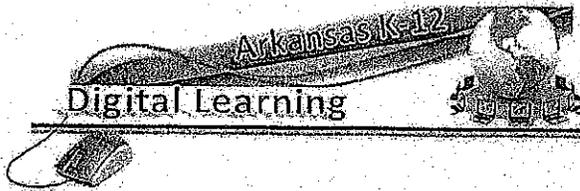

Your district registered students for the Drama, French I, or French II class with Virtual Arkansas. We regret to inform you that the Drama, French I, and French II courses were not approved by ADE for Virtual Arkansas to provide as satisfying the requirements of Act 1280 the 2014 – 2015 academic year.

We are investigating if Virtual Arkansas may provide the Drama, French I, and French II classes to those districts that registered students, as a digital learning class that will not be used by the district to satisfy the requirements of Act 1280. Once we receive definitive direction from ADE, we will contact you and let you know if Virtual Arkansas will be able to offer these classes during the 2014 – 2015 academic year.

Thank you for your understanding and patience as we work to resolve this issue. If you have questions, please contact the Central Office at 501.477.2781.

Sincerely,

Michael Lar, Associate Director
Virtual Arkansas

Mr. Johnson,
 In October and early
 November I checked the course
 offerings of the approved
 providers and none offered
 Drama.

M. B. Newcomb

(2)

Mr. Johnson,

The attached copies are a series of email between me and David Slaymaker at Arkansas School for Math, Science and Arts (ASMSA). I sent an original email in November (2014) and these are emails that were sent in early December (2015).

I know these emails are confusing so please allow me to give you the timeline and information in a simpler format:

After checking the Arkansas approved on-line providers for Drama and not finding the course, I contacted ASMSA because they were our provider for the last number of years for Drama. I contacted ASMSA to inquire if they were offering Drama would it be perhaps a possibility to have our students in that class via computer. David Slaymaker from ASMSA responded letting me know Drama was not one of their on-line courses this year but they did have approval to teach the Drama course. Next I asked Mr. Slaymaker if there would be any possible way they could they might could add this and offer it since they were approved and several schools had the need. He responded he was not certain but if we had an interest he would have to propose and clear this with his senior administration. Due to the fact they did not receive any grant monies to support the Drama they would have to hire an adjunct instructor and the cost would be \$300 per student with the minimum charge would be \$4500 per semester. I contacted two other schools to inquire if they might be interested in sharing this cost. By the time those two schools got back to me it was too late to pursue trying to get this for just England High School because neither school was interested in this proposition.

Hello- Sorry to say no. We are approved to teach drama by ADE but are not currently offering it. At present we are offering:

Chinese
French
Pre-AP Physics
AP Biology
AP Calculus
AP Statistics

We do intend to add more courses next year. Please note that the STEM courses are currently grant funded and free of charge. We believe that will continue next year with the additional of more STEM course such as Environmental Science. We have worked with your school before and would certainly like to have you with us again. Please feel free to keep in touch with me and many thanks!

Dave

Hello Mari- It is a difficult situation as lack of funding led to the closure of ODE and the loss of our teachers. We obtained the Drama course approval before we were 100% sure that was the way things would go.

I can think of one possibility for this, and to do so I would need to clear it with our senior administration. There is the possibility that I might be able to hire an adjunct instructor to teach the class for you. If I was able to do this, as we no longer receive any grant money to support drama, the cost of the semester class would be \$300.00 per student per semester with a minimum charge of \$4,500.00 per semester if enrollment was under 15.

If you are interested I am would be happy to check in to this further, but no guarantees. Please keep in mind our STEM and languages classes for next year and hopefully we will be able to work with your school again.

Thank You

Dave

Yes, this is purely speculative if we can do it, but we could have multiple schools. Two would be best. Three would be the maximum. Each school would pay \$300.00 per student but again, we would need to make get the minimum \$4,500.00 so we could pay the teacher and cover our costs.

Also the class would be delivered in one of two ways:

It could be done via the video equipment we used to use if that is possible on your end-

Or via video to the students desk tops. Either way students would need to have internet connected computers with sufficient bandwidth for class as some work would be on line to satisfy the requirement of ACT 1280.

Thanks

Dave

Mr. Johnson,

Mireya Reith
Fayetteville

On May 01, 2015, pursuant to Ark. Code Ann. § 6-15-203, the Arkansas Department of Education (ADE) notified you of the following schools/school district failing to meet standards for accreditation for the 2014-15 school year:

Vicki Saviers
Little Rock

Diane Zook
Melbourne

England High School

Pursuant to Ark. Code Ann. § 6-15-203, your school district had the right to appeal the ADE's determination to the Arkansas State Board of Education (State Board). The appeal was required to be filed by May 15, 2014. Your district filed an appeal on May 05, 2015.

The State Board will conduct a hearing concerning this appeal during its scheduled meeting Thursday, June 11, 2015, in the Auditorium of the Pulaski County Special School District, 925 East Dixon Road, Little Rock, Arkansas, 72206 at 10:00 a.m. You will have an opportunity to address the State Board at that time. The State Board hearing will be conducted pursuant to the legal authority and jurisdiction vested in the State Board by Ark. Code Ann. § 6-15-201 et seq. and the Arkansas Department of Education Rules Governing Standards for Accreditation of Arkansas Public Schools and School Districts.

You and any other representatives of the England School District who can address questions from the State Board concerning this matter should plan to be in attendance during the meeting. Should you wish to submit any documents, exhibits, or written comments, you may do so by submitting those items to my office by **noon on Thursday, May 28, 2015**.

ACTION AGENDA ITEM

Title: Mt. Pine School District – Appeal of Probationary Status
Not teaching required 38 Units for the 2014-15
school year.

Agenda Category: Action Agenda

Full Item Title: Mt. Pine School District – Appeal of Probationary Status
Not teaching required 38 Units for the 2014-15
school year.

Attachments: Appeal Letter, Evidence submitted by district

Background Information

Mt. Pine High School was in violation of Standards Rules 9.03.4.2 (Physics – 1 unit).

The district had two (2) student enrolled in Physics but the students dropped the course during the first two weeks of the fall semester. No other students enrolled.

The district is requesting Accredited-probationary status not be upheld and a status of Accredited be applied to Mt. Pine High School.

5/04/2015

To Mr. Johnie Walters

When I, Mike Keese, was hired in July, there was not a Master Schedule in place. It had been the practice at Mountain Pine to give out student schedules for Jr/Sr. high students during an open house celebration called "Carnival" the Thursday before the Monday of the first day of school. This year the schedule had not been finalized. We passed out temporary schedules on that Thursday and the first day of school on Monday. According to our adopted handbook students then had two weeks to change their schedule without penalty.

During that two week period, we did schedules by hand and not on eschool until we had something definite. Physics was in our Master Schedule during the 5th period of the day. Christine Lippert was the certified teacher and we had two students originally signed up for it. The two students were seniors, . During the first two weeks they dropped and we could convince no other students to take it. We kept Physics on our schedule and Mrs. Lippert assigned to that period in case we had transfers from other schools.

We do have A.P. Chemistry in our schedule and Mrs. Lippert also teaches that during our 2nd period. I just finished proctoring the A.P. Chemistry exam to our 12 seniors that took that course this year.

Along with this fax are the teaching assignments, classes and students of our three Science teachers and the handwritten schedules for
Christine Lippert teaches A.P. Chemistry, Chemistry, Physical Science and Physics. Keith Scott teaches Biology, Pre AP Biology, 7th Grade Science and Environmental Science. Sean Kelloms teaches 8th Grade Science and Pre AP 8th Grade Science.

Sincerely,

Mike Keese

Mr. Gray,

Mireya Reith
Fayetteville

On May 01, 2015, pursuant to Ark. Code Ann. § 6-15-203, the Arkansas Department of Education (ADE) notified you of the following schools/school district failing to meet standards for accreditation for the 2014-15 school year:

Vicki Saviers
Little Rock

Diane Zook
Melbourne

Mt. Pine High School

Pursuant to Ark. Code Ann. § 6-15-203, your school district had the right to appeal the ADE's determination to the Arkansas State Board of Education (State Board). The appeal was required to be filed by May 15, 2014. Your district filed an appeal on May 04, 2015.

The State Board will conduct a hearing concerning this appeal during its scheduled meeting **Thursday, June 11, 2015, in the Auditorium of the Pulaski County Special School District, 925 East Dixon Road, Little Rock, Arkansas, 72206 at 10:00 a.m.** You will have an opportunity to address the State Board at that time. The State Board hearing will be conducted pursuant to the legal authority and jurisdiction vested in the State Board by Ark. Code Ann. § 6-15-201 et seq, and the Arkansas Department of Education Rules Governing Standards for Accreditation of Arkansas Public Schools and School Districts.

Four Capitol Mall
Little Rock, AR
72201-1019
(501) 682-4475
ArkansasEd.org

You and any other representatives of the **Mt. Pine School District** who can address questions from the State Board concerning this matter should plan to be in attendance during the meeting. Should you wish to submit any documents, exhibits, or written comments, you may do so by submitting those items to my office by **noon on Thursday, May 28, 2015**.

Mr. Robert Gray, Superintendent

ACTION AGENDA ITEM

Title: West Side School District (Cleburne Co.) – Appeal of Probationary Status
Not teaching required 38 Units for the 2014-15 school year.

Agenda Category: Action Agenda

Full Item Title: West Side School District (Cleburne Co.) – Appeal of Probationary Status
Not teaching required 38 Units for the 2014-15 school year.

Attachments: Appeal Letter, Evidence submitted by district

Background Information

West Side High School was in violation of Standards Rules 9.03.4.1 (Journalism – 1 unit).

The district states that one student was enrolled in Journalism during the fall semester but the student dropped the class. (See explanation in appeal letter)

The district is requesting Accredited-probationary status not be upheld and a status of Accredited-Cited be applied to West Side High School.

Subject: Appeal of Failure to Meet Standards for Accreditation

**RECEIVED
COMMISSIONER'S OFFICE**

MAY 15 2015

DEPARTMENT OF EDUCATION

Dear Mr. Key and Arkansas State Board of Education,

On behalf of West Side School District, I would like to file a formal appeal regarding West Side High School being placed on "Probationary" status. The designation of probationary status is due to the lack of a student being enrolled in a Journalism class.

During the 2014-15 academic year Journalism was included in the high school master schedule and was offered via distance learning through Virtual Arkansas. We did have a student enrolled in Journalism to start the year; however, after a couple of weeks the student realized she had mistakenly enrolled in Journalism thinking she was enrolling in Yearbook. When she realized Journalism was not a Yearbook class; she requested, and was granted, a schedule change to enroll in the newly created EAST class. At that time West Side High School became non-compliant to Rule 9.03.3 because, although Journalism was offered in the master schedule, we did not have a student actually enrolled in the course. By the time the mistake was discovered it was too late to legitimately enroll a student in a Journalism section.

While we acknowledge there was an oversight on our part regarding not having a student enrolled in Journalism, we are filing an appeal requesting our status be amended from "Probationary" to "Cited." We are requesting this appeal because we did offer Journalism in our master schedule, but our failure to meet Standards of Accreditation was due to not actually keeping a student enrolled in the course for the duration of the academic school year. However, going forward, Act 853 from the recent legislative session will remove the requirement to mandate a student to take a course in order to successfully meet the Standard for Accreditation.

I am aware this legislation was not passed until the recent legislative session and I realize it will not go into effect until the 2015-16 academic year, but if our appeal is not granted then we will be considered to be on probationary status for a rule that is no longer in effect. I ask that you please consider that aspect when weighing the option to grant our appeal or not.

I certainly appreciate your time and consideration in this matter. West Side School District will be very grateful if we are able to escape the probationary label. We understand we likely could still remain in the status of cited. We will not dispute that if it

is the case. We merely are seeking to appeal the probationary status. Again, thank you for your time and consideration on this matter.

Sincerely,

Andy Chisum, Superintendent
West Side School District

Subject: Clarification of Letter of Appeal

Received

MAY 21 2015

Standards Assurance

Dear Mr. Key and Arkansas State Board of Education,

On behalf of West Side School District, I would like to file a letter of clarification regarding our letter of appeal. In the letter of appeal it was stated that "...after a couple of weeks the student realized she had mistakenly enrolled in Journalism thinking she was enrolling in Yearbook." That should read "...after a couple of 'days'..." instead of a couple of "weeks." Please pardon the oversight and amend our appeal as such.

Enclosed is a copy of our 2014-15 master schedule showing that Journalism was offered via distance learning, an MOU signed by the student for her participation in distance learning classes and an email from Virtual Arkansas showing a timestamp of when the student dropped the journalism class.

I apologize for the oversight in the original letter of appeal and hope the enclosures provide what you need in order to grant our appeal.

Thank you for your time and consideration.

Sincerely,

Andy Chisum, Superintendent
West Side School District

Re: Appeal of Probationary Status – Year One of Probation: White
County Central High School

Dear Commissioner Key:

I am writing to you pursuant to Ark. Code Ann. §6-15-203 on behalf of the White County Central School District (WCC), to appeal the determination of the Arkansas Department of Education (ADE) that the WCC High School be placed on probationary status under the ADE Rules Governing the Standards for Accreditation of Arkansas Public Schools and School Districts (Standards Rules). Specifically, the ADE has determined that WCC High School should be placed in probationary status under Section 9.03.4.1 of the Standards Rules, for only offering a high school Journalism course but not teaching it as no students were enrolled in the course.

While WCC admits that no students did take the Journalism course during the 2014-2015 school year, I would like to point out factors for the ADE and the State Board of Education (SBE) to take into account in their consideration of our appeal.

First, I have attached a copy of the relevant portion of the Master Schedule list for WCC High School (Exhibit 1) which shows the Journalism course as properly scheduled and available to be taught. Secondly, WCC has never received a probationary violation for this type of issue, and is not currently on any type of Standards for Accreditation probation or citation status and is not on any type of academic, fiscal or facilities distress status with the ADE. Our district takes compliance with the statutes and ADE Rules governing our operations very seriously, and we strive not only to keep our district free of any violations but strive to maintain excellent relationships with the ADE staff which oversee these requirements. In particular here, we value our relationship with the Standards Assurance Unit.

Received

MAY 14 2015

Standards Assurance

In this instance, we had a first-year counselor working at the high school that was unaware that the Standards Rules both require that a required course such as Journalism not only be offered but actually taught as well. See Exhibit 2. The counselor diligently attempted to enroll students for the Journalism course, but was unsuccessful (Exhibits 3A-3D).

Finally, I would like to point out that Act 853 of 2015 provides that a course shall be considered as taught by a school district in compliance with the Standards Rules and statutes if the district made the course available to students as required but no students signed up to take the course. Although Act 853 is not yet effective, it illustrates that there is recognition by the General Assembly that problems such as ours exist. These problems are exacerbated in smaller school districts, such as ours.

Thank you for the opportunity to submit this appeal for consideration. I look forward to working with the Standards Assurance Unit and the SBE to resolve this issue.

Sincerely,

Sheila Whitlow
Superintendent
White County School District

Exhibit 1

May 6, 2015

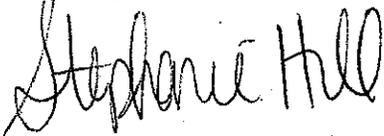

Dear Mrs. Whitlow,

Here is my statement for appealing the probationary status we were given for not having a student enrolled in the required 38 course Journalism.

Statement below:

After calling standards, I became aware that we did not meet the requirements for the 38 units that must be taught annually. I am a new counselor and was under the impression that as long as the course was offered on the Master Schedule, no students had to be assigned to the course. Journalism was offered on our Master Schedule but no student chose to take the course. I have attached a copy of our Master Schedule showing that Journalism was offered but not filled. Every year we have students fill out a course request sheet letting us know what courses they would be interested in taking the following year. They are given a packet that shows what we are offering and what courses they are able to choose from. No students chose Journalism as a course that they would be interested in taking, and as a new counselor, I did not know that we were required to have someone in the course.

Sincerely,

Stephanie Hill

7-12 Counselor

White County Central School District

2015-2016 Course Request --- Grade 9

Name: _____ Phone Number: _____

All 9th graders must take courses 1-4:

- 1. English 9 (410000)/PAP English 9 (410001)
- 2. Physical Science (423000)/PAP Physical Science (432001)
- 3. Civics (472000)/Economics (474300)
- 4. Health (480000)

Choice One:

- 5. Algebra I (430000) OR Geometry (431000) OR PAP Geometry (431001)
(Algebra I Prerequisite)
- 6. PE (48500B, 48501G) OR Athletics (485004, 485003)
- 7. FACS (493080) or Survey of Agriculture (491150) or CBA (492120)

Freshman must choose **three** electives. Place a number one beside your first choice, a number two beside your second choice, and the number 3 beside your third choice.

Course Title

- _____ Art
- _____ Survey of Fine Art
- _____ Band
- _____ Choir
- _____ Spanish I
- _____ Speech
- _____ Yearbook
- _____ Journalism
- _____ Drama
- _____ Critical Reading
- _____ Psychology/Sociology

Do you plan on being an honor graduate? _____

I have reviewed the Career Planner and agree with the course selections indicated above.

**Re: Notice of Probationary Status Appeal Hearing
(VIA CERTIFIED AND REGULAR MAIL)**

Ms. Whitlow,

On May 01, 2015, pursuant to Ark. Code Ann. § 6-15-203, the Arkansas Department of Education (ADE) notified you of the following schools/school district failing to meet standards for accreditation for the 2014-15 school year:

White County Central High School

Pursuant to Ark. Code Ann. § 6-15-203, your school district had the right to appeal the ADE's determination to the Arkansas State Board of Education (State Board). The appeal was required to be filed by May 15, 2014. Your district filed an appeal on **May 12, 2015**.

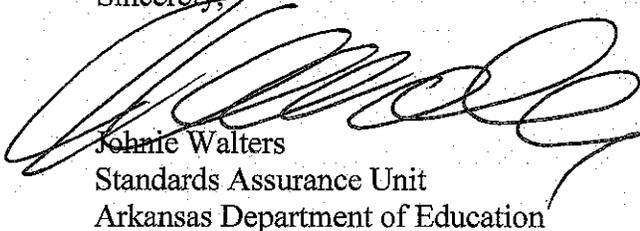

The State Board will conduct a hearing concerning this appeal during its scheduled meeting **Thursday, June 11, 2015, in the Auditorium of the Pulaski County Special School District, 925 East Dixon Road, Little Rock, Arkansas, 72206 at 10:00 a.m.** You will have an opportunity to address the State Board at that time. The State Board hearing will be conducted pursuant to the legal authority and jurisdiction vested in the State Board by Ark. Code Ann. § 6-15-201 et seq. and the Arkansas Department of Education Rules Governing Standards for Accreditation of Arkansas Public Schools and School Districts.

You and any other representatives of the **White County Central School District** who can address questions from the State Board concerning this matter should plan to be in attendance during the meeting. Should you wish to submit any documents, exhibits, or written comments, you may do so by submitting those items to my office by **noon on Thursday, May 28, 2015**.

FAX 870-898-3709

June 2, 2015

Dear Commissioner Johnny Key,

My name is Jason Sanders and I am the Superintendent of the Ashdown School District. I am writing this letter to notify you that I have cancelled the remaining four snow make up days for this year. I am requesting that due to the historical flooding issues here in Little River County that we not be required to make those days up. As I am writing you this letter, officials are predicting that it may take thirty days or longer to be able to open roads and return to normal. Below are some of my reasons for this decision.

- Our county has been labeled a disaster area by Little River Judge Mike Cranford and Arkansas Governor Asa Hutchinson. The state labeled us a disaster area on May 8th, 2015. FEMA is in the area to see if President Obama will label it a federal disaster.
- On June 1, I attended an emergency preparedness meeting. Present at this meeting were representatives of Little River County, Arkansas Highway and Transportation Department, Army Corps of Engineers, Arkansas Game and Fish Commission, Local and State Police, Little River Hospital, Air Life/Air Evac, Office of Emergency Services, and political representatives. All of the constituents echoed the seriousness and historical nature of this flooding and the unknown of how long we will be in this situation.
- Local and area emergency room volumes have increased. The local ambulance service has been loaned a 3rd truck because of the longer drive times from Little River County to Texarkana Hospitals. Because of the travel times to Texarkana, evacuation helicopters are covering the area for serious injuries or conditions.
- This flooding is predicting to be the worst flooding situation in Little River County since 1939.
- Little River county currently has 21 roads closed.

**“The Vision of the Ashdown School District is to unite parents, community and staff in creating an environment of excellence and pride where students will choose to be successful”

- Highway 8/41 is CLOSED with **Major** flooding.
- Highway 71 is CLOSED with **Major** flooding. This route is how many of our staff travel to school.
- Fulton bridge is currently open. The river in this area is going to rise from 27 feet to crest over 32 feet by Wednesday June 3rd. This area is predicted to have **Moderate to Major** Flooding. Arkansas Department of Transportation spokesman Danny Straessle stated "we're waiting to see what happens in the Fulton area. Some of the low lying areas of US 67 have started to flood". He also commented safety concerns of this route. This route is currently not a recommended detour route by AHTD. It is a small winding road with a 2.5 hour round trip to Texarkana. There have been several large trucks get stuck under a small overpass on this route. I have been informed by State Police of safety issues on this route due to people pulling over on the small shoulders to take pictures and look. This route has been at times backed up to I-30 Interstate.
- The Arkansas Highway and Transportation Department has recommended that detour routes from Texarkana to Ashdown go through Hope. This route is 4 hours round trip. Currently there are 90,000 vehicles daily traveling this corridor daily.
- Ashdown Schools has 30 teachers that commute in from the Texarkana area. This is almost 1/3 of our teaching staff. We also have support staff from Texarkana such as nurses, janitors, and bus drivers.
- Forecasters do not know how long this will last. I have been told it may take 30 days or longer. If we get more rain it could get worse.
- Ashdown schools has 3 bus routes significantly affected. The south and east portions of the school district have been devastated by flooding.

"The Vision of the Ashdown School District is to unite parents, community and staff in creating an environment of excellence and pride where students will choose to be successful"

EQUAL OPPORTUNITY EMPLOYER

ASHDOWN, ARKANSAS 71822
870-898-3208
FAX 870-898-3709

- We have a school teacher whose son is still missing due to the flooding. We have had several staff members assist in the search for this young man.
- Many of our school clubs, teams, and organizations have assisted the community with sandbagging houses for people in the community. The County Judge made a emergency request to me during the last weekend in May for me to find school groups to assist in bagging sand. The county needed all of the help it could get.
- The Red Cross is setting up an emergency site in our area.

I understand there is a policy that if a school misses 10 or more days that the State Board may give the school a waiver to not have to make up these days. Mr. Mike Hernandez has stated to me that there is really nothing in the policy that affects our situation. I feel that this is a once in a lifetime type event for our school. I am asking that you look at this as an emergency situation that is unique and unusual. I feel that I had no other choice but to cancel our remaining four days. Due to my safety concerns, I could not be comfortable requiring over 35 employees to drive 4 hours round trip through Hope with 90,000 drivers on that route. With the above mentioned loss in staff, I do not feel that we would have an effective school day. Finally, I do not know how long we will be in this situation.

We will honor any decision that the state board makes on this situation. I am concerned about the possibility of having to make these days up later in the summer due to staff and student vacations and summer obligations. I have been told by Mr. Hernandez that you would support my decision to cancel the remaining four days and that you will recommend to the board at the June 11 State Board meeting that we not be required to make up these four snow days. I thank you for your attention and consideration on this matter.

Sincerely,

Jason N. Sanders
Superintendent

RE: Notice of State Board of Education Review Hearing-June 11, 2015

Dear Dr. Tatum:

On April 15, 2015, the Charter Authorizing Panel met and made the decision to take no action after reviewing the processes and procedures that Covenant Keepers College Preparatory Charter School is employing to improve its academic standing. On May 14, 2015 the State Board of Education (State Board) voted to review the decision made by the Charter Authorizing Panel at its regularly scheduled meeting on **Thursday, June 11, 2015**. The meeting will begin at **10:00 a.m. in the Pulaski County Special School District Board Room, 925 E. Dixon Road, Little Rock.**

The State Board will conduct a full hearing to consider the possibility of acting on the Covenant Keepers open-enrollment charter pursuant to Ark. Code Ann. § 6-23-105. The possible actions allowed by the statute include the State Board placing the school on probation, modifying the open-enrollment charter, and revoking the charter. The reasons for this potential action by the State Board are an alleged failure to meet academic or fiscal performance criteria deemed appropriate and relevant for the public charter school by the authorizer. The facts underlying these allegations are the school's classification as in academic distress during the July 10, 2014 State Board of Education meeting based upon a three-year (2011-2013) proficiency of 46.965% in math and literacy and the school's classification as in academic distress again during the February 12, 2015 State Board of Education meeting based upon 2012-2014 proficiency of 46.640% in math and literacy.

The hearing procedures can be found in Section 6.24 of the ADE Rules Governing Public Charter Schools.

You should be prepared to discuss the entire review packet and answer any questions the State Board may have. Any modifications to the review packet that were made orally before the Charter Authorizing Panel may not be considered part of the review packet before the State Board. If you need to make any of these same or other modifications, you should address the modifications either in your written materials provided to the State Board or in your presentation to the State Board. You should attend the hearing and bring any personnel and documentation necessary to address any questions the State Board of Education may have.

The State Board will be provided copies of the entire packet that was presented to the Charter Authorizing Panel. If you have additional written information to present to the State Board, you must provide that written information to the Charter Office, ade.charterschools@arkansas.gov by 10:00 a.m. on May 21, 2015.

For your information and reference, the transcripts from the Charter Authorizing Panel meetings are available at:

RE: Review of Academic Distress Review Team Recommendations and Progress

Introduction

A three-member team from the School Improvement Unit of Arkansas Department of Education (ADE) conducted an onsite review at Covenant Keepers Public Charter School on March 6, 2015, at the request of the school's director and school improvement specialist. The purpose of the review was to determine the school's progress toward effective implementation of recommendations provided by ADE following an Academic Distress Review Team visit in the fall of 2014.

Background

Covenant Keepers is a public charter school serving approximately 180 students in southwest Little Rock. Most of these students receive free or reduced meals and/or are identified in at least one additional ESEA Targeted Achievement Gap Group. Under Arkansas's ESEA Flexibility Waiver, Covenant Keepers has been identified as a Priority School for the past three years. Under recently-revised state criteria, the school was additionally identified as Academically Distressed. Teacher turnover is a challenge for the school. The school has downsized from grades 6 – 12 to grades 6 – 8, and this year the director also serves as the school principal. A new external provider was contracted to provide turnaround support for the 2014-2015 school year. A different school improvement specialist was assigned to Covenant Keepers in December of 2014.

School leadership worked in collaboration with external providers during the summer of 2014 to develop a school improvement plan for implementation during the 2014-2015 school year. Later in the summer, Covenant Keepers elected to participate in the state's ACSIP Pilot Project, which required participating schools to focus on specific school improvement indicators that may or may not have been addressed in the original ACSIP document. Given the time and effort put into planning, then developing capacity for effectively implementing initial and Pilot school improvement efforts, some members of the school community were reluctant to embrace recommendations provided by ADE. Working with external providers, school leadership prioritized implementation of efforts previously identified for school improvement while seeking to understand and integrate ADE recommendations into their overall efforts.

ADE Recommendations

1. District and building leadership should realign and clearly define the roles for the leadership team.
2. District and building leadership should establish work plans for the year and specific work products to produce with prepared agendas and the maintenance of official minutes of each meeting.
3. The leadership team should establish yearly learning goals utilizing student learning data, and then monitor and evaluate school-level learning data at a minimum of twice per month to drive instruction that leads to increased student achievement.
4. Instructional teams should develop a work plan for common units with pre- and post-unit assessments so that student progress could be monitored in 7 to 15 day increments.
5. Instructional teams should review the data to identify re-teaching groups with an emphasis in planning for the next unit.

6. District and building leadership should provide professional development needed in order to fully engage the students in pre- and post-unit assessments. Building leadership should then monitor post-assessments to guide support efforts.
7. The leadership team and instructional teams should review the results of unit pre/post-tests to make decisions about curriculum and instructional plans and to "red flag" students in need of intervention (both students in need of tutoring or extra help and students needing enhanced learning opportunities because of their early mastery of objectives.)
8. Administration and external providers should establish a means to track progress of implementation of the curriculum, analyze the effectiveness of the curriculum on a quarterly basis based on student growth, and develop a new Priority Improvement Plan or long term plan.
9. The school leadership and instructional teams should establish a focus and support plan to differentiate instruction that is specific to students with disabilities (SWD), English learners (EL) and African American students, given the minimal success that has been made with these ESEA sub-groups.
10. Meet monthly to review the progress of the school related to ACSIP action steps. Revisions to the ACSIP would be appropriate if student level progress data is not reflecting specific and targeted support for improvement in trend data related to math and literacy for the SWD, ELL and African American populations.

Process

Members of the Academic Distress Progress Review Team reviewed documents related to the school's improvement efforts prior to the onsite visit. Team members interviewed members of the leadership team and reviewed additional evidence of the school's work to document progress toward effective implementation of ADE recommendations.

Site Review Conclusions

The Academic Distress Progress Review Team identified the following three clear and concise conclusions regarding the school's progress toward effective implementation of the recommendations provided by ADE:

1. During the third quarter, the school leadership team began integrating ADE recommendations into the previously-developed improvement plan and has fully implemented the first recommendation. The roles of the leadership team members have been clearly defined and documented in written form.
2. The school leadership team has demonstrated substantial effort to implement additional recommendations. While these efforts need meaningful refinement, initial work has begun to develop unit pre- and post-tests, to routinely review data to determine progress toward school improvement, to identify students who are not acquiring mastery of curriculum standards, and to review ACSIP action steps each month.
3. In order to build a more collegial relationship, school leadership and members of the ADE School Improvement Unit assigned to provide technical assistance to the school should collaboratively determine and document in writing expectations and timelines for completing tasks and submitting reports.

45-Day Action Plan for Schools in Academic Distress

District: Covenant Keepers Charter School	School: Covenant Keepers Charter School	Principal: Dr. Valerie Tatum	District SIS or External Provider: APSRC
--	--	-------------------------------------	---

ADE Assigned SIS: **Chante'le' Williams**

Recommendation:
1. District and building leadership should realign and clearly define the roles for the leadership team.

Description of full implementation of the recommendation: All roles of the leadership team are clarified. Our district's policy specifies the team structure for the school. The district policy (approved by the local board) includes a description of the teams' purposes and how they are constituted. The leadership team has a specific purpose and scheduled time to meet. (Wise Ways 36).

Narrative/Description of Progress on Recommendation *[For ADE SIS to complete]*:

Recommendation:

7. The Leadership Team and Instructional Teams should review the results of unit pre/post-tests to make decisions about the curriculum and instructional plans and to “red flag” students in need of intervention (both students in need of tutoring or extra help and students needing enhanced learning opportunities because of their early mastery of objectives.)

Description of full implementation of the recommendation: All teachers develop unit plans in their Instructional Teams during PLC meetings. Teachers create ongoing, formative assessments and use the data from the assessments to adjust the curriculum and instructional plans. They use the data to identify students who need extra help or are surging ahead and need enhanced assignments. (Wise Ways 109).

Objective(s) Only 1 required	Start Date	Date Obj. Compltd	Actions / Tasks	Timeline for Action/ Tasks	Person assigned to task	Evaluation of Objective <i>[For ADE Personnel]</i>
<p><u>Obj. 1</u> The Leadership Team and Instructional Teams should review the results of unit pre/post-tests to make decisions about the curriculum and instructional plans and to “red flag” students in need of intervention (both students in need of tutoring or extra help and students needing enhanced learning opportunities because of their early mastery of objectives.)</p>	<p>10/1/14</p>	<p>6/30/16</p>	<p>7a. The leadership team will provide teachers with ongoing professional development in data-driven instruction. (began June 1, 2014).</p> <p>7b. The instructional teams adopted Engage New York as our math curriculum for all math instruction and Expeditionary Learning for all ELA instruction. (adopted May 1, 2014).</p> <p>7c. The leadership team and instructional team established Wednesday and Thursday as non-negotiable PLC meeting times dedicated to weekly common formative assessment data analysis and action planning. Meetings are held after school.</p> <p>7d. English teachers will provide teachers of other content areas</p>	<p>1a. 6/1/2014-6/30/2015</p> <p>1b. 5/1/2014</p> <p>1c. 10/8/2014-ongoing</p> <p>1d. 10/8/2014-</p>	<p>1a. Lori Clancy</p> <p>1b. Part II Improvement Strategy

Directions: Consider the major innovations necessary for removal of the Academic Distress status. On the template below, provide two or three strategies expected to significantly improve student learning. Next, describe the goals and or tasks necessary to assist in accomplishing the strategies. Finally, include the evaluation of each strategy that will be completed by either the building or the district. During the evaluation process, determine the data to be collected as evidence of the strategy improving student outcomes.

Improvement Strategy (Innovation expected to produce significant improvement)	Goals/Tasks & Timeline (Benchmarks to demonstrate progress)	Evaluation Process (District or Building measures to determine the goal is met)
1. Weekly Formative Assessments with the Standards Tracking Tool	1) Develop data binders for specific grade levels/subject areas (math and ELA) 2) Adopt common rubrics for teachers to measure student achievement 3) Teachers assess students weekly on Common Core State Standards 4) Teachers grade and then analyze the assessments, putting the information into the Standards	Our external provider reviews the data binders weekly. These data binders contain the Standards Tracking Tool for each class, a rubric of the test given, and a copy of the assessment. The leadership team attends the Wednesday PLC meetings, tracks data binders, and make connections between weekly formative assessments and quarterly assessments. The leadership team also meets with teachers to monitor their progress in the classroom.

Part III Reflection

Directions: After completing the first two components, reflect on the implications of the following.

<p>Professional Development needs of administrative team</p>	<p>Book studies have played a vital role in aligning instructional roles within the leadership team. We are currently reading Learning By Doing, which is based on research on successful professional learning communities (PLCs).</p>
<p>Professional Development needs of instructional staff</p>	<p>-We need to find professional development that supports teachers in classroom management, data analysis and disaggregation, and differentiated instruction.</p>
<p>Community & Family Involvement</p>	<p>We have a parent team that manages monthly incentives to motivate students to continually do well academically and behaviorally. We have been meeting with members of our community (Southwest Hometown Coalition) to invite them into our school to read books, tell stories, and to support teachers in the classroom, as well as mentor students. The leadership team is invited to various events to talk about our charter school and our location in southwest Little Rock.</p>
<p>Resources (funding, time, people, materials)</p>	<p>We know an up-to-date computer lab could benefit our students, as well as making improvements to our wireless internet system. More laptops would allow more of our students to participate in EdOptions (online courses). The longer school days and school year has proven successful for the population of children we serve. Our ELL population is growing (48%), and we need more research-based materials that can support this community of learners.</p>

Culture & Climate (school and/or district)	We dissolved the partnership with the Pulaski County Juvenile Detention Center to maintain a culture of learning and teaching. This dissolution allowed us to remain focused on educational needs. The removal of our high school gave us an opportunity to focus on 6-8 grade levels of learning.
Other	

Formative Assessment Weekly Guide

Monday:

Assessment Day

-Math teachers

-assess math standards decided by the team the week before based on common assessment data.

-The math instructional team decides on the standards for the week based on our adopted Engage New York curriculum.

-The standards are tracked using the Standards Tracking Tool.

-The common assessment data comes from the weekly common formative assessment tests given.

-ELA and all other teachers

-assess ELA RI and RL standards decided the week before based on common assessment data

-The ELA standards for the week are based on our adopted Expeditionary Learning curriculum. The standards are tracked using the Standards Tracking Tool.

-The common assessment data comes from the weekly common formative assessment tests given.

-The first time a specific standard is assessed it is a **pre test**. It is formative, and, as such, it informs instruction for the remainder of the week and alerts teachers to individual students who will need additional support inside and/or outside the classroom.

-Next time a specific standard is assessed, and each continual formative assessment of that standard: **post test**

Tuesday:

Grading assessments/processing data based on common rubrics

-teachers put assessment data into the Standards Tracking Tool

Teachers make adjustments to instruction immediately according to test results.

Teachers do not wait until the next round of lesson plans to adjust instruction.

For anyone who would wish to see Standards Tracking Tool sheets from previous weeks, these are located in a binder in the War Room and are available for review at any time.

Wednesday:

Assessment Feedback

-Teachers hand back assessments to the students for feedback

-The teacher talks to the whole class about common errors (this is due to Feedback book study the Leadership Team facilitated through PD).

-These feedback sessions gives teachers additional insight into which students get it and which students are still struggling and need additional support.

-The rich conversation allows students to reflect on what they are struggling with and gives them the confidence to ask questions and motivates them to embrace the additional support they are offered.

-Students fill out a feedback form, stating what they will work to improve or what they still do not understand.

-Teachers have been given examples of feedback forms, but have the freedom to choose their own feedback forms to use with their classes. These feedback forms are filed with student tests in student portfolios.

PLC after school- Analyzing Data Trends

-Meeting protocol: before the meeting commences, teachers have the three required items in hand (standards tracking tool, copy of the assessment used, and common rubric used for each class) and sign off on an accountability form, indicating the assessment is valid and was carried out with fidelity, and ensures that all required items were completed and turned in on time. A member of the leadership team also signs off on each teacher's form after reviewing the 3 items.

-Mrs. Whipps starts the meeting and teachers go around the table to discuss the common formative assessment data for the week, and can pull individual student tests from portfolios as needed. This is both an opportunity for teachers to spot data trends indicating that a standard should be re-taught (class wide data) and an opportunity for teachers to red flag individuals for additional support inside and outside the classroom.

-Each week, one designated teacher presents in-depth long-term data trends from their classes' weekly common formative assessments.

-This is a chance for the leadership team to ensure quality assurance: making sure each teacher is carrying out high-quality assessments and using the common rubrics with fidelity. The leadership team points out concerns with data during the meeting and corrects teachers in private as needed.

-At the end of the meeting, teachers place these three items in the data binder (math or ELA binder depending on the standard assessed) for each class:

- Standards Tracking Tool
- Copy of the assessment used
- Common rubric used

Thursday:

PLC after school- Intervention Decision-Making

-instructional teams make lesson planning/unit decisions based on assessment data

-ELA team shares focus standards for the next week

-During these meetings, plans are created to address class-wide re-teaching for areas of concern as demonstrated by the data.

-Plans are made to address students who have been red flagged for support in the classroom, during Plus Time, or via computer-based intervention time.

-Decisions are made regarding what standards will be addressed within each Plus Time group for the ensuing week.

-Mrs. Whipps leads the ELA team and Mrs. Jones ensures the protocol is followed. - Mrs. Jones also takes notes at both the Wednesday and Thursday PLC meetings and distributes them to all meeting participants within 24 hours.

Friday:

-teacher collaboration

-lesson planning based on assessment data

-This occurs after school. Teachers have freedom to choose who they wish to work with, using their content as a vehicle to teach the Common Core standards addressed in this week's PLC meetings. Teachers plan for differentiation based on formative assessment results.

Covenant Keepers Charter School

Focus Areas for School Improvement

Board Adopted November 11, 2014

INTRODUCTION

The 2014-2015 Covenant Keepers Charter School, Focus Areas for School Improvement described in these pages was developed through a nine-month-long, collaborative process involving teachers, school leaders, students, parents, and external resources. After thoughtful and thorough review of 2007-2014 ACTAAP, school discipline, perception survey and attendance data, the Covenant Keepers leadership team created this targeted list of focus areas to provide our faculty with not only the guiding principles of school-wide improvement, but also principles essential to guiding individual student success in a very personal, life-changing sense.

This blueprint has been created to address the explicit needs of our cohort of students and is driven by research relevant to students with their statistical similarities. This work is guided, in large part, by the recommendations of the Arkansas Department of Education's Academic Distress Team lead by Dr. Richard Wilde and our External Provider, Arkansas Public School Resource Center. Our APSRC team, lead by Dr. Barbara Cox, includes our leadership consultants Arkansas State Representative and former school administrator, Bill Gossage; our instructional consultant, former curriculum administrator, Susan McKinney-Owens; and our teaching and learning specialist, Kristi Campbell.

This 2014-2016 School Improvement Strategy will be reviewed, evaluated, and amended as needed.

NARRATIVE SUMMARY

These Focus Areas were compiled to support data-driven decision-making and ultimately to disseminate those decisions to our faculty for implementation. We are confident that the goals within the focus areas below are rigorous yet attainable and appropriate, and that the strategies outlined are the essential steps necessary to make our school a more effective place to learn and a more rewarding place to work.

The Focus Areas were developed quite deliberately to address the unique needs of our unique students and to build on the strengths and passions of our organization. More specifically, our strategy was designed to reflect our "hedgehog concept"...

Under the guidance of Bill Gossage, CK leadership participated in a compelling study of the book, *Good to Great* by Jim Collins. In the book, Collins addresses a number of management, personnel, and operational practices, behaviors, and attitudes that are both conducive and antithetical to the transition from good to great. Although the book is primarily concerned with business practices, the theories and ideology within can easily be applied to a school system. Many of the investigations conducted and resulting decisions made by CK leadership have been driven by the principles in this book.

One particular principle driving CK leadership is that of the "Hedgehog Concept". The Hedgehog Concept is based on an ancient Greek parable that states: "The fox knows many things, but the hedgehog knows one big thing." According to Collins, organizations are more likely to succeed if they focus on one thing, and do it well. An organization can find its "Hedgehog Concept" by making three separate assessments. First, it can understand what its people are truly passionate about. Next, it can identify what it does better than anyone else. And last, it can determine where it can have the greatest and most sustainable impact on the organization's long-term success. The intersection of these three findings is where the organization should focus its time and energy to make the biggest, most sustainable impact—it's hedgehog concept.

After much discussion, CK leadership came to realize that our “hedgehog” was student growth--helping below-average students to become good students, good students to become better students, and so on regardless of their socio-economic or ethnic backgrounds. From that defining moment, we had clarified our focus and were ready to proceed with building strategy to support that focus.

THE STRATEGY

The overall objective of our school improvement planning is a greater level of student achievement—specifically growth. To affect real change, however, the process needs to focus on specific priorities that impact achievement. Our analysis of previous efforts (2009—2014) all point to the same problem: lack of said focus. With the help of our book study, we have now found our focus. Additionally, we now understand that an emphasis on clear and simple research-based improvement strategies will propel us toward meeting our goals and realizing that student achievement.

We understand that our students’ performance will improve:

- (1) when their teachers use a rigorous curriculum with curriculum-delivery strategies that reflect an awareness of and responsiveness to the needs of students;
- (2) when teachers use a structured approach to monitoring student growth through effective data analysis that uses frequent formative assessments to guide interventions.
- (3) when the school is fully staffed with committed individuals with a shared vision;
- (4) when the school environment is positive, supportive, and reflects only high expectations;
- (5) when parents are involved in their children’s education; and
- (6) when school leaders are highly visible and supportive in all aspects of teaching and learning.

In developing the school’s Focus Areas for Improvement, leadership worked through each of these focus areas and asked the following questions:

Where are we now? How do we know?	Where do we want to be?	How will we get there?	How will we know we’re there?	How will we stay there?
(Self-assessment)	(Focus Areas)	(Interventions)	(Progress monitoring)	(Sustainability)

FOCUS AREA FOR IMPROVEMENT (FAI) #1

FAI 1: Curriculum and Instruction

Teachers use a rigorous curriculum with curriculum-delivery strategies that reflect an awareness of and responsiveness to the needs of Covenant Keepers' students

RESEARCH–BASED INTERVENTIONS FOR FAI 1:

Aligned to:

ADE Recommendation #7: The leadership team/instructional teams should review the results of unit pre/post tests to make decisions about the curriculum and to make instructional plans and to red-flag students in need of intervention (both students in need of tutoring or extra help and students needing enhanced learning opportunities because of their early mastery of objectives.)

ADE Recommendation #8: Building and district administration and the external provider should:

- establish a means to track the progress of implementation of the curriculum
- analyze the effectiveness of the curriculum on a quarterly basis based on growth
- analyze and develop a new PIP or long-term plan

School Improvement Indicator IID07: The Leadership Team will monitor school-level student learning data.

School Improvement Indicator IID11: Instructional Teams will review the results of unit pre-/post-tests to make decisions about the curriculum and instructional plans and to "red flag" students in need of intervention (both students in need of tutoring or extra help and students needing enhanced learning opportunities because of their early mastery of objectives).

School Improvement Indicator IIIA01: All teachers will be guided by a document that aligns standards, curriculum, instruction, and assessment.

A. ADOPT PROVEN, RIGOROUS CURRICULUM

English and Language Arts Curriculum

Commissioned by New York State using Race to the Top funds, the Expeditionary Learning curriculum is an open educational resource. Each module correlates with books – not textbooks or anthologies – which have been carefully selected and vetted by the authors of the Common Core as the best books for teaching grade level content. These central texts are supported by a list of recommended texts—books, articles, and primary source documents—that balance literary and informational texts at appropriate levels of complexity.

The curriculum includes: grade-specific Common Core State Standards-aligned curriculum plans, standards-aligned curriculum maps and pacing guides, daily lessons, formative and summative assessments and end-of-unit performance tasks with performance rubrics, and teacher and student materials.

The core ELA proficiencies we see being developed include: reading closely for textual details, making evidence-based claims, researching to deepen understanding, and building evidence-based arguments.

One of the components we like best about Expeditionary Learning is that requires ELA teachers to work

with other content area teachers to support text-based reading and writing in classes such as social studies, science, arts, and even computer and health classes. This across-the-curriculum use of close reading and evidenced-based writing is having a real impact on reading comprehension and writing at Covenant Keepers.

Math curriculum

Engage NY Curriculum modules in mathematics are marked by in-depth focus on fewer topics. They integrate CCSS, rigorous classroom reasoning, extended classroom time devoted to practice and reflection through extensive problem sets, and high expectations for mastery.

Our daily 90-minute math classes include fluency development, concept development, application problems, student reflection, a substantial remediation period, and exit tickets. The curriculum essentially reflects the organization of math emphases PARCC has created.

B. MANDATE THE IMPLEMENTATION OF RESEARCH-BASED INSTRUCTIONAL DELIVERY PLANS AND METHODS

Covenant Keepers has adopted an instructional planning and delivery method created by Jane Pollock who updated the globally recognized Master Teacher schema by Madeline Hunter. Her method, *GANAG*, is the acronym for a 21st century daily lesson planning schema using the seminal research she and her colleagues (Marzano and Pickering) introduced in *Classroom Instruction that Works*.

The five-stage GANAG lesson planning and delivery schema cues teachers to plan to deliberately teach students to use the 9 high yield strategies every day.

As students use the high-yield strategies daily to engage with the lesson content, they have continual opportunities to seek and receive feedback about the progress they are making toward lesson goals—the standards and daily objectives.

FOCUS AREA FOR IMPROVEMENT (FAI) #2

FAI 2: Assessment and Data Analysis

CK Leadership has developed and adopted a structured approach to monitoring student growth through effective data analysis that uses frequent formative assessments to guide interventions.

Description of FAI 2: Data-driven instruction, when done right, is one of the most powerful tools in a school's arsenal. Covenant Keepers is just now coming to understand that in order to truly use data to drive instruction, it must be systemic and carried out with fidelity.

After much research, we have turned to the work of data and leadership expert, Paul Bambrick-Santoyo. He has shared what works with school leaders and teachers across the nation through his books. We have recently adopted his principles and created a data-driven culture here at CK. Many of the ideas you will find in our building are from his research findings.

RESEARCH–BASED INTERVENTIONS FOR FAI 2:

Aligned to:

ADE Recommendation #3: Leadership team should establish yearly learning goals utilizing student learning data; monitor and evaluate school-level learning data at minimum twice per month in an effort to allow the data to drive instruction that leads to increased student achievement.

ADE Recommendation #4: Instructional teams should review the data to identify re-teaching groups with an emphasis in planning for the next unit.

ADE Recommendation #5: Instructional teams should develop a work plan for common units with pre- and post-unit assessments so that student progress could be monitored in 7 to 15 day increments.

ADE Recommendation #6: District and building leadership should provide PD in order to fully engage the students in pre- and post-unit assessments. Building Leadership should then monitor the post assessments to guide support efforts.

ADE Recommendation #7: The leadership team/instructional teams should review the results of unit pre/post tests to make decisions about the curriculum and to make instructional plans and to red-flag students in need of intervention (both students in need of tutoring or extra help and students needing enhanced learning opportunities because of their early mastery of objectives.)

School Improvement Indicator IE07: The principal will monitor curriculum and classroom instruction regularly.

School Improvement Indicator IG01: The school will monitor progress of the extended learning time programs and strategies being implemented, and use data to inform modifications.

School Improvement Indicator IID07: The Leadership Team will monitor school-level student learning

data.

A. Assessment:

All teachers assess students every Monday based on upcoming focus standards agreed upon collectively. They are also using pre and post assessments to drive instruction in the classroom.

B. Rubric:

All assessments are graded *at the standard level* using a common grading rubric to provide consistency in evaluating student work. These rubrics provide an objective perspective of the quantitative data. They also let students know what is expected of them, and demystifies grades by clearly stating, in age-appropriate vocabulary, the teacher's expectation.

C. Data Tracking Tool:

After data collection, results are placed in each teacher's Data Tracking Tool. Teachers bring this data to PLC meetings every Wednesday at 4:15 to address weaknesses and strengths found in the data.

D. Professional Learning Communities:

PLC meetings are held every Wednesday and Thursday at 4:15 to discuss focus standards and assessment data.

E. Data Binders:

Data binders contain whole group tracking forms, standards tracking forms, NWEA data, Reading Plus/Istation data, module overview, and student grade detail

F. Data System Monitoring:

Teachers and leadership will complete Data System Implementation Surveys quarterly to determine the degree to which the Data System is being employed.

G. Leadership Support:

Leadership will conduct 30-minute support sessions with teachers to identify strengths, challenges, goals, and strategies for classes and individuals.

Below is a detailed look at the data system's weekly cycle:

Monday:

Assessment Day

-*Math teachers*

-Assess math standards (decided on by the team the week before based on common assessment data).

-The math instructional team decides on the standards for the week based on our adopted Engage New York curriculum.

-The standards are tracked using the Standards Tracking Tool.

-The common assessment data comes from the weekly common formative assessment tests given.

-*ELA and all other teachers*

-Assess ELA Reading Informational Text and Reading Literature Text standards (decided the week before based

on common assessment data).

- The ELA standards for the week are based on our adopted Expeditionary Learning curriculum. The standards are tracked using the Standards Tracking Tool.
- The common assessment data comes from the weekly common formative assessment tests given.
- The first time a specific standard is assessed it is a **pre-test**. It is formative, and, as such, it informs instruction for the remainder of the week and alerts teachers to individual students who will need additional support inside and/or outside the classroom.
- Next time a specific standard is assessed, and each continual formative assessment of that standard: **post-test**

Tuesday:

Grading assessments/processing data based on common rubrics

- Teachers put assessment data into the Standards Tracking Tool for individual and class level analysis
- Teachers make adjustments to instruction immediately according to assessment results. Teachers do not wait until the next round of lesson plans to adjust instruction.
- The Standards Tracking Tool sheets from previous weeks are located in a binder in the War Room and are available for review at any time for teachers or Leadership to make comparisons across the unit(s).

Wednesday:

Assessment Feedback

- Teachers hand back assessments to the students for feedback during class.
- The teacher talks to the whole class about common errors (this is due to *Feedback* book study the Leadership Team facilitated through PD).
- These feedback sessions gives teachers additional insight into which students get it and which students are still struggling and need additional support.
- The rich conversation allows students to reflect on what they are struggling with and gives them the confidence to ask questions and motivates them to embrace the additional support they are offered.
- Students fill out a feedback form on the back of their assessment, stating what they will work to improve or what they still do not understand.
- Teachers have been given examples of feedback forms, but have the freedom to choose their own feedback forms to use with their classes. These feedback forms are filed with student tests in student portfolios and reviewed with students or with instructional teams as needed.

PLC after school- Analyzing Data Trends

- Meeting protocol: before the meeting commences, teachers have the three required items in hand (standards tracking tool, copy of the assessment used, and common rubric used for each class) and sign off on an accountability form, indicating the assessment is valid and was carried out with fidelity, and ensures that all required items were completed and turned in on time. A member of the leadership team also signs off on each teacher's form after reviewing the 3 items.
- The Lead Teacher starts the meeting and teachers go around the table to discuss the common formative assessment data for the week, and can pull individual student tests from portfolios as needed. This is both an opportunity for teachers to spot data trends indicating that a standard should be re-taught (class wide data) and an opportunity for teachers to red flag individuals for additional support inside and outside the classroom.
- Each week, one designated teacher presents in-depth long-term data trends from their classes' weekly common formative assessments.
- This is a chance for the leadership team to safeguard quality assurance: making sure each teacher is carrying

out high-quality assessments and using the common rubrics with fidelity. The leadership team points out concerns with data during the meeting and corrects teachers in private meetings as needed.

-At the end of the meeting, teachers place these three items in the data binder (math or ELA binder depending on standard assessed) for each class:

- Standards Tracking Tool
- Copy of the assessment used
- Common rubric used

Thursday:

PLC after school- Intervention Decision-Making

- Instructional teams make lesson planning/unit decisions based on assessment data
- ELA team shares focus standards for the next week with all other teachers (these are Informational Text standards)
- During these meetings, plans are created to address class-wide re-teaching for areas of concern as demonstrated by the week's data.
- Plans are made to address students who have been red flagged for support in the classroom, during Plus Time, or via computer-based intervention time.
- Decisions are made regarding what standards will be addressed within each Plus Time group for the ensuing week.
- The Lead Teacher leads the ELA team, and her partner ensures the protocol is followed.
- The team's designated note taker takes notes at both the Wednesday and Thursday PLC meetings and distributes them to all meeting participants within 24 hours.

Friday:

- teacher collaboration
- lesson planning based on assessment data
- This occurs after school. Teachers have freedom to choose who they wish to work with, using their content as a vehicle to teach the Common Core standards addressed in the current week's PLC meetings. Teachers plan for differentiation based on formative assessment results.

FOCUS AREA FOR IMPROVEMENT (FAI) #3

FAI 3:

The school must be fully staffed with committed individuals with a shared vision

Description of FAI 3: CK leadership has been influenced by the principle found in *Good to Great*, by Jim Collins that says, "...to build a successful organization and team you must get the right people on the bus." It is critical that we get (and keep) the right people on the bus.

Great teaching matters: Bob Marzano, author of *What Works in Schools*, says, "It is clear that effective teachers have a profound influence on student achievement."

Great teaching makes a difference: Charlotte Danielson, author of *Enhancing Professional Practice: A Framework for Teaching*, tells us, "High-level learning by students requires high-level instruction by their teachers."

Great teaching is the key: Mike Schmoker, author of *Results Now: How We Can Achieve Unprecedented Improvements in Teaching and Learning*, claims, "The single greatest determinant of learning is not socioeconomic factors or funding levels. It is instruction."

As leaders and employees who are committed to the success of this school, it's not enough to say that we need to get "the right people on the bus". We must identify who the right people are and create a process that gets them on our bus and in the right seat. So, who are the right people, and how do we find them?

RESEARCH-BASED INTERVENTIONS FOR FAI 3:

Aligned to:

ADE Recommendation #2: District and building leadership should establish work plans for the year and specific work products to produce with prepared agendas and the maintenance of official minutes of each meeting.

ADE Recommendation #6: District and building leadership should provide PD in order to fully engage the students in pre- and post-unit assessments. Building Leadership should then monitor the post assessments to guide support efforts.

School Improvement Indicator IH01: The LEA has a plan and process in place to recruit and retain highly-qualified teachers to support the transformation.

School Improvement Indicator ID02: All teams will have written statements of purpose and by-laws for their operation.

A. RECRUITMENT

In order to generate a larger pool of employee candidates, recruitment will become a major factor in every hiring season, but its seeds will be planted long before the season arrives. We will work to promote our school around Central Arkansas so that every potential candidate is aware of who we are

and what we offer our community. We will work with every university's teacher education department and career placement division to communicate our needs. We will network with area education agencies and organizations to communicate our needs.

B. HIRING

The principle of identifying the right people has been underscored with our *Good to Great* book study. Leadership is working together with teachers and students to develop the key characteristics, strengths and traits of each job/position in the school and then creating a benchmark that every potential employee is measured against. In future hiring seasons, we will interview each potential employee and then identify how he or she measures up to the benchmark of the position they are applying for. As a result, we will more definitively be able to identify who the right people are for each job at the school.

We will develop a rubric that looks at each of the following areas:

1. **Personal Characteristics** With representatives from each school group (leadership, teachers, support staff, students, and parents) we will identify several people in our school that we wish we could clone. We will write down their personal characteristics and traits and create a benchmark of the right person for each position.
2. **Professional Characteristics** Next, the group will identify the professional characteristics we wish to prioritize—at a minimum, a focus on each of the following: instructional strategies, content knowledge, credentials, leadership, creativity, etc.
3. **Passion for our students** To the extent possible, we have to ascertain how much a candidate is familiar with the demographics and characteristics of the families we serve. Because we have a high-needs group, each employee must be equipped to meet those needs in a caring and responsible way.
4. **Work ethic** Because this school requires a high degree of commitment and personal responsibility from each employee, and because each position is incredibly demanding, we must make every effort to assess the degree to which each candidate will be able to (and willing to) meet those responsibilities.
5. **Team players** Candidates must be able to demonstrate their willingness to work as part of a team. In our school, very few curriculum, instruction, assessment, or even classroom management decisions are left to individual teachers to make on their own. Most are made by teams of teachers as part of their Professional Learning Communities (PLC's). We strongly believe that PLC teams work far more efficiently than individuals ever could towards advancing our vision of learning for all.
6. **"The proof is in the pudding"**. The next step in the evaluation of teacher candidates is to place them in a classroom for a day and observe all of the indicators previously mentioned.
7. **Teacher vetting**. The final step in our process is having our teacher team meet with the candidate. This is a time for the team to ask questions and decide if they can get behind the candidate—meaning that this is a person they can see fitting in with their team. Equally important, it gives the candidate a chance to ask questions and get a real sense of what it means to work on the team. It is not uncommon for candidates to realize at this point that this is not the place for them after hearing about the expectations and the realities of being part of this team.

C. RETENTION

Once we have the right people on the bus, we must work to keep them there. We will place a more deliberate and individualized emphasis on the following:

1. Professional development
2. Mentorship of new and nearly-new teachers

3. Acclimation of experienced teachers to the CK ways
4. Sincere demonstrations of appreciation and respect for every employee

D. DISMISSAL

We must be diligent, however, in acknowledging that despite our best efforts, not every hiring decision is going to be a good fit. It is noteworthy to mention at this point, that our charter grants us the ability to exercise “at will” employment. While we will work to correct issues that we see a teacher having, we will not allow consistently poor performance to continue, as this is ultimately a detriment to students. In that vein, we have developed a new policy that establishes a 30-day probationary period for new teachers.

FOCUS AREA FOR IMPROVEMENT (FAI) #4

FAI 4:

The school environment must be positive, supportive, and reflect only high expectations

Description of FAI 4: Turning again to Jim Collins, we must pay particular attention when he expresses, “The key lies not in better information but in turning information into information *that cannot be ignored*”. Information ignored for the sake of maintaining staff morale ultimately diminishes the team’s motivation when it becomes clear this information is a “brutal fact” of their reality.

The brutal fact of our reality, to this point, has been that despite the best efforts of every person who has fully committed themselves to this team, we could never quite get our footing to make and sustain great gains. After much reflection and facing the brutal facts, we have determined that our shortcomings can all be traced back to our school environment.

RESEARCH–BASED INTERVENTIONS FOR FAI 4:

Aligned to:

ADE Recommendation #1: 1. District and building leadership should realign and clearly define the roles for the leadership team.

ADE Recommendation #2: District and building leadership should establish work plans for the year and specific work products to produce with prepared agendas and the maintenance of official minutes of each meeting.

School Improvement Indicator IIIA35: Students will be engaged and on task.

A. Develop, implement, and monitor a new demerit-based behavior system

B. Build time into the school week to support student mentoring and character development in a genuine way

C. Develop a school-wide system of rituals and routines

D. Implement “Earn It”, a culture that rewards hard work

A. Develop, implement, and monitor a new demerit-based behavior system

The CK Leadership team has developed a new behavior system that allows teachers and the discipline team to systematically document behavioral infractions and apply consequences in a timely, consistent, and unbiased manner. Parents are notified of each infraction and the accumulation of demerits so that they remain aware of their child’s status and are given the opportunity to assist us in

correcting chronic misbehavior.

B. Build time into the school week to support student mentoring and character development in a genuine way

Every student will be matched with an adult employee for Friday mentoring sessions. Students will be “drafted” by adults in order to ensure that students are partnered with adults that have built a solid rapport with them. Groups will consist of 5-8 students. Each group will meet every Friday from 3:00—4:00 to discuss any issues they may be having as individuals or issues that might be present school-wide.

Additionally, students who have been “red flagged” for chronic behavior issues will be paired with our Student Leadership Coach for more intensive mentoring.

C. Develop a school-wide system of rituals and routines

A team of teachers and leaders has developed a handbook for CK rituals and routines. This handbook outlines procedures that apply both on the classroom level and on the school-wide level.

Many of the procedures included come from the research of prolific educational writer and teacher advocate, Harry Wong, however the majority of the procedures included come from the collective trial-and-error experiences of our teacher team and are specific to the needs of our school campus.

These rituals and routines have been designed to ensure optimal classroom management and to communicate the high expectations for students. Followed with fidelity, the plan will eliminate chronic issues that hinder the learning experience including: interruptions, lack of supplies, ambiguity in instructions, disorganization, and general misbehavior.

D. Implement “Earn It”, a culture that rewards hard work

To quote Ron Clark, author of *The End of Molasses Classes: Getting Our Kids Unstuck — 101 Extraordinary Solutions for Parents and Teachers*, “Not every student deserves a cookie.”

CK has implemented a reward system designed to recognize the hard work of students who do their best to meet expectations. Not necessarily the students with the highest grades or the best behavior, but those who are making noticeable efforts daily.

Rewards range from the intrinsic (an affirmation or a pat on the back) to the extrinsic (field trips or special privileges). Our goal is to teach students that they must work hard to earn the rewards they seek. We believe it is important for students to be recognized for their efforts, and we also believe it is important for them to see the result of not putting out effort and consequently missing out on what they desire. This cause-and-effect principle is missing from so many of our students’ reality, and we firmly believe that it’s critical for them to acquire this understanding.

FOCUS AREA FOR IMPROVEMENT (FAI) #5

FAI 5:

Parents must be involved in their children's education

Description of FAI 5: “When schools, families, and community groups work together to support learning, children tend to do better in school, stay in school longer, and like school more.” That’s the conclusion of **A New Wave of Evidence**, a 2002 report from Southwest Educational Development Laboratory.

The report, a synthesis of research on parent involvement over the past decade, also found that, regardless of family income or background, students with involved parents are more likely to:

- Earn higher grades and test scores, and enroll in higher-level high school programs
- Pass their classes, earn credits, and be promoted
- Attend school regularly
- Have better social skills, show improved behavior, and adapt well to school
- Attend a post-secondary education program

RESEARCH–BASED INTERVENTIONS FOR FAI 5:

Aligned to:

School Improvement Indicator IVA01: The school’s Compact will include responsibilities (expectations) that communicate what parents (families) can do to support their students’ learning at home (curriculum of the home, with learning opportunities for families to develop their curriculum of the home)

A. Better develop our Parent Involvement program

B. Create a program that teaches parents how to help their students with school work at home

C. Implement an effective parent communication system

A. Better develop our Parent Involvement program

Our parent involvement has historically been low. We attribute this to several factors including:

- the workload and odd work shifts of many of our struggling families;
- lack of transportation of many of our parents;
- communication difficulties of many of our Latino families;
- a general uneasiness that many of our parents have in dealing with teachers and school administrators;
- fear among many parents that they might not be able to help students due to their own lack of academic skills
- and, unfortunately, apathy among many of our parents.

We will offer transportation when parents have an issue with getting to school for events or meetings.

We will continue to work hard to build a good rapport with each family who entrusts us with their child. New families meet with administration upon enrolling their children; parents are greeted daily upon dropping off and picking up their children; teachers are encouraged to communicate regularly and directly with parents for both positive and negative reports.

We have implemented an open door policy that encourages parents to attend class with their child to observe the climate and the work going on throughout the building.

In the past, our parent/teacher group has been lacking as far as enrollment and participation. We are currently working to organize a group that will take a highly visible and highly active roll in the CK culture of parents and students.

B. Create a program that teaches parents how to help their students with school work at home

CK has developed “10th Period: Connecting Families to the Classroom” a family event night engineered to:

- get parents/guardians to the school to stay in the know;
- share tools with parents/guardians to help them work with their children on areas of weakness; and
- connect with parents so they feel comfortable with approaching their child’s teachers with issues or concerns.

C. Implement an effective parent communication system

CK has engaged a parent notification system that uses texts and emails to notify parents of any current, relevant, school wide news. These messages are sent out in Spanish and in English.

CK hopes to keep a Spanish-speaking adult in or near the front office at all times to welcome our Latino families and communicate as needed on behalf of the school and the parents.

All written communications are sent home in English and in Spanish.

We always make translators available for parent meetings with our Latino families.

FOCUS AREA FOR IMPROVEMENT (FAI) #6

FAI 6:

School leaders must be highly visible and supportive in all aspects of teaching and learning.

Description of FAI 6: With the growth and achievement of all students as the focal point of all practices and decisions, the school leadership must rely heavily on the school's teachers. And teachers, the leaders' most valuable assets, require and deserve more than management; they need strong relationships, individual attention, consistent support, fair treatment, and accurate feedback. In short, they need active guidance based entirely upon their own and their collective improvement.

In that vein, we again refer to the Jim Collins theory that when "the right people are on the bus", they are led by self-discipline and exhibit disciplined actions rather than being led by heavy-handed, managerial discipline. It is here that we must make the distinction between discipline and a "culture of discipline". CK teachers, assuming that we have the right people on the bus, will be guided by leaders who support their efforts to teach students and to grow as professionals, as that is their innate desire.

RESEARCH-BASED INTERVENTIONS FOR FAI 6:

Aligned to:

ADE Recommendation #1: 1. District and building leadership should realign and clearly define the roles for the leadership team.

ADE Recommendation #2: District and building leadership should establish work plans for the year and specific work products to produce with prepared agendas and the maintenance of official minutes of each meeting.

ADE Recommendation #3: Leadership team should establish yearly learning goals utilizing student learning data; monitor and evaluate school-level learning data at minimum twice per month in an effort to allow the data to drive instruction that leads to increased student achievement.

ADE Recommendation #6: District and building leadership should provide PD in order to fully engage the students in pre- and post-unit assessments. Building Leadership should then monitor the post assessments to guide support efforts.

ADE Recommendation #8: Building and district administration and the external provider should:
-establish a means to track the progress of implementation of the curriculum
-analyze the effectiveness of the curriculum on a quarterly basis based on growth
-analyze and develop a new PIP or long-term plan

School Improvement Indicator IE07: The principal will monitor curriculum and classroom instruction regularly

A. School leadership must work closely to train teachers on and to monitor implementation of critical mandates such as lesson planning and instructional delivery schema

B. School leadership will constantly seek to professionally develop themselves to stay abreast of current issues, policies, and research findings

C. CK leaders must develop the skills and talents of those around them

A. School leadership must work closely to train teachers on and to monitor implementation of critical mandates such as lesson planning and instructional delivery schema

CK leadership will provide teachers with extensive support in adopting and implementing both their new curriculum and their new instructional delivery schema (GANAG). With the assistance of our APSRC instructional support team, teachers will be exposed to a multitude of practice activities and professional development opportunities highlighting these new concepts.

Additionally, leadership will make collaboration time a priority, so that teachers can work together to effectively comprehend and apply new concepts. Leadership will often be present in PLCs to offer guidance, or merely to offer support.

B. School leaders will constantly seek to professionally develop themselves to stay abreast of current issues, policies, and research findings

CK leaders must be introspective and reflective. They must ask questions and seek answers rather than assuming to know all by virtue of being at the helm of the school. CK leaders must make themselves familiar with current research and best practice, not only in education, but also in other related fields. They must maintain a personal plan for self-improvement and continuous learning, and balance their professional and personal lives, making time for all interests.

C. CK leaders must develop the skills and talents of those around them

Effective school leaders must work to develop a deep understanding of the talents and skill sets of all employees. Because of our very small leadership team, we all find ourselves “wearing many hats”, and we must look for opportunities to delegate tasks to those who are best equipped to handle them. For example, top leadership has handled roles such as district and school test coordinator, Dean of students, parent coordinator, federal programs coordinator, and data coordinator in the past. Currently, the leadership team has expanded and appointed individuals, who have proven their abilities over the past several years, to handle these roles.

Leadership must engage in shared decision-making with the school community including staff, students, and parents. As both the guardians and reformers of the CK educational system, leadership must ensure that all groups are engaged in a common goal and moving in the same direction. CK leaders must recognize that management skills can be learned, and that they have an obligation to

establish and nurture strategically appointed roles and activities to make certain that other individuals in the district develop as leaders.

Covenant Keepers Charter Data-Driven Instruction

A Structured Approach
to Monitoring Student Growth
through Effective Data
Analysis

2014/2015

One of the main reasons a successful school is successful is because it is "driven by data". Decisions on what happens in the classroom are not made arbitrarily, but are determined by careful examination of interim assessments of students. With this information, teachers are able to craft a classroom experience that helps all students maximize their performance to the point where the school can close the achievement gap.

Data-driven instruction, when done right, is one of the most powerful tools in a school's arsenal. Unfortunately, too many schools don't do it right and have tarnished a great idea. An expert in the field, Paul Bambrick-Santoyo has discovered how to make it work. He has shared what works with school leaders and teachers across the nation through his books. We are in the process of adopting his principles and creating a data-driven culture here at CK. Many of the ideas you will find here are from his research findings.

Data-driven instruction is a precise and systematic approach to improving student learning throughout the year. The cycle of data-driven instruction includes assessment, analysis, and action and is a key component for school-wide support of all student success.

What is Data-Driven Instruction?

Data-driven instruction (DDI), sometimes referred to Data-Driven Decision Making (DDDM), is a system of teaching and management practices that gets better information about students into the hands of teachers. A multitude of schools and districts across the country are seeing substantial improvements in student learning and achievement as they incorporate data-driven practices. Teachers in these schools are finding that intelligent and pervasive uses of data can improve their instructional interventions for students and ultimately improve student learning outcomes.

Data-driven instruction requires an important paradigm shift for teachers – a shift from day-to-day instruction that emphasizes process and delivery in the classroom to pedagogy that is dedicated to the achievement of results. This packet will introduce Covenant Keepers' teachers and leaders to many of the important tools that teachers and PLCs will need to be effective data-driven classroom instructors.

Essential Concepts

Data-driven educators should be familiar with the essential elements of effective data-driven education outlined in the diagram below. The five major elements of data-driven instruction are:

- acquiring good baseline data,
- as a team, determining measurable instructional goals,
- administering frequent formative assessments,
- active participation in professional learning communities (PLCs), and
- developing focused instructional interventions.

CK teachers and leaders should be continuously asking:

- Where do we want our students to be?
- Where are they now?

- How do we know?
- What are we doing for students who are meeting goals?
- What are we doing for students who are not meeting goals?

As a team, we must set performance goals both at the school level and the student level. (“Where do we want our students to be?”). Student performance tasks show us what our students know and are able to do, and where the gaps are in their learning (“Where are they now?”). Careful analysis of the performance outcomes give us the evidence that we need to draw those conclusions (“How do we know?”), but how do we make sure that we’re using the data from those performance tasks to close those gaps for those who are struggling or enrich learning for those who are ready to move on (“What are we doing for students who are meeting or not meeting goals?”)? Educators in the most rapidly achieving schools cite data-driven instruction as one of the most important factors in helping all students achieve success.

And so our newest CK journey begins. The goal of this packet is to provide all CK teachers and leaders with both the overall vision of how an efficient DDI school should run and the tools to execute this new plan. Please understand that this is long-term solution (through which we should see immediate short-term results) and therefore, implementation will be a process, not a single step. Also, understand that you and your colleagues must equally share the responsibility for uncovering and understanding all of the components within the system. Please do not feel like you have any more or less responsibility based on your content area, your seniority, or your personality type (we all know those who are eager to embrace new concepts and those who are not!).

Below are the most important pieces of the DDI system:

1. People

Teachers

Data-driven teachers understand the importance of utilizing multiple measures, and multiple indicators within measures, when assessing school and student success (Bernhardt, 2004). For example, data from a single administration of a Benchmark reading test do not give teachers the information they need to improve student learning. Information from other assessments, pre-tests, mid-module assessments, post-tests, NWEA tests, and other data are needed for teachers to design appropriate instructional interventions. Similarly, use of a single formative assessment to measure students’ reading progress is not as reliable as using multiple, different assessments to measure the complex concept of student reading. Data-driven teachers need to be savvy consumers of summative assessment data who understand when and how the data can, or can't, inform teacher practice.

Leaders

CK leaders can support the implementation phase of the DDI process by helping teachers understand the five essential elements and by helping staff envision what good data-driven education looks like in practice. As with any other school reform initiative, building staff and organizational DDI capacity takes time. Leaders should work with internal and external sources to create and implement a comprehensive, long-term professional development plan that is designed to ground teachers in the skills they need to be effective data-driven instructors.

2. Collecting and Analyzing Summative Data

Educators in data-driven school organizations are expected to utilize data from yearly summative

assessments to improve student learning. For example, teachers should be able to get the previous year's NWEA reports for baseline analytical and reporting purposes. In other words, educators need to be able to get their hands on the data from yearly summative assessments that will help them improve instructional practice.

Teachers

Once classroom teachers have access to good baseline information, they should work with their administrators to select key indicators of success for their classrooms. In order to do this, teachers need to be well-grounded in assessment reporting concepts so that they can appropriately interpret baseline data. Teachers also need to give ongoing feedback to administrators about the usefulness of the data and/or reports that they are receiving.

Leaders

Leaders should ensure that the data teachers receive is accurate, timely, and in a format that can inform classroom instruction. Leaders also should work with school personnel to design and implement data systems that allow for exploration and reporting of raw data. Data platforms should be useful at both the teacher level and the PLC level for comparing data across grades or content areas. This is particularly important within a school structure like CK's. Most importantly, school leaders must actively help teachers identify key indicators of classroom success, appropriately analyze their data, and then turn those data into strategic pedagogical interventions.

"Before I write my name on the board, I'll need to know how you're planning to use that data."

3. Setting Measurable Goals

Once armed with key summative indicators of classroom success, educators can use those baseline data to identify mastery levels and learning needs of classes, demographic subgroups, and individual students. Data-driven educators then use that information to set measurable year-end instructional goals, which serve as meaningful targets to guide their teaching strategies. These goals are often referred to as **SMART goals**. The acronym stands for Specific, Measurable, Attainable, Results-Oriented, and Time-Bound. An example SMART goal might look something like the following:

The percentage of sixth grade students scoring at grade level or higher on the spring NWEA mathematics test will increase from 54% in Fall 2014 to 72% in Spring 2015.

Focus areas for improvement 1. Number sense 2. Computation 3. Measurement

Data-driven educators recognize that formalized goal-setting can lead to improved student learning outcomes. All SMART goals created by teachers and administrators should have the following six components (with example language from the SMART goal above):

1. A measurable baseline (54%);
2. A measurable target (72%);
3. A specific time frame (Fall 2014 to Spring 2015);
4. Specificity about what is being assessed (percentage of sixth grade students scoring at grade level or higher);

5. Specificity about the method of assessment (spring NWEA mathematics test); and
6. Focus areas that guide future action needed to reach the learning target (number sense, computation, and measurement).

Inclusion of these six components ensures that SMART goals meet the criteria represented by the acronym. SMART goals can be used with common assessments, teacher-made rubrics, and other types of assessments as well as with computer-based tests such as Reading Plus or iSation.

Teachers

Data-driven teachers identify and work toward only a few key instructional goal areas each year. Teachers often are overwhelmed by the multitude of learning needs present in their classrooms and must combat natural tendencies to either create too many goals or to become discouraged and shun goal-setting altogether. Teacher goal-setting should address instructional areas that are both important and strategic. Remembering the Pareto Principle that 20% of activity causes 80% of results is critical at this stage of the DDI process. Evidence from successful data-driven schools shows that strategic focus and success in a couple of key areas commonly carries over and alleviates other instructional and behavioral concerns as well.

Leaders

Leaders should model the goal-setting process. Leaders' goal statements might focus on factors such as discipline, attendance, or students' level of engagement with the teaching-learning process in addition to student learning objectives but should always include all of the essential components outlined above. Organizational goals should be focused on critical school needs and should be referenced frequently and noticeably with teachers, support staff, students, and parents. Leaders also should actively assist teachers as they work to create appropriate, targeted goals for their classrooms and students.

4. Collecting and Analyzing Formative Data

As noted above, data-driven schools have a good sense of where their students are at the beginning of the year (previous summative assessments) and have measurable goals for where they want their students to be at the end of the year (SMART goals). The next step for educators is to implement a system of frequent formative assessments in order to track the progress of their students *during the school year* toward those year-end goals. Simply using baseline data to set measurable year-end goals, without also implementing a system that allows for frequent analysis and adjustment of instructional and organizational practice, is not likely to result in significant improvements in student learning. This was the basis for many of the ADE Distress Team's recommendations for CK teachers and leaders. They recognized a general, quarterly data tracking system (as evidenced by the War Room data walls), but no formal system was in place to help guide instruction throughout the year to meet our end-goals.

As noted above, effective formative assessment practices, implemented during the school year, have been shown to be a powerful mechanism for improving student learning. Research meta-analyses have shown that good formative assessment has a greater impact on student learning, and on achievement gaps, than any other instructional practice (*Black, P., & William, D. (1998. Inside the black box: Raising standards through classroom assessment. Phi Delta Kappan, 80(2), 139-148.*

To realize the instructional power of formative assessment practices, educators also need the opportunity to meet regularly and frequently to have collaborative, data-based discussions about student progress. During these meetings, educators identify emergent patterns from the formative

data and discuss what the data tell them about students' progress toward year-end learning goals. Teachers can then collaboratively identify appropriate instructional interventions that can be implemented during the next instructional cycle and collectively commit to implementing those interventions. These types of *professional learning communities* have been shown to have major impacts on student achievement and teacher satisfaction

Covenant Keepers Data Process

Teachers

Data-driven teachers utilize their instructional expertise to identify key formative indicators of success that can be used to measure student progress during the school year. They also use appropriate technologies to collect, organize, analyze, and report that data to students, parents, administrators, and other teachers in the PLCs. Other key skills of data-driven teachers include knowledge of relevant assessment literacy concepts (in order to appropriately interpret formative assessment data), the ability to engage in root cause analysis to identify appropriate instructional interventions, and the capacity and willingness to work effectively with other staff on shared instructional problems and solutions.

Leaders

Leaders must recognize that the driving engine behind substantial improvements in student learning outcomes is a strong system of formative assessment, coupled with the opportunity for teachers to collaboratively make sense and act upon the formative data they receive (time for PLCs). Too many

school systems are focusing on summative baseline data because of the track NCLB had us on and are realizing only later that a primary reason they are not obtaining desired results is because they lack a feedback loop that allows teachers to receive information, before the end of the school year, about the success or failure of their instructional interventions. That's exactly the position CK finds itself in, and that is why leadership is enacting this change.

5. Making Changes

Data analysis is meaningless if it does not result in meaningful instructional change. Data-driven educators are able to use summative and formative assessment data together to implement strategic, targeted, focused instructional interventions to improve student learning. These interventions should be aligned with CCSS, state standards, school curricula as well as content-specific, developmentally-appropriate best practices. Teachers should work with our resources to identify effective, grade-level instructional practices for their subject areas.

Many teachers feel disempowered and fatalistic about their ability to significantly impact student learning outcomes. Many teachers feel that the academic success of their students and schools is dependent upon the input characteristics of their students and families—things out of our control. Other educators, however, believe that collaboratively they can have powerful impacts on student learning. These latter schools, which are recognizing that they can make a difference and are strategically and intelligently redesigning instructional and organizational practices to support student learning, are the ones that are closing achievement gaps and succeeding in this new era of accountability. This is where we now strive to be as a school with the implementation of the CK Data System. Schools that continue to struggle are those that place the bulk of the responsibility for student learning, and the blame for the lack thereof, on students and families rather than accept the fact that many classroom practices and school structures could be changed to better facilitate student achievement.

Teachers

Confucius noted that a journey of a thousand miles starts with a single step. While teachers may not be able to address the often-overwhelming problem of low student achievement all at once, they can take small steps that together add up to big improvements over time. Teachers can work with leaders and CK external resources to implement effective teaching practices and to design and implement teacher-driven action plans.

Leaders

Teachers will need help identifying and implementing new research-based curricula and teaching practices. Leaders can effectively support teachers by connecting them with appropriate training opportunities and instructional experts (primarily through our experts at APSRC and ABC). Continual attention to teachers' motivational and pedagogical concerns is another key role for leaders during this stage. Teachers, like most professionals, can be highly resistant to changes in their daily practice. Leaders must help teachers recognize what is working (and what is not) in their classrooms and vigorously support their faculty as they transform ineffective instructional practices into those that result in desired outcomes.

6. Data Transparency and Safety

Information transparency is a necessary condition for successful data-driven education. Data-driven decision-making practices are only possible in school climates where data are valued and visible. In many data-driven schools, graphs, tables, and other indicators of data usage permeate the school

environment. Discussions about data are frequent and analysis of student data is considered to be integral to the teaching and learning process.

Students and parents can be important allies in this process. Rather than serving as gatekeepers, and hindering access to student learning data, educators should strive to ensure that relevant data are accessible to parents and students in order to enlist their buy-in and support. Many times data will need to be made anonymous in order to comply with data confidentiality requirements. In some schools, teachers are finding that having students track their own learning progress increases their buy-in and motivation and illustrates that significant learning growth can be achieved regardless of students' initial starting points.

Educators can use communications such as notes home, website posts, and other mechanisms to disseminate status and progress information on key summative and formative assessment indicators to parents and students. Teachers and administrators should utilize data to celebrate instructional progress and successes as well as to address continuing gaps or needs.

Teachers

Like others, educators are naturally hesitant to have negative results exposed publicly. One of the key lessons from successful data-driven organizations, however, is that teachers and administrators must confront the often-brutal truths about their performance, and the reasons underlying lack of progress, if substantial progress is to occur. Educators can't address student needs if they don't know what, how significant, or how extensive those needs are.

Data-driven teachers view data as feedback, not as indictments. They use data to inform pedagogical modifications and actively seek out more data to judge the success of those changes. Data-driven teachers also are willing to discuss their instructional strengths and weaknesses with peers in order to facilitate shared communities of practice that are focused on individual and organizational learning. By recognizing and acting upon the fact that all educators, like students, have areas in which they could improve, teachers can be models of life-long learning for the students that they serve.

Leaders

One of the most important things leaders can do to foster data-driven educational practices is to facilitate school climates where it is professionally and emotionally safe to look at student data. Teachers will resist using data if they feel that the information will be used against them for evaluative or punitive purposes. This is especially true for teachers who are newcomers to data-driven education. Ultimately, teachers need to collaboratively examine classroom-level data so that they can identify and learn effective instructional techniques from each other. In a school where a climate of data safety exists, data are used to highlight faculty strengths and structure professional development opportunities rather than to identify weaknesses and blame teachers. School leaders bear the primary responsibility for fostering these kinds of climates.

7. Alignment for Results

One of the most difficult challenges for teachers and administrators is making the mental paradigm shift from existing practice, which commonly emphasizes process and delivery, to a mindset dedicated to the achievement of results. Successful data-driven educators recognize that accepting greater responsibility for student learning can result in improved student learning outcomes.

Results-driven educators assess all educational practices in light of their impacts on student learning. Any instructional practice, organizational structure, or school program that hinders student success is reexamined and redesigned. Even successful practices are examined to see if they can be improved.

Results-driven educators understand the importance and impact on student learning of continuous and progressive improvement, and recognize that even small improvements add up over time to become large ones. This latter point is particularly important, because ambitious long-term goals like “achieving 100% proficiency” can be disabling rather than motivating.

Instead of teachers individually selecting the content and direction of their professional development plans, teachers and leaders should work together to ensure that professional development opportunities are aligned to student and school learning needs. Similarly, curricular design and delivery also should be aligned to meet these needs. In results-driven school systems, all processes and programs are designed to facilitate maximal student learning: the guiding paradigm is “If it’s not working, why are we doing it?”

Teachers

Teachers who have incorporated a results orientation into their instructional practice continually seek out evidence about the success or failure of their pedagogy. Ineffective strategies are discarded, and successful strategies are tweaked or modified to achieve even larger learning gains. Data-driven teachers exhibit a constant dissatisfaction with the status quo and continually strive for further improvement, even when already exhibiting high levels of success. These teachers also are willing risk-takers who understand that trying something new and different may be the only path to improved outcomes.

Leaders

A results-oriented school system incessantly asks, at every level of the organization, five questions:

- Where do we want our students to be?
- Where are they now?
- How do we know?
- What are we doing for students who are meeting goals?
- What are we doing for students who are not meeting goals?

Leaders in successful data-driven schools ensure that these questions continually guide classroom instruction and organizational decision-making. Data-driven leaders also align, and help teachers connect with, necessary resources to facilitate effective educational interventions.

Conclusion

Mike Schmoker (1999) has said that if educators constantly analyze what they do and adjust to get better, student learning will improve. By focusing initially on small, rapid improvements and then building upon those toward an ongoing process of continuous reflection about classroom instruction and student learning outcomes, teachers across the country are significantly impacting student achievement. When these teachers also are able to participate in professional learning communities and collaboratively identify and implement effective, strategic instructional interventions, their schools are not only surviving this new wave of accountability but indeed thriving in it (see, e.g., Supovitz & Klein, 2003).

Below is snapshot of how our Data System will work. Note: Updates will be made this spring (2015) which will include procedures/documents for summer and 1st nine weeks of 2015/2016.

Professional Development: Data-Driven Analysis And Action Planning

KEY PRINCIPLES FOR LEADING ANALYSIS MEETINGS:

- Let the data do the talking
- Let the teacher do the talking (or push them to!)
- Always go back to specific questions on the test
- Make explicit, detailed action steps & ensure that they happen in the classroom

PRE-CURSORS FOR EFFECTIVE ANALYSIS MEETINGS:

Before Giving Interim Assessment:

- **BEFORE THE UNIT BEGINS:** Teachers review assessment and (backwards) plans towards the rigor of those assessments
- **A FEW DAYS PRIOR:** Teacher predicts performance on each assessment question (% correct)
- **PD:** Teachers receive model of how to do assessment analysis and complete action plan, and they see protocol for effective analysis meetings

Immediately Following Interim Assessment:

- **TEACHER ANALYSIS PLC (WEDNESDAYS):** Teachers do analysis of results prior to meeting, trying to answer fundamental question: why did the students not learn it?
- **TEACHER ACTION PLANNING PLC (THURSDAYS):** Teachers complete action plan
- **LEADER SUPPORT MEETING (30 MINUTES):** Leader analyzes teacher results, analysis and action plan:
 - Determine which standards require deeper analysis or more effective, explicit action steps
 - Prepare questions to get the teacher to improve analysis and/or action steps

Content Expertise: If the teacher or leader lacks deep content knowledge

- If Leader is lacking: identify expert within/outside of school to call on for extra support
- If Teacher is lacking: leader should be ready to coach them about effective techniques

Professional Development: Effective Analysis of Assessment Results

MAKE A SOLID HYPOTHESIS: Look at Specific Questions:

- Did students all choose same wrong answer? Why or why not?
- What misunderstandings are revealed: what do you think students were doing wrong here?
- What are all the steps students needed to be able to do to answer this question correctly? Where does it seem the student mastery broke down within those steps?

Look Within Standards:

- On questions that measured the same standard: were students better on some questions than on others?
- If so, what are the differences in difficulty between those questions? Why did students do better on one question than on another?

Compare Similar Standards:

- Do the results on one standard influence the other?

TEST YOUR HYPOTHESIS:

- Review written student work—do their errors match my hypothesis of why they are struggling?
- Ask students how they solved the problem—do their errors line up with your hypothesis?

MAKE EXPLICIT ACTION STEPS:

- Explicit Instruction: What would I have to teach to overcome these misunderstandings? How will that teaching be different than the last time?
- Assignments/Activities: What activities/assignments will students need to practice this new skill to the point of mastery?
- Assessment/Check for Understanding: Where will I build in assessment/checking for understanding during the lesson itself?

REPEAT THE PROCESS FOR STRUGGLING & SPED STUDENTS:

- Sort data by students' scores—are there questions that only the struggling students are getting wrong?
- What are all the steps the students need to take to answer these questions correctly? Which of these steps need to be made more explicit to the students?
- What sort of practice do the students need to master this standard—heavy repetition of computational skills? Following a multi-step protocol?

Second Line of Action—In-Class Support:

- What are the standards that will be reviewed/taught for the whole class?
- Are the struggling students' misunderstandings different than the rest of the students on these standards?
- What additional support/steps will the struggling students need when these standards are being reviewed?

Professional Development: Data Analysis and Action Planning PLCs

Data can give us the answer to **two important questions**:

How many students are succeeding in the concepts I teach?

Within those concepts, what are the areas of strength or weakness?

The answers to these two questions set the stage for targeted, collaborative efforts that can pay immediate dividends in achievement gains.

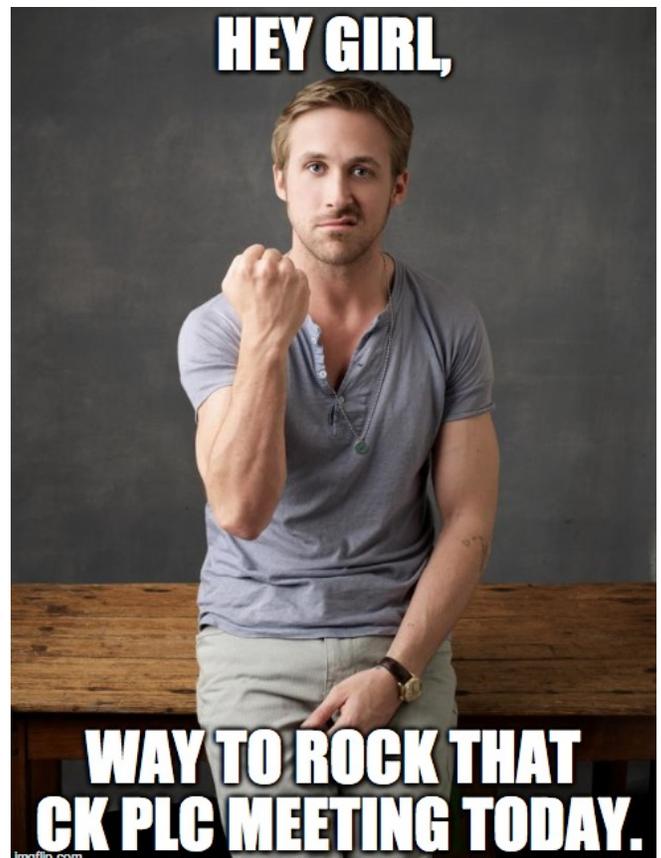

Turning Weakness into Strength

After your teacher team has set a goal, you can turn to the next important question: Within the identified subject or course, where do we need to direct our collective attention and expertise? In other words, **where do the greatest number of students struggle or fail within the larger domains?** For example, in English, students may have scored low in writing essays or in comprehending the main ideas in paragraphs. In mathematics, they may be weak in measurement or in number sense.

Every well-designed assessment provides data on areas of strength and weakness. After team members identify strengths and weaknesses, they can begin **the real work of instructional improvement: the collaborative effort to share, produce, test, and refine lessons and strategies targeted to areas of low performance, where more effective instruction can make the greatest difference for students.**

Teachers do have data, such as Individual Education Plans (IEPs), grades, and test scores. Though such individual data are useful, they are seldom converted into the kind of group data that is necessary for more formal and collective reflection and analysis. Even such easily gathered, conventional data are seldom collectively analyzed to help teams or schools find better ways to address collective problems. They should be.

Teachers tend to evaluate students individually and reflect on how to improve class performance less frequently. Often educators do not seek to identify and address patterns of success and failure, which can have broad and continuous benefits for greater numbers of children. Not focusing on patterns is unfortunate, because the **real power of data emerges when they enable us to see--and address—patterns of instructional program strengths and weaknesses, thus multiplying the number of individual students we can help.**

3 Big Ideas and 4 Crucial Questions

Big Idea #1: Ensuring That Students Learn

Big Idea #2: A Culture of Collaboration

Big Idea #3: A Focus on Data

4 Primary Questions

1. What do we want our students to learn?
 - CCSS/PARCC emphasis
 - Driven by effective collaboration
2. How do we know if they have learned?
 - Data derived from common assessments
 - Driven by effective collaboration
3. What do we do if they have not learned?
 - Systematic interventions
 - Driven by effective collaboration
4. What are we doing to extend learning for those students who *have* learned?
 - Systematic interventions for ALL levels
 - Driven by effective collaboration

Professional Development: Team roles in data analysis and action planning PLCs

Action Planning PLCs

The group must establish norms, meeting guidelines, and protocols. ***This time is for collaborative planning, and independent work is not permitted.*** The smallest allowable group is two people. In the beginning, the literacy facilitator will organize the planning. After the group norms are established, all of the roles in the collaborative group can rotate. Planning for a larger group can rotate by subject area, with all teachers collaborating in lesson and assessment design, even though they are not currently teaching the subject under consideration.

Prepare an agenda and decide on team roles (e.g., timekeeper, facilitator, recorder). Inform appropriate school leaders of the schedule. They may need to know what groups will be meeting and what focus is planned.

Keep to the agenda, and eliminate announcements that are not critical to the process.

Establish time limits for discussion. Teams can probably complete business in a 45-minute session. A time limit will help to keep the process focused.

Protocol

1. **Follow Up:** Begin with follow-up from the last collaborative planning meeting. Engage members in a concise discussion of what worked, what did not work, and how strategies can be refined. This can be done in 5 minutes.

Then...

Complete steps 2 and 3 in approximately 10 minutes. (The process will move faster with practice.) The goal for a 45-minute session would typically be to align standards with accompanying assessments for two units.

2. **Chief Challenges:** Identify and discuss a math/literacy standard where students need to improve their skills (a relative weakness) that you plan to teach in the next unit. This ought to reflect the most urgent instructional concern, problem, or obstacle to progress (what does the data say?).

Teachers should use data that are relevant for their own students, including, but not limited to, NWEA reports, classroom level assessments, 2014 ACTAAP reports, Reading Plus reports, teacher-made assessments, IEPs, and grades.

3. **Non-math and literacy** teachers briefly share the general focus of their upcoming units. Brainstorm how the standards discussed in #2 above might be embedded into the content discussed in #3.

4. Each teacher rough out an assessment of the standards discussed in #2 and #3 above for the upcoming unit you plan to teach (or review if the assessment is embedded in your curriculum). **Identify what goes into an assessment of the standard by brainstorming the skills tied to the**

standard on which the data says you need to focus. (10 minutes)

From the brainstorm, identify the crucial skills needed to master the standard. The assessment doesn't have to be polished at this point, but the design should be specific enough to show exactly what students will have to do to demonstrate that they have mastered the standard. Be sure you require students to do more than retrieve factual information. Make sure they will be required to demonstrate higher-order cognitive processes, such as application, understanding, analysis, and synthesis.

5. 15 minutes. Rough out a lesson designed to help as many students as possible succeed on the assessment. If your lessons are embedded in your curriculum, try to identify trouble spots that might prevent your students from fully reaching mastery of the standard(s). Sketch the sequence and content of the lesson. **Identify how INBs can be used to help master the standard.**

Anticipate obstacles to learning and brainstorm ideas to negate those obstacles.

6. Before the next planning session, team members teach the lesson to their classes and use the common assessment they've designed to determine what students have learned. Teachers summarize results for their own classes. They look at more than grades. They reflect on patterns. What concepts/skills did students master? What concepts/skills were difficult for many students? What needs re-teaching or further development? Where do they need to focus next? (see #1 above)

7. At the beginning of the next collaborative planning session (or sooner, if there is opportunity), teachers compare results and analyses with those of the other teachers in their group.

Facilitator

A facilitator skillfully helps a group of people understand their common objectives and steers the plan to achieve them without personally taking any side of the argument. The facilitator assists the group in achieving a consensus on any disagreements that pre-exist or emerge in the meeting to create strong basis for future action.

Some of the things facilitators do to assist a meeting:

- Helping participants show up prepared to contribute
- Codifying the purpose, scope, and products of the meeting
- Keeping the group on track to achieve its goals in the time allotted
- Either providing the group or helping the group decide what ground rules it should follow and reminding them of these when they are not followed
- Reminding the group of the objectives or required products of the meeting or session
- Setting up a safe environment where members feel comfortable contributing ideas
- Guiding the group through processes designed to help them listen to each other and create solutions together
- Asking open-ended questions that stimulate thinking
- Ensuring the group doesn't settle for the first thing that they can agree on because they find it painful to go on disagreeing with each other
- Offering opportunities for less forceful members to come forward with contributions
- Ensuring that actions agreed upon by the group are assigned to individuals

Timekeeper

A timekeeper is someone who skillfully keeps the meeting on a schedule. Effective, time-efficient meetings are fast paced and productive. The timekeeper moves the group through the different parts of the meeting. The chief challenge is to keep members on track with clear concise statements lasting no more that 20 seconds during the brain storming section. Below is a suggested guideline of each

part of the meeting.

Recorder

The recorder writes all ideas where participants can see, possibly on a white board. The recorder may question participants for clarity. Actions agreed upon by the group (the assessment and lesson plan) are recorded for all to see and are assigned to individuals. The recorder also completes the Team Log and distributes it according to protocol.

Brainstorming Guidelines

The purpose of brainstorming is to produce as many good ideas as possible in a fast-paced, positive setting. This step in a focused improvement meeting includes the following:

7. Assign a recorder to ensure that the group keeps accurate notes of each idea or strategy.
8. State the purpose or desired result of the team meeting, preferably in writing.
9. Write each idea on a white board.
10. Offer each person in the group **in consecutive order** the opportunity to contribute one idea or strategy.
11. Keep each person's remarks as succinct as possible by limiting comments to 20 seconds or less.
12. Do not criticize or discuss of ideas or strategies at this time.
13. Expect to "piggyback" or build on each other's ideas to generate the best strategies.

Warm and Cool Feedback

There are two types of feedback in this process. The first one is "Warm" feedback. This feedback is termed warm because it is supportive in nature. Warm feedback may include comments about how the work presented seems to meet the desired goals and generally consists of supportive statements.

The second one is "Cool" feedback. Cool feedback is more critical. It may consist of concise essential questions that are both supportive and challenging. (i.e. "Where are the gaps?"; "What are the problems here?") "I wonder what would happen if you tried this," is more acceptable than, "I think you should have..." or, "Why didn't you....?"

Rewards, Recognition, and Celebration

Rewards, recognition, and celebration are important motivators. These three things are indispensable elements of effective collaboration. As we practice collaborative planning with common formative assessments, we have to celebrate small achievements. When data from common assessments show even small gains, we need to recognize and celebrate that. Brainstorm ways to communicate those gains school-wide.

Accountability

Groups will keep brief minutes of who was present/absent and the topics that were covered. They may either describe or attach lesson plans and common assessments. A basic format for minutes is included in this guide.

Administrators are expected to conduct walk-throughs on the Action Planning PLC sessions. Expect them to stop by and listen for a few minutes.

Test Analysis Worksheet

1. List the five “easiest” items in terms of the percentage of students giving the correct answer. List in descending order, highest first. List each item number and its topic standard. If too many ties, choose items closest to the **end** of the test.

“Easiest” Items Rank	Item #	Standard	# correct	# incorrect

2. Look at these items on the test. Discuss and note any surprises or interesting results.

3. Which topic shows the strongest student performance? Discuss.

4. List the five “hardest” items for these students. List in ascending order, lowest first. If too many ties, choose items closest to the **beginning** of the test.

“Hardest” Item Rank	Item #	Standard	# correct	# incorrect

5. Which topic shows the weakest student performance? Discuss

Implementation Rubric: Data-driven Instruction

The rubric is to be used to assess the present state of data-driven instruction and assessment in our school. The rubric specifically targets interim assessments and the key drivers leading to increased student achievement.

4 = Exemplary Implementation

2 = Beginning Implementation

3 = Proficient Implementation

1 = No Implementation

<p>DATA-DRIVEN CULTURE</p> <ol style="list-style-type: none"> 1. Highly Active Leadership Team: facilitate teacher-leader data analysis meetings after each interim assessment and maintain focus on the process throughout the year _____/4 2. Introductory Professional Development: teachers and leaders are effectively introduced to data-driven instruction—they understand how interim assessments define rigor and experience the process of analyzing results and adapting instruction _____/4 3. Implementation Calendar: Develop and share a detailed calendar that includes time for assessment creation/adaptation, implementation, analysis, planning meetings, and re-teaching (flexible enough to accommodate district changes/mandates) _____/4 4. Ongoing Professional Development: PD calendar is aligned with data-driven instructional plan: includes modeling assessment analysis/action planning and is flexible to adapt to student learning needs _____/4 5. Build by Borrowing: Identify and implement best practices from high-achieving teachers & schools: visit or study schools/classrooms, share & disseminate resources/strategies _____/4 <p>NOTES:</p>	
<p>ASSESSMENTS</p> <ol style="list-style-type: none"> 1. Common Interim Assessments 6-8 times/year Literacy _____/4 Math _____/4 2. Transparent Starting Point: teachers see the assessments at the beginning of each cycle; they define the roadmap for teaching _____ /4 _____ /4 3. Aligned to PARCC/CCSS _____ /4 _____ /4 	

<p>4. Aligned to instructional sequence of clearly defined grade level/content expectations</p> <p>5. Re-Assess previously taught standards</p> <p>Notes:</p>	<p>_____/4 ____/4</p> <p>_____/4 ____/4</p>
<p>ANALYSIS</p> <p>1. Immediate turnaround of assessment results (ideally 48hrs)</p> <p>2. User-friendly, succinct data reports include: item-level analysis, standards-level analysis & bottom line results</p> <p>3. Teacher-owned analysis facilitated by effective leadership preparation</p> <p>4. Test-in-hand analysis between teacher(s) & instructional leader</p> <p>5. Deep: moves beyond “what” students got wrong and answers “why” they got it wrong</p> <p>NOTES:</p>	<p>_____/4</p> <p>_____/4</p> <p>_____/4</p> <p>_____/4</p> <p>_____/4</p>
<p>ACTION</p> <p>1. Plan new lessons collaboratively to develop new strategies based on data analysis</p> <p>2. Implement explicit teacher action plans for whole-class instruction, small groups, tutorials, and before/after-school supports</p> <p>3. Ongoing assessment: utilize in-the-moment checks for understanding and in-class assessment to ensure student progress between interim assessments</p> <p>4. Accountability: instructional leaders review lesson/unit plans and give observation feedback driven by the action plan and student learning needs</p> <p>5. Engaged Students know the end goal, how they did, and what actions they are taking to improve</p> <p>NOTES:</p>	<p>_____/4</p> <p>_____/4</p> <p>_____/4</p> <p>_____/4</p> <p>_____/4</p>
	<p>TOTAL: ____/100</p>

30 Minute Leadership Support Meeting

DISCUSS WHAT WORKED (5 MINUTES):

- Teacher shares most recent assessment *and analysis* of the results.

 - Explain the identified focus strategies selected by the team at the previous meeting. How well did they work or how can they be refined?
-

CHIEF CHALLENGES: (5 MINUTES)

What is the most urgent instructional concern, problem, or obstacle to progress and to better results?

Identify a common area of area of under-performance identified by data.

PROPOSED SOLUTIONS (8-10 MINUTES):

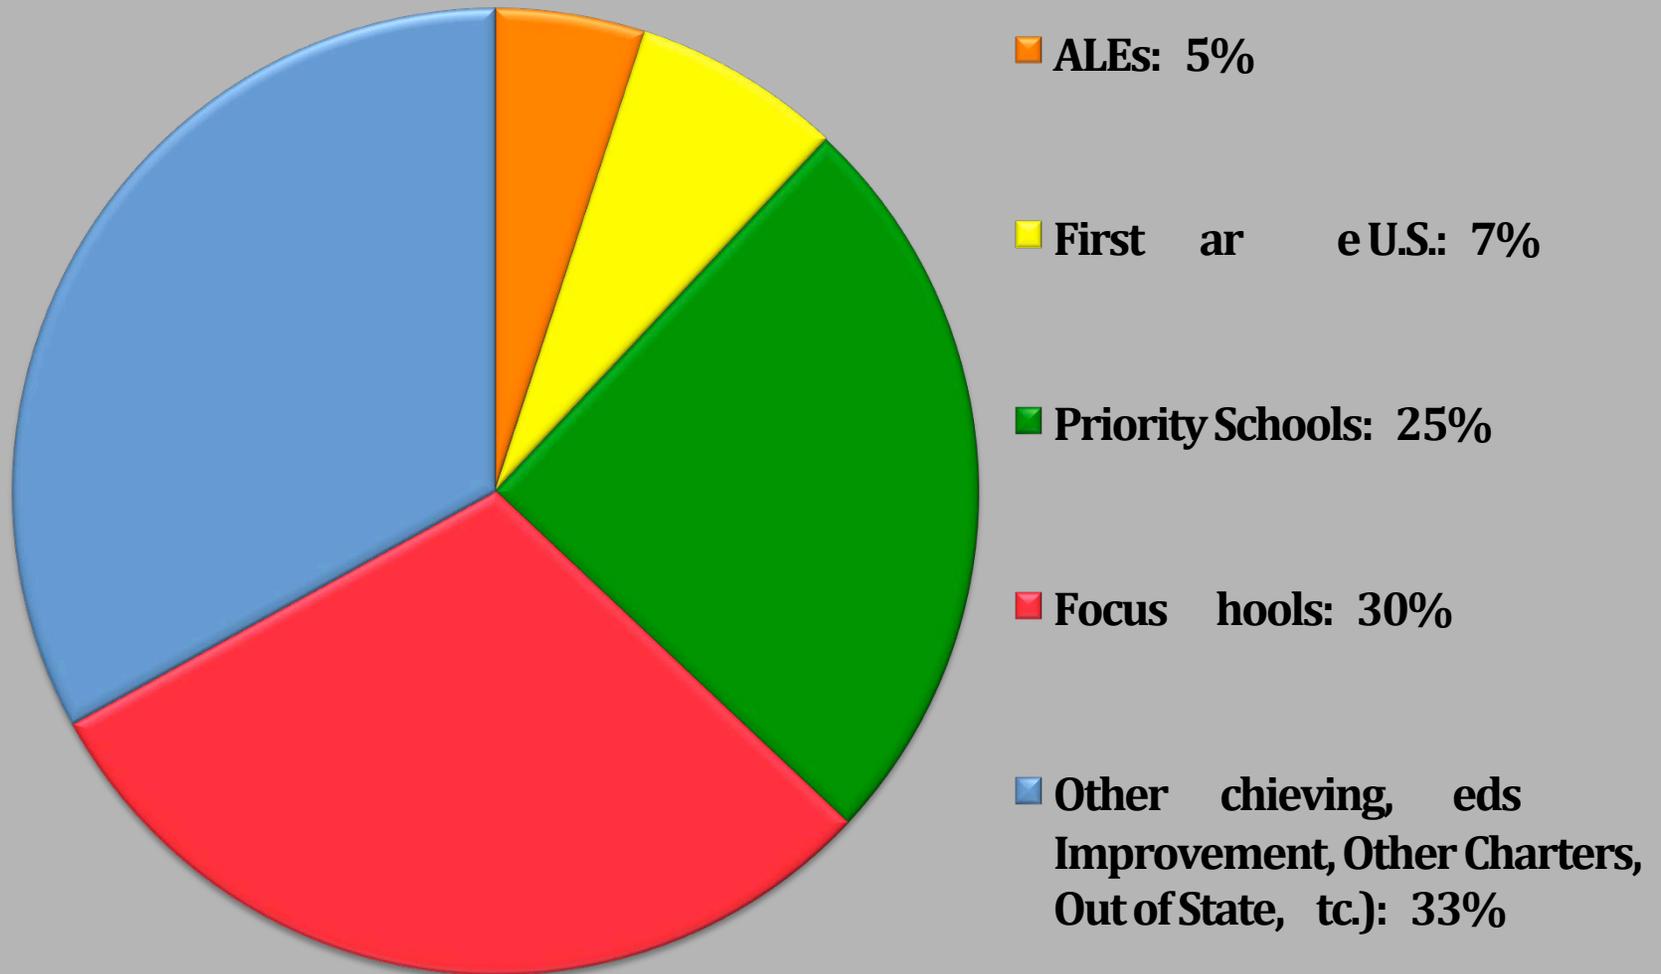

Suggest practical solutions to these identified problems.

ACTION PLAN (8-10 MINUTES):

Decide which solutions or strategies might be best for the teacher to focus on and implement between now and the next meeting.

Long-Term Student Growth on NWEA MAP Assessments

Covenant Keepers sought to determine the average point growth of students who have remained with CK for one full school year or more. **CK determined the growth average of long-term students meets or exceeds typical growth nationwide on the NWEA exam.**

Projected Typical Growth (50% of students nationwide meet these growth goals from Test A to Test B)

Subject	Fall 2013- Winter 2015	Fall 2012- Winter 2015
Reading	6 points (7th grade) 5 points (8th grade)	9 points
Math	9 points (7th grade) 7 points (8th grade)	13 points

Key:

Green: Proficiency according to NWEA National Norms. The green score at the top of the column is the national median score for each grade level.

Yellow: Growth exceeding typical growth in that time period.

Aqua: Cohort Growth Average

7th Grade Cohort: Fall 2013-Winter 2015: Math

35 Students Returning: 35 students have remained with this cohort from 6th grade into 7th grade.

Name	Fall 2013 (219)	Winter 2015 (228)	Growth

Long-term Students Scoring Proficient on the Winter 2015 NWEA MAP Assessments

Definition of long-term: remaining at Covenant Keepers for period longer than 1 school year.

Covenant Keepers sought to determine the percentage of long-term students among those who scored proficient on the Winter NWEA MAP Assessments. **CK determined that the majority of students who scored proficient on the NWEA MAP Assessments in all areas were long-term students.**

Subject	Reading	Math	Language
7th grade long-term students proficient/all proficient students	7/11 63%	6/6 100%	8/9 88%
8th grade long-term students proficient/all proficient students	9/12 75%	4/6 66%	10/11 91%

63% of 7th grade students who **scored proficient** on the NWEA MAP Reading Winter assessment are **long-term students**.

100% of 7th grade students who **scored proficient** on the NWEA MAP Math Winter assessment are **long-term students**.

88% of 7th grade students who **scored proficient** on the NWEA MAP Math Language assessment are **long-term students**.

75% of 8th grade students who **scored proficient** on the NWEA MAP Reading Winter assessment are **long-term students**.

66% of 8th grade students who **scored proficient** on the NWEA MAP Math Winter assessment are **long-term students**.

91% of 8th grade students who **scored proficient** on the NWEA MAP Language Winter assessment are **long-term students**.

Long-Term Students Meeting Growth Goals on the Winter 2015 NWEA MAP Assessments

Definition of long-term: remaining at Covenant Keepers for period longer than 1 school year.

Covenant Keepers sought to determine the percentage of long-term students among those who met their growth goal on the Winter NWEA MAP Assessments. **CK determined that the majority of students who met their growth goal on the NWEA MAP Assessments in all areas were long-term students.**

Subject	Reading	Math	Language
7th grade long-term students MG/all students MG	23/28 82.1%	19/28 67.9%	15/21 71.4%
8th grade long-term students MG/all students MG	12/14 85.7%	11/16 68.8%	14/17 82.4%

82.1% of 7th grade students **who met or exceeded their Winter Growth Goal** on the NWEA MAP Reading Winter assessment are **long-term students**.

67.9% of 7th grade students **who met or exceeded their Winter Growth Goal** on the NWEA MAP Math Winter assessment are **long-term students**.

71.4% of 7th grade students **who met or exceeded their Winter Growth Goal** on the NWEA MAP Language Winter assessment are **long-term students**.

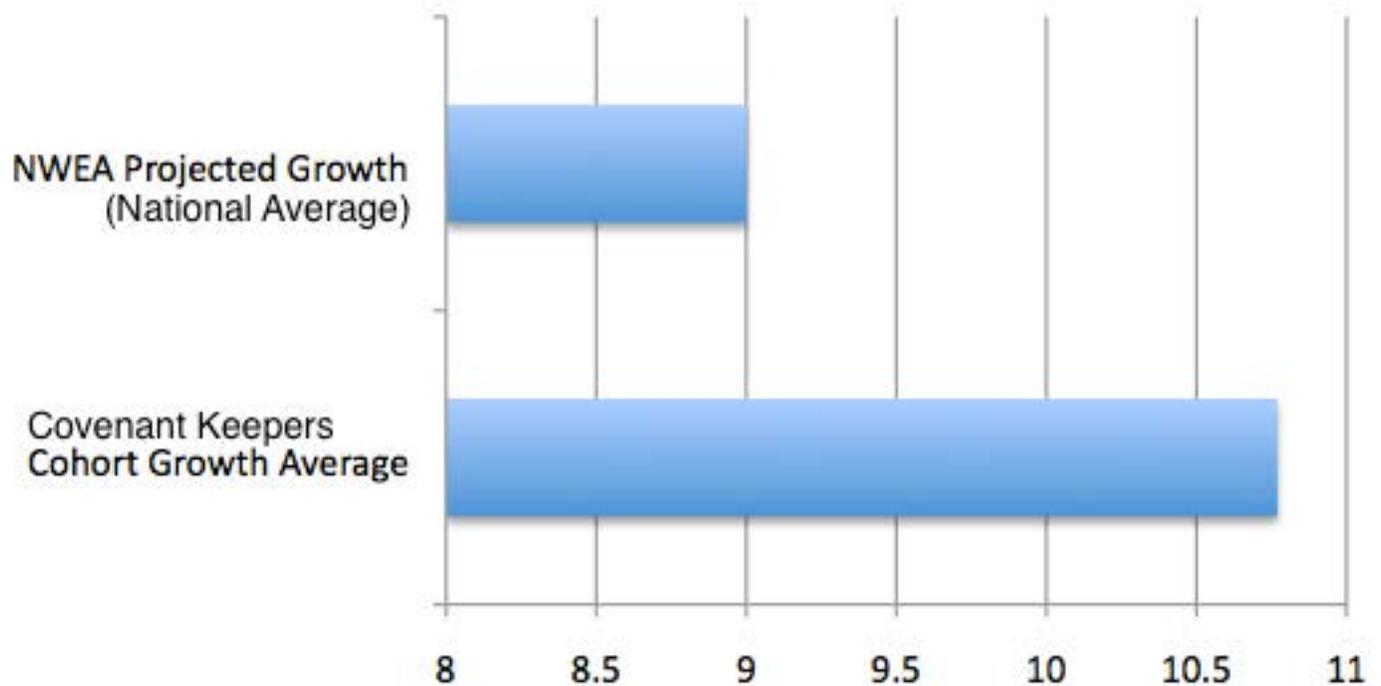

85.7% of 8th grade students **who met or exceeded their Winter Growth Goal** on the NWEA MAP Reading Winter assessment are **long-term students**.

68.8% of 8th grade students **who met or exceeded their Winter Growth Goal** on the NWEA MAP Math Winter assessment are **long-term students**.

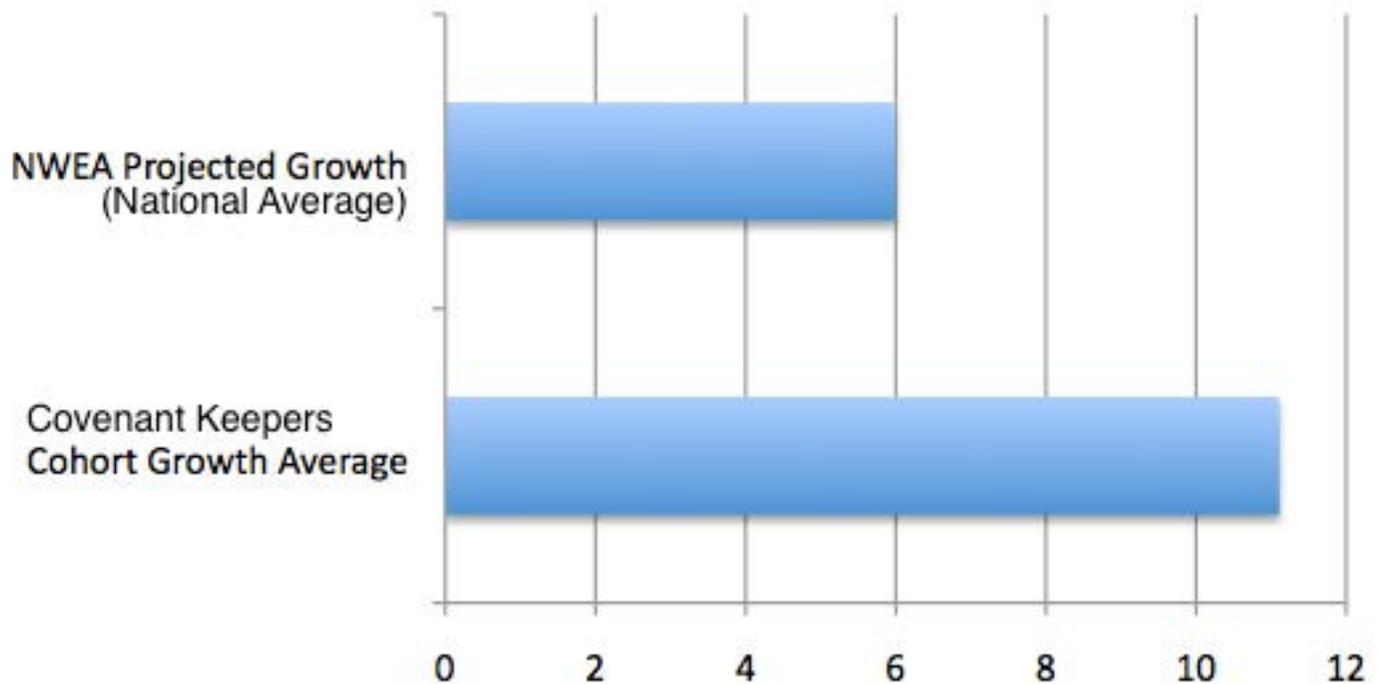

82.4% of 8th grade students **who met or exceeded their Winter Growth Goal** on the NWEA MAP Language Winter assessment are **long-term students**.

Note: An average of 50% of students nationwide meet their growth goal for any NWEA test. Covenant Keepers' long-term students have well exceeded this statistic.

Third Quarter ESEA/ IMO Report

Date Completed: March 18, 2015

School: Covenant Keepers Charter School

District: Covenant Keepers Charter School

Status: Priority Academic Distress

Principal: Dr. Valerie Tatum

ADE School Improvement Specialist: Chante'le' Williams

External Provider: APSRC

Internal School Improvement Specialist: None

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights:

As reported by school:

- In the winter of 2015, we created the leadership team role of Student S.O.A.R. Coordinator (Lenard Blocker).
S.O.A.R. stands for:
 - Setting Goals
 - Organizing
 - Asking Questions
 - Reflecting On Results

Responsibilities of this position:

- mentoring students targeted through Life Strategies Services

Third Quarter ESEA/ IMO Report

- Daily mentoring to encourage positive leadership skills in students
- Transitions all new students through the S.O.A.R. program for 2-4 weeks
- Conducts at-home visits as needed

- Increased enrollment in the 3rd quarter
- PARCC readiness: technically and academically
- NWEA Winter testing: many students had success meeting and exceeding their growth goals.
 - Teacher/student data talks in regards to Winter to Spring goals for NWEA tests (will conduct a survey in the near future to assess student perceptions of the data talk.
 - 77% licensed teachers, 100% highly qualified teachers on staff

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

AS reported by District:

- Inclement weather right before PARCC testing impeded progress.
- Bandwidth is a problem; having to use all technology at the same time
- Communicating with the after-school programs: making sure all transitions are clear is an issue.
- Influx of kids- making sure all records/documentation is taken care of is a necessity.

b) Building Principal:

As reported by principal:

- Keeping the rituals and routines going across the whole school: simple things, such as standing at the door and having pencils are problems we face daily.

Third Quarter ESEA/ IMO Report

c) Building Leadership Team:

As reported by Building Leadership Team:

- Interruption of PARCC- making sure all students are ready to test was an issue.
- Acclimating new students to our school environment is a something that needs to be worked out.

d) School Improvement Specialist:

As reported by ADE SIS:

- The leadership team and teachers should continue to engage in inquiring about instructional improvement, the instructional leaders should also continue to monitor to ensure high quality instruction is present in every classroom all the time.
- Representatives from all stakeholders should use data from multiple sources to establish a coherent vision that guides leadership actions and decisions.
- It would be advantageous to have rigorous and regular reviews in place to assess progress to goals, make adjustments to strategies as needed, and guided systematic professional development, support and monitoring efforts (as related to common formative assessments).
- Academic Distress Recommendations work is being completed diligently.
- Deadlines are being met in a timely manner.

e) Other:

None

Additions/Revisions to current year's PIP/TIP:

None

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

Date Completed: April 08, 2015

School: Dermott High School

District: Dermott School District

Status: Title I Priority School and Academic Distress

Principal: Greg Evans

ADE School Improvement Specialist: LaDonna Spain

External Provider: None

Internal School Improvement Specialist: Heather Hardin

Highlights:

- Personnel and office staff are inviting and helpful when entering the building and office.
- The building administrator is present in the hallway before the start of school with one of the building coaches.
- There is evidence of student work samples posted in the hallways across several content areas with rubrics at the end of the quarter including Mathematics, Literacy, Science, and Social Sciences.
- Instructional facilitators are working in their offices, walking to and from classrooms, or teaching classes during the site visits.
- The building administrator was present during some of the review of the Interim Measurable Objective data review, but was pulled away for a parent meeting to collect missing data from the data binder.
- Teachers are mostly engaged with students during class time observations. Students are seen working from smart boards, discussing content with the teacher and other students, working on computers, or working from independent work at their desk. Objectives are posted in some of the classrooms. Teachers in other locations besides the classroom left notes on the door of the class location.
- Students greet visitors with smiles and open doors to the office for visitors. Students are now waiting behind the office counter instead of surrounding the administrative assistant's desk. This is a change in student behavior from the previous year when students could be found behind the office counter huddled around the administrative assistant's

ARKANSAS
DEPARTMENT
OF EDUCATION

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

- desk. The administrative assistant worked to enforce office procedures from the previous year to the current year.
- Students are seen walking to classes on the right side of the hallways before classes begins. Hallway noise levels are low while students transition to classes. Students walk to classes instead of run as seen in the previous years.
 - The principal is sending weekly e-mails to the staff.
 - The administrator took a group of students to eat lunch at Mazzio's Friday, March 20, 2015 for making all A and B grades last semester. He indicated in his e-mail to the staff that the trip was a reward for focusing on their grades and understanding that they are important to their future. He encouraged to staff to, "send some praise their way." He provided the list of students to the teachers that would participate in the incentive trip.
 - Work plans for the building administrator and instructional facilitators are submitted by e-mail to the Arkansas Department Of Education School Improvement Specialist (ADE SIS) weekly the results are as follows:
 - February Calendar and Work plan reviews includes:
 - According to the Administrator's Work Plan, the focus of the week of February 16-20, 2015 included the following-
 - A total of 1310 minutes were collected of time spent at school
 - 900 additional minutes were spent at ballgames for duty
 - 64% of the week was spent on TESS, Leadership Team, Instructional Team activities.
 - 34% of the week was spent on Other, Office, or Lunch duty.
 - There was no school on Monday and the administrator indicated that he was not at school on Tuesday.
 - Further breakdown included:
 - Parent meetings 30 minutes / 2% of the total time
 - Priority Improvement Plan (PIP)/ Interim Measurable Objective (IMO) 0/0%
 - Other 75/6% of the total time
 - Professional learning communities (PLC) 90/7% of the total time
 - Leadership team 480/ 37% of the total time
 - PD in school 0/0%
 - PD outside of school 0/0%
 - TESS 270/21% of the total time
 - Meetings away 0/0%
 - Office 260/20%
 - Lunch duty 105/8%
 - According to the Math Facilitator's Work Plan, the focus of the week of February 2-6, 2015 included the following-
 - A total of 1220 minutes were collected of time spent at school
 - Further breakdown included:

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

Professional learning communities (PLC)s 180/15%

Leadership Team 60/5%

Principal meeting 45/4% (including a 45 minute meeting with the internal district SIS not the administrator)

PD for Instructional actions 0%

Modeling/covering classes for Peer observations for teachers 630/52% (daily)

Observing and feedback to teachers 105/8%

Direct student instruction/intervention 50/4%

Small group PD 0%

Other 150/12% (including The Learning Institute (TLI) test uploads, Website search, 21st Century meeting)

- According to the Curriculum Coordinator's Work plan, the focus of the 24th week included the following-
A total of 18 hours were collected of time spent at the high school and 1 hour at the elementary school of service. Monday was President's Day, Tuesday the Curriculum Coordinator was absent and Wednesday and Thursday was spent on PARCC monitoring of infrastructure testing.
Further breakdown included:
High school –
Unit / Curriculum Review- 1 hour
Organizational Structure Support- 5 hours
Office other – 6 hours
Technology planning 12 hours
- There is confirmation the Interim Superintendent reviews Arkansas Department of Education School Improvement Specialist reports. E-mail responses are submitted to the Arkansas Department Of Education School Improvement Specialist (ADE SIS) directly from the Interim Superintendent regarding concerns from the Arkansas Department Of Education School Improvement Specialist (ADE SIS) reports. The Interim Superintendent has agreed to begin attending all core and building leadership team meetings following the report from the Arkansas Department Of Education School Improvement Specialist (ADE SIS) of the lack of instructional leadership by the Administrator.
- According to high school personnel, the Interim Superintendent and Federal Program Coordinator assume district responsibly and decision making for the district as evident in District Leadership Team meeting minutes and reports from faculty.
- District School Improvement Specialist supports the building by facilitating the development of hallway bulletin boards including current student work with posted rubrics. There was a need for a bulletin board for a mathematics teacher to post student work outside the classroom door. The need was fulfill quickly by the central office. The mathematics teacher now has a shout out section reserved on a student praise wall located outside of the door. The shout out may

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

be written by students or the teacher. The students are encouraged to display the work that includes their name and grade as well as handwritten post its on the bulletin board.

- The District School Improvement Specialist saw a need for classrooms to have pencil sharpeners. The Federal Program's Coordinator submitted a work request for each teacher following the communication of the need to provide the sharpeners in a timely manner to the teachers. Today all teacher requests have been met according to the District School Improvement Specialist.
- As reported by the District School Improvement Specialist-
- co-taught with a math teacher during the 8th grade math boot camp
- facilitated the Parent Involvement Team meeting(s)
- maintains the hall television monitor by turned on the monitor daily and updating the information
- assisted with the gathering and analyzing data for Interim Measurable Objective (IMOs).
- reviewed active and completed Indistar tasks with team members.
- collaborated with Academic Distress team during their on-site visit.
- represented the district at a career fair along with the Superintendent and Curriculum Coordinator.
- met with the Rural Community Alliance representative to discuss a plan for developing Next Steps for their work with the district.
- organized a day for a group of parents to volunteer in the school where needed.
- The Core Leadership Team used the Turnaround Principal Implementation Rubric to self-assess the status of the Indicators selected by the Academic Distress Team during the regularly scheduled meeting on Thursday. All Principles were scored as a 2 except 2 which were self-assessed as a 3. Gathered evidence for the ADE selected Indicators of the 7 Turnaround Principles rubric.
- A needs assessment has occurred and is being reviewed and updated. Technical assistance and support are being offered in the development of the Priority Improvement Plan (PIP) and needs assessment quarterly
- Weekly progresses are being reported to the Arkansas Department Of Education School Improvement Specialist (ADE SIS) and Interim Superintendent by reports
- The Priority Improvement Plan (PIP) is in the revision process to address findings from Year 2 Priority Improvement Plan (PIP) report
- Began contributing information to the 3rd quarter report
- Assisted with administering and monitoring the PARCC exam for a week.
- Documented next step progresses and reported those in a reply to a Coaching Comment.
- The principal, SIS, and Interim Superintendent are continuing to discuss teacher effectiveness interventions.
- Professional development has been aligned to identify needs of teachers.

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

- A positive behavior system is evident and used to improve the learning environment
- Collaborated with the Arkansas Department Of Education School Improvement Specialist (ADE SIS) to share the evidence gathered for the items on the rubric.
- The District School Improvement Specialist provided the following list of next steps/actions to be completed by the administrator and curriculum and instruction team prior to a two week absence:
- Discuss the Next Steps left by the Arkansas Department Of Education School Improvement Specialist (ADE SIS) with those assigned.
- Follow up with the progresses of the Next Steps left for the week of February 9 – 13, 2015 listed below:
- Building Administrator:
 - In regards to this Next Step:
 - *Determine which students are not actively engaged in school activities and why*
 - Please gather the list of student members you requested the sponsors send to you and compare it to a master student list by grade (you can get that list from the building counselor). Identify the students who are not a member of any club, sport, etc... If you have not gotten a list of members from the sponsors yet, please ensure they get it to you ASAP. I would like to see the list of nonparticipating students when I return.
 - In regards to this Next Step:
 - *Check grades for student progress periodically and at mid-term*
 - Since mid-term is here, request a progress report from Mrs. Bunn for students in math and literacy classes. After you identify struggling students, you can address the following Next Steps:
 - *Meet with individual teachers to discuss plans and student outcomes*
 - *Meet with some students identified as struggling to provide further support of teachers*
- Literacy Instructional Facilitator:
 - Observe a full period of teacher A and teacher B's classes daily. For teacher B, please alternate between the 3rd and 7th period 11th grade classes. Please make notes of what is observed and share them with the curriculum coordinator and building administrator. I will review them when I return. You may wish to use the Classroom Observation sheet that I created for the curriculum coordinator.
 - During the Common Planning Professional Learning Communities (PLC), please review the Rtl process with the teachers and ensure they are documenting the assistance they provide struggling students. Review student-

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

learning data.

- Math Instructional Facilitator:
 - Please lead the Common Planning Professional Learning Communities (PLC) and review the Response to Intervention (RtI) process with the teachers and ensure they are documenting the assistance they provide struggling students. Make sure teachers identify struggling students, students who are on level, and students who are excelling per class. Have them make brief notes about why the students are struggling. I would like to see each teachers' notes when I return.
- Curriculum Coordinator:
 - Please attend the elementary Professional Learning Communities (PLC) this week and present the Response to Intervention (RtI) process, Interim Assessment Remediation Plan, and My Selfie to the teachers.
 - During the PD on Friday, could we also use that time to hold a Vertical Team meeting? If so, please have the teachers sign in on a separate sign in sheet documenting the meeting. The Math Facilitator is going to lead the Math Vertical Team Meeting during that time. Since all the teachers will be together at that time, it will be good opportunity to present information related to vertically aligning to them.
- **Sampling of Building Leadership Team activities during 3rd quarter include:**
 - In the after school building leadership team, the Student Safety and Discipline Team and Parent Involvement Team Chairpersons gave updates from their team feedback form. The feedback form was created by the District School Improvement Specialist to provide a structure for the team reporting.
 - The team discussed the problem of repeat offenders when it comes to discipline referrals. One member posed the question, "What intervention can we put into place to help decrease repeat offenders?" Members of the team brainstormed ideas such as role models, behavior contracts, and positive reinforcements. Specific students and their circumstances were discussed. It was decided that the Student Safety and Discipline Team will explore targeting those repeat offenders and assigning them a mentor teacher. (The above meeting decisions and actions are occurring in absence of the Priority Improvement Plan (PIP) process and leadership team discussions.)
 - The team identified students who would be interviewed by the Academic Distress Team.
- The District School Improvement Specialist assumed the role of assistant to the Family and Community Engagement team. According to the district school improvement specialist, the Family and Community and Safety and Discipline teams provided an update to the Building leadership team during the regularly scheduled meetings. Both subcommittees are on target to reach their 3rd quarter goals in February according to the District School Improvement Specialist and team meeting minutes.

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

- According to the district school improvement specialist, the web site survey was reviewed by the Family and Community Team. There were 13 responses. (The survey remains on the website on 4/11/2015 without indication of removal, updates, or next cycle of data analysis from current responses.) The full results of the on line survey were not disclosed to the Arkansas Department Of Education School Improvement Specialist (ADE SIS); however, the team is focused on ways to build student pride. An action plan is being developed to address the survey findings. The team decided to give the survey again to stakeholders by paper copy instead of using the website to encourage participation in the survey. (The decisions and action plans are in absence of the Priority Improvement Plan (PIP). The District School Improvement Specialist and ADE school improvement specialist discussed the possibility of the development of an action plan on a word document to be uploaded in the Document Upload section of the Indistar system in the future.)
- The Parent and Community Involvement Team are working on the following:
 - share calendar with stakeholders
 - Collect all surveys provided to stakeholders and analyze the results to report findings and plan to address needs found within the result.
 - discussed the status of the Interim Measurable Objective (IMO) for positive parent contacts and it was determined that it was met.
 - reviewed the outcome of the African American History program presented by the art students.
 - discussed the Volunteer Board that is going to be posted in the front office and reviewed the teacher requests form for teachers to posts requests for volunteers on the board.
 - reviewed a “timeline” for next year regarding when specific events should occur during team meetings. The item is still in review.
 - discussed details of the Black History Month Skit scheduled for February 27, 2015. A signup sheet was passed around to the teachers asking for donations for items to have a Cast Party after the skit.
 - reviewed the four methods of outreach: Facebook, School Reach, Remind101, and church bulletins.
 - gathered a list of pastor/ secretary emails for the team to send notifications of events to.
 - discussed a “Volunteer Board”. This would allow the teachers to post information about what they may need a volunteer for in their classroom.
 - discussed updating the Parent Volunteer Handbook to include necessary items such as a bell schedule, map of the school, dress code, etc...
 - reviewed the website survey results and brainstormed ideas for activities that would increase student pride in the school.
- Student Safety & Discipline Team activities as reported by the district school improvement specialist-
 - Referrals are down; the Interim Measurable Objective (IMO) is being met. The team members reviewed perfect

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

attendance data which totaled 128 students and discipline referrals for a two week time span which totaled 7 referrals. The team charted referrals before Interim Measurable Objective (IMO) were due and determined they were significantly reduced due to students taking part in the PARCC exam each day. For the upcoming year, the team discussed updating the tardy policy and dress code.

- With the boot camp going on this week, there has been an improvement on the discipline slips that are being turned in; this is accredited to the personnel in charge of the boot camps.
- The nurse's report shows no issues.
- The Dean of Students and a team member conducted a safety walkthrough through the building, including the band hall. There are no safety issues at this time.
- The Dean of Students discipline focus walks are "pretty much positive."
- There were plans in motion for rewarding those students on the A/A-B honor rolls from last semester. The funding is in place to take these students out to eat in Monticello. There are 13 students total (double our original estimate), and the date (originally proposed to be March 6). The new date is March 13. Mr. Evans is chaperoning, and will be taking the students to Mazzio's pizza. Permission slips need to be typed and sent out. A team member created permission slips for the students, the dean of students called the students out.
- A reward for the Practice PARCC test was completed during lunch.
- Handbook changes included:
 - Tardy policy
 - First semester exemption
 - Lunch time d-hall needs to be added
 - Revisit dress code
- Next steps:
 - The Dean of Students needed to acquire a list of those students with no discipline referrals
 - The Dean of Students and Building Administrator reviewed the handbook for any additional changes that needed to be made, in preparation for April meetings.
 - The Literacy Facilitator and Literacy Professional Learning Communities (PLC) team met to identify the students performing, remaining the same or regressing interim assessments by developing a portable data wall.
- The facilitators are working with the teachers to ensure the Professional Learning Communities (PLC)s are used to review classroom assessments and The Learning Institute (TLI) results to adjust instruction as determined by data. This is being done through teacher reports following module assessments. The reports are submitted to the facilitators. After reports are submitted the teachers identify the areas of weakness. Once this is done a date is selected for reteaching and retesting. This is completed every two weeks.
- **Highlights as reported by the Core Leadership Team-**

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

- Literacy students in grades 7-9 have significantly improved their open response scores on the interim assessment.
- Students in Algebra II continue to score high on the interim assessment.
- The Leadership Team has completed several Next Steps.
- Both Interim Measurable Objective (IMO) for Parent and Community Involvement were met.
- Several assemblies have been held where parents were invited.
- Students participated in boot camps to prepare for PARCC exams.
- Students appear to be trying harder on PARCC practice tests and interim assessments.
- The quality and quantity of units of instruction being produced are improving.
- Ten students were presented Math awards at a local banquet. One of those ten was awarded a scholarship.
- **Coaching reviews from the Arkansas Department Of Education School Improvement Specialist (ADE SIS) were submitted to the district and high school including the following:**

High School Coaching Reviews:

2/27/2015

Dermott Leadership Team-

Please take a moment to watch the following video on youtube.com entitled Improving Education: the View from Jones Elementary School. Listen to how the Vision can positively affect the culture and climate of the school.

Improving Education: The View from Jones Elementary School /Improving Education: The View from Jones Elementary ...

View on www.youtube.com Preview by Yahoo

This school is considered a high-performing high-poverty school, and much of what is discussed in the video is what we are trying to replicate in Dermott High School. This school was one of five schools in the nation profiled by the U.S. Department of Education.

The video includes a teacher named Justin Minkel who was the 2007 Arkansas Teacher of the Year/2006 Milken Educator. His principal, Ms. Melissa Fink, has been recognized by the Arkansas State Board for her outstanding work and she received the service award for going above and beyond.

I have contacted Mr. Justin Minkel and requested to have him and his principal video chat (ZOOM) or visit in person with some of the schools in which I work and would love for him to visit Dermott.

Let me know if you are interested in this resource.

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

2/27/2015

Dermott High School Leadership Team-

The Rural Community Alliance (RCA) Policy and Education Director for the state of Arkansas has requested alignment of community involvement efforts with the Dermott schools. The Rural Community Alliance (RCA) Policy team have provided fund support in the past for student incentives and can provide future fund support for more incentives. Rural Community Alliance (RCA) Policy Director, is very interested in getting the community involved in the efforts of the school to address the academic distress needs in Dermott to extend support.

Rural Community Alliance (RCA) Policy Director provided two community members names to provide to the district that are very strong community organizers as well as other people in the community who are key to generating community support for the school, and that she is also very willing to do that. She also feels that the Rural Community Alliance can take a more active role in the school's efforts.

I think that Dermott can continue to benefit from this stream of funding and support of time.

I strongly suggest that we take advantage of this resource at the high school.

They are eager to provide more services and resources to High school and the district. Since there are systems in place for parent and community involvement including a District Parent Coordinator, Parent Facilitators, and Family and Community Involvement teams, this organization can naturally support the internal system in Dermott.

Here is the RCA director's title and contact information:

01/07/2015

District Leadership Team,

The following e-mail was sent out by the SEARK Cooperative reminding districts and schools to complete the Arkansas Professional Development Survey. Where are the schools in the completion of the survey? We will want to use the results a part of the needs assessment data used to determine districtwide and specific school professional needs. Building administrators and leadership teams should use the survey results as one source of information to develop the 2015-16 Professional Development Plan and align to TESS building wide next steps.

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

E-mail-

reminder – please forward to all of your certified staff to complete – deadline January 23rd.

Arkansas Professional Development Needs Survey 2014-2015

The Arkansas Professional Development Needs Survey was developed by education cooperatives in Arkansas. The purpose of this survey is to gather data to plan professional development provided by the co-op that meets the needs of your district. This data will also be available for you to use in planning your local professional development. Once this survey is completed by your certified staff, we can generate a district and building report and send to you by email.

Please get 100% of your certified staff to complete the survey by the deadline of January 23rd.

Below is the live link for the Arkansas Professional Development Needs Assessment Survey (2014-2015). Please forward this link to all certified staff to complete.

[http://www.surveygizmo.com/s3/1879721/Arkansas-Professional-Development-\(PD\)-Needs-Survey-2014-2015](http://www.surveygizmo.com/s3/1879721/Arkansas-Professional-Development-(PD)-Needs-Survey-2014-2015)

Thank you for your assistance in gathering this valuable information.

Southeastern Arkansas Educational (SEARK) Cooperative

A District Leadership Team meeting occurred on Monday, March 03, 2015. Minutes included the following:

Celebrations not reviewed.

Coaching Comments- not reviewed

Approval of last meeting minutes – not reviewed

Old business- not discussed

Indicators to assess, plan, or monitor – not discussed (but listed below the plan is to assess and plan required

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

Indicators and meeting was scheduled for Tuesday, March 10, 2015 to continue to the district's work.

I. PARCC

The PARCC test is scheduled for next week and the week after next. A schedule is in place.

II. Academic Distress site visit

The Memo sent to the Interim Superintendent detailing the Academic Distress On-Site Review visit was distributed to the members present. The team developed a schedule for the day of the review.

Schedule for Interviews

8:00-9:00 Interview with Principal

9:00-10:00 Interview with Leadership Team

10:00-11:00 Interview with Instructional Facilitators

12:00-1:00 Interview with Focus Group Teachers

1:00-1:45 Interview with Student Focus Group 1

1:45-2:30 Interview with Student Focus Group 2

2:30-3:15 Interview with Superintendent and Support Staff

3:15-4:30 Interview with other District Level Personnel

III. Updates---Departmental updates

Interim Superintendent/ Elementary Administrator shared that she is finalizing the calendar and asked that the High School Administrator provide her with any events to add to the calendar. The High School Administrator stated that he had recently posted a calendar in the teacher's lounge for teachers to post events.

IV. Upcoming Events

PARCC Testing, Basketball Tournament, Spring Break

V. Indistar/indicators updates

The Leadership Team will meet weekly until the remaining Indicators have been assessed and planned for. The next meeting will be next Tuesday.

The next meeting agenda scheduled to occur Tuesday, March 10, 2015 does not indicate which Indicators will be assessed or planned.

The following next steps were addressed during third quarter according to the administrator, Interim Superintendent, and district school improvement specialist:

- Attend Instructional Facilitator meetings to remain current with Math and Literacy The Learning Institute (TLI)

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

outcomes and expectations. The principal has attended some of the meetings according to the district Interim Superintendent, and district school improvement specialist.

- Meet with individual teachers to discuss plans and student outcomes . According to the administrator this is done with Teacher Evaluation Support System (TESS) with the teachers. Frequency, evidence of the practice, and documentation was not provided to the Arkansas Department Of Education School Improvement Specialist (ADE SIS).
- Each team member review their assigned Task Report to stay on task with the Priority Improvement Plan (PIP), document things as they happen (The tasks are reviewed during the core leadership team meetings. As evidence of leadership team meeting minutes. The Task reports on the wall contain January dates.)
- Checking grades for student progress periodically and at mid-term. (The Administrator and Instructional Facilitators are checking grades before progress reports according to the Interim Superintendent. Evidence of this practice, reports, or documentation was not provided to the Arkansas Department Of Education School Improvement Specialist (ADE SIS) during the site visit.
- The Administrator will post a calendar for the remainder of the year in the teacher's lounge for teachers to post future events as included in an e-mail to the staff. The Administrator attests to the posting and use of the calendar. The calendar was not provided to the Arkansas Department Of Education School Improvement Specialist (ADE SIS) for review during the site visit.

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

- The Interim Superintendent ensured the Arkansas Department of Education School Improvement Specialist (ADE SIS) that the building administrator's list of next steps were completed by the 02/20/2015 site visit while the Internal District School Improvement Specialist was on leave for a two week time span. The building next steps were not fully completed.
- The Interim Superintendent reports the Administrator is the Instructional Leader of the building. There were no reported concerns from the District Leadership Team.
- The Interim Superintendent is concerned about the report concerns from the January 2015 meetings regarding –

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

- The District School Improvement Specialist taking on the role of Instructional Leader within the building . The Interim Superintendent indicates that any actions as instructional leader by the District School Improvement Specialist is voluntary. The Interim Superintendent indicates that the building administrator is the instructional leader of the building and that the successes and failures of the school rest on his shoulders. The District School Improvement Specialist should work with, not against, the Building Instructional Leader to accomplish established tasks instead of demanding that it be done a certain way. The Interim Superintendent does not feel the District School Improvement Specialist should “be over” supervise the Building Administrator.)
- High school building lighting in hallways (On 02/20/2015 all trophy case lights, hallways lights, library lights, and doors opened to office lighting were on. The hallways were brighter.)
- Time the District School Improvement Specialist is able to spend working with the high school and ensures that the time will be available for the specialist will be able to address the intensive needs of the high school. The Interim Superintendent clarified that the District School Improvement Specialist was not filling in for the Elementary Principal duties, but the high school dean of students, District Federal Program’s Coordinator/Testing Coordinator, and other staff member filled in the position of Elementary Principal as needed.
- The District School Improvement Specialist’s roles and responsibilities as the District School Improvement Specialist. The Interim Superintendent wants clarity on what the position should be, and does not understand the difference between the internal District School Improvement Specialist’s role and an external provider for the building even following receipt of the Elementary and Secondary Education Act (ESEA) Flexibility Request and review of the request for several years. The Interim Superintendent disagrees with the current job description and is seeking to make modifications.
- According to the Interim Superintendent, the district wants to know what the building “has” to do to comply with Elementary and Secondary Education Act(ESEA).

b) Building Principal:

- There is concern by the Building Administrator of the high number of low grades in the past progress report as indicated by e-mail to the faculty. The teachers were instructed to seek interventions from the building counselor for failing students and to stop doing the same thing over and over again if students are not “getting it.” Teachers were instructed to justify the grades and look at ways to show that they monitored the grade.
- As reported by the principal report on Wednesday, April 08, 2015 by e-mail to the instructional facilitators. It was not evident to the Arkansas Department Of Education School Improvement Specialist (ADE SIS) by April 11, 2015 if the

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

information was presented to the staff.

- **Principal's report on instruction Professional Learning Communities (PLC))** Date: _____ (This date was missing from the e-mail attachment.)

OBSERVATION OF CLASSROOM RESULTS: second semester focus walks and TESS show that we are using different types of instruction and incorporating more technology in most classes. There are still management issues, mostly students talking out of turn or without permission. There is more group work and I have seen several competitive activities in classrooms. I still have not actually seen a student presentation although I have seen some in the research stages. Stated objectives are still not posted in all rooms. I have seen a number of videos being shown in classes, to this point all have been of proper subject content. Few classes have had students doing actual "out of my seat for a purpose" activities or hands on activities.

RECOMMENDATIONS: Although we are using more diverse instructions there are still areas that need attention to become more effective. Our questioning many times is still at lower thinking levels (one word answers or rote memorization). I noticed in group work especially that students would simply ask for the answer to a question and the teacher would supply it as opposed to prompting the students to find it themselves. Videos can be very useful in instruction, but only if the instruction comes during the video at necessary points of importance to emphasize what is to be learned from the video. Just showing a video does very little for student engagement or learning without reinforcement. I would love to see some student presentation involving some research of a topic. Objectives are for the students. They should be able to know what is expected of them that day by reading the objective. Simple obj: the student will be able to explain the basic causes of the Civil War. At the end of class the student should be able to explain this to the teacher. The objective is posted and met. Using some more engaging instruction and setting basic ground rules for student interaction would help relieve some of our management problems.

Peer resources: here are a few teachers that if you could work out a time to observe some of the techniques below, you can get some quality ideas from. (based on observations thus far)

I will try to provide you with peer resources each report. We have many teachers that do things very well. We need to use them! The list above is just a few. If you wanted to take a few minutes of your prep and watch them while they are doing some of the above activities or just talk with them about it, I feel they would be more than happy to help you.

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

Provide any feedback to the Principal on the back of this form please.

c) Building Leadership Team:

Concerns reported by the Core Leadership Team-

- A long term substitute has remained in place for grades 7-9 literacy.
- A math teacher on the Intensive Track in Teacher Evaluation Support System (TESS) has not made any progress in improving instruction and classroom management.
- Special Education students are not provided or administered the interim assessments.
- Several school days were missed to due inclement weather that prohibited instruction to prepare students for the PARCC exam.
- Students are not utilizing the after school tutoring programs.
- Teachers are not consistently delivering engaging instruction.
- Discipline referrals have increased for grades 7-9 for this quarter.
- The concern that students are missing their morning classes too often due to the testing schedule was discussed. A rotation of the morning schedule was presented. The administrator suggested switching 1st, 2nd, and 3rd periods with 6th, 7th, and 8th periods. There are several factors that would hinder the proposed schedule. One factor is the virtual class schedule. The schedule will be discussed again when we return.
- Reported the week of February 16-20, 2015 during the leadership team meeting.
 - The number of students failing was discussed. The counselor and District School Improvement Specialist determined that 108/169 students were failing at least one class at progress report time and 78/169 were failing at least two or more. The building counselor has developed an intervention plan to discuss these grades with the teacher and students. The Interim Superintendent ordered folders for students for teachers to house evidence of the interventions and remediation they provide the students. (This is followed by numerous attempts and recommendations by the Arkansas Department Of Education School Improvement Specialist (ADE SIS) to encourage teacher student goal setting and charting of individual student progresses in classes such as completed by one teacher's "My Selfie" folders.)

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

- Concerns from various leadership team personnel:
 - There is concern that presenting the principal's report content to the staff for the first time during Professional Learning Communities (PLC) before staff as a whole receive the information would put facilitators in a supervisory role. There is resistance from some teachers with coaching recommendations during daily work and some facilitators are afraid this process would cause further issue with teachers as evident in reply e-mails to the administrator on Wednesday, April 8, 2015.
 - It was reported by staff that faculty meetings are not regularly occurring to maintain transparency and gather input from staff regarding school improvement processes and the Priority Improvement Plan (PIP).

d) School Improvement Specialist:

Barriers

- A new Interim Superintendent is in place with less than two years' experience as building administrator. The Interim Superintendent also serves as elementary principal. Other personnel assuming other responsibilities such as the Federal Programs/Testing coordinator, High School Dean of Student, and other personnel are assisting the Elementary while the Interim Superintendent juggles both positions as indicated in the Interim Superintendent's e-mail to the Arkansas Department Of Education School Improvement Specialist (ADE SIS).
- A new administrator is in place at the high school which is in Priority School status and recently identified as academic distress.
- There are so many next steps that are generated by various teams that are not followed up by management that the lists become unmanageable without concentration by the Building Administrator and other teacher leaders assuming the role of facilitator of teams or committees.
- Mathematic Professional Learning Communities (PLCS)s are canceled regularly if there are members absent on the regularly scheduled date of meeting. The meetings are not rescheduled. The mathematics facilitator is unavailable during some meetings due to the afterschool schedule.
- The mathematics facilitator continues to teach in one teacher's classroom on a regular basis with little change in student outcomes on interim assessments. She is unavailable during key meetings due to the overreaching responsibilities of taking on teacher and instructional facilitation responsibilities.
- The literacy facilitator is also stretched beyond instructional facilitation by completing planning, assessment, and reporting responsibilities for a long term substitute in one of the literacy classrooms.

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

Concerns

- Four of nine Interim Measurable Objective (IMO) were not met within the Third Quarter. Two of the four missed Interim Measurable Objective (IMO)s are Student Progress and Achievement Interim Measurable Objective (IMO)s. It is continuously recommended to the Core Leadership team to develop a plan of action to address the missed Interim Measurable Objective (IMO) for the next quarter within the Priority Improvement Plan (PIP) as should be evident within the Mathematics Professional Learning Community (PLC) feedback form meeting reflections.
- The orange chairs reported as broken in the previous semester within a computer lab. Three of the chairs were in use by students during class on Wednesday, April 8, 2015.
- Seven out of seventeen teachers signed in during the morning of Friday, February 20, 2015 before 8:10 a.m. The Building Administrator does not consider teacher attendance a priority and the office sign in sheet continues to be lacking teacher signatures in the office. No teachers signed in and out on the sign in sheet prior to 8:10 a.m. as previously reported.
- Students are tardy for school. There is no mention from the Safety and Discipline team nor staff to the Arkansas Department Of Education School Improvement Specialist (ADE SIS) regarding concerns about student tardies. There were a least three students dropped off at school after 8:10 a.m. during the site visit day.
- When the Building Administrator was questioned about next steps, little progress was made between site visits. A few of the next steps were listed as completed by interview of the principal and core leadership team members.
- The Building Administrator stated that he had no concern about regular review of teacher attendance and teacher sign in sheets.
- As reported by the district school improvement specialist, the principal developed a list of nonnegotiable with the core team but did not take the list to all parties to present the list to the faculty.
- The Principal prepared a report for the staff to communicate progresses or lack of progresses of classroom instructional practices. Interim Measurable Objective (IMO) for conducting Classroom Walk Throughs (CWTs) was not met. The principal openly admits, "I have done a poor job of getting it to the whole staff instead of just the individual who was observed." He requested but did not mandate the instructional facilitators add the report to the agenda and report the information to the teachers during Professional Learning Communities (PLC) team time.
- A long term substitute continues to be present in a core Literacy classroom.
- The Arkansas Department Of Education School Improvement Specialist (ADE SIS) has requested opportunities to sit in on a Student Advisory Team meeting, but a schedule was not available during the past few site visits to provide the Arkansas Department Of Education School Improvement Specialist (ADE SIS) the opportunity to process observe a meeting. One up and coming meeting was scheduled on a day the Arkansas Department Of Education School Improvement Specialist (ADE SIS) will be off site.

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

- A Core Leadership Team meeting is included in Indistar scheduled to occur on Tuesday, March 03, 2015. There are no meeting minutes included on the scheduled agenda. The agenda included:
 - I. Finish Updating 2nd Quarter Needs Assessment
 - II. Self-Assess Turnaround Principals using rubric (Academic Distress site visit rubric)
 - III. Review the Past Due Tasks (within the Priority Improvement Plan (PIP))
 - IV. Finalize non-negotiable list
 - V. Review Math Data Wall Progresses
- The Arkansas Department Of Education School Improvement Specialist (ADE SIS) has reviewed all Work Plans that have been sent by e-mail to date while working to determine why the shared Google Calendars are not showing the actual actions included while viewing them on site on individual computers. This will be addressed on or before the next site visit as well as the submission of all administrator, instructional facilitator, and District School Improvement Specialist work plans.
- The Priority Improvement Plan (PIP) is visible to the staff through the posted guest log in to Indistar® on the hallway monitor and in the Professional Learning Communities (PLCS)/Leadership Team meeting room on colorful displayed Task Reports with completion dates marked in black ink. There is a lack of evidence of use of the Priority Improvement Plan in regularly scheduled faculty meetings to all staff for discussions on implementation progresses or lack of progresses, and new intervention or action plans.
- The Student Advisory Team facilitator and building principal are in the process of setting a regular schedule for the team to provide input to the leadership regarding the school vision Priority Improvement Plan (PIP), Interim Measurable Objective (IMO), and other building activities) The Arkansas Department Of Education School Improvement Specialist (ADE SIS) has requested the opportunity to attend a meeting; however, meetings occur on days that are not scheduled site visits.
- The Administrator's nonnegotiable list continues focus on management of compliance rather than instructional impact –
- The list of nonnegotiable was developed by the building administrator to include teachers in the hallway between classes, attend scheduled meetings, and turn in unit plans. The list was sent to the District school improvement specialist , Interim superintendent, And Arkansas Department Of Education School Improvement Specialist (ADE SIS). The list will be shared with the leadership team prior to overview with staff during next faculty meeting.

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

- The building administrator does not see an issue with absences for specific teachers without a valid excuse. According to building personnel, the Dean of Students is now in charge of enforcing the high school office teacher sign in sheet.
- There is a pattern of continuous failure each quarter to show progress in meeting Interim Measurable Objective (IMO) in Mathematics, next steps as determined by leadership team meetings and meetings with the administrator or district school improvement specialist. There are concerns regarding the Mathematics Interim Measurable Objective (IMO) outcomes for the third quarter. There are still several tests to take in mathematics as of February 20, 2015... The Mathematics Facilitator spends each day within a specific timeframe in mathematics classroom(s). There is little evidence known by administration as to whether there are progresses being made from the above efforts. The administrator is now attending Math Professional Learning Communities (PLC) on Mondays according to the administrator to assist the teachers and facilitator. Evidence of attendance has not been presented to the Arkansas Department Of Education School Improvement Specialist (ADE SIS).
- It was discovered by the instructional facilitator that a teacher had not taught all of the literacy module standards or finished the literacy unit. The Curriculum Coordinator is working with the teacher on an intervention plan to address pacing of lessons and alignment of instructional to the assessment. Reports of such incidences are reported to the building administrator by the instructional facilitators within facilitator weekly reports with reported lack of response or no response to the issue.
- Several of the literacy assessments are being rescored in open response only to determine if the test results are accurately calculated to meet or not the 3rd quarter Interim Measurable Objective (IMO).
- Focus walks will be calculated to meet the Classroom Walk Throughs (CWT) Interim Measurable Objective (IMO). This is also a concern due to time it will take to calculate the results.
- The Arkansas Department Of Education School Improvement Specialist (ADE SIS) has been invited to view both the Administrator's and District School Improvement Specialist's Google Calendars that align to the submitted work plans but the calendars are not visible to the Arkansas Department Of Education School Improvement Specialist (ADE SIS) without being on sight to view the calendars on school computers.
- The following has been requested by the Arkansas Department Of Education School Improvement Specialist (ADE SIS) for assistance by the district-
 - Frequently monitor the implementation of the next step list and provide aggressive assistance in seeking completion of the list to ensure the Priority Improvement Plan and Interim Measureable Objective success.
 - Ensures the administrator meets regularly with instructional facilitators following interim assessments to determine what percentages of students are performing. The Core Leadership Team should follow through with recommendations to the Professional Learning Communities (PLC) to address findings.

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

- Superintendent is encouraged to continue to meet and work with the Arkansas Department Of Education School Improvement Specialist (ADE SIS) weekly to collaboratively develop strategies for district level alignment and support of effective interventions for the Priority Improvement School.
- Provide the Arkansas Department Of Education School Improvement Specialist (ADE SIS) a copy of the testing schedule to avoid site visits during state testing. (A schedule has been requested during the past two high school site visits.)
- Include district meetings during regularly scheduled Arkansas Department Of Education School Improvement Specialist (ADE SIS) site visits to allow the Arkansas Department Of Education School Improvement Specialist (ADE SIS) to attend a meeting or provide a schedule of meetings so arrangements may be made for attendance.
- The Interim Superintendent and District School Improvement Specialist should review the progresses of the Priority Improvement Plan (PIP), Interim Measurable Objective (IMO), and Next Steps list regularly to ensure the administrator and teams work toward full completion.
- To address the concerns by the building administrator regarding the high number of low grades during the recent progress reporting, it is recommended that the Core Leadership team develop a plan to have teachers turn in their assessments with their lesson plans and directly monitor the assessments turned in and see if the assessments are graded and recorded in the eSchool system.
- **The Core Leadership team:**
 - Reviews the implemented Priority Improvement Plan (PIP), Interim Measurable Objective (IMO), committee and team reports, Professional Learning Communities (PLC) feedback forms, student achievement on module assessments, and much more. The Interim Superintendent and District School Improvement Specialist assists the Core Leadership team to align data findings and review all Objectives and missed Interim Measurable Objective (IMO) in Indistar to develop a plan of action to address deficiencies and monitor outcomes of students. Recommendations to applicable committees, teams or personnel will follow the Core Leadership Teams efforts.
 - Provide specific recommendations to the Professional Learning Communities (PLC) teams, facilitators, and administrators regarding review of data and outcomes of Interim Measurable Objective (IMO), student achievement data, and Priority Improvement Plan (PIP) outcomes.
 - report progresses to the building leadership team
 - Include action plans from subcommittees in the Priority Improvement Plan (PIP) if not developed directly by the sub teams in the Priority Improvement Plan (PIP). (i.e., student pride focus of the Family and Community Engagement team from the online survey.)

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

- Include as one of the main agenda items for the Building Leadership team should include the review of the Core Leadership Teams meeting minutes for open discussion and feedback regarding Core Leadership Team's efforts.

- **Remaining Next Steps carried forward from the 1st and 2nd quarters that were not completed by 02/20/2015**

- **Building administrator:**

- Attend Instructional Facilitator meetings to remain current
- Review the Math and Literacy The Learning Institute (TLI) outcomes and expectations
- Each team member review their assigned tasks to stay on task with the Priority Improvement Plan (PIP), document things as they happen
- Checking grades for student progress periodically and at mid-term.
- Meet with individual teachers to discuss plans and student outcomes
- Meet with students identified as struggling to provide further support of teachers
- Ensure the instructional facilitators are working with teachers with grade distribution issue
- Check instructional facilitators work plans for scheduled assistance with teachers

- **Leadership Team will:**

- The process manager will develop agendas at the end of team meetings and disseminate the agenda to the leadership team days before meetings to conduct next steps.
- Update the Needs Assessment/school profile and Data Wall

- **Safety and Discipline Team and Team Facilitator establish a school environment that improves safety by:**

- Ensure that students and teachers are notified of incentive expectations at the beginning of the nine weeks for academics, discipline, and absences
- Investigate ways that building doors can be secured for the safety of the students. **(Some teachers lock the classroom doors.)**
- Identify struggling students by maintaining watch over classroom management, procedures, and rules implementation (See Indistar for Indicators aligned to this Turnaround Principle.)

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

- **Family and Community will work to engage Families and Communities as stakeholders and gather input:**
 - **Regarding clubs, activities, organizations, and sports:**
 - Determine which students are not actively engaged in school activities and why (To begin work on this task, the building administrator has sent out an email to all the club sponsors requesting a list of all the student members for each club.)
 - Read survey results to develop goals and next steps with the leadership team
 - New surveys will be administered to stakeholders (Will be completed during the 4th quarter by the Family and Community Involvement Team)
 - 1. How will the Website Building Surveys be utilized to guide next steps?**
 - Pull the current survey from the District and/or High school website,
 - Gather the website survey results,
 - Analyze findings
 - Share findings with the leadership team.
 - Develop a proposed plan for the leadership team to include in the Priority Improvement Plan related to community involvement (Are there Indicators aligned to the proposed plan?)
 - 2. What Activities, Clubs, Organizations, and Sports are actively engaging the students, teachers, and stakeholders in the Dermott High School?**
 - Pull the survey results from the Arkansas Department Of Education School Improvement Specialist (ADE SIS) site report,
 - Analyze findings
 - Share findings from Sponsors, Community/Parents, and Students with the leadership team
 - Develop a list of all activities and clubs currently in place and sponsors from the

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

surveys

- Submit results to the leadership team
- Develop a proposed plan for the leadership team to include in the Priority Improvement Plan related to community involvement to engage parents of students participating in events. (Are there Indicators aligned to the proposed plan?)

3. How will the new volunteers be welcomed and utilized?

- Add the new volunteers to the volunteer resource book.
- Contact the listed parent volunteers for alignment of needs as needed
- Determine a process for teachers to communicate needs to the community for volunteering (Consider starting a volunteering board where teachers request help and volunteers will sign up for the requested jobs.)

4. Update the needs assessment for Family and Community Involvement in Indistar following the above next steps.

District School Improvement Specialist will:

- Review the culture and climate progresses and work with the administrative team to ensure change following the Elementary and Secondary Educational Act (ESEA) Flexibility Request roles and responsibilities.
- Guide the building administrator to become the instructional leader of the building.

February 16-20, 2015, the district school improvement specialist reported the PARCC Infrastructure Test served as a barrier for communication among Core Leadership Team members as well as delaying the progress of the next steps. All team members were involved with the testing procedures. The test and those participating in administering and monitoring it was necessary and mandatory. The disruption was a barrier but not a concern.

The District School Improvement Specialist requested the minutes for this meeting and to date they have not been received. The designated binder in the Professional Learning Communities (PLC) room is not current with the necessary materials.

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

March 2-6, 2015, the district school improvement specialist reported the Core Leadership Team did not meet regularly. There are several tasks past due within the Priority Improvement Plan (PIP). **The district school improvement specialist** followed up with the principal to discuss the progresses of the Next Steps left for the week of February 9 – 13, 2015. The Next Steps and the principal's progresses are listed below.

The Building Administrator, in regards to this Next Step, *determine which students are not actively engaged in school activities and why*. Please gather the list of student members you requested the sponsors send to you and compare it to a master student list by grade (you can get that list from Mrs. Bunn). Identify the students who are not a member of any club, sport, etc... If you have not gotten a list of members from the sponsors yet, please ensure they get it to you ASAP. I would like to see the list of nonparticipating students when I return. There was no progress made by the building administrator regarding this action.

The Building Administrator, in regards to this Next Step, *Check grades for student progress periodically and at mid-term*. Since mid-term is here, request a progress report from Mrs. Bunn for students in math and literacy classes. After you identify struggling students, you can address the following Next Steps: *Meet with individual teachers to discuss plans and student outcomes* *Meet with some students identified as struggling to provide further support of teachers*. The principal shared with the Arkansas Department Of Education School Improvement Specialist (ADE SIS) during her last on-site visit that in regards to the next step: *Meet with individual teachers to discuss plans and student outcomes*, he has met with teachers during the TESS observation process and discussed this. In regards to the next step: *Meet with some students identified as struggling to provide further support of teachers*, the principal shared that he had made no progress.

- The Counselor rarely attends the Core Leadership meetings or the Building Leadership meetings.
- Several recent meeting agendas, minutes, and artifacts are missing from the Math Professional Learning Communities (PLC) binder in the Professional Learning Communities (PLC) room.
- Several The Learning Institute (TLI) interim assessments have not been administered to special education students.
- The Literacy Instructional Facilitator continues to plan units and lessons for the three grades assigned to the long-term substitute.
- The Geometry B class has not been administered the scheduled interim assessment for third quarter.

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

- The Student Safety and Discipline team has developed a list of incentives to award students with no discipline referrals and perfect attendance but this has not been made known to the students. Information about the incentives or the criteria to receive the incentive is not posted in the halls or classrooms.
- The Student Safety and Discipline team is not disaggregating discipline data during their meetings. Meetings are scheduled to occur one hour twice per month. However, meetings are averaging thirty minutes twice per month.
- Leadership Team
- The Core Leadership Team
- The Principal rescheduled the Core Leadership Team meeting for Tuesday, April 7, 2015.
- Building Leadership Team
- The Principal rescheduled the Core Leadership Team meeting for Tuesday, April 7, 2015.
- Parent and Community Involvement
- The meeting minutes, agenda, and artifacts were unavailable for review.
- Student Safety & Discipline Team
- Due to Spring Break occurring since the last meeting, there was no discipline referral or nurse's report available with updated information.
- The team reviewed the incentive program for the A/B honor roll students and decided to keep the item tabled until Mr. Evans can give his opinion regarding the field trip from last semester's honor roll.
- The team reviewed Appearance Code in the Student Handbook. There was a discussion regarding the leggings as listed in the dress codes. The current handbook states that "Spandex/leggings are not to be worn unless the leggings are worn with a dress, skirt, or shorts/pants of appropriate length." Minutes from the meeting include, "However, students are still wearing leggings. Unfortunately, there does not seem to be an effective way to re-word this portion of the code to be effective. It may be beneficial to amend the description of leggings as tight, pants without pockets." The team also discussed putting a restriction on spaghetti straps into the dress code.
- One member suggested that the district consider switching to uniforms. The chairperson seconded that, and will present this to the leadership team. He will also present the request for eye-bolts and webbing (eye-bolts and webbing were not clarified in the meeting minutes), for safety in case of a lock-down.
- The team reviewed the potholes concern from last meeting. Some of the potholes were filled. However, the rain that

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

has occurred recently has prevented more activity on that front. Maintenance will continue to address this as they are able to.

e) Other:

- Safety and Discipline team concerns as evident in meeting minutes and the District School Improvement Specialist reports:
 - The potholes in the parking lot.
 - The number of students running in the hallway between classes. The Arkansas Department Of Education School Improvement Specialist (ADE SIS) has not witnessed students running in the hallways during site visits for the spring semester, but did see some students running during the fall semester.)
 - As a safety matter, the sidewalk leading into the building, with the grate, floods badly when there is any sort of rain. There is no safe way for students to get across that area without getting wet, leading to potential safety issues and health hazards.
 - The Dean of Students will talk to maintenance to see if anything can be done. As a stop gap measure, a team member suggests that, on rainy days, students use an alternate entrance not normally available to them.
 - Additionally, a team member suggested that we get eye bolts and webbing for every classroom to allow for barricading them in case of a lockdown. Each room would need one closed eye-bolt (for the wall), and one open eye-bolt (for the door). The webbing would be threaded through the closed eye bolt and tied into a water knot. In an emergency, the loop would be pulled through the eye-bolt on the door, preventing unwanted entrances. This would require a full count of the doors, a requisition form for the materials, and assistance from maintenance personnel to install. This would allow teachers to have a defensive measure in place in their classroom, ready to be implemented at a moment's notice.
 - The administrator also notes that the school needs a master key, since there is no consistency in the key system. Ideally, there would be a master key that would open all doors (available only to the personnel who require it), and then each teacher would have the individual key that opens their own door. Additionally, the keys for computer lab and other multi-teacher rooms should be made accessible to all teachers.

Additions/Revisions to current year's PIP/TIP:

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

- There is a lack of urgency to update the Priority Improvement Plan (PIP) beyond the required ACSIP Pilot Indicators. The Arkansas Department Of Education School Improvement Specialist (ADE SIS) encouraged the District School Improvement Specialist to color code the Comprehensive Task report by leadership team member and post the Task reports on the leadership team meeting wall for the leadership team and building administrator for the 2014-2015 school year. The posted reports were to be used to mark the date Objectives/Tasks were completed by the team. To date March 11, 2015 only January 2015 dates are visible marked as completed on the Task reports. The building administrator wanted to implement a Problem Solving process by placing issues of post its he refers to as “stickems” on the wall from teachers, then address issues/problems identified by teachers during Professional Learning Communities (PLC)s and determine the effectiveness of the practice. This process is posted alongside the Priority Improvement Plan (PIP) Task reports with many sticky notes posted. There is no evidence of the alignment of the Problem Solving Process and the Priority Improvement Plan (PIP). The Arkansas Department Of Education School Improvement Specialist (ADE SIS) provided the administrator the research behind Problem Solving Processes from IDEAs by Patricia Roy and it remains posted on the leadership team meeting room cabinet.
- As reported by the District School Improvement Specialist, the leadership team met Friday, March 20, 2015 to assess the final two of the five Indicators required prior to the March 31, 2015 submission deadline. The Indistar Priority Improvement Plan (PIP) Indicators assessed on Friday, March 20, 2015 were IG01 and IVA01. For Indicator IGO1, two tasks were developed and for Indicator IVA01, three tasks were developed.
- The district and school Comprehensive plans were submitted to the ADE by the Federal Programs Coordinator prior to the March 31, 2015 deadline.
- The Administrator and District School Improvement Specialist requests or would rather implement the current plan and not update the plan. There are limited interventions or actions that are aligned to the current actions administered by personnel.

discipline referrals will be reduced to no more than 22 as determined by data collected from e-school reports.					<p>(IMO) was met with 18 discipline referrals reported for grades 10-12 students. This was 4 discipline referrals below the expected interim measurable outcome.</p> <p>10th grade: 9 referrals 11th grade: 7 referrals (One student accounted for 5/7 recorded incidences for 11th grade.) 12th grade: 2 referrals</p>
By March 13, 2015, sign in sheets will show that at least 50% of students in grades 7-12 will have been represented by a parent/ guardian at school functions such as open house, parent/ teacher conference, math and literacy nights, etc...	X		4.	3/13/15	<p>This Interim Measurable Objective (IMO) was met with 51% of students having representation at a school functions.</p> <p>7th grade: 16/35=46% 8th grade: 13/28=46% 9th grade: 16/32=50% 10th grade: 18/31=58% 11th grade: 13/30=43% 12th grade: 16/26=62% Total: 92/18=51%</p>
By March 13, 2015, at least 8 positive, 2-way contacts will be made by each Dermott High School teacher as determined by the parent/ teacher communication.	X		4.	3/13/15	<p>The Interim Measurable Objective (IMO) was met with each teacher having 8 or more positive contacts as evident with parent contact logs and analysis of results.</p>

Third Quarter ESEA/ Interim Measurable Objective (IMO) Report

Quarterly ESEA Reporting Form

ARKANSAS
DEPARTMENT
OF EDUCATION

Date Completed: March 13, 2015

School: Dollarway High School

District: Dollarway School District

Status: Priority Academic Distress

Principal: Gabriel Jackson, Interim

ADE School Improvement Specialist: Kerri Williams

External Provider: Generation Ready

Internal School Improvement Specialist: None

Highlights from 3rd Quarter:

- Six Dollarway School District students won awards in the Southeast Regional Art Show at the University of Arkansas at Monticello earlier this month. The students, all first-time entrants into the art competition, competed against 42 other schools in an eight-county area. Dollarway art teacher said that she is proud of her students and that they have made a strong statement in their first year of competition. A ninth-grader A. Mitchell won third place, 12th-grader J. Craig won second place, 12th-grader W. Evans won sixth place, and 12th-grader M. Ferrell won seventh place. Tenth-grader T. White and 12th grader Antonio Smith submitted artwork for the competition.
- The staff are beginning to utilize data to drive instruction
- Literacy Coach has worked consistently with teachers on effective instruction
- Consistent teacher meetings with agendas and minutes are being held and are productive.
- Curriculum workshops are being set-up to train and inform the school board to become more academic focused
- Planning summer school to remediate and improve student achievement
- Working with staff to make assessments of staff placement for next school year
- Mentoring program implemented this quarter with 22 students and 5 other students that are interested in the program – Members from Omega Psi Phi fraternity from University of Arkansas at Pine Bluff has volunteered to mentor the students and met with them prior to spring break.

Quarterly ESEA Reporting Form

- Interim Principal has begun using the protocol to evaluate time spent effectively; shows where the focus of the school day is being spent.
- Interim Principal is utilizing the suggestions from the external provider to help transition into the position as interim principal
- Interim Principal is adjusting well in the new position and completing task in a timely manner.
- External Provider noted that the ADE School Improvement Specialist is involved in all leadership meetings

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

The Superintendent noted the following concern:

- Due to the resignation of the principal, there will be a change in building leadership for the next school year. Currently an Assistant Principal was named as Interim Principal which leaves the school with 1 less administrator.

b) Building Principal:

The building principal noted the following concerns:

- Technical issues with PARCC testing caused missed instruction and testing time school wide
- An adjustment focusing my role from assistant principal to interim principal is challenging

c) Building Leadership Team:

Members from the building leadership team noted the following

- Teacher by-in is not occurring with turnaround efforts
- Processes and procedures are not in place and consistent
- Change in leadership in March

d) School Improvement Specialist:

Quarterly ESEA Reporting Form

The School Improvement Specialist noted the following concerns:

- Having all members of the Leadership Team involved in the meeting to have input and discuss certain issues with the teachers
- Tardy and discipline issues are not decreasing enough to show academic improvement
- Lack of instructional leadership from the math facilitator at the high school
- Lack of support for the 2 long term substitutes in math that are not certified and 1 first year math teacher who is non-traditional certified
- 2 new literacy teachers hired this quarter; one in February and one in March. There has not been a 9th grade teacher in literacy all year.
- Lack of communication throughout the building; the teachers are not receiving pertinent information from leadership team. There is a lack of or miscommunication from the math facilitator and external provider. There are no follow-up procedures from administration to ensure that communication is occurring.

e) Other:

The External Provider noted the following concerns:

- Implementing processes and procedures school wide
- Lack of leadership from math facilitator at the high school
- Change in policy for next school year regarding tardy procedures
- Lack of structure in In-School-Suspension

Rev. 11/18/14

Quarterly ESEA Reporting Form

ARKANSAS
DEPARTMENT
OF EDUCATION

Date Completed: March 13, 2015

School: Robert F. Morehead Middle School

District: Dollarway School District

Status: Priority

Principal: Yolanda Prim

ADE School Improvement Specialist: Kerri Williams

External Provider: Generation Ready

Internal School Improvement Specialist: None

Highlights from 3rd Quarter:

- Organization and process in place for testing
- Communication was a positive from principal to teachers and students regarding PARCC assessment – everyone was kept informed and expectations were made clear
- Six Dollarway School District students won awards in the Southeast Regional Art Show at the University of Arkansas at Monticello earlier this month. The students, all first-time entrants into the art competition, competed against 42 other schools in an eight-county area. Dollarway art teacher Kathryn Dokes said that she is proud of her students and that they have made a strong statement in their first year of competition. Sixth grader L. Baker won a third-place award and sixth-grader D. Branch won a fifth-place award.
- 3 students attended the 4-H support at the capital
- 2 students were Pages at the capital for legislative meeting

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

No input provided

Quarterly ESEA Reporting Form

b) Building Principal:

Building principal stated that communication and direction between the external providers and literacy coach is not occurring. She also stated that she is not receiving any reports from the external provider to know what is occurring and what they are observing in the classrooms.

c) Building Leadership Team:

No input provided

d) School Improvement Specialist:

No input provided

e) Other:

- The External Provider states that everyone is not on board with LDC/MDC and the gaps are noticed in the classroom during instruction and data

Additions/Revisions to current year's PIP/TIP:

Quarterly ESEA Reporting Form

					TLI in 8 th grade. While those students are reviewing the other students will begin with a preview of 9 th grade math content to prepare for transition.
By end of the 3 rd Quarter 2014, 75% of 6th through 8th graders will STAR test and reading levels will be assigned as determined by STAR summary reports. (4Q-100%)			2	3/13/15	No data due to the inclement weather and PARCC testing. The data will be available for Quarter 4 report.
By the end of the 3 rd Quarter, students enrolled in Read 180 will show overall growth of Lexile Level as determined by Scholastic Growth Reports. (4Q-growth)			2	3/13/15	No data due to the inclement weather and PARCC testing. The data will be available for Quarter 4 report.
By the end of the 3 rd Quarter, students enrolled in System 44 will show overall growth of Lexile Level as determined by Scholastic Growth Reports. (4Q-growth)			2	3/13/15	No data due to the inclement weather and PARCC testing. The data will be available for Quarter 4 report.
By the end of the 3 rd Quarter, students enrolled in Math 180 will show overall growth of Lexile Level as determined by Scholastic Growth Reports. (4Q-growth)			2	3/13/15	No data due to the inclement weather and PARCC testing. The data will be available for Quarter 4 report.
By the end of the 3 rd Quarter, student discipline data will decrease by 30% (108) as evidenced by eSchool records. (4Q-40% (93))		X	3	3/13/15	124 referrals which is a 19% decrease from baseline data 29% decrease in referrals from Quarter 2 20 referrals for continuous discipline problem 17 referrals for profanity use The principal held a staff meeting to address the problem areas in regard to discipline. Conferences are being scheduled with parents

Quarterly ESEA Reporting Form

					<p>to address the concerns with certain students and devise a plan.</p> <p>Teachers have decided that they will begin addressing dress code infraction and supply needs with individual students on a case by case basis using various strategies.</p> <p>The school resource officer will also begin with certain interventions with students.</p>
By the end of the 3 rd Quarter, an increase of 10% of parents and community participation in school activities and wellness as determined by attendance logs and sign-in sheets. (Q4-10%)			4	3/13/15	Math and Science night was cancelled due to the inclement weather and will be rescheduled for the 4 th Quarter.

Quarterly ESEA Reporting Form

Date Completed: March 13, 2015

School: Earle High School

District: Earle School District

Status: Priority

Principal: Juanita Bohanon

ADE School Improvement Specialist: Kerri Williams

External Provider: Education Consulting Services

Internal School Improvement Specialist: None

Highlights from 3rd Quarter:

- Building climate and school culture is consistently positive
- Good participation for Parent/Teacher Conference
- Six students were selected to be pages for the House of Representatives
- Varsity (Sr.) boys basketball team: 1) earned Runner up for the District Tournament 2) won the Regional Tournament 3) State final four 4) district runner up
- Consistent improvements in technology. Teachers are utilizing what has been introduced in professional development and other trainings.
- English department is showing growth in utilizing profession development and data within the classrooms
- 2 students won the National Benjamin Banneker award and 1 student received honorable mention
- Increased focus on School Improvement Efforts and data
- Math department is looking more at data and discussing strategies to assist struggling students
- Band: 1) 5 students attended University of Memphis honor band 2) 2 students attended Ole Miss honor band 3) 4 junior high students selected for Arkansas State honor band 5) Texarkana, TX concert assessment 3rd place 6) Solo ensemble competition received 9 superior ratings and 13 excellent ratings 7) 2 senior high students selected for Arkansas State University honor band 8) 5 students attended Delta State University honor marching band 9)

ARKANSAS
DEPARTMENT
OF EDUCATION

Quarterly ESEA Reporting Form

utilizing technology for communication with 151 followers on Facebook and 151 followers on Twitter

- Teachers are having input on embedded professional development and beginning to connect the dots and realize the efforts that are occurring and areas in which need improvement.

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

- No input was provided

b) Building Principal:

- The building principal reported the science teacher is currently on medical leave and finding a replacement mid-year is difficult; Resignation is awaiting board acceptance.

b) Building Leadership Team:

- Building leadership team reported concerns due to the inclement weather and testing schedule is resulting in missed instruction time with students and the inability to finish teaching instructional units

c) School Improvement Specialist:

- School improvement specialist noted teacher turnover rate is negatively impacting instruction. The 10th grade has new teachers in every subject area; the science class has had a new teacher each year with the current teacher on medical leave mid-year.

d) Other:

External Provider noted:

- The need for additional time for teacher training
- Inability to retain teachers and hire highly qualified teachers. The district recruits heavily from Teach For America
- Inclement weather, TLI testing, and PARCC testing has reduced the time students have in the classroom which has impacted instruction.

Quarterly ESEA Reporting Form

Rev. 11/18/14

Third Quarter ESEA IMO Report

Date Completed: April 01, 2015

School: Forrest City High School

District: Forrest City School District

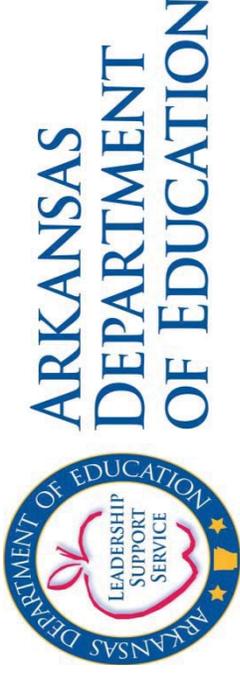

Status: Priority Academic Distress

Principal: Osceola Hicks

ADE School Improvement Specialist: Janie Hickman

External Provider: None

Locally Hired School Improvement/Internal Provider: Michael Hawkins

Highlights:

- A Parent Summit was held to inform parents of the state of the district and included presenters from each building.
- A positive culture shift is evident in the building.
- Three high school teachers are involved in the Emerging Leaders Program – 1) a project to use Data for instruction; 2) a project to improve Lesson Plans, 3) a project to improve School Culture.

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

- The district leadership team and superintendent stated a need for the two assistant principals to develop instructional and organizational capacity so that they may provide needed support for the principal.
- There is a need for an instructional facilitator to focus on the instructional program at the high school.
- Lost instructional time due to missing 8 days from inclement weather is a district concern.

Third Quarter ESEA IMO Report

b) Building Principal:

- The principal expressed a concern with the amount of extra reports required by the state.
- The principal expressed a concern with the lack of administrative help, including lack of facilitators.
- The range of PD and level of emphasis placed on implementation is a concern.
- Lack of fidelity in implementing various supplemental components of LD (i.e. DI, RTI-2, etc.) is a concern of the principal.

c) Building Leadership Team:

- There is a concern about the number of missed days of instruction time due to inclement weather and the effect in will have on test scores.

d) ADE School Improvement Specialist:

- The ADE SIS is concerned about the loss of instructional time due to loss of 8 days of inclement weather.
- The ADE SIS is concerned about the lack of consistent quality help for the principal in the area of discipline, instruction, and curriculum.
- There is a concern for the low interim assessment scores, although there is growth in most areas.
- The ADE SIS is concerned about the number of students tardy.

e) Other:

- None

Additions/Revisions to current year's PIP/TIP:

No changes were made.

IMO	Met	Not Met	IMO Area	IMO Date	Explanation/Supporting Data
By April 01, 2015, the principal, assistant principals and the school improvement specialist will conduct an average of 50 C.W.T.'s per week to determine the level of student engagement in learning.		x	1	04/01/15	The data is put into the school's database and progress monitored by the principal, and the internal school improvement specialist
By April 01, 65% of the teachers will document in their lesson plans and appropriately implement six (6) of Marzano's High Yield Strategies learned during a prior PLC.	x		1	04/01/15	The progress of documentation and implementation monitored by the principal and the internal school improvement specialist.
By January 22, 2015 70% of 11 th grade literacy students will score 70% or better on The Learning Institute (TLI) interim assessment.		x	2	01/22/15	Progress monitored by the internal school improvement specialist, the district test coordinator, and the external Concentric partner. 24% of 11 th grade students scored proficient or advanced. This is a decrease of 3% from the last module.
By January 30, 2015 65% of Algebra I students will score 70% or better on the		x	2	01/30/15	Progress monitored by the internal school improvement specialist, the district test

Third Quarter ESEA IMO Report

TLL interim assessment.						coordinator, and the external Concentric partner. 11% scored above 70%. There was an increase of 13% moved from below basic to basic (16 students)
By March 11, 2015 70% of Algebra I students will score 70% or better on the TLL interim assessment.	x	2	03/11/15			Progress monitored by the internal school improvement specialist, the district test coordinator, and the external Concentric partner. 0.79% (1 student) scored above 70%. There was an increase in basic from below basic students by 26% (28 students).
By January 22, 2015 70% of Geometry students will score 70% or better on the TLL interim assessment.	x	2	01/22/15			Progress monitored by the internal school improvement specialist, the district test coordinator, and the external Concentric partner. 19.5% of students scored below 70%, however a significant number of students moved from Below Basic to Basic (45 students) and 18 students (12%) increase in proficient and 3 students increased into advanced.
By April 01, 2015 72% of Geometry students will score 70% or better on the TLL interim assessment.	x	2	04/01/15			Progress monitored by the internal school improvement specialist, the district test coordinator, and the external Concentric partner. 91% students scored below 70%. Teachers were advised to forget TLI during this time and focus on designated standards for the PARCC test, as well as missed days due to inclement weather.
By April 01, 2015 there will be a 10% decrease in the number of students tardy.	x	3	04/01/15			Progress monitored by the assistant principals, counselors, and external Concentric partner. There was an increase of students tardy from 462 to 497 in the third nine weeks.

Third Quarter ESEA IMO Report

By April 01, 2015 there will be a 10% decrease in the number of discipline referrals submitted by administrators.		x	3	04/01/15	Progress monitored by the assistant principals, counselors, and external Concentric partner. There was a decrease of 11 student referrals from 2 nd nine weeks and 10% would be 16 students.
From January 5 – April 01, 2015 each faculty member will have documented 25 parent contacts per nine week grading period.	x		4	04/01/15	Supporting data on file in principal's office. Progress monitored by the parent involvement coordinator. 100% of teachers submitted documentation of 25 parent contacts
From January 5 – April 01, 2015 a minimum of one parent/teacher conference will be held. Twenty percent (20%) of the parents will attend.	x		4	04/01/15	Supporting data on file in principal's office. Progress monitored by the parent involvement coordinator. Sign in sheets documented 371 participants attended, which is 46%.

Rev. 11/18/14

Third Quarter ESEA IMO Report

Date Completed: March 31, 2015

School: Forrest City Junior High School

District: Forrest City

Status: Priority/Academic Distress

Principal: Reginald Murphy

ADE School Improvement Specialist: Janie Hickman

External Provider: Arkansas Public School Resource Center

Internal School Improvement: Michael Hawkins

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights:

- Dr. J. Pollock and Arkansas Public School Resource Center (APSRC) are working with the faculty to improve overall instruction and student achievement.
- Teachers and facilitators continue to develop curriculum documents for each subject area and post them to the school website.
- Teachers continue to host “Parents’ Night” by subject area to give parents the opportunity to be informed and participate in the curriculum.
- A team consisting of teachers and students was formed to create incentives for the students who reach assigned goals. Students have gone on a field trip and received incentives for their attendance, academic achievement, and discipline.
- The technology subcommittee facilitated a training session covering Google Classroom, Google Drive, and Power Point. These workshops were differentiated according to the technology skill level of each teacher.
- All Chrome books have been received and are being used in the classrooms.
- Interim Assessment scores proved to be comparable to other schools in the assessment network.
- A Project Manager was hired to assist the principal with implementation of the SIG grant.

Third Quarter ESEA IMO Report

- The school participated in the district's Parent Summit on March 17, 2015. Instructional Facilitators presented break-out sessions covering the Common Core State Standards and how parents could help.
- Students were awarded an extended lunch for their effort during PARCC Assessment administrations.
- The art teacher (Mr. Joey Moseley) met with the governor.
- A monthly breakfast for parents is held to provide an opportunity to meet with the principal.
- Students attended the Lion King play in Memphis as a means of exposing them to the fine arts.
- Consultant visits from English language arts and mathematics curriculum companies provided onsite professional development for teachers.
- One teacher is participating in the districts' Emerging Leader Project with a project that focuses on a need identified in the building.

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team Concerns:

- There is a need to develop higher expectations for all staff and students.
- Expeditionary Learning does not provide a parent component to support student learning at home.
- Lost instructional time due to missing 8 days from inclement weather is a district concern.

b) Building Principal Concerns:

- The principal reported that mid-year reviews have limited the amount of time he can spend in classrooms.

c) Building Principal, School leadership team, and Internal School Improvement Specialist collaborated and listed the following concerns/barriers:

- Teachers are in need of more curriculum training.

Third Quarter ESEA IMO Report

- The curriculum and interim assessments are not fully aligned. Therefore, teachers have to modify lessons to ensure assessed standards are taught.
- Some teachers have not embraced implementing the Arkansas Standards for literacy and mathematics.
- The loss of eight instructional days due to adverse weather conditions is a concern.
- Three long-term substitutes are working in the building, two of them for teachers on extended medical leave.

d) ADE SIS Concerns:

- Curriculum and interim assessments are not fully aligned.
- Interim assessment scores are a concern
- A need exists for higher expectations for both faculty and students
- The physical condition of the building is a concern. Several bathrooms were all or partially out of order on several visits and large chunks of floor tiles are missing in multiple places in the hallways
- The structure and use of ISS is a concern.

e) Other:

- NONE

Additions/Revisions to current year's PIP/TIP:

- No additions or revisions to the current year's PIP have been made.

Math – All students will be 57.09% proficient on Interim Assessment by the end of the third quarter.		X	2	03/31/15	Documentation of 30% of students scoring proficient on the interim assessment Data was taken from the ANET Interim Assessment Reports
Math – Students with disabilities will be 40.33% proficient on Interim Assessment by the end of the third quarter.		X	2	03/31/15	Documentation of 23% of students with disabilities scoring proficient on the interim assessment. Data was taken from the ANET Interim Assessment Reports.
Public Celebrations will increase by 62.5% through honor board, privilege cards, student of the week, and other public celebrations by the end of the third quarter.	X		3	03/31/15	Documentation of 116% increase in Teacher/Building Celebrations. Data was taken from Honor roll, Perfect Attendance, 100 Points Club, Round-Up Student of the Week, Teacher's student of the week, Spelling Bee Participants, Fast ForWord achievers.
By the end of the third quarter, 97.5% of teachers will maintain communication with parents/guardians, as evidenced by a file of communication.	X		4	03/31/15	Documentation of 100% of teachers maintaining communication logs. Data was taken from teacher logs of communication with parents.

Rev. 11/18/14

Third Quarter ESEA/ IMO Report

Date Completed: April 3, 2015

School: Summit ALE

District: Hot Springs

Status: Priority

Principal: Kelley Deardorff

ADE School Improvement Specialist: Tiah Frazier

External Provider: E2E/ Elbow 2 Elbow; Toni Lockhart

Internal School Improvement Specialist: None

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights:

- The principal is implementing the TESS process and fully utilizing Bloomboard; regularly schedules formal observations and provides specific feedback as it relates to targeting student growth and achievement.
- The principal is working with external provider to address individual and/or grade level needs based on informal and formal observational data; the external provider often assist in a coaching type model for this ALE because there are not instructional facilitators in the building; the building principal and external provider address areas of concern as identified through formal and informal observations.
- Teachers use the online format for TLI testing and use data for decisions about instructional plans; TLI modules are aligned with district curriculum and instructional teams meet regularly to discuss growth of students and make decisions on ways to target student intervention groups in a multi-level classroom.
- Data teams are organized and meeting twice a month, and agendas/sign-in sheets are on file in the evidence box.
- Data teams have met as new students have enrolled this semester to make key decisions about placement and individual education plans and goals.
- Use of data from Nichols Behavior Charts, NWEA, TLI and classroom progress is discussed as part of data team conversations.

Third Quarter ESEA/ IMO Report

- Implementation of math Type I, II and III tasks has begun.
- Teachers are using the new format of PARCC for literacy.
- 5-11 science teachers are using weekly science open responses.
- Disaggregated data from January 7 TLI assessments during instructional team meetings.
- Continued creation of templates for answering essay- formatted questions and math PARCC-alike problems.

Third Quarter ESEA/ IMO Report

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

District administration performed focus walks and the feedback indicated the following concerns: teachers need to implement rigorous questioning techniques; teachers need to plan for differentiated strategies during instruction; and teachers need to use less prepared packets and more projects.

b) Building Principal:

No concerns reported.

c) Building Leadership Team:

The Leadership Team reported concerns about time spent on standardized testing preparation and testing administration; worried about lost instructional time; concerned about bandwidth and number of devices for student use.

d) ADE School Improvement Specialist:

None

e) Other:

None

Additions/Revisions to current year's PIP/TIP:

Due to inclement weather days during the 3rd quarter some revisions have been made to the 3rd and 4th quarter IMO's to better meet the needs of the students being served.

IMO	Met	Not Met	IMO Area	IMO Date	Explanation/Supporting Data
By the end of October, 2014, and continuing monthly, 100% of the students attending Summit/Vista will have individual plans to address their individual needs after the first two weeks of attendance. *During testing periods of the year, teachers will wait until they have had new students for two weeks in regular classes before creating individual plans	X		1	04/03/15	-Use of data from Nichols Behavior Charts, NWEA, TLI and classroom progress is discussed as part of Data Team conversations -All students who have been enrolled more than three weeks now have a completed Nichols Behavior Chart and Action Plan housed in the counselor's office
By March 6, 2015, 100% of teachers in grades 3-11 literacy and social studies will have modeled, assisted, and scored at least three prose constructed response patterned after the PARCC model within that quarter. By March 6, 2015, 100% of teachers in grades 3-11 math will have modeled, assisted, and scored at least three Type II and two Type III problems patterned after the PARCC model within that quarter.	X		1	04/03/15	-Teachers use the online format for TLI testing and use data for decisions about instructional plans -Implementation of math Type I, II and III tasks -100% of teachers in grades 3-11 literacy and social studies now have three scored responses patterned after the PARCC in the documentation box -At least 90% of teachers in grades 3-11 math have two Type III and one Type II problem patterned after the PARCC on

Third Quarter ESEA/ IMO Report

					file in the documentation box
By the end of March, 2015, 90% of the teachers will consistently use higher levels of questioning as evidenced in informal and/or formal observations through the TESS model.	X		1	04/03/15	-Based on classroom observations, principal interviews, external provider reports, and evidence placed in the IMO box; 100 % of teachers used higher levels of questioning during lessons observed
By the end of October, 2014, and continuing monthly, the building administrator will lead the staff through identifying strengths and weaknesses according to the Charlotte Danielson's Framework for Teaching Domains recorded from focus walk data.	X		1	04/03/15	-Weakness identified in mathematics; more engaging math materials/activities were shared with and some modeled for teachers
By the end of October, 2014, and continuing monthly, the building administrator will use the data from classroom observations and Bloomboard progress to determine and plan for support of individual teachers.	X		1	04/03/15	-Principal is implementing TESS process and fully utilizing Bloomboard -Principal is working with external provider to address individual and/or grade level needs based on informal and formal observation
By the end of September, 2014, and continuing weekly, the building administrator will require full implementation of the lesson plan template as indicated by at least 90% of plans documented through the principal's spreadsheet.	X		1	04/03/15	-100% of teachers implemented use of approved lesson plan template
By end of January, 2015, formative literacy data will reflect that at least 40% of students have demonstrated growth since enrollment in Summit/Vista. By end of March, 2015, formative literacy	X		2	04/03/15	-Literacy teachers are working on the format for essays that require use of multiple texts -85% of students had shown growth in literacy -89% of students had shown growth in

Third Quarter ESEA/ IMO Report

data will reflect that at least 42% of students have demonstrated growth since enrollment in Summit/Vista.					math
By end of January, 2015, formative math data will reflect that at least 50% of students have demonstrated growth since enrollment in Summit/Vista. By end of March, 2015, formative math data will reflect that at least 52% of students have demonstrated growth since enrollment in Summit/Vista.	X		2	04/03/15	-Teachers are using the new format of PARCC for literacy and have begun implementing Type I, II and III math problems
IMO: By the end of third quarter of school year 2014-15, (March 12), discipline referrals will decrease or stay the same as compared to the same quarter of the 2012-2013 school year.	X		3	04/03/15	-The discipline data report from April 2, 2015 indicates the discipline referrals stayed the same as compared to the 3 rd quarter of the 2012-2013 school year
Beginning October 1, 2014, and continuing quarterly thereafter, 100% of teachers will have initiated a parental involvement activity to engage parents.	X		4	04/03/15	-100% of teachers will have initiated a parental involvement activity to engage parents

Third Quarter ESEA/IMO Report

Date Completed: April 1, 2015

School: Anna Strong Intermediate School

District: Lee County

Status: Priority

Principal: Mary Hayden

ADE School Improvement Specialists: OIS - Andrew Tolbert, Janice Streeter, Jeff Martello

School Improvement Specialists: Charlotte Earwood and Wendy Allen

External Provider: Fetterman & Associates

Internal School Improvement Specialist: None

Highlights:

- Renew, a public service organization, recognized Anna Strong staff, students, and family members for their volunteer efforts in the local community.
- The district's Spring Fling was a huge success; approximately 200 Anna Strong students and family members participated in this annual event.
- All staff members continue to work toward full-implementation of the Positive Behavior Intervention System. Some have been more consistent in their efforts than others, but perceptual data regarding discipline actions indicates a moderate reduction in office referrals. No statistical data is available to verify these perceptions (*See the IMO chart at the end of this report.*)
- District and state leadership determined that merging grades K-2 with grades 3-6 will reduce expenditures necessary to operate two campuses. As a result, all K-6 students will be served at Anna Strong Learning Academy beginning with the 2015-2016 school year.

Third Quarter ESEA/IMO Report

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

The State Board of Education released Lee County School District from State Takeover at its regular meeting in March. While district leadership is pleased with progress to date, members of the district leadership team voiced the need to ensure that currently-implemented school improvement efforts continue to be effectively implemented and to consistently seek and implement research-based interventions and actions to improve student outcomes.

b) Building Principal:

- The principal stated that even though staff members perceive office referrals have been reduced during the third quarter, she remains concerned that all staff members consistently implement the Positive Behavior Intervention System.
- Additionally, the principal indicated inclement weather closings have forced leadership to cancel and/or postpone activities planned during the third quarter.

c) Building Leadership Team:

Some staff members indicated concern that merging Whitten Elementary and Anna Strong Intermediate will result in a reduction of force and, consequently, either changes in position or the loss of jobs.

Third Quarter ESEA/IMO Report

d) ADE School Improvement Specialist:

- While the principals at Whitten and Anna Strong work well together and share similar visions for their students, merging two faculties into one is always a challenge. Transparency and adequate support from district leadership during every aspect of this merger will promote a collaborative culture and climate where adults consistently do what is best for kids.
- The perceived decrease in discipline referrals, concerns regarding classroom management voiced by the principal and the external provider, and the percent of students reported as authentically engaged in instruction during classroom observations do not align.

e) Other:

External providers reported that teachers' classroom management skills remain inconsistent.

Additions/Revisions to current year's PIP/TIP:

The ADE SIS continues to work with members of the school's leadership team to revise IMOs in the current PIP to ensure rigor and reflect meaningful improvement.

Third Quarter ESEA/IMO Report

Rev. 11/18/14

Third Quarter ESEA/IMO Report

Date Completed: April 3, 2015

School: Lee High School

District: Lee County

Status: Priority

Principal: Phylistia Stanley

ADE School Improvement Specialists: Office of Intensive Support: Andrew Tolbert, Janice Streeter, Jeff Martello

School Improvement Specialists: Charlotte Earwood and Wendy Allen

External Provider: Fetterman & Associates

Internal School Improvement Specialist: None

Highlights:

The principal reported the following highlights:

- Funds provided through Title I 1003(a) grants in 2012-2014 have been either expended or encumbered.
- Plans for utilizing funds awarded during the 2014-2015 school year are near completion and will be included in the 2015-2016 ACSIP.
- Lee High School earned accreditation through AdvancEd. Recommendations for improvement will be addressed in the 2015-2016 ACSIP.
- The district's Spring Fling was a huge success; approximately 250 LHS scholars and family members participated in this annual event.

It was noted that the principal has made effective use of data to evaluate current systems in place at the school. Even though the third-quarter goal for reducing discipline referrals to the office was not met, Ms. Stanley worked collaboratively with members of the leadership team to analyze recently collected discipline data to determine effectiveness of the school's current discipline policy and identify next steps for improvement. These data are reflected in the IMO chart at the end of this report.

ARKANSAS
DEPARTMENT
OF EDUCATION

Third Quarter ESEA/IMO Report

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

The State Board of Education released Lee County School District from State Takeover at its regular meeting in March. While district leadership is pleased with progress to date, members of the district leadership team voiced the need to ensure that currently-implemented school improvement efforts continue to be effectively implemented and that additional research-based interventions and actions to improve student outcomes are considered for implementation when data analyses indicate standard practice is not effective.

b) Building Principal:

The principal stated that due to the number of discipline referrals to the office, she is concerned about spending at least 50% (fourth-quarter goal) of each school day working directly with teachers to improve instruction.

c) Building Leadership Team:

The leadership team is concerned about the number of days devoted to uninterrupted instruction. The school was closed approximately six days due to inclement weather, various TLI interim assessments have recently and will soon be administered, and PARCC testing began March 6.

d) ADE School Improvement Specialist:

While classroom observation results indicate 70% of teachers use research-based instructional strategies, student achievement results from all recent TLI interim assessments except Geometry do not reflect increased levels of student proficiency from initial assessments at the IMO goal of 30%. In fact, literacy performance scores indicate 9th through 11th grade students scored at lower levels of proficiency as compared to initial assessments. (See IMO chart at the end of this report for specific results.)

Third Quarter ESEA/IMO Report

e) Other:

The external provider is concerned that training and work regarding the development of a written, standards-based curriculum that is aligned K-12 continue through the summer and into the 2015-2016 school year.

Additions/Revisions to current year's PIP/TIP:

The ADE SIS continues to work with members of the school's leadership team to align school improvement plans created within Indistar software with interventions, actions, and interim measurable objectives included in the current PIP.

IMO	Met	Not Met	IMO Area	IMO Date	Explanation/Supporting Data
By March 20, 2015, 60% of teachers will use high-probability strategies to improve instruction to students as indicated by CWTs and informal observation data.	X		1	03/20/15	Results from classroom observations conducted by instructional leaders during the third quarter indicate approximately 70% of teachers use high-probability strategies to improve instruction. The strategy noted most often is questioning. Teachers were observed asking more questions that require students to use higher-order thinking skills. These questions sometimes lead to students asking questions of their peers amid academic conversations.
By March 20, the principal will spend at least 40% of each school day working directly with teachers to improve instruction.	X		1	03/20/15	Based on the principal's weekly schedules and documentation of actual work, she spent approximately 45% of each school day working directly with teachers to improve instruction.

Third Quarter ESEA/IMO Report

By March 20, 2015, each content-area TLI assessment will show a 30% increase in the number of students who score at proficient and advanced levels as compared to the initial assessment.			2	03/20/15	Math Data:		
					Initial	Most Recent	
		X			7 th Grade	29	57

Third Quarter ESEA/IMO Report

<p>By March 20, 2015, there will be a 30% decrease in the number of discipline referrals to the office as compared to the first quarter.</p>		X	3	03/20/15	<p>Based on discipline data presented by the principal, the number of discipline referrals has remained steady since the first quarter. School leadership has developed an electronic system for submitting referrals and creating various reports for analysis by the leadership team. The following findings from the third quarter are of particular note:</p> <ul style="list-style-type: none"> • Over 100 referrals were submitted to the office between January 6 and January 20. One teacher submitted almost half of these referrals. The principal has provided coaching and support to teachers who do not consistently demonstrate classroom management skills. The number of referrals from these teachers has slightly declined, but further training and support are needed. • Over 50% of all referrals involved seventh- and eighth-grade students. • Approximately 60% of referrals are for “failing to follow reasonable instructions.” • Twenty-five students were responsible for approximately 40% of all referrals. Intervention team members have worked collaboratively with parents and students to develop Individual

Rev. 11/18/14

Third Quarter ESEA/IMO Report

Date Completed: April 2, 2015

School: Whitten Elementary

District: Lee County

Status: Priority

Principal: Lillie Sexton

ADE School Improvement Specialists: Office of Intensive Support: Andrew Tolbert, Janice Streeter, Jeff Martell
School Improvement Specialists: Charlotte Earwood and Wendy Allen

External Provider: Fetterman & Associates

Internal School Improvement Specialist: None

Highlights:

The principal noted the following highlights:

- Over 200 parents and/or guardians participated in school-sponsored sessions designed to educate families on state-mandated assessments and on the use of instructional technology within school and home settings to support student learning.
- The school hosted Black History and Spring Fling celebrations with family and community members prior to spring break in March.
- Teachers are participating in technology workshops to improve its integration into instruction. Instructional leaders monitor implementation of this professional learning and facilitate job-embedded support based on individual teachers' learning needs.
- District and state leadership determined that merging grades K-2 with grades 3-6 will reduce expenditures necessary to operate two campuses. As a result, all K-6 students will be served at Anna Strong Learning Academy beginning with the 2015-2016 school year.
- All external support personnel (Office of Intensive Support, School Improvement Unit, and external providers with Fetterman & Associates) worked to align school improvement efforts.

ARKANSAS
DEPARTMENT
OF EDUCATION

Third Quarter ESEA/IMO Report

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

The State Board of Education released Lee County School District from State Takeover at its regular meeting in March. While district leadership is pleased with progress to date, members of the district leadership team voiced the need to ensure that currently-implemented school improvement efforts continue to be effectively implemented and that additional research-based interventions and actions to improve student outcomes are considered for implementation when data analyses indicate standard practice is not effective.

b) Building Principal:

The principal stated that she remains concerned about the ability of the staff to meet the needs of students with mental health issues. District and school leadership are working to identify avenues for additional support, including the use of categorical funds to employ mental health professionals.

c) Building Leadership Team:

- Members of the leadership team, including the principal, voiced the concern that, due to the lack of a certified teacher in one classroom, some second-grade students have not mastered grade-level standards. District and school leadership are working with OIS to plan and implement a compensatory summer program designed specifically to meet the learning needs of these students.
- Some staff members are concerned that the merging of Whitten Elementary and Anna Strong Intermediate will result in a reduction of force and, consequently, either changes in position or the loss of jobs.

Third Quarter ESEA/IMO Report

d) ADE School Improvement Specialist:

While the principals at Whitten and Anna Strong work well together and share similar visions for their students, merging two faculties into one is always a challenge. Transparency and adequate support from district leadership during every aspect of this merger will promote a collaborative culture and climate where adults consistently do what is best for kids.

e) External Provider:

The Fetterman & Associates consultant assigned to Whitten reported that, based on concerns voiced by the principal and the counselor, parents of some children need additional support and encouragement in reinforcing the school's recommendations for addressing disruptive student behavior. Whitten and Anna Strong are utilizing Title I - 1003(a) funds awarded during this school year to collaboratively facilitate a three-day event aimed at providing family and community members with knowledge and skills to partner with staff members in building positive relationships among all members of the school community.

Additions/Revisions to current year's PIP/TIP:

The ADE SIS continues to work with members of the school's leadership team to align school improvement plans created within Indistar software with interventions, actions, and interim measurable objectives included in the current priority improvement plan.

Third Quarter ESEA/IMO Report

IMO Area: 1. Change in Teacher and Leader Practice: Met: 5 Not Met: 0
 2. Student Progress and Achievement: Met: 1 Not Met: 0
 3. Student Safety and Discipline: Met: 0 Not Met: 1
 4. Parent and Community Engagement: Met: 0 Not Met: 1
 Total IMO's this Quarter: 8 Met: 6 Not Met: 2

IMO	Met	Not Met	IMO Area	IMO Date	Explanation/Supporting Data
By January 6, 2015, 50% of ESEA Required Actions for Year 3 Priority Schools will be implemented. (This interim measureable objective was inadvertently omitted from the second quarter report.)	X		1	01/13/15	Documents including school leadership team meeting agendas, minutes, and work products indicate the following ESEA required actions were implemented prior to January 6, 2015: <ul style="list-style-type: none"> • Ensure all implementation requirements for first- and second-year implementation have been met. • Ensure that the 2013-2014 Priority Improvement Plan activities have been evaluated and reviewed to determine appropriate activities to be carried forward. • Make revisions to the Priority Improvement Plan to update actions and new interventions and actions for the 2014-2015 school year. • Continue to address Scholastic Audit improvement data and implement related interventions and actions into the 2014-2015 Priority Improvement Plan.

Third Quarter ESEA/IMO Report

<p>By March 20, 2015, all grade-level teachers will collaboratively develop, administer, and score common pre-/post-tests in literacy, math, and science to plan differentiated instruction and identify students who need additional support to master standards.</p>	X		1	03/20/15	<p>External providers work collaboratively with all K–2 teachers monthly to create units of instruction, including pre- and post-tests. These units reflect integration of literacy and social studies standards, as well as integration of math and science standards. Teachers administer and score these assessments during each unit of study, and instructional facilitators meet with teachers during grade-level instructional team meetings to review results and identify students who need additional support to master standards.</p>
<p>By March 20, 2015, the principal will reflect on and document her actual weekly activities compared to those listed on the schedule to determine what percent of her time was spend working directly with teachers to improve instruction.</p>	X		1	03/20/15	<p>The principal documents her use of time at the end of each week when she reflects upon her schedule and notes activities that were completed, as well as those that were not. Based on this reflection, the principal determines the amount of time she spent working directly with teachers to improve instruction.</p>
<p>By March 20, 2015, the principal will participate in each grade-level professional learning community at least once per month and provide feedback to teachers to guide their collaborative work and ensure ongoing, job-embedded professional development is of high-quality and to provide support for effective implementation.</p>	X		1	03/20/15	<p>Professional learning community meeting agendas and minutes indicate the principal participates in each grade-level professional learning community once each month. She may participate in either literacy or math professional learning community meetings, based on needs identified through classroom observations.</p>

Third Quarter ESEA/IMO Report

<p>By March 20, 2015, the principal will spend at least 40% of her time working directly with teachers to improve instruction.</p>	X		1	03/20/15	<p>Documented reflection of weekly schedules, designed to reflect the principal's use of time, indicate the principal spends approximately 50% of her time working directly with teachers to improve instruction.</p>
<p>By March 20, 2015, results from classroom observations will indicate that 85% of students are engaged.</p>	X		2	03/20/15	<p>Based on results collected and analyzed by the principal and instructional facilitators, 90% of students were engaged in lessons during classroom observations. Members of the school leadership team cite the use of 1:1 technology as the innovation that has most improved levels of authentic student engagement.</p>
<p>By March 20, 2015, results from classroom observations will indicate that routines and procedures are evident in 85% of all classrooms.</p>		X	3	03/20/15	<p>Based on results collected and analyzed by the principal and instructional facilitators, routines and procedures were evident in 82% of classrooms while observations were conducted. These results indicate this interim measureable objective was not met by 3%. Members of the school leadership team cite changes in routines, such as administering PARCC assessments, hosting special events for family and community members, and upcoming spring break may explain less consistent implementation of classroom routines and procedures. The principal and Fetterman & Associates consultant will work collaboratively with teachers to ensure consistent implementation of classroom</p>

Third Quarter ESEA/IMO Report

					discipline plans.
By March 20, 2015, 95% of classroom contact logs will reflect a file of communication with parents.		X		03/20/15	Based upon the principal's review of contact logs submitted during the third quarter, 67% of teachers document communication with parents. The principal speculates that very few teachers are not documenting parent communication, but many fail to submit contact logs to the office.

Rev. 11/18/14

Third Quarter ESEA/ IMO Report

Date Completed: April 15, 2015

School: Baseline Elementary

District: Little Rock School District

Status: Academic Distress & Priority

Principal: Katina Ray

ADE School Improvement Specialist: Roxie Browning

External Provider: N/A

Internal School Improvement Specialist: Natisha Hampton

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights:

As reported by the building administrative team:

- Focus walks were implemented regularly by the administrative team and have been used to guide the professional development of teachers.
- Music Art PE (MAP) night had a huge turnout. A night of enrichment where the music, art and physical education (PE) teachers created an event where students and parents were able to participate in activities and lessons that incorporated music, art and P.E. strategies along with math and literacy.
- Reopening of the parent center took place. ARKids provided books to be made available in the parent center.
- Six students participated in the district science fair.
- Two teams competed in the "Mathletes" competition where students compete on teams in rounds solving math problems.
- Cooking club was initiated by the Community and Family Engagement team.

Concerns/Barriers as reported from:

Third Quarter ESEA/ IMO Report

a) District Personnel/District Leadership Team:

Concerns/Barriers reported from District Personnel who work directly with Baseline Elementary:

- Additional reading teacher was not hired due to lack of qualified applicants.
- Length of time to fill the 2nd grade classroom teaching position. Students had a long-term substitute in lieu of a certified teacher for most of the quarter.
- Significant number of teachers on improvement plans due to ineffective instruction.
- Teacher's failure to meet instructional expectations in a timely manner. For example, Small Group Focus Walks continued for most of the 3rd quarter because of a delayed shift in instruction in spite of continuous support via professional development, lesson planning, and modeled lessons.
- Ineffective communication between the principal and literacy department regarding creation and implementation of the Comprehensive Assessment Plan - a 2nd Quarter suggestion made by the Literacy Department to assist in streamlining the schools CFAs and identifying an assessment to aide in targeting student deficits.
- There was low morale amongst teachers and staff.

b) Building Principal:

Concerns/Barriers reported from Baseline's Principal:

- Difficult to ascertain the level of support
- District implementation of district assessment plan.
- A significant amount of time was spent working on the various plans (i.e. 45 day plan inclusive of the district and state plan,) which became double the work. This could have been time spent working the instructional and academic deficits.
- Uncertainty of support from Literacy Department for teachers on Improvement Plans; Communication regarding Comprehensive Assessment Plan.

c) Building Leadership Team:

- Concerns/Barriers reported from the School Leadership Team (SLT)
- There was a failure to meet the targeted goals set forth by each classroom.

Third Quarter ESEA/ IMO Report

d) School Improvement Specialist:

As reported by the currently assigned ADE SIS:

- Several teachers are in varying stages of the “improvement plan” process.
- No evidence has been provided to substantiate that improvement is being made in the classrooms being led by teachers on Improvement Plans.
- Data analysis from focus walks and classroom observations continuously demonstrate that there is a significant deficiency within the core instruction occurring at Baseline Elementary.
- A majority of the instructional staff continued to not implement small group instruction after several PD trainings and direct support provided.
- ADE SIS was on campus a limited amount of days during the 3rd quarter for full day support. This was due in part to several inclement weather days when school was not in session, a week of spring break, standardized testing, and schedule conflicts among school and/or district personnel and the various ADE duties/responsibilities which pulled the ADE SIS out of the building.

e) Other:

Additions/Revisions to current year’s PIP/TIP:

Current PIP:

Priority 7: 2014-2015 Priority Improvement Plan (PIP)

1.

Summary Action for Baseline Elementary School - NI: PRIORITY

○ Basic School Profile

- 97.2% of the students enrolled are from low income families
- Receives Title I funding and operates a “Schoolwide Program”
- 2014-2015 Title I Allocation \$ 133, 095.54

○ Student Enrollment: 317

Supporting Data:

Third Quarter ESEA/ IMO Report

- African American: 51%
- Caucasian (White): 2%
- Hispanic: 46%

- The building's Comprehensive Needs Assessment will be developed jointly between the school, the district, the *ADE, and the School Improvement Specialist.
- The school's improvement goals and targets will be determined based on the building's comprehensive needs assessment.
- The selected interventions shall be aligned with the Turnaround Principles.

Additional resources have been provided to assist us in reaching our 2014-2015 PIP Goals.

2. Comprehensive Needs Assessment Narrative

The Arkansas Department of Education requested an ESEA Flexibility Waiver from the US Department of Education to be able to waive some of the requirements of the No Child Left Behind Act (2001). Arkansas was granted the waiver on June 18, 2012. All schools in the state are being held to a different accountability standard. Arkansas schools have been identified and placed in the following categories:

- Exemplary Schools,
- Achieving Schools,
- Needs Improvement Schools,
- Needs Improvement Focus Schools and
- Needs Improvement Priority Schools.

Needs Improvement Priority Schools

Arkansas was required to identify a number of lowest-performing schools equal to at least five percent of the state's Title I schools. Arkansas had 803 Title I schools in 2011, requiring at least 40 Title I schools be identified among the schools identified as Needs Improvement Priority Schools. Arkansas identified 48 schools which included 41 Title I schools. The criteria for identification of Priority Schools set by USDE included identifying schools that were:

- Among the lowest five percent of schools in the state based on proficiency and lack of progress of the "All Students" group, or
- Title I participating or Title I eligible high schools with graduation rates less than 60% over a number of years, or
- Tier I or Tier II SIG schools implementing a school intervention model.

Third Quarter ESEA/ IMO Report

Baseline Elementary School is among the lowest five percent of schools in the state based on proficiency and lack of progress of the "All Students" group. Baseline will implement selected interventions that will guide effective and continuous building level school improvement practices as specified by Arkansas' ESEA approved Flexibility Waiver. The building leadership team along with the selected external provider, Pearson Education, an ADE School Improvement Specialist will share the responsibility of implementing the Priority Improvement Plan.

3. **Baseline Elementary School Scholastic Audit Summary Report at a Glance (2010, p.2)**

STRAND I: Academic Performance. The three (3) Standards in this strand address curriculum, classroom, evaluation/assessment and instruction. There are twenty-three (23) indicators addressed in Standards 1, 2, and 3.

Standard 1- Curriculum: The school develops and implements a **curriculum** that is rigorous, intentional, and aligned to state and local standards.

- 57%__ Performance Level 2 "Limited development or partial implementation" of indicators 1.1a, 1.1b, 1.1c, 1.1e, and 1.1f.
- 43% __ Performance Level 2 "Little or no development and implementation" of indicators 1.1c, 1.1d, and 1.1g.

Standard 2 – Classroom Evaluation/Assessment: The school utilizes multiple **evaluation and assessment** strategies to continuously monitor and modify instruction to meet student needs and support proficient student work.

- 13% __ Performance Level 3 "Fully functional and operational level of development and implementation" of indicator 2.1g.
- 25%__ Performance Level 2 "Limited development or partial implementation" of indicators 2.1a and 2.1e.
- 62%__ Performance Level 1 "Little or no development and implementation" of indicators 2.1b, 2.1c , 2.1d , 2.1f and 2.1h.

Standard 3 - Instruction: The school's instructional program actively engages all students by **using effective, varied, and research-based practices** to improve student performance.

- 75%__ Performance Level 2 "Limited development or partial implementation" of indicators 3.1b, 3.1d, 3.1e,3.1f, 3.1g and 3.1h.
- 25%__ Performance Level 1 "Little or no development and implementation" of indicators 3.1a and 3.1c.

STRAND II: Learning Environment. The following standards address school culture; student, family, and community support; and professional growth, development and evaluation.

Standard 4: The school/district functions as an **effective learning community and supports a climate conducive to performance excellence.**

- 9% __ Performance Level 3 "Fully functional and operational level of development and implementation" of indicator 4.1a.
- 64%__ Performance Level 2 "Limited development or partial implementation" of indicators 4.1f, 4.1g, 4.1h, 4.1i, 4.1j and 4.1k.
- 27%__ Performance Level 1 "Little or no development and implementation" of indicators 4.1b, 4.1c and 4.1e.

Standard 5: The school/district works with **families and community groups to remove barriers to learning in an effort to meet the intellectual, social, career, and development needs of students.**

- 20% __ Performance Level 3 "Fully functional and operational level of development and implementation" of indicator 5.1e.
- 40%__ Performance Level 2 "Limited development or partial implementation" of indicators 5.1a and 5.1c.
- 40%__ Performance Level 1 "Little or no development and implementation" of indicators 5.1b and 5.1d.

Third Quarter ESEA/ IMO Report

Standard 6: The school/district provides research-based, results driven **professional development opportunities** for staff and implements performance evaluation procedures in order to improve teaching and learning.

- 75%__ Performance Level 2 "Limited development or partial implementation" of indicators 6.1a, 6.1b, 6.1c, 6.1d, 6.1e, 6.1f and 6.2a, 6.2b, 6.2c
- 25%__ Performance Level 2 "Little or no development and implementation" of indicators 6.2d, 6.2e and 6.2f.

STRAND III: **Efficiency.** The following standards address leadership, school structure and resources, and comprehensive and effective planning.

Standard 7: School/district instructional decisions focus on support for teaching and learning, organizational direction, high performance expectations, creating a learning culture, and developing **leadership capacity**.

- 9% __ Performance Level 3 "Fully functional and operational level of development and implementation" of indicator 7.1h.
- 55%__ Performance Level 2 "Limited development or partial implementation" of indicators 7.1b, 7.1d, 7.1e, 7.1g, 7.1i, and 7.1j
- 36%__ Performance Level 2 "Little or no development and implementation" of indicators 7.1a, 7.1c, 7.1f and 7.1k.

Standard 8: There is evidence that the school is organized to maximize **use of all available resources** to support high student and staff performance.

- 70%__ Performance Level 2 "Limited development or partial implementation" of indicators 8.1a, 8.1c, 8.1e and 8.2a, 8.2b, 8.3c and 8.2d.
- 30%__ Performance Level 2 "Little or no development and implementation" of indicators 8.1b, 8.1d and 8.1f.

Standard 9: The school/district **develops implements and evaluates an ACSIP** that communicates a clear purpose, direction and action plan focused on teaching and learning.

- 13% __ Performance Level 3 "Fully functional and operational level of development and implementation" of indicators 9.3c and 9.5d..
- 74%__ Performance Level 2 "Limited development or partial implementation" of indicators 9.1a, 9.2a, 9.2b, 9.3a, 9.3b, 9.4a, 9.4b, 9.5a,9.5b,9.6b, 9.6c and 9.6d.
- 13%__ Performance Level 2 "Little or no development and implementation" of indicators 9.5c and 9.6a.

Goal To implement selected "**Turnaround Principles**" to guide effective and continuous building level school improvement practices as specified by Arkansas' ESEA Flexibility Waiver. Will meet or exceed AMO goals for Literacy and Math for the 2014-2015 school year.

Benchmark

1. Literacy: All Students Group Performance 63.52% and Growth 73.12% and TAGG Group Performance 63.11% and Growth 72.22%;
2. Math : All Students Group Performance 69.81% and Growth 76.35% and TAGG Group Performance 68.93% and Growth 75.55%.

Intervention: School Leadership- Maintain a team structure that plans with teachers and staff to ensure successful implementation of the core curriculum, school climate, and professional development opportunities.

Scientific Based Research: Rhim, L. M., Kowal, J.M., Hassel, B.C., & Hassel, E. A, (2007). *School turnarounds: A review of the cross-sector evidence on dramatic organizational improvement*. Lincoln, IL: Center on Innovation & Improvement.

<p>By April 3, 2015, 25% of the student population will be represented through parent/community participation in classrooms and school sponsored events as evidenced by a communication log, VIPs logs and sign in sheets.</p>	X		4	04/3/15	<p>The student population was 270 for the 3rd quarter. 39% of the student population was represented during school sponsored events and activities during the 3rd quarter as evidenced by ViPS (volunteers in public schools) and other sign in sheets. Three after school activities/events took place during 3rd quarter with a total of 78 family and community participants in attendance. The School Community Council met each month in the 3rd quarter with a total of 28 participants.</p>

Third Quarter ESEA/ IMO Report

Date Completed: April 10, 2015

School: Cloverdale Aerospace Technology Conversion Charter Middle School

District: Little Rock

Status: Priority Academic Distress

Principal: Wanda Ruffins

ADE School Improvement Specialist: Chante'le' Williams

External Provider: None

Internal School Improvement Specialist: Dr. Vanessa Cleaver

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights:

- Math, literacy and science teachers are actively engaged in activities and conversations about effective questioning to increase rigor in lesson planning and delivery through the use of a lesson plan analysis tool.
- Students are reflecting on their data and setting individual goals through the use of classroom data boards and personal reflection forms.

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

The Internal Provider noted the following concern/barriers:

- Primary concerns and barriers continue to be around addressing the needs of the English Language Learners. Cloverdale needs a full time ESL coordinator as well as qualified bilingual personnel. Efforts to address concerns include identifying ESL/SIOP trained teachers and reinitiating implementation of SIOP strategies.

Third Quarter ESEA/ IMO Report

- 45-minute period is not conducive to time needed to implement intervention strategies.
- Key support personnel consistently pulled from their core job responsibilities to facilitate and prepare for testing.
- Days missed due to inclement weather continue to impact instructional time.

b) Building Principal:

- The literacy intervention curriculum does not allow time for remediation.
- Concern about what to do with level one ELL learners with loss of intervention classes.
- As a newcomer center, there is a need for a full-time ESL Facilitator, qualified bilingual personnel; continued intervention classes, sheltered classes and ESL endorsed teachers.

c) Building Leadership Team:

- There is a need for a full-time ESL Facilitator to build capacity among staff for delivery of instruction using SIOP strategies.
- There is a need for a qualified bi-lingual interpreter for real-time communication with parents.
- The average grade equivalency for sixth, seventh and eighth grade students in reading is 4.0 according to the STAR assessment.
- Instructional reading level for sixth, seventh and eighth grade students is 3.6 according to the STAR assessment.
- There is a need for fluency among all grades in basic math skills.
- Apathy for learning is evident among students according to 2013-2014 EXPLORE assessment results.
- English teacher on long-term leave poses a chronic issue.
- Loss of instructional time due to student sanctions and inclement weather has caused ongoing issues.

Third Quarter ESEA/ IMO Report

d) ADE School Improvement Specialist:

- The ability to multitask and streamline the school improvement work is needed.
- There is a lack of the use of Indistar on a regular basis.
- The structure of the Leadership Team having to supervise transitions during Leadership Team meetings, at times, impedes progress.
- School’s mission and vision should be evident in the daily life of the school.
- The amount of time to complete assessments (getting all teachers to test) is too lengthy.
- There appears to be a limited amount of knowledge and skill set available in both the school and the district to implement necessary school turnaround principles and methods.

Third Quarter ESEA/ IMO Report

IMO Area: 1. Change in teacher and leader practice: Met: 1 Not Met: 0
 2. Student progress and achievement: Met: 0 Not Met: 0
 3. Student safety and discipline: Met: 0 Not Met: 0
 4. Parent and community engagement: Met: 1 Not Met: 0

Total IMO's this Quarter: 6 Met: 2 Not Met: 4

IMO	Met	Not Met	IMO Area	IMO Date	Explanation/Supporting Data
By March 19, 2015, 52.87% of literacy students in the "All Students" category will score 70% or above on an in-house common formative assessment.		X	2	03/19/15	This IMO was not met due to the fact that English was still assessing.
By March 19, 2015, 55.755% of literacy students in the "All Students" category will score 70% or above on an in-house common formative assessment.		X	2	03/19/15	Data was not available by the deadline of this report.
By March 19, 2015, in order to be viewed as curriculum/instructional leaders, school administrators will plan and present a minimum of four professional development sessions on instructional strategies as evidenced agendas and sign in sheets.	X		1	03/19/15	The dates of the sessions are as follows: January 5, 2015, January 12, 2015, February 3, 2015, and March 3, 2015.
By March 19, 2015, parent participation in an ABC (Academics, Breakfast, Commitment) training session will increase by 25% from the second quarter and will be documented on an agenda and sign-in sheet.	X		4	03/19/15	The ABC acronym is no longer being used, but several parent trainings were conducted to include ESL parent night, Math and Literacy, etc. Parent attendance increased by well over 25% from the second quarter.
By March 19, 2015, 95% of teachers will be actively engaged in student transitions as evidenced by focus walk data.		X	3	03/19/15	There is an uncertainty as to the best way to measure this IMO. The school is currently looking at tardy reports from the

Third Quarter ESEA/ IMO Report

					first 3 quarters to compare tardies for period transitions by grade and teacher.
By March 19, 2015, literacy, math, science and social studies teachers will evaluate and analyze the use of a variety of question types on a monthly basis as evidenced by completed effective question lesson plan analysis forms.		X	1	03/19/15	English and math teachers continue to assess questioning on a monthly basis. Science and social studies teachers did not complete this activity in the 3 rd quarter due to testing and inclement weather. The IMO for the 4 th quarter will focus on the science and social studies teachers.

Third Quarter ESEA/ IMO Report

Date Completed: April 16, 2015

School: Hall High

District: Little Rock School District

Status: Academic Distress & Priority

Principal: Larry Schleicher

ADE School Improvement Specialist: Roxie Browning

External Provider: N/A

Internal School Improvement Specialist: Carolyn Carter

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights:

As reported by the principal:

- Two members from the building Leadership Team presents at staff faculty meeting in March, first Major step for this leadership team.
- Pre and Post-test administered in Math and Literacy.
- Teachers attended the Advancement Via Individual Determination (AVID) critical reading classes in the areas of History, Science and Literature.
- Continuing in the work of getting all teachers fully prepared to teach all children with an emphasis on English as Second Language (ESL) and Special Education instructional strategies. Trainings have taken place 6 times in the 3rd quarter and are continuing throughout the school year.

As reported by District Personnel:

- SHMOOP (on-line program for improving test scores) was implemented as tool for ACT and Advance Placement (AP) Exam test prep.
- Building administration arranged a half-day grade level instructional teaming session for Literacy.

Third Quarter ESEA/ IMO Report

As reported by Building/School Leadership (SLT) members:

- Approximately 38 teachers completed the training and began implementing the AVID Cross-Curricular Critical Reading Strategies. Follow-up training is scheduled to occur during the 4th quarter.
- Attendance at after-school/before-school programs is up and holding steady considering it is spring and there is competition with spring sports.
- Planning for summer programs completed for the following: Art Across the Curriculum (art + math, science, literacy), Robotics Camp, ACT Math Prep for ESL, ESL Summer Academy, ESL Physical Science Credit Recovery
- Beginning to work on 90/90/90 school research and integrating the three chosen practices (i.e., Planning, Implementation, and Monitoring (P.I.M.)/ Building Data Teams, Decision Making for Results/ Instructional Data Teams, Learning Environment and School Culture into the school), which should bring a sense of “forward progress,” direction, and purpose.

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

Concerns/Barriers reported from District Personnel who work directly with Hall:

- In literacy, grade-level groups met for the first time during the 3rd quarter. There was reluctance to participate on the part of some teachers; none of the teachers had a real idea of expectations as a result of the Instructional Team meeting. Data-driven decision-making was not part of the groups’ discussion.
- Testing was a concern because of a combined total of 115 students who chose not to participate and the teachers allegedly involved in the process.
- School climate is not positive because of low teacher morale; students not focused on learning. Discipline issues are increasingly the administration’s major concern.
- There is a perception that ESL students are isolated and not part of the larger school community.
- The main concern involves having enough time to truly develop and implement of the 45 day plan with measurable outcomes by the school year.
- Building leadership capacity among teachers is lacking.
- Develop a true focus for the academic teams during their designated half day professional development (PD.)
- A major barrier is the amount of testing during the 4th quarter. This requires a tremendous amount the

Third Quarter ESEA/ IMO Report

administrators' time.

b) Building Principal:

Concerns/Barriers reported by the principal:

- Community influences continue to hamper the positive things we are doing and behavioral issues are being brought in on a daily basis. Student focus is being limited due to these negative influences.
- Snow Days/ Testing changes have prevented the full completion of IMO's.
- History teacher out on medical leave since January 2015.
- 11th grade English teacher out on medical leave since September 2014. Students have been without a certified teacher ever since.
- Communication teacher resigned in February 2015.
- Teachers allegedly encouraged students to refuse PARRC Exam testing.

c) Building Leadership Team:

Barriers/concerns reported by Building/School Leadership Team (SLT) Members:

- It was difficult for the literacy grade-level teams and math subject-area teams to meet since they did not have common preps, with the exception of the ninth grade team.
- All literacy teachers did not administer the Common Formative Assessment.
- Not enough time was spent on analyzing student math and literacy data.
- There is a general lack of "forward progress," such as team members are confused about what has and has not happened in these meetings.
- There is a general lack of direction: What is the SLT focused on? What is our goal? What are we working towards?
- There is a general lack of understanding of the purpose of SLT as a Data Team that plans, implements, and monitors: What is considered "off-limits" by the SLT? What is considered pertinent to the SLT? Who decides this? What are we working on? Why are we working on it?
- In literacy, grade-level groups met for the first time during the 3rd quarter. There was reluctance to participate on the part of some teachers; none of the teachers had a real idea of expectations as a result of the Instructional Team meeting. Data-driven decision-making was not a part of the groups' discussions.

Third Quarter ESEA/ IMO Report

- PARCC testing was a concern because of the number of students who chose not to participate.
- School climate is not positive because of low teacher morale; students were not focused on learning. Discipline issues are a primary focus of building administration.
- There is a perception that English as Second Language (ESL) students are isolated and not part of the larger school community.
- Seven days were missed during the third quarter due to inclement weather.
- There has been a lack of morale regarding job cuts.
- Disaggregated data was not reviewed and discussed during SLT meeting.

d) School Improvement Specialist:

As reported by the currently assigned ADE SIS:

- A limited amount of high expectations is communicated to staff, students and families, and support for students to achieve them.
- There is a lack in the assurance of a rigorous and coherent standards-based curriculum and aligned assessment system being implemented at Hall.
- Students' ability to perform at proficiency when a great number of students are not strong readers.
- No evidence that classroom level instruction is adjusted based on formative and summative results from aligned assessments and shared planning.
- It is difficult to ascertain a coherent strategy and plan for implementing the school vision, including clear measurable goals, aligned strategies and a plan for monitoring progress and driving continuous improvement.
- There is limited evidence of maintaining a culture that values learning which promotes the academic and personal growth of students and staff.
- There appears to be a limited amount of knowledge, urgency and skill set available in both the school and the district to implement necessary school turnaround principles and methods.
- During state testing, an incident occurred resulting in over 100 students refusing to test. An investigation ensued which involves alleged teachers who may have influenced students to refuse to test and may result in teacher termination. This has caused a major disruption to the school day and testing environment.
- The ADE SIS has no quantifiable evidence of the progress of student success in the Newcomer Center location at Hall. A request to the district EL coordinator was recently made for an analysis and program evaluation and is expected before the end of the school term for planning. ADE SIS suggested that this information be analyzed on

Third Quarter ESEA/ IMO Report

a regular basis as a part of a reoccurring needs assessment, program monitoring and evaluation.

e) Other:

Additions/Revisions to current year's PIP/TIP:

Retrieved from the October 1 submitted ACSIP

2014-2015 PIP: Hall High School will use School Improvement grants to implement a Transformational Model that will improve student achievement and performance.

Supporting

Data:

1. Comprehensive Needs Assessment Narrative

The Arkansas Department of Education requested an ESEA Flexibility Waiver from the US Department of Education to be able to waive some of the requirements of the No Child Left Behind Act (2001). Arkansas was granted the waiver on June 18, 2012. All schools in the state are being held to a different accountability standard. Arkansas schools have been identified and placed in the following categories:

Exemplary Schools,

Achieving Schools,

Needs Improvement Schools,

Needs Improvement Focus Schools and

Needs Improvement Priority Schools.

Needs Improvement Priority Schools

Arkansas was required to identify a number of lowest-performing schools equal to at least five percent of the state's Title I schools. Arkansas had 803 Title I schools in 2011, requiring at least 40 Title I schools be identified among the schools identified as Needs Improvement Priority Schools. Arkansas identified 48 schools which included 41 Title I schools. The criteria for identification of Priority Schools set by USDE included identifying schools that were:

Among the lowest five percent of schools in the state based on proficiency and lack of progress of the "All Students" group, or

Title I participating or Title I eligible high schools with graduation rates less than 60% over a number of years, or

Tier I or Tier II SIG schools implementing a school intervention model.

Hall High is a Tier I SIG school and will implement selected interventions that will guide effective and continuous building level school improvement practices as specified by Arkansas' ESEA approved Flexibility Waiver. The leadership team will share the responsibility of implementing all aspects of the America's Choice School Design Model for school improvement. The leadership team will emphasize a standards-based education and provide guidance and continued support to faculty and staff on actual structure and key roles in order to raise student

Third Quarter ESEA/ IMO Report

achievement.

2.

Summary Action for Hall High School - NI: PRIORITY

Basic School Profile

79.6% of the students enrolled are from low income families

Receives Title I funding and operates a "Schoolwide Program"

2012-2013 Title I Allocation \$ 499,800.00

Student Enrollment: 1116

African American: 77%

Caucasian (White):5%

Hispanic:17%

The building's Comprehensive Needs Assessment will be developed jointly between the school, the district, the *ADE, and the External Provider selected by the school.

The school's improvement goals and targets will be determined based on the building's comprehensive needs assessment.

The selected interventions shall be aligned with the Turnaround Principles.

Goal

1. Hall High School will meet Literacy AMO for all students of 54.9% for 2013, 59.4% for 2014, and 63.9% for 2015. Hall High will meet Literacy AMO for TAGG of 50.88% for 2013, 55.8% for 2014, and 60.7% for 2015.

2. Hall High School will meet Math AMO for all students of 47.6% for 2013, 52.8% for 2014, and 58.1% for 2015.

Hall High School will meet Math AMO for TAGG of 47.5% for 2013, 52.7% for 2014, and 57.9% for 2015.

3. Hall High School will meet Graduation AMO for all students of 75% for 2013, 77.7% for 2014, and 80.5 for 2015.

Hall High School will meet Graduation AMO for TAGG students 77% for 2013, 79.5% for 2014, and 82.1 for 2015.

Hall High School expects to meet or exceed its 2015 performance Annual Measurable Objectives (AMOs) in Literacy, Benchmark

Math and graduation in the "All Students Group" and the "TAGG Group".

a. **Literacy:** All Students Group Performance 59.40% and TAGG Group Performance 55.8%;

b. **Math :** All Students Group Performance 52.8% and TAGG Group Performance 52.7%;

c. **Graduation:** To meet or exceed the required AMO for graduation in the "All Students Group" 73.07% and "TAGG Group" 72.45%.

Hall High School has exceeded the 2014 graduation performance requirement in both groups **ALL (77.7%)** and **TAGG (79.5%)**.

Goal To ensure the school's instructional program actively engages all students by *using effective, varied and researchbased practices* to improve student academic performance.

Benchmark **IMO:IF03/IF04/IF07**: Professional development for teachers will include observations by the principal and by peers with an emphasis related to effective teaching and classroom management.

Benchmark

IMO:IID02/IID11: The school will test each student at least three times a year with the Department Chairs reviewing these results and the results from pre-and post-tests of each module/unit to determine progress towards standardsbased objectives. The Department Chairs will use these results to make decisions about the curriculum and the instructional plans with a focus on "red-flagging" students in need of intervention or enrichment.

 4. Parent and community engagement: Met: 0 Not Met: 1
 Total IMO's this Quarter: 6 Met: 1 Not Met: 5

IMO	Met	Not Met	IMO Area	IMO Date	Explanation/Supporting Data
By April 3rd, there will be a 50% growth from the baseline in observed levels of student engagement, higher levels of Bloom's Taxonomy, and incidents of student collaboration according to observation results for the third quarter as measured/evidenced by reports from the district observation tool.		X	1	04/3/15	Principal: Observations were limited due to testing/Snow Days. ADE SIS: This IMO has not been revised with the support of the current ADE SIS. In its current state, the IMO does not adequately address the needs of instruction and learning at Hall High.
By April 3rd, the administrative team will complete 45 classroom observations per week on average during the 3rd quarter as evidenced by the analysis of data from the district provided observation tool.		X	1	04/3/15	Principal: This task became impossible due to six snow days and PARRC Testing. The IMO was not well thought out. ELDA test started also in Last days of March. ADE SIS: This IMO has not been revised with the support of the current ADE SIS. In its current state, the IMO does not adequately address the needs of instruction and learning at Hall High.
By April 3rd, the Leadership Team will meet and discuss disaggregated results from the Algebra I, Geometry, and Literacy Module as measured by the third Quarter Common Assessments		X	2	04/3/15	Principal: The SLT viewed a portion of the raw data in literacy and math. No SLT discussions could take place without disaggregated data. ADE SIS: Provided "Coaching Comments" and other weekly visit notes

Third Quarter ESEA/ IMO Report

					related to guiding the SLT to review disaggregated data and make decisions to improve instruction and learning based on that data. In addition, this IMO has not been revised with the support of the current ADE SIS. In its current state, the IMO does not adequately address the needs of instruction and learning at Hall High.
By April 3, common pre-and post-tests will be developed and administered at the beginning and the end of Third Quarter for Algebra I, Geometry, and Literacy as evidenced by the analysis of testing results.		X	2	04/3/15	<p>Principal: Tests were developed but not implemented in all areas mentioned in the IMO.</p> <p>ADE SIS: This IMO has not been revised with the support of the current ADE SIS. In its current state, the IMO does not adequately address the needs of instruction and learning at Hall High.</p>
By April 3, there will be a 5% decrease of suspensions as compared to the third quarter of 2013-14 as measured/evidenced by the data analysis from AS400.	X		3	04/3/15	<p>Principal: In the 3rd quarter of the 2013-14 school term, there were 640 suspensions, both in-school and out of school. In the 3rd quarter of the 2014-15 school term there were 302, a more than 50% decrease in suspensions during that quarter.</p> <p>ADE SIS: Reviewed suspension data from the 3rd quarter of last school year compared to this school year and the report indicates this IMO is met as written. This IMO has not been revised with the support of the current ADE SIS. In its current state, the IMO does not adequately address the safety and discipline needs at Hall High.</p>

Third Quarter ESEA/ IMO Report

<p>Parent and Community Engagement - By April 3, there will be a 50% increase from the baseline in the number of total parent contacts as recorded in communication logs submitted on a weekly basis for third quarter.</p>		X	4	04/3/15	<p>Principal: Increase noted and data kept in office. Exceptions to office are counselors and Translator but books are reviewable. See Ms. Stewart for reports.</p> <p>ADE SIS: Reviewed several teacher documented communication logs from 3rd quarter. As of date, the school has not provided an analysis of the information to determine if there was a 50% increase or not from the baseline number of contacts. This IMO has not been revised with the support of the current ADE SIS. In its current state, the IMO does not adequately address the parent and community engagement needs at Hall High.</p>

Third Quarter ESEA/ IMO Report

Date Completed: April 3, 2015

School: Henderson Middle School

District: Little Rock

Status: Priority Academic Distress

Principal: Frank Williams

ADE School Improvement Specialist: Chante'le' Williams

External Provider: None

Internal School Improvement Specialist: Suzi Davis

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights:

- The district will continue focus on instructional supervision among administrators
- Students were involved and recognized for participation in community service shoe drive
- Planning is in progress for the ALE classroom to be housed at Henderson
- The district had successful administration of PARCC PBA tests
- Four teachers became National Board Certified teachers

Third Quarter ESEA/ IMO Report

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

The Internal Specialist provided the following concerns/barriers:

- School culture and morale are low due to impending changes in district governance
- Teachers are not using time to plan and implement curriculum effectively which effects solid instruction and student learning.
- Teacher attendance and long-term substitutes in classrooms are chronic issues.
- Resistances to change and to use new pedagogical practices are ongoing issues.
- Focus for school improvement is not communicated to all effectively and not shared.
- There is a lack of time for PD or PLC's to hone new skills impedes progress.
- Inconsistent and interrupted teaching days (weather and testing) pose problems.

b) Building Principal:

The principal reported the following concerns/barriers:

- Barriers continue to be the resistance to change and using Common Core rigor and standards in instruction.
- Development of PD plan to address student grouping, discussion techniques, technology infusion, and lesson planning more thoroughly is needed (PLC's, team time, collaboration etc.)
- Teacher Attendance; Average daily attendance for teachers is 80.08%; 5 teachers are on extended leaves of absence.

c) Building Leadership Team:

The Building Leadership Team noted the following concerns/barriers:

- Various change initiatives such as teacher observations and accountability in regards of teacher attendance has led to pockets of low teacher morale.
- There is a lack of efficient system of developing quarterly pre and post-tests.

Third Quarter ESEA/ IMO Report

d) School Improvement Specialist:

- Level of rigor and consistency across classrooms is an issue.
- Teacher absences are chronic.
- 6th grade team should work more closely together, and should create and deliver effective lesson plans.
- Leadership team should be vested in school improvement work.
- Leadership Team needs additional training in Indistar and should reference and use the system more frequently.
- The school mission and vision should be evident in the daily life at the school.
- A coherent strategy and plan for implementing the school vision, which includes clear measureable goals, aligned strategies and a plan for monitoring progress and driving continuous improvement should be developed and promoted.
- The school improvement plan should be referred to frequently at leadership team or planning meeting.

IMO	Met	Not Met	IMO Area	IMO Date	Explanation/Supporting Data
By March 30, 2015, an additional 25 (300 total) classroom observations, including teacher feedback notes, will be completed by trained building administrators as evidenced by LRSD tool documentation.	X		1	03-30-15	At end of third quarter, a total of 446 classroom observations were logged by building administrators and feedback provided to teachers.
By March 30, 2015, teachers will implement the eight components of lesson planning in math and literacy classrooms as determined by district focus on planning.		X	1	03-30-15	Some teachers have used district recommended planning format and implemented workable plans. Many teachers resist and have not planned effectively.
By March 30, 2015 teachers will use SRI and SMI data and pre/post test data to analyze student achievement and plan instruction.		X	2	03-30-15	Some teachers are diligent with use of data and assessing students as others are less diligent.
By March 30, 2015, an increase of community involvement activities as indicated by VIPS forms.	X		4	03-30-15	Community led Girls Rock Program is in effect and meets regularly on Tuesday and Thursday at lunch. Computer Power day was hosted at Henderson Middle School during the third quarter. Guest speakers volunteered during the MLK celebration.
By the end of the 3 rd Quarter 2015, the number of discipline referrals will decrease by 20 students as compared to the 3 rd Quarter of 2014, as determined by discipline referrals report.	X		3	04-02-15	Category 2 and above offenses reduced from 132 infractions to 116 infractions.

Third Quarter ESEA/ IMO Report

Third Quarter ESEA/ IMO Report

Date Completed: April 14, 2014

School: J.A. Fair High

District: Little Rock School District

Status: Priority & Academic Distress

Principal: Jeremy Owoh

ADE School Improvement Specialist: Roxie Browning

External Provider: N/A

Internal School Improvement Specialist: Marcelline Carr

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights:

Highlights as reported by the principal:

- The School Leadership Team (SLT) continues to receive leadership training. The team has been working efficiently and effectively.
- The collaboration among the Arkansas Department of Education (ADE) School Improvement Specialist (SIS,) Little Rock School District (LRSD) SIS, and school leadership continues to be beneficial to the instructional work of the school. The work is more focused and concise.

Concerns/Barriers as reported from:

- a) District Personnel/District Leadership Team:

Concerns/Barriers reported from District Personnel who work directly with J.A. Fair

Third Quarter ESEA/ IMO Report

- The main concern involves having enough time to truly develop and implement the 45 day plan with measurable outcomes by the end of the school year.
- There is a limited amount of leadership capacity among teachers.
- There appears to be a lack in the development of a true focus for the academic teams during their designated half day Professional Development (PD.)
- A major barrier has been the amount of testing during the 3rd quarter, requiring a tremendous amount of administrators' focus and time to be devoted towards test administrator tasks.

b) Building Principal:

Concerns/Barriers reported by the principal:

- With recent changes within the district and impending changes to the upcoming school year, it has been difficult at the building level to plan. There is a limited amount of a clear focus pertaining to the overall plan.
- There was an inconsistency of academic school reports being requested by multiple entities.
- The amount of time that was devoted to testing and taken away from an instructional focus during the 3rd quarter.
- A significant amount of meetings have occurred, taking time away from providing support to teachers in the classroom or handling evaluations.

c) Building Leadership Team:

Barriers/concerns reported by Building (School) Leadership Team Members:

- Teachers currently do not possess a horizontal common planning time to create a common formative assessment (CFA.) Planning is currently taking place to support providing common planning time within the master schedule for next school year.

d) School Improvement Specialist:

Third Quarter ESEA/ IMO Report

As reported by the currently assigned ADE SIS:

- Teachers are not organized into instructional teams prohibiting them from the development and review of formative assessments nor are they able to plan units of instruction with differentiated lessons. (Indistar Indicator ID11 & Wise Ways #46) Planning is underway for the next school term to incorporate common planning periods for literacy and math teachers.
- ADE SIS was on campus a limited amount of days during the 3rd quarter for full day support. This was due in part to several inclement weather days when school was not in session, a week of spring break, standardized testing, and schedule conflicts among school and/or district personnel and the various ADE duties/responsibilities which pulled the ADE SIS out of the building.

e) Other:

N/A

Additions/Revisions to current year's PIP/TIP:

Current PIP

Priority 7: 2014-2015 PIP: Implementing a Transformational School Improvement Model

1. Comprehensive Needs Assessment Narrative

The Arkansas Department of Education requested an ESEA Flexibility Waiver from the US Department of Education to be able to waive some of the requirements of the No Child Left Behind Act (2001). Arkansas was granted the waiver on June 18, 2012. All schools in the state are being held to a different accountability standard. Arkansas schools have been identified and placed in the following categories:

Supporting
Data:

- Exemplary Schools,
- Achieving Schools,
- Needs Improvement Schools,
- Needs Improvement Focus Schools and
- Needs Improvement Priority Schools.

Third Quarter ESEA/ IMO Report

Needs Improvement Priority Schools

Arkansas was required to identify a number of lowest-performing schools equal to at least five percent of the state's Title I schools. Arkansas had 803 Title I schools in 2011, requiring at least 40 Title I schools be identified among the schools identified as Needs Improvement Priority Schools. Arkansas identified 48 schools which included 41 Title I schools. The criteria for identification of Priority Schools set by USDE included identifying schools that were:

- Among the lowest five percent of schools in the state based on proficiency and lack of progress of the “All Students” group, or

 - Title I participating or Title I eligible high schools with graduation rates less than 60% over a number of years, or

 - Tier I or Tier II SIG schools implementing a school intervention model.
2. J.A. Fair is among the lowest five percent of schools in the state based on proficiency and lack of progress of the “All Students” group, we are also a Title I eligible high school with a graduation rate of less than 60% over a number of years. Fair is also a Tier II SIG school implementing a school intervention model.
3. The Arkansas Department of Education conducted a Scholastic Audit of JA Fair High School during the period of November 11, 2007 to November 16, 2007. The Scholastic Audit Performance levels are as follows:
- Performance Level 4: – Exemplary level of development and implementation;
 - Performance Level 3 – Fully functional and operational level of development and implementation;
 - Performance Level 2- Limited development or partial implementation; and
 - Performance Level 1 – Little or no development and implementation.

J.A. Fair High School will address the all the recommendations of the report over a period of three to five years; however, the current focus is on Standards 7, 8, and 9.

- In the area of **Leadership or Standard 7**, the Scholastic Audit Report indicated that Fair High School showed “*Limited development or partial implementation*” on ten (10) of the eleven (11) the indicators for Leadership. One (1) indicator was determined to have “*Little or no development and implementation*”.

Third Quarter ESEA/ IMO Report

- In the area of **School Organization and Fiscal Resources or Standard 8**, the Scholastic Audit Report indicated that Fair High School showed “*Limited development or partial implementation*” on 4 of the 6 the indicators for **School Organization**. The remaining indicators showed “*Little or no development and implementation*”. In the area of **Fiscal Resources**, there were four (4) indicators. Fair showed “*Limited development or partial implementation*” on two (2) and “*Little or no development and implementation*” on two (2).

- In the area of **Comprehensive and Effective Planning or Standard 9**, there are sixteen (16) indicators. The Scholastic Audit Report determined that Fair High School showed “*Limited development or partial implementation*” on 14 of the 16 the indicators and “*Little or no development and implementation*” on two indicators.

The Priority Improvement Plan will reflect interventions, actions and measurable objectives that will demonstrate improved building level capacity in the identified areas.

4.

The state’s new accountability system does not use the ESEA subgroups separately to determine if a school is failing or in need of improvement. The state will use two groups to determine whether the school has met its annual measurable objectives (AMOs). Those two groups are the “All Students Group” and the “Targeted Achievement Gap Group” or “TAGG”. The TAGG subgroup is a combination of the following ESEA subgroups: Economically Disadvantaged subgroup, English Learners subgroup, and Students with Disabilities subgroup. The difference in performance between these two groups will determine how well the building is meeting its annual goals. Currently, the difference between these two groups in our school is as follows:

- All Students (Non TAGG)
 - Literacy Performance 39.08
 - Math Performance 47.03
 - Graduation 73.18
- Targeted Achievement Gap Group (TAGG)
 - Literacy Performance 34.0
 - Math Performance 46.99
 - Graduation 73.88

J. A. Fair met its AMOs in Literacy and Math; however, it did not meet the Graduation AMO of 73.18%; our score was 63.64% for All Students. J.A. Fair must continue to meet our AMOs in literacy by achieving an AMO of 44.62% and in math by achieving 51.84% for All Students in 2013. The interventions and actions in our Priority Improvement Plan will also provide the direction for supporting our subgroups to reach at a minimum their annual measurable objectives.

5. *Summary Action for J. A. Fair High School* - NI: PRIORITY

- Basic School Profile
 - 80.6% of the students enrolled are from low income families
 - Receives Title I funding and operates a “Schoolwide Program”
 - 2012-2013 Title I Allocation \$ 369,075.00
- Student Enrollment: 820
 - African American: 85%

Third Quarter ESEA/ IMO Report

		<ul style="list-style-type: none"> ▪ Caucasian (White):7% ▪ Hispanic:8% 	
			<ul style="list-style-type: none"> ○ The building’s Comprehensive Needs Assessment will be developed jointly between the school, the district, the *ADE, and the External Provider selected by the school. ○ The school’s improvement goals and targets will be determined based on the building’s comprehensive needs assessment. ○ The selected interventions shall be aligned with the <u>Turnaround Principles</u>.
Goal			<p>To implement selected “Turnaround Principles” to guide effective and continuous building level school improvement practices as specified by Arkansas’ ESEA Flexibility Waiver and a positive Change in Leadership Practice and Support of sound instructional setting.</p> <p>J.A. Fair High School will meet or exceed the 2014 performance annual measurable objectives (AMOs) in Literacy, Math and Graduation Rate for the "All Students Group" and the "Targeted Achievement Gap Group (TAGG)".</p>
Benchmark			<p>a. Literacy: All Students Group Performance 50.16% and TAGG Group Performance 46.0%;</p>
			<p>b. Math : All Students Group Performance 56.66% and TAGG Group Performance 56.63%;</p>
			<p>c. Graduation: To meet or exceed the required AMO for graduation in the “All Students Group” 79.39% and “TAGG Group” 80.37%.</p>
Benchmark			<p>IMO #1 Change in Leader and Teacher Practice: By the end of 1st quarter, the leadership team will identify all students who are considered at risk for the purpose of pairing a positive adult for mentoring by gathering data that will include attendance records, behavior incidents, low-grades, low test scores, and failure rates.</p>
Benchmark			<p>IMO #2 Change in Leader and Teacher Practice: By the end of the 2nd quarter, 50 % of the at risk students will be linked with one positive adult to help build character and support appropriate student behavior which will be measured by the adults’ report.</p>
Benchmark			<p>IMO #3 Change in Leader and Teacher Practice: By the end of the 3rd quarter, 100 % of the identified at-risk students will be linked to a positive adult in the school building.</p>
Benchmark			<p>IMO #4 Change in Leader and Teacher Practice: By the end of the 4th quarter, 80-100% of the at-risk students will be connected to a community based supports to build upon their unique strengths as measured by teacher input.</p>
<p>Intervention: School Leadership and Decision Making - <i>Establishing a team structure with specific duties and time for instructional planning</i></p>			
<p>Scientific Based Research:</p>

School: Osceola High School

District: Osceola School District

Status: Priority/Title I

Principal: Ms. Tiffany Morgan

ADE School Improvement Specialist: Pam Clark

Approved External Provider: Blaine Alexander, Arkansas Leadership Academy

Internal School Improvement Specialist: N/A

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights:

- *Office for Education Policy Report*
 - Osceola High School was recognized as one of the *Top 5 Most Improved High Schools in **Northeast** Arkansas, **EOC Algebra and Geometry** Achievement from 2008-09/2009-10 to 2012-13/2013-14.*
Subject:Algebra Grades:9-12 Free/Reduced: 87% Proficient: 30% to 58% GPA growth +0.44
Subject:Geometry Proficient: 24% to 44% GPA growth+0.40
- The State Board of Education removed Osceola High School from Academic Distress in February, 2015.
- The principal is currently attending Master Principal Program with the Arkansas Leadership Academy. This is the 3rd year for this principal to attend the institute and the work continues to include depth, spread, scale, and sustainability throughout the faculty and staff of the building.

Third Quarter ESEA/IMO Report

- Osceola High School will be sending two students and two teachers to the student voice conference hosted by the Arkansas Leadership Academy.
- Osceola High School participated in Literacy Design Collaborative training with Dawn Bessee from the Crowley's Ridge Co-op.
- Osceola had a senior get appointed to the United States Air Force Academy. He is the first recipient in Northeast Arkansas to receive an appointment to the Academy.
- Osceola High School had a student participate and win the state Poetry Out Loud contest.
- Osceola High School had a teacher get inducted into the Teacher Hall of Fame for Thespian.
- As a part of its STEM initiative, Osceola School District has implemented the Project Lead the Way Engineering curriculum. Students in this program learn about the Engineering Design process through a hands-on, project based approach. Our students have access to 3-D printers that they have used to print physical models of items they have designed. The level of engagement in Project Lead the Way is self-evident from the actions of the students. Students in the 2nd year of the program participated in the Vex Robotics Competition this year. Even with their preliminary matches being cancelled due to inclement weather, the two teams came to school on snow days to work on their robots/programming, and were able to participate in the state competition where they placed 17th and 19th in the preliminary rounds, and 6th in the finals. The skills learned in this program will help students in all walks of life.
- The Osceola high school EAST program is all about community service through the use of technology. Whether it is establishing a balloon release to raise awareness for childhood cancer, a school sponsored blood drive, or students creating a talent show to raise money for diabetes, the Osceola EAST students are always working to better their community. In March, a group of Osceola high school EAST students had the opportunity to attend the

Third Quarter ESEA/IMO Report

2015 EAST Conference and meet with schools from all over Arkansas who were serving their communities. The Osceola students were able to see the vast array of projects that other schools were working with, ranging from student-made hydroponic or aquaponic systems, model filtration systems for a local water treatment company, or interactive 3D walk-throughs of local museums. The students were also able to watch STEM competitions, tech support competitions, or participate in free classes where they could learn about computer hardware, the use of GPS and mapmaking software, or 3D modeling programs. By attending this conference, the students were able to grow in their technological skills and were also able to gather more ideas for future projects for the community of Osceola.

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

- The district stated that their concerns are:
- Changing the culture within the Osceola School District and Community
- Teacher absenteeism continues to be a problem
- Administrators holding teachers accountable
- A sense of urgency within the district towards student achievement.

b) Building Principal:

The building principal stated that teacher absenteeism continues to be a problem at Osceola high school. Student attendance (93%) is higher than teacher attendance at (89.2%). Another concern is high teacher turnover for the 2015-2016 school year. Once again, the literacy department at the high school will be composed all of new teachers to the Osceola School District for the 2015-2016 school year.

Third Quarter ESEA/IMO Report

c) Building Leadership Team:

The building leadership team stated that understanding Common Core at the high school continues to be a problem each year because of high teach turnover.

d) ADE School Improvement Specialist:

The school improvement specialist stated that daily, classroom instruction should be more rigorous and bell to bell instruction is essential.

e) External provider:

- The external provider stated that there is still a 'Lack of sense of urgency'.
- The second concern by Generation Ready provider is also high teacher turnover. This provider stated OHS should create a plan for the 2015-2016 school year whereby for the first two weeks of school they should provide procedures for rules, routines and procedures.

Additions/Revisions to current year's PIP/TIP:

Each week during the leadership team meeting, 3 Indistar Indicators are monitored for implementation. Also during this time, the IMOs are monitored if new data is available.

 4. Parent and community engagement: Met: 1 Not Met: 0

Total IMO's this Quarter: 5 Met: 5 Not Met: 0

IMO	Met	Not Met	IMO Area	IMO Date	Explanation/Supporting Data
By March 2015, the principal will meet with 100% of the teachers individually to review the teachers failure report for the first semester.	X		1	03/15/15	The high school principal met with 100% of teachers during the third quarter grading period. An action plan will be created for the fourth nine weeks concerning any student with a failing grade. The principal stated that each teacher with a failing student will have to create an action plan for the failing student for the 4 th nine weeks.
By March 2015, 26% of the 10 th grade literacy students will demonstrate growth as determined by MAP RIT scores.	X		2	03/15/15	31% of 10 th grade students showed growth as determined by MAP scores because the leadership team shared the data one-on-one with the students. Students created their own goal and became invested in their scores.
By March 2015, 31% of the 10 th grade math students will demonstrate growth as determined by MAP RIT scores.	X		2	03/15/15	41.8% of 10 th grade students showed growth as determined by MAP scores. This 3 rd nine weeks IMO exceeded our end-of-year growth goal.

Third Quarter ESEA/IMO Report

<p>By the end of March 2015 , any student with five or more referrals will be placed on individualized behavior management plan to be monitored by the principal and the dean of students.</p>	X		3	03/15/15	<p>The principal will continue to lead the discussion about this IMO. Six students are currently on a Behavior Plan. Osceola high school will be adding nine more students. The process of writing the behavior plans for these nine students will be completed with the students. The students will help create the behavior plans, sign them and will be given a copy of the plan.</p>
<p>By the end of March 2015, 100% of parents of students with failing grades will be contacted by the classroom teacher as measured by parent contact log turned in by the teacher.</p>	x		4	03/15/15	<p>Osceola high school had 153 of 355 (43%) come to parent teacher conference for the third quarter grading period. The teachers contacted 100% of students with failing grades during the grading period and have contacted all students with failing grades on their 3rd quarter grading period.</p> <p>The principal has created a plan of action whereby the teacher will have to bring their grade book and will have to justify all failing grades. A plan of action will then be created with the principal and the teacher.</p>

ARKANSAS
DEPARTMENT
OF EDUCATION

Third Quarter ESEA/IMO Report

Highlights:

- The Principal is completing year 1 of the Arkansas Leadership Academy's Master Principal Program and is applying for the year two program.
- Osceola STEM Academy hosted a VEX Robotic competition on campus and invited the community. The judges were plant engineers from American Greeting, Cyro, and Denso. Stem had a student that won the overall award in programing the robots.
- In March, 6th & 7th grade students did an American History program that displayed multiculturalism performances. For examples, student did ballet dancing, poetry, solos and a play.
- There are clubs established on campus. The drama club is very active and has performed for the public on OSA Literacy night. OSA ambassadors and club members read books to local headstart students every Tuesday @ 9:30.
- The Principal and external providers work hand in hand.
- Osceola STEM Academy has planned a 2014-15 OSA Showcase program whereas, students will demonstrate for robotics, share academic success and each grade level will show something that they have learned. The program will end with a slide show on "STEM pathway to Success".

Concerns/Barriers as reported from:

- a) District Personnel/District Leadership Team:

The superintendent stated his biggest concern for the STEM Academy is hiring and retaining good, quality teachers.

Third Quarter ESEA/IMO Report

b) Building Principal:

The building principal's major concerns for the third nine week period are teacher absentees and classroom management. Teacher absentees have increased during the 3rd nine week period. After reviewing the TESS evaluation data, it reveals that classroom Management is still a weak area on campus.

c) Building Leadership Team:

The building leadership team stated that timely communication so teachers can plan appropriately, for example, change of schedules for testing, assemblies, etc.

d) ADE School Improvement Specialist:

The school improvement specialist's concern is for daily instruction to be rigorous, and for classroom instruction be data driven.

e) External provider:

The external provider stated that clear expectations for teachers in planning for substitutes. Another concern is the use of pre-test data to differentiate instruction. The last concern mentioned is the lack of timely communication throughout the district.

Additions/Revisions to current year's PIP/TIP:

Each week the PIP is monitored by analyzing three Indistar Indicators for effectiveness.

Highlights:

- Review progress toward Academic Distress Recommendations; ADE Team visit; State Board Meeting; Removal from Academic Distress list.
- Preparation for responding to the Academic Distress Recommendation Review Team and planning development toward future goals and areas of concern.
- Arkansas Leadership Academy provided support and helped with documentation for increasing principal, Leadership Team, and teacher effectiveness.
- Using the reflective process the external provider will assist the principal weekly with a self-assessment of his leadership skills based on the five performance strands, skills, and rubrics; this is a document and process required by the external provider.
- The external provider met with the leadership team to discuss team assignments that include using data to focus on instructional improvement, implementing cultural shifts with the goal of second order change, and stages of development for becoming a mature team; this is the focus of the Team Institute and they are preparing for regional meeting.
- Teams worked on activities and presentations for a Community meeting scheduled for Thursday night 2/19/2015.

Third Quarter ESEA/ IMO Report

- PARCC Testing Training and scheduling was a major focus during the 3rd quarter.
- Planning for an “Awards Assembly”, Parent/Teacher Conferences, iPad proficiency demonstration by students during awards assembly.

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

No concerns were reported.

b) Building Principal:

The principal reported concerns about the possible consolidation of another school with Harris; millage increase proposal; and possible negative effect this may have on the culture and climate of the building.

c) Building Leadership Team:

Team members reported they are concerned about testing and time spent on preparation for testing; technology concerns (enough devices, bandwidth, etc.)

d) ADE School Improvement Specialist:

No concerns were reported.

e) Other:

The external provider reported concerns on professional development and modeling through the coaching cycle is needed to increase effective teaching practices and classroom management.

Third Quarter ESEA/ IMO Report

Additions/Revisions to current year's PIP/TIP:

The principal and leadership team are working with the external provider and ADE SIS to create a professional development plan which reflects the needs of the teachers in the building for the 2015-2016 school year; they have also worked to align the recommendations from the Academic Distress Review and the work done towards implementing those recommendations in order to create more rigorous IMO's for the 2015-2016 school year. All of the previous recommendations have been fully implemented; however the leadership team feels they should revisit them due to the possibility of a major increase in students for the next school year. They feel they should take a pro-active approach to ensure systems are in place.

IMO	Met	Not Met	IMO Area	IMO Date	Explanation/Supporting Data
3 rd Quarter: Weekly evaluation of the principals calendar will average to identify 50 percent of his time spent working with teams, observing and providing feedback for teachers or engaged in small group instructional planning, aggregation of data, or PD sessions. Calendar will identify an additional 10 percent of his time is with student focus groups or supporting teachers not meeting the 70% mastery level.	X		1	03/19/15	<ul style="list-style-type: none"> The principal's calendar reflects at least 50% of his time being spent on working with teams, observing and providing feedback for teachers (TESS, Bloomboard, CWT data, focus walks, formal and informal observations and meetings), or engaged in small group instructional planning (PLC's), aggregation of data (during leadership team meetings) or PD sessions. Additionally, the building principal assists in instruction by working with student focus groups using specific interventions for identified areas of deficit (pre/post unit assessments).
3 rd Quarter: By survey, 85% of the leadership team participants will report that the teams are effectively functioning and the time is used	X		1	03/19/15	<ul style="list-style-type: none"> Survey results indicate that 85% of the team agrees teams are effectively functioning and time is being used productively with focus

Third Quarter ESEA/ IMO Report

productively with a focus on improving student learning.					on student learning.
<p>3rd Quarter: 100% of the units in math and literacy will have end of unit exams aligned to the pacing guide and 75% of the students will score proficient on the exam or teachers will use student data to modify the lessons and reteach. TLI data will be used to confirm the unit exams.</p>	X		2	03/19/15	<ul style="list-style-type: none"> • 75% of students scored proficient on the end of unit exams and re-teaching of deficit skills in homogeneous groups have been ongoing with the 25% who did not score proficient. • TLI data cannot be used to confirm the outcomes of unit exams because the district has waived the TLI exams for the 3rd and 4th quarters. • Therefore, the instructional team and interventionist are working closely with the classroom teachers and instructional facilitators to progress monitor the areas of need in the underachieving student group and support the classroom teachers.

Third Quarter ESEA/ IMO Report

Date Completed: April 3, 2015

School: Wilbur D. Mills High School

District: Pulaski County Special School District

Status: Priority Academic Distress

Principal: Duane Clayton

ADE School Improvement Specialist: Tiah Frazier

External Provider: Arkansas Leadership Academy

Internal School Improvement Specialist: None

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights:

- The principal met all observational targets for teacher evaluations for the 3rd quarter.
- Preparations for PARCC testing (creating the schedule and attending to logistics, gathering materials, groups, dates, times, and rooms).
- Creation and utilization of PARCC items for practice during advisory period.
- During instructional team meetings, teachers scored and review data from PARCC practice and created plans for reteaching and focus on smaller groups of students.
- Teachers review work with students by explicit individual correctives and sample scoring and allow students to rework and share the new product in a cooperative group.
- Intervention during ISS: Facilitators are assigned to provide support for students assigned to In-School-Suspension. The assignment is 30 minutes per day. Students are provided homework help, remediation, specific skill refinement and TLI make-up.
- A community meeting was conducted to receive input from shareholders about how to make a positive impact on the schools. Parents, students, community members, faculty and staff members associated with Mills and Fuller Middle School were represented (Stakeholder Meeting Mills/Fuller)

Third Quarter ESEA/ IMO Report

- The Principal, Instructional Facilitators and central office members studied the list of recommendations of the ADE Audit Team and the 2nd Quarter Report to check progress and develop plans to address areas of concern. Among the items considered were: the school improvement process, needs assessment, data disaggregation, professional development planning for innovative block scheduling, coaching cycle led by the instructional facilitators, peer observations, time audits, development and planning for funding and actions, pre and post testing in math and literacy classes, student voice group.

Concerns/Barriers as reported from:

- a) District Personnel/District Leadership Team:

No concerns were reported.

- b) Building Principal:

- The principal is concerned about the push back or resistance to change among the faculty and staff.
- The principal reported concern with teachers and students giving push back on the level of accountability which is expected (lesson plans on time, monitoring hallways, tardies, and homework).

- c) Building Leadership Team:

- The leadership team reported concerns about time spent on testing and the pressure they feel due to the new way of testing.
- The team reported concerns about loss of instruction time due to lack of effective planning and inclement weather days.

- d) ADE School Improvement Specialist:

The leadership team and key staff members are currently working on 8 plans in Indistar, 11 recommendations for Academic Distress, and five IMO's; concerned they are working on too many things at once and there should be a way to make these seamless.

**ARKANSAS
DEPARTMENT
OF EDUCATION**

Highlights from

3rd Quarter:

- Participation for Partnership for Assessment of Readiness for College and Careers (PARCC) testing was great for both teachers and students.
- The math and literacy depts. are working together well.

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

- No concerns were reported.

Third Quarter ESEA/ IMO Report

b) Building Principal:

- There are conflicts between the administrative staff. The principal has discussed this with the supt. and will discuss also with the interim supt.
- The district does not allow any field trips- even educational.
- The Keyboarding teacher left and the school has a sub in the classroom now.

c) Building Leadership Team:

- The district has not approved an out of state professional development conference at the Association for Supervision and Curriculum Development (ASCD). The leadership team identified the need and budgeted the money in the school improvement plan.

d) School Improvement Specialist:

- There are still Internet issues- students can't connect to the Internet. The Internet was down district-wide all day Tuesday.

e) Other:

- No concerns were reported.

Additions/Revisions to current year's PIP/TIP:

The school is working on its 45 day plan and evaluating the Priority Improvement Plan (PIP) actions for effectiveness.

IMO	Met	Not Met	IMO Area	IMO Date	Explanation/Supporting Data
By Feb. 28, 2015, 95% of students will meet attendance as determined by the ADA/ADM (Average Daily Attendance/Average Daily Membership) attendance report.		x	1	02/28/15	In Jan., the school had a 90% attendance rate. The teachers were not recording data accurately.
By March 28, 2015, 95% of students will meet attendance as determined by the ADA/ADM attendance report.	x		1	03/28/15	Incentives produced gains and the school will continue this process.
By Jan. 31, 2015, 12% of teachers will meet perfect attendance, as determined by the attendance report.	x		1	01/31/15	Seventeen percent of the faculty had perfect attendance for the month. The principal recognized teachers weekly on the intercom and had drawing for prizes. The principal also provided a luncheon for the teachers with perfect attendance.
By Feb. 28, 2015, students will increase to proficiency level of 64% for 6 th grade and 62% for 7 th grade on interim math assessments, as determined by TLI (The Learning Institute) data.		x	2	02/28/15	6 th grade made 71% but the 7 th grade made 41%. The students had a new math teacher from India who started in January. There has been an adjustment due to language differences. The math coach and external provider will provide additional support to 7 th grade math.
By Feb. 28, 2015, students will increase to proficiency level of 55% for 6 th grade and 57% for 7 th grade on interim literacy		x	2	02/28/15	6 th grade made 55% and met the IMO (Interim Measurable Objective) but 7 th grade made 44% and didn't meet the

Third Quarter ESEA/ IMO Report

assessments, as determined by TLI data.					IMO. There was a new teacher in class this semester. The first semester there was a teacher working under an Additional Licensure Plan who failed the test and had to be removed.
By Feb. 28, 2015, special education students will demonstrate growth as determined by the TLI data.	x		2	02/28/15	The school met the IMO for the Module 2 by growing from 47% to 66% in language arts. They met the IMO. For Module 3, the students went from 66% to 33%. The students did not do well on the research simulation assessment. The students started the test on the computers and couldn't connect. They had to change to paper. For math Module 2 they did not meet the IMO- went from 65% to 38% but for Module 3 they met it by going from 38% to 63%.
By Feb. 28, 2015, the number of school-wide student tardies will show a 10% reduction as determined by individual teacher tardy class trackers.		x	3	02/28/15	There was an increase. The school has implemented the following: tardy forms will be monitored closely; the number of student tardies will be tracked throughout the day for repeat offenders. D-hall has been restructured to become a deterrent. Student attendance in D-hall will be monitored closely.

DEPARTMENT
OF EDUCATION**

Highlights from

3rd Quarter:

- The Carnegie consultant is helping teachers implement Carnegie in Geometry.
- Teachers received materials for math including manipulatives helping students with concepts.
- The school is sending 4 teachers to the NCTM (National Council of Teachers for Mathematics) conference- April 15-18, 2015. Teachers will present to the PLC (Professional Learning Community) and later to the faculty in a mtg.
- The math coach is implementing a book study - *Literacy Strategies for Improving Mathematics Instruction* with the math teachers.
- For testing, the school had 95% participation for PARCC (Partnership for Assessment of Readiness for College and Careers) ELA (English Language Arts).

Third Quarter ESEA/ IMO Report

- The school had 5 students who won at the UAPB (University of Arkansas Pine Bluff) science fair. They also competed at the Monticello science fair and one won.
- Two students scored 2nd and 3rd at the ACTM (Arkansas Council for Teachers of Mathematics) in Alg. II and will be going to the state competition.
- The basketball team won the state championship.
- The geometry teacher is working with students in the ISS (In School Suspension) room during his prep. pd.
- One of the counselors achieved National Board Certification in Counseling.
- Tenth graders will be inducted into the National Honor Society. Eligibility criteria is having a 3.5 or above.
- The high school had partnered with the fire dept. They visited the campus and made some recommendations. The school is reexamining the safety drills.
- The school plans to incorporate tutors from UAPB for math, literacy, and biology.
- After school, students can attend sessions from What's Next- Pine Bluff that teaches students how to write entrance essays, college applications, etc.
- EOC PARCC Family Night- 40 parents and students attended on March 9. Parents and students could do hands on activities on math, literacy, and science.

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights from

3rd Quarter:

- The school rewarded students for their performance in the Renaissance Reading Program.
- The STEM (Science, Technology, Engineering, and Mathematics) for the summer program was designed.
- The principal had all assigned Principal Protocols forms completed.
- The Principal is working diligently on the 2015-2016 school year with respect to consolidation of the two junior high schools into his building. He has specific strategies that he is collaborating with BLT (Building Leadership Team and staff of both schools.

Concerns/Barriers as reported from:

Third Quarter ESEA/ IMO Report

a) District Personnel/District Leadership Team:

- No concerns were reported.

b) Building Principal:

- Consolidation of schools – Principal discussed how he was excited about the consolidation of the two Jr. High schools into his building. However, the issue of teacher assignment could not be determined at this time. The principal did mention he had begun a process of room assignments, bell schedules to accommodate multiple lunches, duty positions, transportation schedules and extracurricular activities. Principal also mentioned he wanted to provide pre-AP training for the new staff this summer, but was not sure who will be assigned to the school; thus making Pre AP training difficult to implement.
- New/Different staff- Although the two junior high schools will combine into one building, the staff selection process is not an individual decision made solely by the Principal. The principal has a strong working relationship with this staff and knows strengths and weaknesses. The principal knows the hurdles that will be met, but has specific plans to address them when that time arrives.
- New/Different students- The current staff have worked diligently with the current student body to form trusting relationships. Not having this initial trust factor and beginning anew will make it somewhat of a challenge; however, the principal feels with time all involved will adjust and form new relationships.

c) Building Leadership Team:

- No concerns were reported.

Third Quarter ESEA/ IMO Report

d) School Improvement Specialist:

- The Internet was down district-wide all day Tuesday, March 31, 2015.

e) Other:

- No concerns were reported.

Additions/Revisions to current year's PIP/TIP: The school is currently reviewing the effectiveness of its PIP.

IMO	Met	Not Met	IMO Area	IMO Date	Explanation/Supporting Data
By 1-30-15, 95% of students will meet attendance as determined by ADA/ADM report.		X	1	03-31-15	The school did not meet the IMO of 93%; school was cancelled 6 days for inclement weather. Many students, especially car riders, could not get to school. Many students were out sick because of colder than usual weather.
By May 2015, teachers will maintain a 95% attendance rate as determined by the attendance report		X	1	03-31-15	The school did not meet this IMO-93%. Many teachers live outside of the Pine Bluff area and could not get to work because of inclement weather. One staff member has a valid serious health issue. The school has implemented a weekly and monthly teacher attendance reward.
By December 31, 2014, members of the JRJH PLC. will disaggregate weekly and interim assessment data	X		1	03-31-15	This IMO was met. The PLC analyzed and shared data with administration, teachers and

Third Quarter ESEA/ IMO Report

to improve instruction.					students.
By May 29, 2015, academic coaches will model/co-teach an average of two lessons per week for/with teachers. After modeling, academic coaches will conduct post conferences or debriefing sessions with teachers.	X			03-31-15	This IMO was met.
By March 2015, students will show evidence of 60% school wide proficient/advanced status on interim literacy assessments as determined by the TLI data. Baseline-55%.	X		2	02-09-15	This IMO was met. Although the IMO was met, Module 4 was difficult as a new component and it was researched based with multiple text. It was practiced with students, nevertheless; data showed the open response was a problem area.
By March 2015, students will show evidence of 50% school wide proficient/advanced status on interim math as determined by TLI data. The scores reflect: Alg. I-27% Geo. 28% 8 th grade: 39%		X	2	03-06-15	This IMO was not met. There have been 4 math teachers this school year. Also, there was a long term sub for 30 days. Lastly, there is currently a non-traditional teacher.
By May 29, 2015 Special Education students will evidence growth as determined by the TLI data. Baseline Data 8%.	X		2	02-09-15	This IMO was met. However, data showed there was a lax attempt on open response by students. Therefore, small groups were created to reinforce attempts on open response. Math Module 2 showed a 66% increase. Literacy

Third Quarter ESEA/ IMO Report

					Module showed a 66% increase. Module 3 was research simulation and students viewed it as very difficult.
By December 12, 2014, the number of office referrals will show a 5% reduction as determined by paper copies of discipline referrals.		X	3	03-30-15	This IMO was not met. Discipline has been reviewed by grade, subject, and teacher, time of day, gender and race. Some students changed classes after the holiday and had new teachers and schedules.
By May 29, 2015, all teachers will have made 100 contacts with parents/guardians to establish positive communication through e-mail, notes, home visits, and telephone calls.	X		4	03-31-15	This IMO was met. Teachers submit a monthly log with parent contacts.

Highlights from

3rd Quarter:

- The school held a Mission Possible for PARCC (Partnership for Assessment of Readiness for College and Careers) testing campaign.
- Students and teachers were rewarded with daily treats during Spirt Week for testing March 2-6, 2015.
- During the week of March 2-6, the school had test practice and fun activities in preparation for testing.
- On a daily basis, classes were reviewed to count participants. The class with the most participants was rewarded each day.
- “Mission IS Possible” assembly was held on March 6, 2015.
- Literacy and Math Night was held on Feb. 10, 2015. The event focused on literacy and math strategies for learning and included a pantomime by some of the 4th and 5th grade girls. Dinner was also provided.

ARKANSAS
DEPARTMENT
OF EDUCATION

Third Quarter ESEA/ IMO Report

- Administrators of Oak Park met with each grade level to encourage students to do their best on the upcoming assessment. During assessment week, each student worked at his/her best to receive a secret brown bag.
- At the close of testing, students were able to pick up a brown bag which included 3 edible items as a reward for their hard work.

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

- No concerns were reported.

b) Building Principal:

- No concerns were reported.

c) Building Leadership Team:

- The district did not supply the parent codes for the online gradebook system.

d) School Improvement Specialist:

- The Internet was down district-wide all day Tuesday.

e) Other:

- No concerns were reported.

Third Quarter ESEA/ IMO Report

Additions/Revisions to current year's PIP/TIP:

IMO Area: 1. Change in teacher and leader practice: Met: 1 Not Met: 0

2. Student progress and achievement: Met: 1 Not Met: 3

3. Student safety and discipline: Met: 1 Not Met: 1

4. Parent and community engagement: Met: 1 Not Met: 0

Total IMO's this Quarter: 8 Met: 4 Not Met: 4

IMO	Met	Not Met	IMO Area	IMO Date	Explanation/Supporting Data
By March 19, 2015, 80% of students in fifth grade will be actively engaged in the learning as determined by CWT's(Classroom Walk-Throughs).	x		1	03/19/15	Observation forms showed notes indicating the use of Kagan strategies, high yield strategies, and classroom stations. 82% of the teachers used Kagan strategies, 100% used high yield strategies, and 61% used classroom stations.
By March 19, 2015, students in grades 3-5 will show growth in citing evidence (informational passages) by 10% or more as determined by TLI (The Learning Institute) Module 4.		x	2	03/19/15	A teacher was out in 4 th grade for 15 days due to illness.
By March 19, 2015, students in grades 3-5 will show growth in fractions in math by 10% or more as determined by TLI Module 4.	x		2	03/19/15	The Learning Institute assessments showed the following: The third grade increased from 33 to 68.2%. Fourth grade increased from 25.3 to 39.9%. Fifth grade

Third Quarter ESEA/ IMO Report

					increased from 29.7 to 44.7%. The school identified students by skills mastered and did after school tutorials. The leadership team coordinated with 21 st Century program at a local church to provide skills needed for tutoring and pulled resources for them as well.
By March 19, 2015, at least 5% or more special education students will show growth in fractions as determined by TLI Module 4.		x	2	03/19/15	There was an overall increase of 3.06% for the building. Third grade went from 18.75% to 33.3%. Fourth grade went from 33% to 27.7%. Fifth grade went from 36% to 33.3%. Fourth grade was the only group that did not increase by 5%.
By March 19, 2015, at least 5% or more special education students will show growth in citing evidence (informational passages) as determined by TLI module 4.		X	2	03/19/15	There was a 5% increase overall. The 3 rd grade went from 13.6 to 34.7%. Fourth grade went from 12.7% to 16.7%. Fifth grade went from 16.6 to 25.8%.
By March 19, 2015, 94% of students will be in attendance daily according to attendance records. (Baseline attendance is 92%.)		x	3	03/19/15	The school maintained the attendance rate of 92%. The district was out for snow for 6 days. The leadership team reported they had many students out due to illness. A phone log documented phone call to parents after 4 days missed.
By March 19, 2015, the number of disciplinary actions (fights) will be reduced by 5% this quart as determined by office referrals.	x		3	03/19/15	The leadership had faculty reinforce the use of hall passes and strategically placed teachers in areas. The administrators now determine what is coded as a fight after giving students due process. Previously the secretary was

Third Quarter ESEA/ IMO Report

					coding what the teacher sent the secretary.
By March 19, 2015, at least 25 or more parents will be engaged in parent workshops that provide parents with strategies (HAC) that strengthen the home/school connection.	x		4	03/19/15	The school provided food and sent out flyers as well as sending out personal invitations. 100 parents attended. The event was advertised in the newspaper, posted on Facebook and the district website.

Third Quarter ESEA/ IMO Report

Date Completed: April 1, 2015

School: Strong High School

District: Strong High School

Status: Title I Priority School

Principal: Jeff Alphin

ADE School Improvement Specialist: LaDonna Spain

External Provider: Fetterman and Associates

Internal School Improvement Specialist: NA

Highlights:

- The student advisory team is meeting monthly. The March, 20, 2015 meeting agenda included discussions about testing progresses, up and coming school events, fundraising, organization of events including the Beta Club, presentation by a local officer about safety tips and general information concerning end of the year procedures, and the completion of a technology survey and discussions of current technology used by students.
- Some of the High School EAST students are developing a transition presentation for the Elementary sixth grade students for discussions related to behavior, discipline, teachers and students. When interviewed by the ADE School Improvement Specialist, they defined behavior in their training as being accountable and organized to keep up with the schedule and work they are to follow while at the high school. They wanted the students to know what it was like to go to a locker and be on time for class. When asked how they would know when the sixth grade would understand their message, they decided that they needed to survey the participating students before and after their presentation to see what changes in thinking occurred from their efforts. The students indicated they may be finished with the project by Monday, April 20, 2015. They were provided with the challenge to consider the possibility of working to develop a video for an audience of potential future teachers within the Strong High School. They would focus on great things occurring in Strong High School and persuasion of why the teacher would want to

ARKANSAS
DEPARTMENT
OF EDUCATION

Third Quarter ESEA/ IMO Report

become a member of their school and community. The principal and superintendent are currently working on the development of recruitment tools and making plans with the district leadership team. One tool in development is to set up a monitor attached to a lap top at job fairs with PowerPoints about the school and community which would also have the ability to play the EAST student's persuasive video.

- My Skills Tutor was put in place for both remediation and advancement purposes for students. The lab is being monitored by the building administrator, progress manger, classroom teachers, and external provider. Reports are pulled that determine which students are not performing and those that should be moved to the next level. The reports were printed and provided to the classroom teachers to determine next steps for students.
- Some students are participating in credit recovery in 10th grade World History to graduate.
- An article was placed in the *Arkansas Career Counselor* highlighting the shop teacher and her students. Articles from the *Arkansas Career Counselor* are forwarded to all Arkansas Career and Technical Education (ACTE) teachers nationwide. This article is also displayed on the school entryway bulletin board.
- The entryway bulletin board includes many articles posted in the local El Dorado News Times paper including the above accomplishments of the Career and technical department student and teacher. The top three students per class are highlighted in articles from interim assessments, EAST students are recognized for efforts in a recent trip to a Hot Springs competition and a coat and canned food drive , students are in photos of giving blood, participating in an abstinence lecture in the Health class, students, current events researched by students highlighted in a news article, and students planning student events such as prom are highlighted in an article.
- Although none of Strong's basketball teams advanced, the leaders did a fantastic job of coordinating the tournament. The faculty stayed and helped clean up the gym. The hospitality room was like a banquet.
- One of the three Student Progress and Achievement Interim Measurable Objectives (IMOs) was met. The previous two quarters all three were missed. The building almost meets the Interim Measurable Objectives (IMO) but for the first time met a target this year.
- The building principal attends and/or facilitates committee or team meetings held within the building.
- The principal is monitoring the documentation of high order thinking questions within lesson plans weekly.
- He continues to develop and publish by e-mail, website, and paper document a monthly newsletter regarding Interim Measurable Objective (IMOs) targeted progresses, meeting updates, principal suggestions and highlights regarding instructional practices, successes, calendar of events, and much more.
- The principal spot checks Academic Improvement Plans (AIPs) implementation progresses through a folder

Third Quarter ESEA/ IMO Report

system, collects Peer observations/Classroom Walk Throughs (CWTs) conducted by leadership team members, collects Units/lesson plans directly, and leads leadership, Professional Learning Community (PLC), and student advisory team meetings.

- The principal is working to develop a recruitment PowerPoint to display at job fairs.
- During each week, the principal submits a self-evaluation of his time spent on instructional tasks to the Arkansas Department of Education School Improvement Specialist. A review of a sample week for March 30 to April 2 included: 26% of the principal's time is spent on Other duties, 43% is spent on lunch duty, 15% on Teacher Excellence Support System, 8% on Parent meetings, 8% on Implementation or Monitoring of the PIP or 45Day Action Plan, and 8% in Professional Learning Communities (PLCs).
- The facilitator is working with teachers on the implementation of the Assessment Grids/Response to Intervention (Rtl) intervention processes.
- She trained the teachers in pulling The Learning Institute (TLI) data during a Professional Learning Community (PLC) meeting on March 18, 2015.
- The facilitator gathered new data from The Learning Institute (TLI) and updated the Interim Measurable Objective (IMOs) charts.
- The instructional facilitator began submitting a self-evaluation of her time spent on instructional tasks to the Arkansas Department of Education School Improvement Specialist and administrator. A review of a sample week for April 6 to April 10 included: 13% of the facilitator's time is spent on K-12 Professional Learning Communities (PLCs), 13% was spent on administrative meetings, and 75% of the time was spend on other duties. Gifted and Talented work accounted for 480 minutes of the facilitator's time which was half of the total weekly minutes.
- School Improvement Process Manager/Technology Coordinator/Federal Programs Coordinator Frequently works with the external provider for embedded training and assistant with updating the budgets in the Arkansas Comprehensive School Improvement Plan (ACSIP)
- Working to implement the My Skills Tutor program with assistance from the external provider while teachers also work with students in the system.
- Updates Indistar and Arkansas Comprehensive School Improvement Plan (ACSIP) related to progresses on assessing, planning, and monitoring School Improvement Objectives
- High School Student Safety and Discipline Sub-team met on Wednesday, March 18, 2015. The team determined that there were only 27 discipline incidences reported for the 3rd quarter.
- The principal reported that students identified as having behavior problems that were perceived as barriers to their interim assessment success were changing their behaviors. The students remain as a focus for assistance while they continue to work hard on their behavior improvements.

Third Quarter ESEA/ IMO Report

- Students identified as repeat offenders of discipline issues are being provided mentoring by the Dean of Students, Counselor, building administrator, classroom teachers and other stakeholders such as family members as a result of Root Cause efforts by the Leadership Team and faculty.
- High School Leadership team and High School Instructional teams and teachers developed the testing calendar by March 4, 2015.
- Teachers are working to show student evidences of mastery of skills and standards within an Assessment Grid/ Response to Intervention (Rtl) processes. Teachers are creating interventions for struggling learners. Documentation of student successes is maintained in folders. Those students with Academic Improvement Plan (AIPs) have the documentation collected along with the Academic Improvement Plan (AIPs) within the folders.
- Teachers in Math, Literacy, and Science classes are piloting an assessment grid/Response to Intervention (Rtl) process that identifies which students are not mastering specific skills/standards within a lesson or unit. Interventions are determined for individual, small group or whole groups of students within classrooms. Formative, pre and post unit, chapter, teacher made tests, etc. assessments determine the level of mastery. Documentation of pre and post assessments are maintained in student Academic Improvement Plan (AIPs) folders. March 18, 2015 during Professional Learning Community (PLC) discussions the teachers discussed successes and problems related to the Assessment Grid process and evidences of changes regarding student behavior and academic changes. All teachers were trained in the use of an assessment grid/Rtl process, and began the implementation of the assessment grid process in one of their classrooms starting March 19, 2015.
- Data was collected and analyzed to determine Interim Measurable Objective (IMOs) outcomes by the Core Leadership team including the administrator, external provider, and Arkansas Department of Education School Improvement Supervisor.
- Root Causes for Interim assessment performance were discussed and identified in preplanning discussions by the leadership team during the month of January 2015. The concept and discussion was led by key leaders of the leadership team during following Professional Learning Community (PLC) meetings with teachers.
- The leadership team identified students that were not performing on state and interim assessments at the proficient and advance levels. The team highlighted in green those students that performed and showed growth in their interim assessments, they identified students that were in a caution state of performance in yellow which meant that no changes were evident or growth, and the students declining in performance at any level were identified in pink. This visual representation of the data helped the team to see which students needed intensive assistance and the teachers and leaders wanted to find out what was causing the students to not perform.
- The Leadership Team and Professional Learning Community teachers identified students remaining unchanged or struggling with state summative and interim achievement results following the second quarter Interim Measurable

Third Quarter ESEA/ IMO Report

Objective analysis of goal outcomes. The staff perceptions below show how teachers perceive the reason students are not meeting expectations on interim assessments. The key potential causes of low performance became key indicators of student success that was beyond any test score. The team wanted to impact student behavior which would in time result in increasing student successes. A total of 176 behavioral or academic results were analyzed. 111 out of 176 63% of the analyzed behavioral academic results had an increase or improved outcome. Of the analyzed areas of need for behavior in academics 48 of 176 27% were charted positive behavioral outcomes of students for third quarter while 128 out of 176 72% were direct positive change or impact on The Learning Institute (TLI) interim math and literacy scores. There were 21 reported increases from teachers for mathematics while 38 increases for literacy were reported by teachers. The Learning Institute (TLI) Mathematics Module 4 results were reviewed by the literacy facilitator and external provider to determine which students were impacted by the leadership team's efforts to share leadership responsibilities. Any student with an increase in interim assessment outcomes for 3rd quarter were included in the individual student, Root Cause charts, and overall results to determine overall needed behavioral and academic changes.

- The total number of students per perceived cause of poor performance on assessment tests by teachers included the following. Teacher perceived causes of poor performance on assessment test total number of students per cause: Attendance 7, Math 5, Literacy 2; Change in Standards 30, Math 8, Literacy 22; Lack of Concern 16 Math8, Literacy 8; Subject 16, Math11, Literacy5; Testing Factors 12, Math 6, Literacy 6; Outside Factors 18, Math 8, Literacy 10; and Behavior 19, Math 12, Literacy 7.
- Definitions or Clarification as perceived by teachers: Attendance- students are absent from class.; Change in Standards-new standards introduced that were possibly more difficult for the student to understand.; Lack of Concern-students that show behaviors of uncaring attitude or lack of interest.; Subject-students with a lack of understanding of how the content is applied in real life settings or why the content is important to them.; Testing Factors-students with test anxiety or issues related to testing.; Outside Factors-external factors that are impacting the students' ability to succeed or to meet their goals. Behavior -students who have demonstrated behavior problems within math or literacy classrooms; Math Advocate-educators or parents who have volunteered to support a student's need to meet specific standards or skills in this content area.; and Literacy Advocate- educators or parents who have volunteered to support a student's need to meet specific standards or skills in this content area.
- Results from Root Cause and Assessment Grid efforts for Literacy includes: Improvement of Literacy at 39/60%; Decrease 15/23%; No Change 4/6%; and Not Tested 7/11%.
- Results from Root Cause and Assessment Grid efforts for Mathematics includes: Improvement of Literacy at 24/37%; Decrease 18/28%; No Change 12/18%; and Not Tested 11/17%.

Third Quarter ESEA/ IMO Report

- The Assessment Grid is basically a chart used by the classroom teacher during instruction to chart which students are not mastering a specific standard or skill to prepare an intervention for point in time remediation or the use of a formative assessment practices. A single sheet of paper is labeled Response to Intervention (Rtl) Tiers 1 and 2 Formative Assessment Grid. At the top of the sheet is the Teacher's name, Grade, Subject and Module/Unit. There are six rows and four columns on the grid. Rows 1, 3, and 5 include up to a total of 12 ADE Standards or skills, one per cell/box that is being taught the teacher identifies as a focus or significant power standards for mastery learning from the lesson plan or Unit. The teacher writes each student under the standard or skill if he or she does not have evidence of student mastery or understanding of the standard from a formative assessment. If there are a few students listed, the teacher provides individualized or small group instruction to the student. If over 60% of the class does not show evidence of learning, the teacher reteaches the standard or skill. Rows 2, 4, and 6 contain an Intervention Plan that the teacher wants to remember to use as she discovers the issues with individual or small groups of students. At the bottom of the page the teacher moves standards that must be retaught to the entire class for adjustment to the instructional practice. The result of the above process was successful.
- Three of the leadership team members also teachers piloted for a two week period. The assessment grid was used in one class period. One standard was of focus of teachers of many included within the lesson plan on the assessment grid. Two of the three teachers participated during the first Assessment Grid process. Both participating teachers used paper pencil teacher made assessments to determine comprehension of learning. The leadership team teacher's first attempt to use the assessment grid process are located below.
 - Teacher 1- The 8th Grade Literacy class focused on the following standard L.8.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings. Eight students out of a total of eleven students were identified as needing point in time remediation. Six of the eight struggling students increased in their mastery of the standard according to the teacher. The teacher used a paper pencil teacher made assessment for determining mastery and again for struggling learners.
 - Teacher 2- Science/Biology teacher focused on standard Genetic and DNA replication (four different standards). The teacher tested fourteen students out of eighteen enrolled in the class. Three students out of nineteen tested students were identified by the teacher from a teacher made assessment needed point in time remediation. The students were retested. 100% of the students were above 60% after the remediation. Remediation was in the form of research by the student of missed problems on the example, writing a response to the missed problems for discussion with the teacher, teacher review of the student's understanding of missed assessment problems after research.
 - Teacher 3- The third teacher for Mathematics was not present during the leadership team meetings to obtain the initial overview and training of the use and how to administer the assessment grid process. He was provided the opportunity to have discussions about the assessment grid process with the ADE School

Third Quarter ESEA/ IMO Report

Improvement Specialist and external provider to learn from his second attempt

- The leadership teachers presented the assessment grid results above to the staff on March 11, 2015.
 - The two participating leadership team teachers presented their experiences and reflections of the process to the other teachers along with the external provider during the March 11, 2015 Professional Learning Community (PLC) time. PLC Feedback forms indicated concerns from three of the faculty members about time, paperwork, etc., but all other teachers did not have a comment or concerns. Five teachers then tried the process with one class with one focused standard to experience the process.
 - The leadership team teacher's second attempt to use the assessment grid process are located below.
 - Teacher 1- The 8th Grade Literacy class focused on the following standard L.8.5 the use of Poetic Devices for one exam as evident in the assessment grid dated April 6-10, 2015. Eight students out of a total of eight students were identified as needing point in time remediation. As reported by the principal, the teacher began to notice that a parent was checking out a student over several days' time for early for lunch around 10 minute prior to the end of literacy class. The teacher contacted the parent and discussed the importance of attendance. The parent and student behaviors were adjusted to address attendance issue. The retest date included 4/6/2015. Six of the eight students had significant gains in their mastery of the standard. Student could start out at 30% and after retesting scoring at 90%.
 - Teacher 2- The second teacher completed the assessment grid process in two classes.
 - Class 1- Science/Biology teacher focused on standard HE6.B1-7 Evolution Terms and one test as evident in the assessment grid and lesson plan dated March 30-April 2, 2015. The teacher tested fourteen students out of eighteen enrolled in the class. Four students were absent or suspended. Six students out of fourteen tested students scored less than 60% and needed point in time remediation. The students were retested on April 7, 2015. Four of the Six students increased significantly, one student was absent, and one student dropped 36% points. According to the building administrator, the decrease in score was a result from possibly discipline and behavioral issues.
 - Class 2 - Science/Biology teacher focused on standard HE6.B1-7 Evolution Terms and one test as evident in the assessment grid and lesson plan dated March 30-April 2, 2015. Four students were absent or suspended. Seven students out of thirteen tested scored less than 60% and needed point in time remediation. The students were retested on April 7, 2015. Three of the seven students increased, one student was absent, and three students dropped 14.5% points. According to the building administrator, the decrease in score was a result from possibly discipline and behavioral issues.
 - Teacher 3- Algebra II /Mathematics teacher focused on basic mathematics misconceptions as identified through the analyze The Learning Institute (TLI) testing including adding and subtracting fractions. Three

Third Quarter ESEA/ IMO Report

out of seven students were retested. Of the seven students, two post tests were at 100% mastery and one student dropped from 20% to 0% (Explanation teacher included that the student needs individualized assistance and parent is seeking alternatives to graduation or general equivalency.).

- A survey was provided to the three participating pilot leadership team teachers on Tuesday, April 14, 2015. The overall results are as follows: Teachers were given the overall results from the survey where there was a positive overall impact, positive impact on behavioral needs, and positive impact on both Mathematics and Literacy needs within the classroom. Teachers reflected on their first attempt to implement the Assessment Grid/Response to Intervention (Rtl) process in their classroom and their second. The overall results of the Root Cause and Assessment Grid processes were shared with the teachers. There was a 63% overall improvement in 176 perceived areas of need, 60% improvement in Literacy and a 37% gain in Mathematics. The teachers were provided examples of steps that they may have taken similar to the formative assessment and differentiation strategies the Assessment Grid requires a teacher to employ. They also discussed what they would change as a result of the discussion to refocus the practices on the learners' successes. The "paperwork" disappeared from the discussion. Teachers began to understand the grid was a way to record what they say students doing as a matter of mastering of the standards and skills while writing possible interventions that would assist the struggling learners in real time. The following questions and responses were gathered from the piloting teachers.
- Interview with the ADE School Improvement Specialist regarding the Assessment Grid process on 4/14/15 from 3rd quarter efforts:
 - What did you or the other teachers do to result in the successful outcomes listed above?
 - When teachers place more importance on the Learning Institute (TLI) testing (giving a grade) will improve student outcomes. The teacher stressed the importance of doing well on interim assessments with the entire class.
 - When talking about the students with difficulties, discussions were held as whole group and feedback was received from multiple sources. You are beginning to see what you asked for last year where you are getting feedback and co-teaching with multiple teachers. Student changes were seen. It was felt that the holidays hindered growth and the weather.
 - Focused more on the students with needs.
 - What standard was used for the pilot process on the assessment grid?
 - Genetic and DNA replication (four different standards)
 - change the standard from general to specifics.
 - L.8.5 Demonstrate understanding of Figurative Language, word relationships, and nuances in word meetings.
 - How many students were identified in need of remediation for mastery of the standard or skill from the total

Third Quarter ESEA/ IMO Report

- number of enrolled students?
 - There were three students out of 18 or 19.
 - While the three students were being provided needed remediation, other students were working on enrichment activities.
 - 8 needed remediation out of 11 students
- How many student outcomes were increased as a result of the point in time remediation?
 - 100% of the students were above 60% after the remediation.
 - No response
 - 6 of 8 increased
- Gathering feedback from Pilot Leadership Team teachers on the assessment grid process survey:
 - How has this experience increased your general competence to reach struggling learners?
 - It has helped me see if they are actually trying to do better as opposed to those that are just blowing off the work.
 - The teacher said, "It forces me to take a closer look at test data and not just record a grade." The ADE SIS praised the teacher for recognizing how important it is to differentiate to keep students focused. The teacher said, "To begin with I was seeing it as more paper work. Now I see it as not as much work but as a benefit." The ADE SIS explained how to assess in an easier manner. She said, "Post-tests do not have to be paper and pencil."
 - I see some benefits, but I want to have a time to plan with the external provider to make the process work with in my class.
 - What would you do differently with the struggling students in the future when conducting another assessment grid cycle?
 - I would do this on a day to day basis instead of waiting for a test.
 - Do more formative assessment not that I understood the purpose of the grid.
 - I would allow more time after the test to allow time to reteach before having to move on.
 - What other strategies would you provide the students as a method of intervention for point in time remediation?
 - Work in small groups to find the answer to the question.
 - More picture drawing or explain sentence by sentence of the math process. What were you thinking from the beginning to the end? The cooperative grouping works well for me. I am fortunate to have smaller classes.
 - Small group intervention
 - What would you do differently with the formative assessment practices in the classroom in the future when

Third Quarter ESEA/ IMO Report

- conduct another assessment grid cycle?
 - In the future I would assess and keep a better record of who is understanding/not understanding on a daily basis.
 - I will keep it simple. Focus more on one skill and not multiple skills. Look at the top 5 standards (skills) to determine what is needed for success.
 - Do more varied assessments before the test.
- How did the assessment grid process make a difference in the students? and school?
 - Has helped students come up with passing grades and should help the school have a higher level of passing. The students' behavior has improved. If you give the student an opportunity to learn what they did not get, they do not feel like failures. Setting higher expectations to learn.
 - Students were less frustrated because we were slowing down. More teachers were looking at the process.
 - Students' grades came up because they had a chance to retake the test.
- What does the evaluation of assessment grid data suggest for future problem-solving in Professional Learning Community (PLC)s?
 - Show teachers what to do. Must look at available data. Teachers need to know exactly what is expected of them.
 - Focusing on individual students not just classes.
 - Knowing which students needed extra help and being able to discuss with other teachers allows us to focus on giving them extra attention.
- What will the assessment grid process look like in 2015-16 as it related to student knowledge and skills, diversity, assessment, technology, communication, and reflective practice?
 - Work on the template – PD before school begins for RTI
 - See above answers.
 - Hopefully, it will be less time consuming and complex so that we have more time to actually spend on creating lessons and teaching.
- How do you see yourself leading the other teachers to understand the purpose for assessment grids as a part of student centered practices?
 - Try to explain to them what is expected of them.
 - Offer help as they need it. Another teacher was confused and I helped them.
 - I can point out the success of identified students who received extra attention due to the grid process.
- What have I learned about addressing Student needs as a result of conducting this assessment grid pilot process?

Third Quarter ESEA/ IMO Report

- You need to be sure that the students do know what they need to know in a timely fashion. Do not want to wait until it is too late.
- Slowing down and not covering so much but so fast. We are slowing down to develop quality of learning.
- Some students need an extra push to be successful, and identify them through the assessment grid allows us to focus on them more.
- Second Pilot of the Assessment Grid by the Leadership team and participating staff. The leadership team teachers presented a second time and attested to their experiences and reflections of the process to the other teachers following their interview with the ADE School Improvement Specialist. They showed samples of completed grids, examples of formative assessment practices, and the successes from the process on Wednesday, April 15, 2015. The presentation was designed to clear up misconceptions and understandings of the purpose and intent of the use of the assessment grids. PLC Feedback forms indicated.
- Professional learning community reflections on the Assessment Grid process on 4/15/15 from 3rd quarter efforts:
 - What did you or the other teachers do to result in the successful outcomes listed above?
 - Targeted certain students and their needs.
 - What it would take to get students involved.
 - We spent time discussing ways to motivate students
 - Retaught with differentiation and smaller groups
 - We encourage the students and monitored them students. We stress the importance of academics improvements and keeping school open
 - Monitored students, encourage students, stress importance of the learning Institute test toward keeping our school open. Gave grades on the learning Institute test.
 - Monitored students to encourage them. Stress the importance of learning. Provide individualized tutoring for students
 - Mentor and constantly questioning how students felt they were doing. Gave helpful hints how to deal with issues
 - Students who were struggling were identified. Then they were given specific help using the My Skills Tutor technology tool on computers.
 - What standard was used for the pilot process on the assessment grid?
 - Quadratic's
 - writing arguments
 - proofreading
 - How many students were identified in need of remediation for mastery of the standard or skill from the total

Third Quarter ESEA/ IMO Report

- number of enrolled students?
 - 50% on average
 - 6 out of 9
 - 4 out of 18
 - 5
- How many student outcomes were increased as a result of the point in time remediation?
 - 75% on average
 - 3 out of 6 identified students
 - 100%
 - 100%
- Gathering feedback from Pilot Leadership Team teachers on the assessment grid process survey:
 - How has this experience increased your general competence to reach struggling learners?
 - It makes you think about individualizing a lesson to reach certain students.
 - It allowed me to take a step back and evaluate the material and think about a deeper reteach with different strategies
 - It has revealed to me that other teachers can be beneficial to motivate students who struggle.
 - It made me more aware of what may have been the problem with each student.
 - This helped me to see how my students were struggling in other classes and succeeding
 - Assessment grids made me more aware of who was not understanding the student learning expectations.
 - It has enlightened me on the importance of identifying causes of struggling students before they fall behind.
 - It has given me a reason to check on student progress outside the normal assessment time.
 - It brings more awareness on a daily basis of targeting students who aren't getting it. The grid helps me know the specific students to target.
 - What would you do differently with the struggling students in the future when conducting another assessment grid cycle?
 - It makes you think of different ways to go over lessons with students.
 - Ask more questions throughout the lesson to correct any misunderstanding sooner.
 - I will utilize my skills tutor and target needs. I will build more positive relationships to increase performances.
 - Differentiated the lesson. I had some students that were stressed-out. So then I had them do a few more

Third Quarter ESEA/ IMO Report

- problems without a grade just to see if they could improve and some did!
- Assess students' progress during lessons. Conduct more questioning for individual student learning expectations instead of general overall questions
- assess students' progress during lessons I like how the system with this time, but I might split into two large groups to see how they will work
- Plan a lesson with adding activities and strategies to help the struggling students that were on the grid not getting it.
- What other strategies would you provide the students as a method of intervention for point in time remediation?
 - Students need material to be relevant and you make a correlation to material that will hit home with students.
 - Group assessments (peer teach), online video lessons (for visual learners)
 - pair peer tutoring
 - I would use pairs more often because in a large class I cannot get everyone and I noticed frustration from some of them and need an outlet for help
 - I would use a hands on method of teaching.
 - Assign homework for them to work on the part they do not understand.
 - Have students look up answers in their book and or work on examples of problems with other students.
 - Another strategy I would provide is students helping students and students' independent research on a given topic online.
 - Individual help in small group to stress vocabulary giving students problems while others work on a skill.
- What would you do differently with the formative assessment practices in the classroom in the future when conduct another assessment grid cycle?
 - I would like to make assessments more verbal and present material to individuals and small groups
 - I will utilize the assessment grid during instruction as a preventative to help students rather than as a retest
 - assessment grids should be used as a proactive measurement during instruction
 - I would be more clear with beginning with due dates for projects that require test grade. Also model how to work step-by-step to complete work.
 - I don't change my formative assessment process; I go from student to student consistently
 - Give more short assessments by more questioning
 - assess students' progress by giving daily quizzes
 - They tie together nicely the way they are.
 - Make my grid larger to include more in-depth intervention strategies

Third Quarter ESEA/ IMO Report

- How did the assessment grid process make a difference in the students? and school?
 - Students are motivated to reach goals in this new way. If they knew the goals and results and where to get started they have better outcomes on assessments.
 - It allowed students to reconstruct their knowledge on the topic and utilize different learning strategies to understand the material
 - Students' felt important that teachers took a one on one approach. The assessment grid aided in student achievement and school atmosphere.
 - My reteach and retest really helped the students to improve and I felt more responsibility.
 - It pinpoints problems for students and allows schools to find solutions.
 - It helps me to see what the students are having difficulty learning. It helps the school when all teachers are collaboratively using this option on a regular basis.
 - The assessment grid helped to pinpoint causes of low test scores so that teachers and students have to overcome them.
 - It is wonderful, I wouldn't change a thing.
 - By giving the targeted students additional help on specific vocabulary and core standards, most of the students showed improvement on their scores.
- What does the evaluation of assessment grid data suggest for future problem-solving in Professional Learning Community (PLC)s?
 - I think that professional learning communities will allow teachers to discuss what is working and modify what is not working.
 - That we should practice more prevention strategies during instruction then the retest strategy.
 - Small groups assigned to a group of students and collaborate regularly to field and modify approaches regularly
 - The evaluation of assessment grid data should help with future problem-solving in professional learning communities because it helps the teacher knew which students understood and failed to understand. It even narrows information down to which questions are asked.
 - We can compare data with other teachers to suggest problem-solving strategies.
 - We can compare data with other teachers to suggest problem-solving strategies
 - we can compare data with others teachers to support worked problem-solving
 - The evaluation of assessment grid data's suggest a way to find issues on the spot.
 - Teachers could use it as a tool to help plan lessons and reteaching strategies for specific students.
- What will the assessment grid process look like in 2015-16 as it related to student knowledge and skills, diversity, assessment, technology, communication, and reflective practice?

Third Quarter ESEA/ IMO Report

- Students have to learn the ideas of the lesson not just the facts.
- Small group collaboration to be effective across the curriculum.
- Small group collaboration to be effective across the curriculum
- It would help if it would have reflective practices space and allow teachers to include the positives and negatives of assessment.
- I believe it would help if it is used in the same principle as pretest/posttest
- If used regularly from beginning of school next year, it will improve student skills and should increase test scores.
- By starting the school year off with assessment grid practices, it may help to raise test scores.
- The assessment grid process will look a lot like it does around the end of the year in 2015 16
- it may be a form for each individual student starting out maybe like a pretest showing where they started, then look at outcomes as posted see how students improved
- How do you see yourself leading the other teachers to understand the purpose for assessment grids as a part of student centered practices?
 - Collaboration on subjects will motivate teachers to teach across the curriculum.
 - I will give them examples strategies to use in their classroom as a way to help challenge their students' minds.
 - Communicate the positive learning occurring
 - it would help the students in more ways as necessary
 - I don't see myself leaving this understanding of the grid assessment
 - show them what the assessment grid purpose is
 - Show how the on the purpose of the assessment.
 - I see myself leading teachers when they need me to help them understand.
 - I see myself leading others by possibly sharing my grid with teachers who share that child may be give them suggestions and what they might try as they see student needs
- What have I learned about addressing student needs as a result of conducting this assessment grid pilot process?
 - Students will understand that each lesson is geared toward a certain skill.
 - They need a remediation class included within their schedule
 - Students need more specific and hands-on approach to specific allotted time and an extra class.
 - I have learned that going back and working with students reteaching, but I need the students to learn how to be more quick because I still have other skills and objectives to teach
 - It helps to pinpoint which students don't care or do not get it. We can work with these problems.

Third Quarter ESEA/ IMO Report

- More attention needs to be paid to which students are understanding. The majority of the class work in time for remediation occurs before a major test is taken.
- I have learned more about my students individually and how to overcome problems
- The assessment takes a micro look at student knowledge that was not available before.
- You must do constant progress monitoring on a daily basis with students.
- The external provider completed the following services for the high school:
 - Collaboratively works with the ADE School Improvement Supervisor.
 - Preplanned with the technology coordinator and high school principal in creating an agenda for Professional Learning Community (PLC) meetings and how to assist teachers with becoming more proficient in using the My Skills Tutor program.
 - Assisted the building administrator and school nurse in preparation for a community appreciation banquet.
 - Gathered information regarding the community meeting held on March 9, 2015.
 - Provided assistance to the principal by reviewing the community flyer and PowerPoint for publishing.
 - Assisted by monitoring during the PARCC exam. Provided technical support to the building by filing in for the technology coordinator or building administrator when they were unable to be the second person in the room for testing.'
 - Assisted the instructional facilitator with her calendar to the ADE
 - Conferenced with the high school principal to get updates and direction (must gather information for the school improvement supervisor)
 - Conferenced and provided technical assistance to the literacy facilitator
 - Provided the AP Coordinator with technical training for ordering AP exams
 - Gathered and disaggregated Interim Measurable Objective (IMOs) 3rd quarter data needed by the ADE School Improvement Supervisor
 - Observed in My Skills Tutor labs to gather needs
 - Conferenced with the superintendent for updates
 - Met with Literacy teacher to determine why scores dropped in the third quarter and plan what to do next
 - Conferenced with math teacher to set up testing for The Learning Institute (TLI) modules dates that had passed
 - Attended the Community Meeting from 6:00 until 6:35
 - Conferenced with the high school principal to determine needs
 - Disaggregated data for Interim Measurable Objective (IMOs) reports
 - Planned for the Professional Learning Community (PLC) meeting
 - Updated the PIP in ACSIP with data for the Interim Measurable Objective (IMOs) s

Third Quarter ESEA/ IMO Report

- Provided technical assistance during the video conference with the ADE School Improvement Supervisor
- Provided technical training for the literacy facilitator in ordering scan sheets
- Provided technical assistance and participation in a video conference with the ADE School Improvement Supervisor.
- Provided technical support and participation in the Professional Learning Community (PLC) meeting.
- Attended the Business/Community Involvement dinner 5:30-

▪ **The 45 day Action Plan Recommendations 1-5, Objectives, Tasks, and documentation of progress completed during the third quarter of 2015 are listed below.**

The leadership team worked to implement and monitor the Academic Distress 45 Day Action Plan as determined by the documentation maintained in the evidence box located in the leadership team meeting room.

Recommendation 1: School leadership, with support from the external provider, should work directly with teachers in continued efforts to align the curriculum with Arkansas Frameworks and develop standards-based units of instruction.

Description of Full Implementation:

All teachers complete a standard template for weekly lesson planning. Teachers are provided assistance individually and during Professional Learning Communities to write quality lessons including higher order thinking questions. Teachers submit plans/units to the building administrator in paper or electronic formats. The K-12 curriculum will include activities and higher level questions aligned to objectives. The K-12 curriculum document/unit and lesson plans will serve as evidence that this objective is fully met.

Objective

IIIA02 (111) -All teachers will be provided PD in creating higher level questioning.

Tasks

- All teachers will be provided professional development in creating higher level questioning.
- Using units of instruction, teachers will complete a weekly lesson plan form showing where the class is within the unit.

IIIA02 (111) Documentation of progress-

Teachers were provided Writing Higher Order Thinking Question training on Wednesday, January 7, 2015 during the regularly scheduled Professional Learning Community (PLC) meeting. Evidence provided: 01/07/15 Agenda, Sign in Sheet, and samples of feedback forms from participating teachers. Professional Learning Community (PLC) feedback

Third Quarter ESEA/ IMO Report

forms were and posted in the evidence folder.)

Sample lesson plans and units are available for review in the evidence box as well as by request.

Objective-

IIC01 – (96) Units of instruction include specific learning activities aligned to objectives.

Tasks

- Teachers will place activities in their units of instruction. (Resources: "Effective Instructional Strategies" by International Center for Leadership in Education, "Strategies That Work by Stephanie Harvey and Anne Goudvis, "Differentiated Instructional Strategies for Reading in the Content Areas" by Carolyn Chapman and Rita King, strategy card provided by SREB, various other books in the faculty library)
- Teachers will find or use previous activities that have shown success to include in the K-12 curriculum.

IIC01 – (96) Documentation of progress

1. Sample lesson plans and units are available for review in the evidence box as well as by request. (Venn Diagram, brainstorming, data analysis and research strategies)

2. The Literacy and Math teachers decided that they had resources that met the needs of the students beyond The Learning Institute (TLI). They chose to use resources they have had success with in the past and through their experiences with Literacy Design Collaborative (LDC) and Understanding by Design (UbD). Some examples include poetry units, computer programs in Geometry classes, Algebra III, and Informational Unit.

All teachers are now given the opportunity to explore the external resources.

Recommendation 2: The principal should regularly conduct classroom observations and provide specific meaningful feedback to ensure that teachers consistently implement research-based instructional strategies to meet the individual learning needs of all students.

Description of Full Implementation:

-The principal provides feedback on a regular basis to increase rigor and relevance in teaching instruction through individual, small group and whole group settings. The principal sets and maintains instructional expectations for the classroom and Professional Learning Communities weekly and quarterly.

Objectives-

IE07 (58) The principal monitors curriculum and classroom instruction regularly.

Tasks

- The principal will keep documentation folders related to classroom walkthroughs and curriculum.
- The principal will collaborate with the instructional facilitator to assist teachers with increasing rigor and relevance.

Third Quarter ESEA/ IMO Report

- The principal will meet with each teacher twice a month.
- The principal provides immediate feedback to teachers who have shown effective practices.
- The principal and instructional facilitator view expectations and processes for classroom instruction at the beginning of the 3rd quarter.
- The principal and instructional facilitator review Professional Learning Community (PLC) expectations and processes at the beginning of the 3rd quarter.

The principal will communicate effective practices and areas of improvement to the building and stakeholders by publishing a newsletter on the campus website and by e-mail to the staff.

IE07 (58) Documentation of progress

1. The principal maintains CWTs in Teachscape and paper copies in individual teacher folders. Evidence includes samples of CWT reports and overall CWT reports.
2. The principal collaborates with the external provider who assists with the instructional facilitator's role minimum of one day of two site visits. Evidence: external provider reports are written weekly. Sample reports are located in the folder.
3. The principal meets with the teachers twice per month to work on TESS and PGPs through Bloomboard during their conference periods. Evidence includes multiple bulletins with requests for teacher attendance during conference periods. Bloomboard entries indicate on going activities two times per month.
4. The principal provides immediate feedback to teachers who have shown effective practices through the posting of a monthly newsletter, Bloomboard, handwritten notes. Documentation for several Bloomboard entries have been placed in the document folder entries, and handwritten notes.
5. The principal reviewed the expectations and processes for classroom instruction at the beginning of the 3rd quarter with the instructional facilitator, external provider, leadership team, and ADE school improvement specialist. Evidence included: Leadership team agendas, minutes in Indistar, and Professional Learning Community (PLC) Feedback form samples.
6. The principal, external provider, leadership team decided Professional Learning Community (PLC) expectations and processes at the beginning of the 3rd quarter through the development of the 45 Day action plan and PIP.
7. The principal communicates effective practices and areas of improvement to the building and stakeholders by publishing a newsletter that is posted on the building website and submitted by e-mails to staff, central office, and ADE SIS.

Recommendation 3: School leadership should provide support for struggling students utilizing Virtual Arkansas by ensuring their ability to interact with instructors for additional support beyond initial instruction.

Third Quarter ESEA/ IMO Report

Description of Full Implementation:

Teachers review classroom assessments, student products, and interim assessments to determine student support and enhancement. Professional Learning Community feedback forms will show evidence of assessment review and next steps to address struggling learner needs. Lesson plans and instructional practice will show evidence of student intervention and practice. Struggling student's grades have improved due to being placed in a traditional classroom environment.

Objective-

IID10 (108) Instructional teams use student-learning data to identify students in need of instructional support or enhancement.

Tasks

- Remove/relocate struggling students from the Virtual Arkansas Classroom to on-site classrooms.
- Place students in traditional classroom environments.
- Tutoring opportunities are provided by Virtual Arkansas teachers during the school day, between 3-4 PM or at home. (Spanish I and II, Journalism I and II)
- Virtual Arkansas students may reserve laptops for home use.
- Teachers will review students' classroom assessments, projects, and interim assessments to determine student support or enrichment.

IID10 (108) Documentation of progress

- Struggling students in the virtual Arkansas classroom were moved to on-site classes. A letter of how the students were moved from

Evidence of the change in schedule included the external provider's report, principal's attestation of the change in schedules.

2. Schedule samples are included in the folder with all personal information removed.

3. The Virtual teachers told the students that they can log into Virtual Arkansas at home if they chose to work after school hours. The students were provided log in the first day of class and Bandwidth is now upgraded to meet the needs of all students and staff. Videos are made and available to students from previous classes. Students may access the videos at their convenience including tutoring time offered to students five days a week.

All students in Spanish II dropped the course. Evidence of the schedule changes and letter of schedule changes from the administrator.

4. The district /school attempted to allow students the opportunity to use technology tools, but due to the misuse of the equipment, the schools has decided to make school equipment available during school hours.

5. The leadership team teachers (Science, Literacy, and Mathematics) piloted the assessment grid process between

Third Quarter ESEA/ IMO Report

February 10, 2015 – March 10, 2015.

Recommendation 4: School leadership should ensure that instruction within the remediation period is differentiated to meet the learning needs of all students.

Description of Full Implementation:

All students are enrolled in My Skills Tutor and functioning at the appropriate grade level.

Teachers use student learning data to plan instruction. Teachers will plan for use of formative assessment and higher order questioning based on needs of students. Teachers bring student learning data to the Professional Learning Communities willingly and seeks support from the Professional Learning Community, building administrator, and/or instructional facilitator.

Mastery folders, units of instruction, assessment grids show aligned skills. All teachers maintain mastery folders where identified students scoring less than 60% on classroom assessments have completed remediation.

A fully implemented Response to Intervention (RtI) progress is in place within classrooms to address the specific needs of all struggling students.

Objective-

IID09 (107 Instructional Teams will use student learning data to plan instruction

Tasks

- All students will be placed in the My Skills Tutor.
- Students mastering skills will be provided enrichment at their individual levels.
- Struggling students will be provided specific skills aligned to classroom assessments for mastery.
- Classroom teachers will be available to provide face to face tutoring for students in My Skills Tutor remediation during class time.
- The computer lab paraprofessional will provide data/My Skills reports to the classroom teachers for face to face tutoring opportunities.

IID09 (107) Documentation of progress

1. All students have been placed in the My Skills Tutor by 12/01/14 as determined by the list of students included in the evidence folder.
2. A printout of a My Skills Tutor report is included in the folder.

Third Quarter ESEA/ IMO Report

3. A printout of a My Skills Tutor report is included in the folder.
4. CWT documents show that teachers are involved in the My Skills Tutor process
5. Documentation includes a copy of a printout for teachers.

Objective

IIIA05 (114) All teachers will maintain a record of each student's mastery of specific learning objectives.

Tasks

- Teachers will use the quarterly The Learning Institute (TLI) student data reports to keep up with student progress.
- Teachers will use the summative The Learning Institute (TLI) data reports to keep up with student progress.
- Teachers will use Academic Improvement Plan (AIPs) to keep up with student progress.
- All teachers will identify students who are performing at below 60% on identified skills.
- All teachers will create mastery folders for identified students scoring less than 60% on classroom assessments.
- All teachers will create interventions for students scoring below 60% on classroom assessments. (Formative Assessment Grids)
- Each teacher will document success of students.
- Teachers on the leadership team will be provided training on the assessment grids.
- Leadership team/classroom teachers will pilot the assessment grid process from February 11, 2015 to February 17, 2015.
- Leadership/Classroom teachers will reflect on the assessment grid pilot process during the February 17, 2015.
- Leadership team reviews RTI resources.

IIIA05 (114) Documentation of progress

- Trifold boards were created for both Math and Literacy to identify students who were Proficient or Advanced or struggling. The Trifold boards are maintained in the high school office. An additional tri-fold board has been added for science. (The administration, instructional facilitator, external provider and teachers have pulled the Learning Institute (TLI) interim reports, charted the students' results on the Trifold boards and discussed outcomes in Professional Learning Community (PLC)s and the Core Leadership Team, external provider and Arkansas Department of Education (ADE) School Improvement Specialist analyzed the data for documenting evidence of completion and outcomes. The teachers have yet to highlight which students showed growth, remained unchanged or regressed on the Trifold boards; however, the administrator and external provider updated the Root

Third Quarter ESEA/ IMO Report

Cause data to show the results of progresses. The teachers will chart the data during the discussion of missed Interim Measurable Objective (IMOs) and data results during the 4th quarter.

2. Trifold boards were created for both Math and Literacy to identify students who were Proficient or Advanced or struggling. The Trifold boards are maintained in the high school office. An additional tri-fold board has been added for science. (The administration, instructional facilitator, external provider and teachers have pulled the Learning Institute (TLI) interim reports, charted the students' results on the Trifold boards and discussed outcomes in Professional Learning Community (PLC)s and the Core Leadership Team, external provider and Arkansas Department of Education (ADE) School Improvement Specialist analyzed the data for documenting evidence of completion and outcomes. The teachers have yet to highlight which students showed growth, remained unchanged or regressed on the Trifold boards; however, the administrator and external provider updated the Root Cause data to show the results of progresses. The teachers will chart the data during the discussion of missed Interim Measurable Objective (IMOs) and data results during the 4th quarter.

Teachers decide on scores to identify below basic, basic, proficient, and advanced on interim assessments.

3. Student work has been updated in the Academic Improvement Plan (AIPs) folders for each quarter. Teachers and students include evidences of progresses on skills included on the Academic Improvement Plan (AIPs) of need. Student samples are maintained in the folder of formative assessment practices and interventions provided to struggling learners as evident in student folders for each classroom.

4. See Assessment Grid / Response to Intervention data in the highlights of this report above. The 45 day action plan contains the same information as above.

5. Documentation is located in teacher Academic Improvement Plan (AIPs)/enrichment boxes in the classrooms. Also see teachers' assessment grid folder.

6. Documentation includes copies of teachers' assessment grid work.

7. Documentation includes copies of teachers' assessment grid work.

8. The Professional Learning Community (PLC) agenda and sign-in sheet are in the documentation folder.

9. The assessment grid forms are in the documentation folder.

10. Professional Learning Community (PLC) Feedback forms are documentation for reflection.

11. Documentation of this is the External Provider Report for March 2-6, 2015.

Recommendation 5: (High School level) District and school leadership should continue outreach efforts inside and outside the community to improve perceptions that impact school enrollment, culture, and enthusiasm for education.

Description of Full Implementation:

All teachers maintain parent contact folders with preferred contact preference. Teachers encourage parents to contact

Third Quarter ESEA/ IMO Report

them regularly following parent contacts. Two-way communication is established between teachers and parents.

Objective

IIIBO1 (150) All teachers will maintain a file of communication with parents.

Tasks

- Parents will be sent a preferred contact letter from the principal's office by mail.
- Teachers will keep a folder with all parent communication.
- The Parent Preferred Contact Letter will be added to the campus website as a parent resource.

IIIBO1 (150) Documentation of progress

1. Parents were sent a preferred contact letter including a survey from the principal's office by mail on 12/19/2014 as determined by evidence of letter in the evidence box.
2. Teachers are maintaining documentation of parent contacts on individual forms that are turned into the principal by 01/21/2015 and maintained weekly. This is determined by copies of contact logs in a folder located in the leadership team meeting room.

The parent logs are checked per quarter by the principal to determine Interim Measurable Objective (IMOs) progresses.

3. A Parent Preferred Contact Letter has been added to the campus website as a parent resource. Parents are instructed to return the information to the office as posted on the website

<http://strong.k12.ar.us/uploads/Communication%20Letter%20to%20Parents%2012-19-14.pdf> .

Recommendation 5: (District level) District and school leadership should continue outreach efforts inside and outside the community to improve perceptions that impact school enrollment, culture, and enthusiasm for education.

Description(s) of Full Implementation:

IA01 (1) More community members will become more involved with the school through improved 2-way communication by the school to various stakeholders. The school staff will attend community functions on a more consistent basis.

Multiple media outlets will be used to communicate district events (i.e. District website, Facebook, e-mail, twitter).

IA02 (2) Members of Community organizations will participate in District Leadership Team meetings every two weeks.

A distribution list will be developed to provide opportunities for 2-way communication for input and feedback from stakeholders.

IA03 (3) Notes:

-Students involved in meetings.

-Parents and community members will be involved and working together. Data based.

Third Quarter ESEA/ IMO Report

- Representatives from the community.
- Clarify meanings of specific issues.
- Building level communication and partnership.
- Outreach trickles down from students to parents.
- Parents and community supporting the school in a positive manner.
- Parent and faculty training partnership. (in-service)

Objective

IA01 (1) The district includes municipal and civic leaders in district and school improvement planning and maintains regular communication with them.

Tasks

- Involve more community stakeholders in multiple ways such as flyers, website postings, outreach efforts, outside signs, etc...
- School staff will be invited and encouraged to attend community functions.
- Use multi media outlets to communicate district events.
- Administration will share communication with staff
- The district will invite concerned citizens of Huttig to participate in leadership team events.

IA01(1) Documentation of progress

- Documentation includes the positive information flyer delivered to all community members, an invitation to a community/ business dinner, website postings, photographs of the school marquee, letters sent to parents, and e-mail
- Documentation includes the e-mail sent by Mr. Lusk inviting staff to attend the Community Update meeting and an invitation to the Community/ Business dinner.
- Documentation includes a copy of the flyer mailed to all community members, the invitation sent for the community/ business dinner, e-mails, newspaper articles, web-page, and newsletters.
- E-mails and newsletters have been placed in the documentation folder.
- Documentation includes sign-in sheets from meetings.

Objective

IA02 (2) The district includes community organizations in district and school improvement planning and maintains regular

Third Quarter ESEA/ IMO Report

communication with them.

Tasks

- Members will participate in leadership team activities every 2 weeks.
- The district will develop a distribution list to provide an opportunity for 2-way communication for input and feedback from stakeholders from the community.
- District will develop and maintain a distribution list of prominent community members to provide a 2-way input/output pipeline.
- The Web page manager along with the elementary/high school principals will collaborate to create links for the community calendar that will be placed on the district's web page.

IA02(2) Documentation of progress

- Documentation includes sign-in sheets from the leadership team meetings
- Documentation includes a copy of the 2-way communication distribution list.
- Documentation includes a copy of the 2-way communication distribution list.
- Documentation includes a copy of the web page and community calendar

Objective

IA03 (3) The district includes parent organizations in district and school improvement planning and maintains regular communication with them.

Tasks

- Community calendar will be developed.
- Create two-way communication list with school and community leaders.

IA03(3) Documentation of progress

- Documentation includes a copy of the 2-way communication distribution list.
- Documentation includes a copy of the 2-way communication distribution list.

Elementary-

- 4th grade students are participating in Earth Day to be held April 20th in El Dorado, AR.
- Elementary will host a Book Fair that is open to the parents/public April 20-24
- Testing of 1st, 2nd, and 5th grade students Successfully Completed - ITBS and Science Benchmark
- Elementary teachers revisiting their PGP for Professional Development Opportunities to support teacher growth/ student achievement.
- Kindergarten-first grade completed end of year DIBELS

Third Quarter ESEA/ IMO Report

- The district was removed from the district Academic Distress list by the state board in February of 2015.
- The district held receptions for the classified and certified staff to celebrate efforts and the accomplishment.
- The ACSIP and Gifted and Talented plans were approved.
- A School Excellent Inventory survey showed very promising results. Teachers were surveyed and their comments showed that students feel valued, a high level of staff and student morale exists, teachers have high expectations for students, and students participate within higher levels of curriculum. Mr. Lusk stated that he will use these results during the next school board meeting.
- District administrative meetings began during 3rd quarter among administrators on March 4, 2015.

- The superintendent is leads districtwide parent advisory meetings as determined during a March 17, 2015 meeting. During the meeting parents were shown videos on parent involvement. Notes were taken and recorded in Indistar by the district leadership team process manager.

- The superintendent is working during the 3rd quarter on the development of a recruiting PowerPoint along with the high school principal and Strong Huttig Educational Association Chair. This PowerPoint will be displayed on a monitor during recruitment fairs and during meetings as needed. There is a desire to display the PowerPoint on the district website in the future.

- Administrators are meeting to discuss continued community involvement at the building levels.

- The superintendent sends out e-mails to the staff as follows-

Good News Everybody,

The waiver bill for schools that are under 350 students have passed both the House and Senate. All left to do now is for the Governor to sign it into law. Remember, that a school district applying for a waiver must not be on Fiscal, Facilities or Academic Distress. Right now, our district will qualify for the waiver. Let's keep working with our children and keep the district moving forward. Thank you so much for all that you are doing to help our schools.

Saul Lusk
Superintendent

The Arkansas Public Policy Panel team took the ACSIP to the community for review and clarification, brought a

Third Quarter ESEA/ IMO Report

community newsletter for distribution to parents and faculty, held a community meeting to discuss community involvement, and will hold additional regularly scheduled meetings for continued community input. This was a direct result of district/community conversations as an identified need and next steps.

The Arkansas Public Policy Panel (APPP) reported the following information during 3rd quarter-

1. Lobby Day at the Capital was very successful with around 200 people in attendance.
2. There will be a meeting here on Monday for a Strong-Huttig forum. The flyer (Forward Arkansas Community Conversation) that will be placed in the community was presented to the team. The APPP are hoping parents will be in attendance to hear about things that are going on in the schools and district. They want to change the perspective of parents to let them know that all groups are concerned about their child/children getting a better education at an earlier age. The group wanted forums held in the communities. During this forum, the parents will be broken into groups and asked their perspective of what they think should be done to improve the schools. Strong-Huttig is one of the four communities to get these forums.
3. Education Lobby Day will be held March 10, 2015. There will be a training that morning discussing what community members will hear and see while at the Capital. It was stated that all children deserve a quality education. When parents and citizens attend meetings at the capital they become informed about current issues and know what the legislators are voting on at the time. The superintendent stated that if people don't contact their legislators, issues will go through that don't necessarily benefit the schools. He has asked legislators why they voted certain ways and was told that they did not hear from their constituents. E-mail is the best way to contact them. The ADE SIS stated that what is working to change in academic distress schools and/or districts is that all stakeholders are working together (students, districts, schools, faculty, board members, cooperatives, ADE, universities....) and moving in one direction. APPP stated that if parents attend sessions at the Capitol they will be able to see that their school district is not the only one with problems. When you can come together, you are a bigger force.
 - March 9, 2015 ForwARd Arkansas Community Discussion Group interviewed the newly formed Strong Huttig Education Committee, (the group consist of members from Huttig and Strong:-Concern Citizen of Huttig and Strong Community Leadership Alliance) held a survey / questions and discussion meeting, at the Gardner Strong Elementary Cafeteria, March 9, 2015, to talk about having their ideas and suggestions to be considered by the ForwARd Arkansas organization. The group served dinner and the facilitator was Mr. Matthew Caston. He asked four questions in a discussion group setting according to the audience table seating.

The four questions asked were:

1. What is your definition of a good school?

Third Quarter ESEA/ IMO Report

2. What measures tell you that a school is good for kids?
3. What distinguish the best school form other school?
4. What are actions needed to make sure all kids have access to good school?

The discussion group responses to each of the four questions asked:

1. What is your definition of a good school?

A good school could be when the students are achieving above basic with a good learning environment and support system from the administration, teacher, parents and community. Instill in the students high expectation for themselves and school district and community.

Put children first

Safe environment

Teachers that really care about students

Good communications from the school system, by letting the parents know about the students and quality education.

Good superintendent

Parents start at home teaching children, do not take sides treat all students the same.

Communication—Make parent feel welcome check on students give students something to do training at home.

Good lunch food cooked the right way.

Good teacher that care about their education

People that care that push students instead of yelling at them.

Good support system /teacher that care help students with academic and personal affairs

Teachers and parents have a better relationship—parent should not come out to school to jump on the teachers. Always know there is more than one side to the story.

Greater communication-school support academic and emotions-greater support for after school affairs.

Stop talking negative about your own school especially in front of your children....they come to school and repeat what you said. If you don't care about the school; why should the child care?

2. What measures tell you that a school is good for kids?

Tests scores go up

Parental support

Students excel after graduation

Be productive at school

More dress code

Third Quarter ESEA/ IMO Report

Students act like family- how you treat people
Allow kids to be kids be more creative with kids that want to create pride in school
Engages instruction that encourages ownership
People should invest in school

3. What distinguish the best schools from other schools?

Have a lot of resources
Low teachers turn over
Better paid teachers and staff (we have low teacher salary)
Better school
Money support from community
Big business that support school system (Strong & Huttig do not have big businesses)
Do not have many fine arts classes to offer
Facilities make a different
More parental involvement needed and support from parents with their children
Administrative support and School Board support

4. What actions are needed to make sure all kids have access to good schools?

Need to support the school
Show more love as a teacher
Support the school
Talk to elected officials
Make your vote be known
Make children feel welcome and valued have an inviting place for children
We as parent, and teachers need to support our school system more and making your (our) votes be heard by our elected officials

The external provider completed the following services at the district:

- Collaboratively works with the ADE School Improvement Supervisor.
- Provided technical assistance during a meeting with the superintendent, federal program coordinator, and bookkeepers for the district (modifications to ACSIP)
- Provided technical assistance by gathering documents needed for standards

Third Quarter ESEA/ IMO Report

- Directly modified the ACSIP plan as needed
- Took meeting minutes for district leadership team meetings
- Directly assisted teachers when the instructional facilitator was absent at the elementary and high school campuses
- Assisted with the development of the CEIS and Gifted and Talented plans.

Concerns/Barriers as reported from:

- District Personnel/District Leadership Team:

- The superintendent reports capacity and recruitment of quality teachers is a huge barrier.
- Also the superintendent said, “Implementing unfunded mandates such as increasing the minimum salary for teachers without adequate funding will cost the district \$50,000 plus benefits and the \$63.00 that the legislature appropriated for 2015-2016 funding will only give us an increase of \$21,000. We are still going to have to spend approximately \$30,000 to meet this mandate. I have implemented a reduction in force for licensed and non-licensed personnel. This is very difficult for us to overcome when we are still losing students. This financial shortfall will have an impact on being able to offer incentives to hire and maintain highly qualified and high performing teachers in the district.”

- Building Principal:

- Recruitment of quality teachers who will be encouraged to remain vested in the students’ success will be a concern in 4th quarter and summer due to some teachers leaving the district in core classes.
- Two of the high school teachers for mathematics will not return for the 2015 16 school year.
- The administrators and staff are concerned about recruitment of highly qualified mathematics teachers.
- The superintendent and the building administrator are working toward the development of a PowerPoint to be displayed on a monitor during job fairs for recruitment purposes.

- Building Leadership Team:

- Assessment Grid/Response to Intervention (Rtl) first attempt of implementation concerns from Instructional Teams

Third Quarter ESEA/ IMO Report

as documented from the 4/8/2015 Professional Learning Community (PLC) feedback forms.

- One teacher wanted to include the assessment grid in their lesson plan template rather than in a separate document to avoid the appearance of more paperwork. (They thought the assessment grid was a great process.)
- A teacher felt that Response to Intervention (Rtl) assessment grids were time consuming and overkill.
- Recording the students who did not master the standard and reteaching students takes time.

▪ Arkansas Department of Education (ADE) School Improvement Specialist:

- Recruitment and retention of new and existing staff.
- There were three of eleven Interim Measureable Objectives (IMOs) not met for the third quarter. (One of the three Student Progress and Achievement Interim Measurable Objective (IMOs) s was moved to the met column during the 3rd quarter.) The main reason behind not meeting most Interim Measurable Objective (IMOs) was documentation of specific times and follow through of the expectations. The leadership team will rewrite the CWT and discipline two focus walks per week into a new Interim Measurable Objective (IMOs) for a set number per quarter.
- Because of the number of personnel new to their positions within the school district, the external provider (formally known as the 2013-14 federal programs coordinator, professional development coordinator, gifted and talented administrator/teacher, K-12 literacy instructional facilitator, district and high school process manager, etc.) is providing on-site professional development to the various personnel during the fall and spring semesters. The amount of time spent on professional development and paper work, gathering of data, and data analysis takes away from the amount of time working on instructional practices with the facilitator and teachers.
- The Arkansas Department of Education school improvement specialist's schedule has prevented on-site visits from March 10, 2015 to April 14, 2015. The administrators, process manager, instructional facilitator, and external provider have been in touch with the school improvement specialist over the given time span from March to April by email, phone, and Zoom (video conferencing).
- Assessment Grid/Response to Intervention (Rtl) first attempt of implementation concerns- Some teachers are focused on the document and not on the purpose or intent of the process. Two of three teachers on the leadership team implemented the pilot process to gather data. (Two of the three leadership team pilot teachers were provided a second brief overview of the assessment grid process on 4/14/2015 and had open dialog with the ADE school improvement specialist and external provider regarding the process while completing a reflection survey following the second attempt by the pilot teachers to use the assessment grid process. The third teacher was provided the same opportunity with the instructional facilitator on 4/15/2015.) There is concern following the idea that the

Third Quarter ESEA/ IMO Report

assessment grid is taking away from the development of lesson plans or teaching when it is a measurement or checklist of students who are not mastering the standard in the formative practice of instruction and assessment prior to chapter or unit exams. The process is completed during teaching/instruction. Purposefully planned within the lesson and unit among the higher order questions and activities for learning. Survey results are listed among highlights above. A Professional Learning Community is scheduled to occur on 4/15/2015 to redirect the thinking and focus toward high quality instructional practices that students' react to positively by use of formative assessments to direct point in time remediation practices. The impact of the Assessment Grid/Response to Intervention (Rtl) on student learning, achievement and success in real time will remain as the focus of the process.

- Other:

- Concerns identified by the external provider include:

- Tenth grade students began taking the PARCC exam. There was an issue with technology during the test where students would get kicked out of the test and the testing coordinator would have to go in and release the test back to them.
- Getting students to attend after-school tutoring is a challenge.
- Students are mathematically disadvantaged at least two years.
- One of the external providers is having difficulties getting into the classrooms for direct assistance. She does conference with teachers but has difficulties getting in to work directly with them. Because many of the key staff that dealt with Indistar, ADE requirements, and federal programs are no longer with the district and because of a decrease in staff, new people have had to fill these positions. The external provider is providing embedded on-sight professional development and assisting with the transitions of these new duties. This has taken away from the external provider's opportunity to actually helping teachers in the classroom. This training and assistance is not only for the high school but also for the elementary and the district.
- When My Skills Tutor was purchased, only 8 of the 21 programs were purchased. The programs purchased are not at a level sufficient to provide challenging work for many of the students. The program has been approved and the purchase order was sent. The technology coordinator was told that the additional programs would be added in 48 hours. The program still was not added to the high school's options.

Additions/Revisions to current year's PIP/TIP:

Third Quarter ESEA/ IMO Report

- The district and school focused on the implementation of the Academic Distress 45 Day Action Plan. Following the completion of the amendments and adjustments in the Arkansas Comprehensive School Improvement Plan (ACSIP) system, the process manager will work with the leadership team will reflect on the successful practices that were implemented during the 3rd quarter to update the Indistar PIP in the 4th quarter.
- The building administrator and process manager were recommended by the Arkansas Department of Education (ADE) School Improvement Specialist (SIS) to contact the School Improvement Unit Indistar manager to remove all previous two year Indicators from the PIP to start the next school year. The external provider is working with the process manager on updating the Federal Programs Coordinator, Student Special Needs Funds, and 1003a grant funds in the ACSIP system as well as the updates to the action narratives aligned to the amendments and adjustments.

Third Quarter ESEA/ IMO Report

Date Completed: March 10, 2015

School: Arkansas High School

District: Texarkana

Status: Priority

Principal: Eva Nadeau

ADE School Improvement Specialist: Teena Bell

External Provider: Arkansas Leadership Academy

ARKANSAS
DEPARTMENT
OF EDUCATION

- Class Meetings were held.
- Quiz Bowl won First Place at the quiz meet.
- Students collected 266 pairs of jeans for the Jean Drive to fund Artist on Campus.
- An employee from a local business participates with job shadowing program for Arkansas High School students.
- AHS students participate in Four States Band AHS Band, Choir and Strings attend All-State.
- Arkansas High School was approved for the "Blue and You" partnership grant with TA Police Department.
- \$16,000 awarded to ROTC at Drill Competition called the Distinguished Gentleman Meet.
- Parent Meetings were held for each grade level.
- Arkansas High School students participated in Athletic Signing Day.
- Redline Tryouts were held.
- Arkansas High students participated in several college visit days at Texas AM, TAMUT, and UAMS LR.
- Arkansas High students participated in the Arkansas Leadership Summit Black History Program and Black History Parade.
- AHS hosted Destination Imagination Regional Tournament.
- Arkansas High School students participated in the Youth to Leaders program mentoring students at CHMS.
- Academy Service Night was held.
- Congressional Meeting was hosted for students interested in serving in the military EAST Conference.
- 504 Training was held at Arkansas High School.
- Arkansas High School hosted a Blood Drive.

Third Quarter ESEA/ IMO Report

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

No concerns were reported.

b) Building Principal:

No concerns were reported.

c) Building Leadership Team:

No concerns were reported.

d) ADE School Improvement Specialist:

Due to the submission date for this report, there are 4 additional IMO's addressed during the 3rd quarter that will not be reported on until the 4th quarter report. With testing and Spring Break, there was not sufficient time to gather data, review data, and determine if these additional IMO's were met or not met but these IMO's will be reported on in the 4th quarter.

e) Other:

Literacy Instructional Facilitator is concerned about the lack of available time for developing and finalizing IMOs for next year 2015-16.

By February 20, 2015, there will be a 25% increase above the baseline for the number of Proficient and Advanced Open Response Answers for Algebra 1, Geometry, and Algebra 2 as evidenced by common assessments.		X	2	02/20/15	Not met, needed 57.0% to meet the 25% increase. The combined total for proficient and advanced was 51.7 percent.
By February 15, 2015, there will be an increase to 1300 parent contacts made by staff as evidenced by "parent-contact logs."	X		4	02/20/15	Met with evidence with 1941 parent contacts recorded through teacher maintained parent contact logs and parents attending parent teacher conferences.

Third Quarter ESEA/ IMO Report

Date Completed: March 31, 2015

School: Wonder Junior High

District: West Memphis School District

Status: Priority & SIG

Principal: Dr. Quarrels

ADE School Improvement Specialist: Renata Bryant

External Provider: Elbow 2 Elbow

Internal School Improvement Specialist: none

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights:

- Parent conferences were designed to explain student's reading level as well as the math level and the track that the child has chosen for high school.
- March 20, 2015 teachers in all content areas had professional development on Cornell notes.
- February 27, 2015 students experienced a live play, *Lion King*, in the Orpheum in Memphis, Tn. About 80 students went on the *Lion King* Trip. A feeding program fed students before leaving campus.
- The week of February 23, 2015, the Tenth grade high school counselor was on-site to have Freshman Night and to help register students for upcoming school year.
- Renaissance STAR diagnostic data findings are aligned with the findings for TLI (The Learning Institute) data reports.
- The Administrative and School Leadership teams are having deep discussions on what professional development should be provided during the summer based on the school's needs.
- The college tour field experience trip to Atlanta, Georgia requirements have been created along with the list of potential candidates. List will continuously be updated if students become ineligible.
- The Renaissance Representative shared Renaissance STAR growth data with team. Wonder Junior has farther

Third Quarter ESEA/ IMO Report

growth than any other school within the district.

- Vice President of MCSS (Mid-South Community College) spoke to parents at Freshman Seminar parent meeting.
- One hundred thirty-five students will go on tour of MSCC (Mid-South Community College) campus to view possible programs.
- Life Strategies is now doing the In School Suspension for Wonder Junior High School.
- Seventh grade girls won the district basketball championship. Ninth grade teams advanced to the regional tournament.
- The library is now open on Saturdays and after school during the week.
- On March 10 and 11, 2015, students will attend the training, "Get Money" to spark interest in entrepreneurship.
- The Career Fair hosted by Seventh graders was a success. This fair was designed based on Project Based Learning by The Buck Institute. It helped students gain knowledge of which track to take for high school.
- Student attendance is 95% for month of February.
- The principal is registered to attend (ALA) Arkansas Leadership Academy.
- The Ninth grade AVID (Advanced Via Individual Determination) students will attend the Grizzly basketball game. Eligibility is based on academic performance and behavior.
- Educational Day for the Redbirds will be May 11. Students will be invited to attend based on academic performance as well as behavioral performance. The Redbird's team will provide 90 minutes of curriculum in baseball prior to the start of the game.

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

- The district is concerned about student attendance is an issue for the district. The weather and not having a transportation system for picking up students and dropping them off at home are issues that impact the attendance rates for most campuses. The district heavily relies on MATA (Memphis Area Transit Authority) to transport students to and from school.
- The district leadership team is concerned about technology and infrastructure. These issues are slowly being eliminated as barriers for the district.
- The district assistant supt. is concerned about the lack of monitoring of students who go the GED (General Education Development) route. The need to establish a protocol to ensure that students are attending on a regular

Third Quarter ESEA/ IMO Report

basis is crucial to the attendance / graduation rates.

- The district is concerned about immunization issues, which are hindering some students from attending school. The district plans to have a nurse on site for registration and orientation days for students and parents to be conferenced about options and shot requirements.
- The district leadership teams is concerned that there is no automated call- out system to communicate with parents. Parents haven't been notified in about 6 years. The Assistant Supt. plans to invite the technology director to the upcoming meeting to address this issue and to work with the Technology director on resolving this issue so parents can be notified.

b) Building Principal:

- The principal is concerned that the assistant principal is not being viewed as an instructional leader. The assistant principal is being provided continued support to build capacity as an instructional leader. The assistant principal is required to turn in a weekly schedule to discern how much time is spend on discipline and referrals and how much time is being used for instructional purposes.
- The principal is concerned with one of the career coaches who teach the AVID (Advanced Via Individual Determination) program to Ninth grade students. When observed in the classroom it appeared that students do not want to set academic goals and students do not want to utilize Cornell notes.

c) Building Leadership Team:

- A member on the administrative leadership team is concerned about the freshman and AVID (Advanced Via Individual Determination) classes, which allow students to research and choose a program of study that will be offered through the Academies of West Memphis and Mid-South Community College for the upcoming school year. The major issue with these programs is that students do not fully understand the importance of the process or the long-term benefits of choosing a program of study.
- A member of the administrative leadership teams are the enrichment classes. These classes are limited in the

Third Quarter ESEA/ IMO Report

needed math focus due to several teachers being certified in areas other than math.

d) School Improvement Specialist:

- I am concerned about teachers not fully implementing Cornell Notes during instructional time.
- I am concerned about faculty and staff who are not invested in enhancing the rigor of instruction in science and literacy. The data from TLI (The Learning Institute) modules in science indicate there are issues with instruction, curriculum, and assessments. The data from literacy indicates that they have met their IMO (Interim Measurable Objective), but there are some issues when students are asked to write essays without teacher guidance. Students struggle to write and work independently.
- I am concerned about teachers not encouraging and motivating students to want to read more to increase their reading levels and comprehension through the program Renaissance Learning. Based on the Renaissance data reports, teachers allow students to read books that are not on their ZPD (Zone of Proximal Development) level.
- I am concerned about students having to walk to MATA (Memphis Area Transit Authority) bus stops to find a means of getting home. The time students are standing waiting on a bus ranges from 20 minutes to 40 minutes. Standing in weather is an issue as well as overcrowding on the MATA (Memphis Area Transit Authority) buses causing some students to walk or wait longer for another bus.
- I am concerned about issues during the PARCC (Partnership for Assessment of Readiness for College and Careers) Assessment. The servers were not able to allow multiple campuses to assess at the same time. The testing schedule had to be altered.

e) Other:

Additions/Revisions to current year's PIP/TIP:

Revision of the IMO (Interim Measurable Objective) for Student Safety and Discipline includes a new tool known as TisBis to measure discipline referrals and to also address issues with locations of discipline problems, teachers, and the time of day to help adjust and support teachers as needed.

Third Quarter ESEA/ IMO Report

IMO	Met	Not Met	IMO Area	IMO Date	Explanation/Supporting Data
<p>1. Change in Teacher/Leader Practice—CWT-</p> <p>By March 13, 2015, CWT (Classroom Walk Through) data will reflect an average of 30 classroom walkthroughs per week (270 during 3rd quarter) conducted by the principal, assistant principal, literacy specialist, math specialist, and science specialist using the Wonder Jr. High Google Doc (<i>adapted from Teachscape and TESS-Teacher Excellence and Support System</i>). Progress will be monitored by E2E (Elbow 2Elbow) school improvement specialist.</p>	X		1	3-19-15	74 CWTs (Classroom Walk Through)
<p>2. Change in Teacher/Leader Practice-- Teach Like a Champion—</p> <p>By March 13, 2015, teachers will implement 6 techniques from <u>Teach Like a Champion</u> in both lesson plans and instruction. Wonder Jr. High classroom walkthrough observation data will provide evidence of implementation in both lesson plans and instructional practices. Progress will be monitored by the</p>	X		1	3-19-15	<p>E2E Specialist has this data readily available in the evidence box in the school's data room.</p> <p>The data indicates that teachers are integrating at least 6 techniques from the book study into their instructional practices.</p>

Third Quarter ESEA/ IMO Report

principal and the E2E (Elbow 2 Elbow) school improvement specialist.					
<p>3. Change in Student Achievement-Literacy-</p> <p>By March 13, 2015, 66% of all 7th, 8th and 9th literacy students will meet the benchmark for proficiency on the most current TLI forecast report. Progress will be monitored by the literacy curriculum specialist and literacy interventionist.</p>	X		2	3-19-15	69% - average of all grade levels 7 th grade – 61%, 18% SWD 8 th grade – 83%, 40% SWD 9 th grade – 63%, 20% SWD
<p>4. Change in Student Achievement-Math-</p> <p>By March 13, 2015, 63% of all Seventh, Eighth and Ninth grade math students will meet the benchmark for proficiency on the most current TLI (The Learning Institute) forecast report. Progress will be monitored by the math curriculum specialist and math interventionist.</p>	X		2	3-19-15	72%- average of all grade levels 7 th grade – 52% 8 th grade – 58% Algebra 1 – 78% Geometry – 100%
<p>5. Change in Safety and Discipline-Teacher Referrals-</p> <p>By March 13, 2015, there will be a 9% (<158) decrease from 2013-14 3rd quarter teacher referrals (173) as reflected in 3rd quarter TisBis discipline data. Progress will be monitored by the assistant principal and</p>	X		3	3-19-15	126 teacher referrals were logged in TisBis software system

Third Quarter ESEA/ IMO Report

the counselor.					
<p>6. Change in Parent/Community Involvement--Parent Contacts-</p> <p>By March 13, 2015, teachers will document an average of 15 parent contacts for 3rd quarter. Progress will be monitored by the parent coordinator and the parent facilitator.</p>	X		4	3-19-15	<p>4388 parent contacts reported</p> <p>Template was created to log positive parent contacts per week. It requires teachers to list the date, time, and reason for the call as well as the student's name. This document is due at the end of every week. The on-site parent facilitator and coordinator collect the data from the logs. Blackboard also keeps a record of parent communication, too.</p>
<p>7. Change in Parent/Community Involvement--Parent Attendance-</p> <p>By March 13, 2015, parent sign-in sheets will reflect that at least 20% of 528 (106) parents will attend the 3rd quarter monthly parent involvement activities. Progress will be monitored by the parent coordinator and project manager.</p>	X		4	3-19-15	<p>111 parents in attendance for meetings and/or conferences. This data is calculated from sign- in sheets at each monthly meeting and conference. The parent coordinator and project manager collect this data.</p>

School: McClellan High School

Priority ____

District: Little Rock School District

Priority Academic Distress X

Principal: Henry Anderson

Focus Academic Distress ____

ADE School Improvement Specialist: Kyrion Jones ____ **External Provider:** _____

X **Locally Hired School Improvement:** Dr. Danny Fletcher

Highlights from 3rd **Quarter:**

- Basketball team not only made it to the State Playoffs, but they won and are now 5A State Champions.
- Literacy Instructional Facilitator was hired and is now on board. She moved from her teaching position at McClellan into the Literacy Facilitator role. Her students were absorbed within the master schedule (with the exception of her Advanced Placement classes)
- The Discipline and School Climate Committee had members attend the Safe Schools Conference in Little Rock. This committee has been meeting and working on the local school handbook and crisis management plan.
- The Professional Development/Teacher Mentoring and Support Committee has been working to create a completely new Teacher Orientation packet that is specific to McClellan High School and what a teacher might need to be successful.

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

No information reported.

Quarterly ESEA Reporting Form

b) Building Principal: Henry Anderson

Although there is now some shifting and buy-in from teachers, it still remains problematic that all teachers are not ALL on board with the efforts for reform at the school.

Students have begun taking ownership for their actions and are assisting in working to make McClellan a safe and orderly school.

c) Building Leadership Team:

- We are revisiting and creating a mission and vision statement that recognizes and brands us as “A New McClellan”.
- We are working on the clarifying and creation of transition courses and developing Academic Improvement Plans in College and Career Readiness to ensure each student’s success after graduation.
- We are working on providing needed Professional Development throughout the school. As we wrap up the School Improvement Grant, we are identifying and creating new avenues to ensure the teachers’ ability in supporting the students’ success in all areas.
- We are buying books for classroom libraries.
- We are buying new math and science equipment.
- We are offering Professional Development to help the Freshman Academy.
- We are also offering AVID training to ensure teachers’ success with Avid strategies.
- As a Leadership team, we have been collaborating with the district, and the other schools in the district, to allow us protected time to meet and discuss our roles together both as a school and as a district.

d) School Improvement Specialist: Kyron Jones

- Staff buy-in is still a concern.
- Student discipline takes away time the administrators can spend on instruction.
- The school now has a literacy facilitator on staff.

Quarterly ESEA Reporting Form

e) Other: Dr. Danny Fletcher

Progress has been slow on the designated improvement strategies for McClellan High School. Administration must continue to monitor the use of research based strategies in teaching of Common Core Anchor standards and use formal assessment data to: (a) Implement and utilize a student profile tool to assist teachers with planning and teaching effective lessons. (b) Allow students to progress monitor their learning.

Academic Distress –released by State Board, February 12, 2015

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights:

***Highlights for Augusta High School
Based on the Office for Education Policy Report***

#1 of the Top 20 Most Improved Middle Schools Based on Benchmark Mathematics Achievement from 2008-2014.

#1 for the Top 5 Most Improved Middle Schools in Northeast Arkansas Benchmark Mathematics Achievement from 2008-2014.

#1 of the Top 20 Most Improved Middle Schools Based on Benchmark Literacy Achievement from 2008-2014.

#1 of the Top 5 Most Improved Middle Schools in Northeast Arkansas Benchmark Literacy Achievement from 2008-2014.

Third Quarter ESEA/IMO Reporting Form

- Augusta High School was released from Academic Distress by the State Board on February 12, 2015.
- The Augusta School District received a B rating on the School Letter Grade Detail Report from ADE.
- The Augusta high school leadership team will be featured on the Indistar Website as a success story in raising test scores and improving student engagement through the positive use of Indistar Indicators.
- The high school principal continues to be involved in the Arkansas Leadership Academy's Master Principal Program.
- The Deep Knowledge Leadership Team with the assistance of the Arkansas Leadership Academy will form a student leadership team, who will draft a charter for their group and plan for a future summer meeting.
- The Deep Knowledge Team will also survey community and parents to use the survey data to plan a summer community meeting.
- The Deep Knowledge Team has created strategic planning teams across the high school---Mission and Vision, Content and Instructional Practices, Building the Environment, Engaging the Community, Financing and Funding, Professional Development, Deployment Planning and Measuring Success.

- Augusta High School is a proud recipient of an Apple grant through as part of the White House ConnectED initiative. By giving students access to the latest technology and powerful learning tools, we're working to transform the classroom into a place of deeper exploration and creativity. Together, we can unlock the potential of the world's future inventors, dreamers, and leaders.
- The grant will enable the Augusta High School to implement a 1:1 technology initiative. All students will have daily access to an iPad to complete class assignments and projects. Classrooms will be outfitted with the latest technology including Apple TVs and high speed internet, while instructors will have MacBook Airs to deliver hands-on lessons.
- Representatives from the school attended a Kick Off Event in Dallas, TX on February 2-4, where they met other grant recipients and learned about the leadership, curriculum, and technology aspects of the program. receiving an outline of the events to come in this implementation, concentrating on three key areas: leadership, curriculum, and technology. With on-going assistance and support from Apple and various other companies/partners, the school will use these three areas to implement will ensure a seamless phased implementation of the initiative.
- The technology infrastructure and adult learners were adequately prepared for the implementation of PARCC assessments!
- The high school is a finalist with the AT &T grant, Aspire Connect Ed, whereby each student will receive free internet at home for 3 years to be used in connection with their iPads from the Apple Grant mentioned in #6.
- 100% of the seniors at Augusta School District have applied and have been accepted to go to college for the

Third Quarter ESEA/IMO Reporting Form

2015-2016 school year.

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

The district personnel stated that one of their concerns for the third nine weeks is completing PARCC assessments this spring, planning for unknown assessments for the 2015-2016 school year and whether we are going to use Common Core or how we will adjust our curriculum.

b) Building Principal:

The building principal stated that one of his primary concerns for the third nine weeks is making sure that the preparation for the PARCC assessment and technology infrastructure will be adequate for testing purposes. The building principal's second concern is about high teacher absenteeism. Teacher absenteeism is high due to the fact that several teachers are resigning or retiring and they have already 'maxed out' their personal and sick leave for the 2014-2015 school year.

c) Building Leadership Team:

The building leadership team stated concerns related to time committed to the initial development of infrastructure of technology to support implementation of the PARCC assessment –for examples, room set up and organized, ensuing hard wiring for all computers, logging on to the testing website and bookmarked websites, practice run for all computers to be logged in at the same time.

Third Quarter ESEA/IMO Reporting Form

d) ADE School Improvement Specialist:

The school improvement specialist continues to be concerned that the technology infrastructure will be completed and testing will be successful. (The technology/infrastructure worked each day and the students were able to test without any major problems.)

e) External provider:

The external provider stated that his concerns are:
Lack of job descriptions for the new principal, instructional facilitators and design coach.
Lack of clarity for administrative protocol throughout the district.
Technology infrastructure and training adequate to support PARCC and end of year assessments.
Increase level of engagement and ownership of systemic change to impact student achievement, on the part of classroom teachers.
Accountability systems designed and implemented with fidelity and transparency, as it relates to teaching and learning.

Additions/Revisions to current year's PIP/TIP:

Each week the leadership team focuses on 3 Indistar indicators which drives our work towards changing instructional practices and improves our student successes!

Interim Measurable Objectives (IMO)	Met	Not Met	IMO Area	IMO Date	Explanation/Supporting Data
<p>By March 2015, the principal and/or principal's designee will have conducted 21 formal/informal evaluations, according to TESS tracks for each classroom teacher. (Data showed <u> 100 </u>% of these observations were conducted.</p>	x		1	3/15/15	The principal/designee achieved this IMO because an action plan was created in which the principal calendar mapped a schedule of observations in order to achieve this goal.
<p>By March 2015, 90% of all classroom teachers will turn in effective lesson plans on time.</p>	x		1	3/15/15	The teachers at Augusta high school consistently turn in lesson plans each week at a success rate of 94%. Lesson plans are analyzed by the leadership team on Mondays and regular feedback is provided back to the teachers. The teachers have specific components they must include each week, such as, standards, objectives, opening work period, questioning, closing activity, assessment, differentiation and resources. Lesson plans are submitted by email and posted each Monday near the door for

Third Quarter ESEA/IMO Reporting Form

					easy access to both the leadership team and visitors from outside the school. This work is in response to Indistar Indicator IIIA02—All teachers develop weekly lesson plans based on aligned units of instruction.
By March 2015, the leadership team will conduct 150 classroom walk-throughs with verbal and/or written feedback	x		1	3/15/15	The leadership team created an action plan whereby they scheduled a coordination effort to accomplish this goal.
By March 2015, 58% of literacy students will be projected proficient on the third TLI module from the 7th, 8th, 9th, 10th and 11th grade. (The overall goal to make AMO will be 57.03% of students.)	x		2	3/15/15	Literacy exceeded their goal by achieving 73% of their students were proficient or advanced. This high level of intensity was provided by the instructional facilitators in providing coaching for classroom teachers with the implementation of effective, instructional strategies. The collaboration between the literacy facilitator and the specialist from the Wilbur Mills Educational Coop continues to develop and provide support for the enhancement of instructional strategies. The leadership team focused on classroom walkthrough collecting data on teacher and student engagement. This was addressed at their PLCs meetings which resulted in a higher level of student engagement. Following the analysis of literacy data, students were identified to receive interventions to address academic

Third Quarter ESEA/IMO Reporting Form

					concerns. In support of the RTI (Response to Intervention) process currently in place, these students received differentiated interventions at the Tier II Level. This work in response to Indistar Indicator IID10. This Indicator is in Wise Ways, # 108.
By March 2015, 58.4% of math students will be projected proficient on the third TLI module from 7th and 8th grade, Algebra I, Geometry, and Algebra II. (The overall goal to make AMO will be 57.72% of students.)	x		2	3/15/15	Math exceeded their goal by achieving 67.04% of their students were proficient or advanced. This high level of intensity was provided by the facilitators in providing coaching for classroom teachers with the implementation of effective, instructional strategies. The collaboration between the math facilitator and the specialist from the STEM center at Harding University continues to develop and provide support for the enhancement of instructional strategies. The math facilitator and the Algebra teacher work weekly to develop plans on how to effectively implement Common Core Standards into daily instruction. The math facilitator will begin co-teaching for the remainder of the year to model engagement and motivational techniques, and questioning. This work in response to Indistar Indicator IID10.
At the end of the 3 rd nine weeks the leadership team will compare absenteeism and grade data from Eschool to TLI data looking for trends in low performing students and their correlation to attendance.	x		3	3/15/15	The leadership team noted that there was no correlation between absenteeism and grade trend data. This data was based on current TLI data and absenteeism data for each quarter. This IMO is consistent with indicator IID09, stating-- Instructional

Third Quarter ESEA/IMO Reporting Form

					teams use student learning data to plan instruction, Wise Ways, # 107.
By March 2015, 100% of the high school teachers will make contact with 80% of the students' parents.		x	4	3/15/15	Principal/teachers meeting with parents during parent teacher conferences, phone calls, emails and visits. This IMO was not met due to poor communication with the teachers—a procedure or system will be created for the remainder of the year and for the 2015-2016 school year.

Quarterly ESEA Reporting Form

Date Completed: March 31, 2015

School: Trusty Elementary

District: Fort Smith School District

Status: Priority

Principal: Shantelle Edwards

ADE School Improvement Specialist: John Harris

External Provider: None

Internal School Improvement Specialist: Kellie Cohen

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights:

- Progress has been made learning the new Indistar program for the new assistant principal/process manager.
- The implementation of grade-level common assessments with regular data meetings with facilitators have been sustained.
- The Principal has performed the required Teacher Excellence and Support System (TESS) informal and formal observations of all the instructional staff.
- The community mentoring program is established and benefits are being observed.
- The parent signage of Mid-Term grade reports was 100%.
- The third quarter discipline report comparison from last year to this year is encouraging: Last year we had 101 referrals and 11 suspensions. This year we had 67 referrals and 3 suspensions.

Quarterly ESEA Reporting Form

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

The Director of Student Achievement & Accountability identified:

- Generational poverty and high mobility are barriers to school improvement efforts at Trusty Elementary.

b) Building Principal

The Building Principal has identified the following areas connected to concerns/barriers:

- Due to the amount of time spent in meetings outside and inside of school, feedback concerning teacher observations is often delayed...
- Parent participation in response to school activities to improve student performance has been high, however collaboration in team meetings and other events need improvement.
- The Fort Smith new teacher induction program, although needful and beneficial, takes teachers out of the classroom multiple times during the year.
- Substitute teachers lack the familiarity of curriculum and instructional objectives to adequately serve student achievement.

c) Building Leadership Team:

The building leadership team has identified the following areas as concerns/barriers:

- The new assessments (PARCC) are a concern due to the extensive use of technology and the new format that the PARCC brings to the yearly assessments..
- Some changes in key personnel for the upcoming year is very possible and it is always a concern when losing experienced staffing.
- The loss of a full-time math/literacy facilitator, who is moving to an interventionist position, is a concern because it is currently unknown if the facilitator position will be replaced.

Quarterly ESEA Reporting Form

d) ADE School Improvement Specialist

The School Improvement Specialist identified the following areas of concern:

- The high mobility of students moving in and out of the school zone during the spring semester have a negative impact on assessment results. In addition, in-district transfer students count in the "regular" student population count.
- Generation poverty continues to be a concern for student achievement. Generational poverty creates an environment in which parents are not motivating their children to succeed academically. This lack of concern diminishes the general effectiveness of school improvement efforts, fosters more student absenteeism, and decreases the quality of parental engagement.

e) Other

- None

Additions/Revisions to current year's PIP/TIP:

The Leadership Team has placed more emphasis on student achievement performance.

- Formative assessments are being used to track student performance growth toward interim measurable objectives (some to be initiated in the third and fourth quarters).
- There is also a concentrated effort by instructional and support staff to implement Academic Improvement Plans (AIPs) that use intervention strategies and assessments to close achievement gaps.
- The principal is supporting changes in teacher practice by providing data-driven professional development opportunities,
- The Teacher Excellence and Support System (TESS) to track and support Professional Growth Plans (PGP) teacher goals for 2014-15 school year, and the use of regular Professional Learning Communities (PLC) and grade-level collaborative meetings in support of curriculum and instructional goals. The school has also set a high Annual Measureable Objective (AMO) target for parent/teacher communication through personal and electronic communication for the 2014-15 school year in order to improve parental involvement.

Third Quarter ESEA/ IMO Report

Date Completed: April 28, 2015

School: Belle Point Alternative Education High School

District: Fort Smith School District

Status: Priority

Principal: Mrs. Maria Arnold

ADE School Improvement Specialist: John Harris

External Provider: None

Internal School Improvement Specialist: Kellie Cohen

ARKANSAS
DEPARTMENT
OF EDUCATION

Highlights:

- Belle Point was one of the most improved schools on the Benchmark and End of Course Exams Award.
- The building instructional initiative for 2014-15 is 50% implemented.
- The building-wide initiative of essential and guiding questions achieved 100% implementation during the 3rd quarter.
- Belle Point has only 1 student expulsion for the 2014-15 school year.
- The district benchmark for 100% contact at Parent-Teacher conferences has been achieved for the 2014-15 school year.
- All certified staff are showing evidence of meeting Professional Growth Plans (PGP) goals.
- One hundred percent of General Educational Development (GED) students passed the General Educational Development (GED) test.
- One hundred percent of staff implemented 3 or more constructed response (PARCC-like) assessments during the 3rd quarter.
- Student contraband items have decreased.

Third Quarter ESEA/ IMO Report

Concerns/Barriers as reported from:

a) District Personnel/District Leadership Team:

The Director of Student Achievement & Accountability identified: High mobility and generational poverty is a barrier in district and building efforts to improve student performance.

b) Building Principal:

The Building Principal has identified the following areas connected to concerns/barriers:

- Disciplinary office referrals have increased (increased enrolment could be cause). This increase in poor behavior and suspensions are a cause for concern.
- The lack of time for instructional leadership responsibilities such as administrative requirements, testing venues, professional development requirements, state reporting, and weekly court appearances are also a cause of concern.
- Fifty-two percent of the population at Belle Point reads three or more grade levels below current grade levels.
- Eighty-two percent of the population is on formal or informal probation through the Sebastian County Juvenile Court system.
- The Lack of parental support in the areas of student attendance, disciplinary issues, and student achievement are a concern as well.

c) Building Leadership Team:

The building leadership team has identified the following areas as concerns/barriers:

- Students who demonstrate a lack of interest in receiving one-on-one interventions when being pulled from the classroom is a concern.
- Scheduling interventions conflict with core subject learning time (after-school venues are not effective).
- Truancy decreases the effectiveness of intervention efforts on a daily basis.
- Differentiating interventions to address deficiencies in student grade level competencies are difficult because frequent administrative tasks detract from student intervention time.

Third Quarter ESEA/ IMO Report

d) ADE School Improvement Specialist:

The School Improvement Specialist identified high mobility as a barrier for student achievement.

- A root cause reason is related to the court and legal system. Many Belle Point students are involved in several ancillary programs connected to the Fort Smith judicial system that involve arrest and incarceration, probation officer supervision, social support systems, mental health services, and regular court hearings. This high mobility inhibits the school's efforts to reach high fidelity with its student improvement efforts.
- In addition, generational poverty creates an environment by which parents are either unable or incapable of aiding and motivating their children to succeed academically. This impacts the general effectiveness of school improvement efforts, student attendance and tardiness, and parental participation in school efforts.

e) Other:

None

Additions/Revisions to current year's PIP/TIP:

- There is more emphasis on student achievement performance.
- The use of multiple formats that include diagnostic entrance testing, General Educational Development (GED) testing success, Academic Improvement Plan (AIP) intervention strategies and formative assessments are the primary changes.
- The administrative team is providing support by incorporating and measuring improved teacher instructional strategies (with embedded professional development and Professional Learning Communities (PLC) meetings)
- The use of formative assessments to measure student understanding of instructional goals for quick response re-teach/retest goals.
- There is also increased parental contacts to support school intervention efforts.

~~B. EXECUTIVE SUMMARY~~

~~Provide the mission statement of the proposed school.~~

~~**Applicant Response:**~~

~~Briefly describe the key programmatic features that the school will implement in order to accomplish the mission.~~

~~**Applicant Response:**~~

~~C. NARRATIVE DESCRIPTION OF THE PROPOSED CHARTER SCHOOL~~

~~The applicant for the proposed charter school, if approved by the authorizer, agrees to operate the educational program described below in accordance with the provisions described within this document, Arkansas Code Annotated §6-23-101 et seq., the State Board of Education Rules Governing Public Charter Schools, and the attached assurances.~~

~~Provide a narrative description of the various components of the proposed charter school by responding to the following prompts:~~

- ~~1. Describe the results of the public hearing, which was held for the purpose of assessing support for the establishment of this public charter school. Provide copies of supporting evidence.~~

~~Applicant Response:~~

~~Attach documentation to demonstrate that each of the following requirements of Arkansas Code Annotated §6-23-201 was met:~~

- ~~A. The notice of public hearing was distributed to the community, certified school personnel, and parents of all students enrolled at the public school for which the school district initiated the application.~~
- ~~**B. The notice of the public hearing was published in a newspaper having general circulation in the school district in which the school will be located at least three weeks prior to the date of the meeting.**~~

~~2. Give the mission statement for the proposed charter school.~~

~~**Applicant Response:**~~

~~3. Describe the educational need for the school by responding to the following prompts. Include the innovations that will distinguish the charter from other schools.~~

~~Complete the following charts to include 2014 literacy and mathematics performance assessment data and graduation rates for the district in which the charter would be located and the schools closest to the proposed charter.~~

~~Explain the educational need for the charter in light of the academic performance by the district, the campus proposed to be converted, and at the schools in the same feeder pattern as the proposed charter. Explain other significant factors. Be certain to include the source for information presented.~~

Applicant Response:

~~If the performance of students at schools and or/districts not noted in the previous charts demonstrate the need for the charter, provide the student performance data and its source and explain.~~

~~**Applicant Response:**~~

~~Describe three (3) innovations that will distinguish the charter from other schools.~~

~~**Applicant Response:**~~

~~Explain how the attainment of the goals will demonstrate that the charter is meeting the identified educational need for the school and fulfilling its mission.~~

~~**Applicant Response:**~~

- ~~5. For elementary charter schools provide a daily schedule for all grade levels indicating the classes that will be provided for a one week time period. For secondary schools, provide required and elective courses for every grade level. If the school plans to phase in grade levels, include expansion grade levels by year with courses to be offered.~~

~~**Applicant Response:**~~

- ~~6. Provide a description of curriculum, programs, and instructional methods used to support core classes. Explain how the district will pay for all associated costs.~~

~~**Applicant Response:**~~

- ~~7. Describe the educational program to be offered by the charter school~~

~~**Applicant Response:**~~

- ~~8. Explain why a charter school is necessary to better meet student academic needs instead of a traditional district school.~~

~~**Applicant Response:**~~

- ~~9. Explain how the charter school will have more autonomy than traditional schools in the district. Discuss each of the following:~~
- ~~A) Employing personnel;~~
 - ~~B) Developing and controlling the charter school budget;~~
 - ~~C) Managing day-to-day charter school operations;~~
 - ~~D) Developing and controlling the school calendar; and~~
 - ~~E) Other areas of autonomy to be afforded to the charter.~~

~~**Applicant Response:**~~

~~10. Describe the school improvement plan by addressing the following:~~

~~A) Explain how the licensed employees and parents of the students to be enrolled in the charter school will be involved in developing and implementing the school improvement plan, identifying performance criteria, and evaluating the effectiveness of the improvement plan.~~

~~**Applicant Response:**~~

~~B) Describe a plan for school improvement that addresses how the charter school will improve student learning and meet the state education goals.~~

~~**Applicant Response:**~~

- ~~11. Describe the process that will be used to ensure curriculum alignment with the Arkansas Curriculum Frameworks and the curriculum requirements of the state standards as adopted by the State Board of Education.~~

~~**Applicant Response:**~~

- ~~12. Describe the manner in which the school will make provisions for the following student services, even in each area for which a waiver is requested:~~

~~A) Guidance program;~~

~~**Applicant Response:**~~

~~B) Health services;~~

~~**Applicant Response:**~~

~~C) Media center;~~

~~**Applicant Response:**~~

~~D) Special education;~~

~~**Applicant Response:**~~

~~E) Transportation;~~

~~**Applicant Response:**~~

~~F) Alternative education, including Alternative Learning Environments;~~

~~**Applicant Response:**~~

~~G) English Language Learner (ELL) instruction~~

~~**Applicant Response:**~~

~~H) Gifted and Talented Program.~~

~~**Applicant Response:**~~

- ~~13. Describe the plan for the school officials to provide an annual report to parents, the community, and the authorizer, **separate from the district's annual report to the public**, that demonstrates the progress made by the charter school during the previous academic year in meeting its academic performance objectives. (See *Arkansas Code Annotated* 6-23-202.)~~

~~**Applicant Response:**~~

- ~~14. Describe the enrollment criteria and student admission, recruitment, and selection processes for the proposed public charter school.~~

~~**Applicant Response:**~~

~~It is affirmed that a random, anonymous student selection method will be utilized in the event that more students apply for admission to the open enrollment public charter school than can be accommodated under the terms of the charter, except as allowed for in Arkansas Code Annotated §6-23-306(14)(C).~~

~~Yes~~

~~No~~

- ~~15. Name any district personnel, and/or leaders of the proposed charter who have any prior involvement in the operation of one or more other charter schools and complete a Prior Charter Involvement **template** for each individual listed.~~

~~Applicant Response:~~

- ~~16. Summarize the job descriptions of the school administrator(s) and other key personnel. Specify the qualifications to be met by professional employees (administrators, teachers, counselors, etc.) of the program. List the types of administrative positions, teaching positions, and support positions for the school.~~

~~Applicant Response:~~

~~17. It is affirmed that the public charter school will participate in the Arkansas Public School Computer Network, as required by state statute and by State Board of Education rule, for reporting both education data and financial data, including grant funds or private donations received directly by the charter school.~~

~~Yes~~

~~No~~

~~18. Describe the facilities to be used. Give the present use of the facility and its use for the past three years.~~

~~**Applicant Response:**~~

~~The facility will be in compliance with all requirements for accessibility in accordance with the Americans with Disabilities Act (ADA) and Individuals with Disabilities Education Act (IDEA) and all other state and federal laws and local zoning ordinances.~~

~~Yes~~

~~No~~

~~If the facility does not currently meet these requirements, provide a list of items that will need to be addressed to bring the facility into compliance. Also include a statement of permissible uses for the facility from the local zoning authority, and whether there are any alcohol sales within 1,000 feet of the facility.~~

~~**Applicant Response:**~~

- ~~19. Describe the manner in which the school will make provisions for food services. State whether the proposed charter school will apply to participate in the federal National School Lunch program or other federal nutrition programs.~~

~~**Applicant Response:**~~

~~20. Describe how the parents or guardians of the enrolled students and other members of the community will be involved with the school to positively impact the charter school's educational programs.~~

~~**Applicant Response:**~~

~~21. Describe the potential impact of the proposed public charter school on the efforts of affected public school district(s) to comply with court orders and statutory obligations to create and maintain a unitary system of desegregated public schools.~~

~~**Applicant Response:**~~

~~22. Explain what the charter founders and other leaders are doing or will do to ensure the success of the charter school in perpetuity.~~

~~**Applicant Response:**~~

23. Complete the following table showing all sections of Title 6 of the Arkansas Code Annotated (Education Code) and State Board of Education rules, including the Standards for Accreditation of Arkansas Public Schools and School Districts, from which the public charter school seeks to be exempted in order to meet the goals of the school. Identify the specific statute, rule, or standard requested to be waived by title and number if applicable. **Provide a rationale for each waiver requested that explains how the waiver will increase student achievement and how the increase in achievement will be measured.**

~~ARKANSAS DEPARTMENT OF EDUCATION~~

~~REQUIREMENTS FOR LETTER OF INTENT~~

~~To Apply for a District Conversion
Public Charter School~~

~~Applicants for district conversion public charter schools are required to send a one-page "Letter of Intent to Apply for a District Conversion Public Charter School" to the Arkansas Department of Education.~~

~~Submit the signed letter of intent, via email, to the Arkansas Department of Education at the following email addresses no later than 4:00 p.m. on Tuesday, June 2, 2015 in order for the application to be considered by the authorizer during the 2015 cycle:~~

~~ade.charterschools@arkansas.gov~~

~~Required format to be followed for the letter of intent:~~

- ~~1. The letter of intent is to be a one-page document;~~
- ~~2. Identify the school district that intends to apply for the charter;~~
- ~~3. Include the contact person's name, full address, daytime telephone number, and email address;~~
- ~~4. Give the name of the school that the district wants to convert to charter status;~~
- ~~5. Provide the name of the proposed public charter school;~~
- ~~6. Describe the location of the proposed public charter school.~~
- ~~7. Identify the grade levels of students intended to be served by the public charter school;~~
- ~~8. Identify the number of students intended to be served by the public charter school; and~~
- ~~9. Provide a one-paragraph description of the purpose or special emphasis of the proposed school.~~

~~The superintendent of the school district applying for the charter must sign the letter of intent to apply.~~

~~**2015 APPLICATION**~~
~~**DISTRICT CONVERSION PUBLIC CHARTER SCHOOL**~~
~~**STATEMENT OF ASSURANCES**~~

~~The signature of the superintendent of the school district proposing the public charter school certifies that the following statements are and will be addressed through policies adopted by the public charter school; and, if the application is approved, the local board, administration, and staff of the district conversion public charter school shall abide by them:~~

- ~~1. The information submitted in this application is true to the best of my knowledge and belief.~~
- ~~2. The district conversion public charter school shall be open to all students, on a space available basis, and shall not discriminate in its admission policy on the basis of gender, national origin, race, ethnicity, religion, disability, or academic or athletic eligibility.~~
- ~~3. In accordance with federal and state laws, the district conversion public charter school hiring and retention policies of administrators, teachers, and other employees shall not discriminate on the basis of race, color, national origin, creed, sex, ethnicity, sexual orientation, mental or physical disability, age, ancestry, or special need.~~
- ~~4. Any educator employed by a school district before the effective date of a charter for a district conversion public charter school operated at a school district facility shall not be transferred to or employed by the public charter school over the educator's objection.~~
- ~~5. The district conversion public charter school shall operate in accordance with federal laws and rules governing public schools; applicable provisions of the Arkansas Constitution; and state statutes or regulations governing public schools not waived by the approved charter.~~
- ~~6. The district conversion public charter school shall ensure that any of its employees who qualify for membership in the Arkansas Teacher Retirement System or the State and Public School Employee Insurance Program shall be covered under those systems to the same extent any other qualified employee of the school district is covered.~~
- ~~7. The district conversion public charter school shall comply with all health and safety laws, rules and regulations of the federal, state, county, region, or community that may apply to the facilities and school property.~~

- ~~8. The employees and volunteers of the district conversion public charter school are held immune from liability to the same extent as other school district employees and volunteers under applicable state laws.~~
- ~~9. The district conversion public charter school shall be reviewed for its potential impact on the efforts of a public school district to comply with court orders and statutory obligations to create and maintain a unitary system of desegregated public schools.~~
- ~~10. The applicant confirms the understanding that certain provisions of state law shall not be waived. The district conversion public charter school is subject to any prohibition, restriction, or requirement imposed by Title 6 of the Arkansas Code Annotated and any rule and regulation approved by the State Board of Education under this title relating to:~~
- ~~(a) Monitoring compliance with Arkansas Code Annotated § 6-23-101 et seq. as determined by the Commissioner of the Department of Education;~~
 - ~~(b) Conducting criminal background checks for employees;~~
 - ~~(c) High school graduation requirements as established by the State Board of Education;~~
 - ~~(d) Special education programs as provided by this title;~~
 - ~~(e) Public school accountability under this title;~~
 - ~~(f) Ethical guidelines and prohibitions as established by Arkansas Code Annotated § 6-24-101 et seq., and any other controlling state or federal law regarding ethics or conflicts of interest; and~~
 - ~~(g) Health and safety codes as established by the State Board of Education and local governmental entities.~~
- ~~11. The facilities of the public charter school shall comply with all requirements for accessibility for individuals with disabilities in accordance with the ADA and IDEA and all other state and federal laws.~~

Public Comments – Rules Governing the Public School Choice Act of 2015

Date	Respondent	Comment	ADE Response
04/17/2015	Lucas Harder, ASBA	<p>4.04.2: Just for clarity, I would recommend adding "under federal law, state law, the rules for standards of accreditation, or other applicable regulations" to the end. Not only would this take out any possible confusion about who determines the maximum authorized amount, but it would bring the regulations closer into alignment with the language from Opportunity Choice, which it's based off of.</p> <p>6.01.1: I would recommend adding a 6.01.1.1 that includes the requirement for the notification sent to the resident district to include at a minimum the student's name and the date and time the application was received. I've gotten several calls from districts who have received a notification that just includes the student's name and no other information. Without having the date and time of the applications received, the resident district will have a hard time knowing which student actually triggered the 3% cap if it is triggered.</p>	<p>4.04.2 – Comment considered. This change was made.</p> <p>6.01.1 – Comment considered. No changes were made as a result of this comment. The date and time received by both the resident and nonresident districts are listed on the application.</p>
04/27/2015	Sally Bennett, Superintendent Armored School District	<p>7.01.1 If a school district claims a conflict under Section 7.01 of these rules, the school district shall immediately submit proof from a federal court to the Department of Education that the school district has a genuine conflict under an active desegregation order or active court-approved desegregation plan with the interdistrict school choice provisions of this subchapter.</p> <p>Who is going to make the determination that the "proof" submitted is current and valid? Will anything a district submits regarding this claim be accepted at face value?</p>	<p>7.01.1 – Comment considered. No changes were made as a result of this comment. Pursuant to Attorney General's Opinion No. 2003-269, the ADE does not have the authority to interpret federal court orders. The ADE understands that further clarification of this issue has been sought by way of an Attorney General's opinion request. The ADE will review that opinion once it is issued.</p>
04/29/2015	Mary Cameron, BLR	<p>(1) Will Section 1 of Act 560 be placed in the ADE rules?</p> <p>(2) In Rule 7.02.2, shouldn't the reference be to Ark. Code Ann. 6-15-430 instead of 6-15-530?</p>	<p>(1) Comment considered. No changes were made as a result of this comment. Section 1 of Act 560 is a standalone provision.</p> <p>(2) Comment considered. This correction has been made.</p>

Public Comments – Rules Governing the Public School Choice Act of 2015

05/18/2015	Jennifer Dedman, APSRC	<p>6.05.2 This section could be improved by a definition of “reasonable deadline” under section 3.00.</p> <p>Attachment 1 The school choice form could be improved by a space to list siblings for purposes of school choice. Districts have difficulty quickly identifying student siblings that do not share the same last name.</p>	<p>6.05.2 – Comment considered. No changes were made as a result of this comment.</p> <p>Attachment 1 – Comment considered. Change made asking for any siblings to be listed.</p>

**ARKANSAS DEPARTMENT OF EDUCATION RULES GOVERNING
THE PUBLIC SCHOOL CHOICE ACT OF ~~2013~~ 2015**
September 2013

1.00 PURPOSE

- 1.01 These rules shall be known as the Arkansas Department of Education Rules Governing the Public School Choice Act of ~~2013~~ 2015.
- 1.02 The purpose of these rules is to set forth the process and procedures necessary to administer the Public School Choice Act of ~~2013~~ 2015.

2.00 AUTHORITY

- 2.01 The Arkansas State Board of Education promulgated these rules pursuant to the authority granted to it by ~~Act 1227 of 2013~~ Ark. Code Ann. § 6-18-1901 et seq., as amended by Act 560 of 2015, and Ark. Code Ann. §§ 6-11-105 and 25-15-201 et seq.

3.00 DEFINITIONS

As used in these rules:

- 3.01 “Nonresident District” means a school district other than a student’s resident district;
- 3.02 “Parent” means a student’s parent, guardian, or other person having custody or care of the student;
- 3.03 “Resident district” means the school district in which the student resides as determined under Ark. Code Ann. § 6-18-202;
- 3.04 “Sibling” means each of two (2) or more children having a parent in common by blood, adoption, marriage, or foster care; and
- 3.05 “Transfer student” means a public school student in kindergarten through grade twelve (12) who transfers to a nonresident district through a public school choice option under Arkansas Code, Title 6, Chapter 18, Subchapter 19 and these rules.

4.00 ESTABLISHMENT OF PUBLIC SCHOOL CHOICE PROGRAM

- 4.01 A public school choice program is established to enable a student in kindergarten through grade twelve (12) to attend a school in a nonresident district, subject to the limitations under Ark. Code Ann. § 6-18-1906 and Section 7.00 of these rules.

- 4.02 Each school district shall participate in a public school choice program consistent with Arkansas Code, Title 6, Chapter 18, Subchapter 19 and these rules.
- 4.03 These rules do not require a school district to add teachers, staff, or classrooms, or in any way to exceed the requirements and standards established by existing law.
- 4.04 The board of directors of a public school district shall adopt by resolution specific standards for acceptance and rejection of applications under Arkansas Code, Title 6, Chapter 18, Subchapter 19 and these rules. The standards:
- 4.04.1 May include without limitation the capacity of a program, class, grade level, or school building;
- 4.04.2 May include a claim of a lack of capacity by a school district only if the school district has reached at least ninety percent (90%) of the maximum authorized student population in a program, class, grade level, or school building *under federal law, state law, the rules for standards of accreditation, or other applicable regulations*;
- 4.04.23 Shall include a statement that priority will be given to an applicant who has a sibling or stepsibling who:
- 4.04.23.1 Resides in the same household; and
- 4.04.23.2 Is already enrolled in the nonresident district by choice.
- 4.04.34 Shall not include an applicant's:
- 4.04.34.1 Academic achievement;
- 4.04.34.2 Athletic or other extracurricular ability;
- 4.04.34.3 English proficiency level; or
- 4.04.34.4 Previous disciplinary proceedings, except that an expulsion from another district may be included under Ark. Code Ann. § 6-18-510.
- 4.04.45 A school district receiving transfers under the Public School Choice Act of 2013 and these rules shall not discriminate on the basis of gender, national origin, race, ethnicity, religion, or disability.
- 4.05 A nonresident district shall:
- 4.05.1 Accept credits toward graduation that were awarded by another district; and

- 4.05.2 Award a diploma to a nonresident student if the student meets the nonresident district's graduation requirements.
- 4.06 The superintendent of a school district shall cause public announcements to be made over the broadcast media and either in the print media or on the Internet to inform parents of students in adjoining districts of the:
 - 4.06.1 Availability of the program;
 - 4.06.2 Application deadline; and
 - 4.06.3 Requirements and procedure for nonresident students to participate in the program.

5.00 GENERAL PROVISIONS

- 5.01 The transfer of a student under the Arkansas Public School Choice Act of 1989 (Ark. Code Ann. § 6-18-206 [repealed]) or the Public School Choice Act of 2013, is not voided by Arkansas Code, Title 6, Chapter 18, Subchapter 19 and these rules and shall be treated as a transfer under Arkansas Code, Title 6, Chapter 18, Subchapter 19 and these rules.
- 5.02 A student may accept only one (1) school choice transfer per school year.
 - 5.02.1 A student who accepts a public school choice transfer may return to his or her resident district during the school year.
 - 5.02.2 If a transferred student returns to his or her resident district, the student's transfer is voided, and the student shall reapply if the student seeks a future school choice transfer.
- 5.03 A transfer student attending a nonresident school under Arkansas Code, Title 6, Chapter 18, Subchapter 19 and these rules may complete all remaining school years at the nonresident district.
 - 5.03.1 A present or future sibling of a student who continues enrollment in the nonresident district under Section 5.03 of these rules and applies for a school choice transfer under Ark. Code Ann. § 6-18-1905 may enroll in ~~or continue enrollment in~~ the nonresident district ~~until the sibling of the transfer student completes his or her secondary education~~, if the district has the capacity to accept the sibling without adding teachers, staff, or classrooms or exceeding the regulations and standards established by law.
 - 5.03.2 A present or future sibling of a student who continues enrollment in the nonresident district and who enrolls in the nonresident district under

Section 5.03 of these rules may complete all remaining years at the nonresident district.

- 5.04 The transfer student or the transfer student's parent is responsible for the transportation of the transfer student to and from the school in the nonresident district where the transfer student is enrolled.
- 5.04.1 The nonresident district may enter into a written agreement with the student, the student's parent, or the resident district to provide the transportation.
- 5.04.2 The State Board of Education may resolve disputes concerning transportation arising under Section 5.04 of these rules.
- 5.05 For purposes of determining a school district's state aid, a transfer student is counted as part of the average daily membership of the nonresident district where the transfer student is enrolled.

6.00 APPLICATION FOR TRANSFER

- 6.01 If a student seeks to attend a school in a nonresident district, the student's parent shall submit an application:
- 6.01.1 To the nonresident district ~~with a copy to~~ , which shall notify the resident district of the filing of the application;
- 6.01.2 On the form that is attached to these rules as Attachment 1; and
- 6.01.3 Postmarked no later than ~~June~~ May 1 of the year in which the student seeks to begin the fall semester at the nonresident district.
- 6.02 A nonresident district that receives an application under Section 6.01 of these rules shall, upon receipt of the application, place a date and time stamp on the application that reflects the date and time the nonresident district received the application.
- 6.03 A nonresident district shall review and make a determination on each application in the order in which the application was received by the nonresident district.
- 6.04 Before accepting or rejecting an application, a nonresident district shall determine whether one of the limitations under Ark. Code Ann. § 6-18-1906 and Section 7.00 of these rules applies to the application.
- 6.025 ~~By August~~ By July 1 of the school year in which the student seeks to enroll in a nonresident district under Arkansas Code, Title 6, Chapter 18, Subchapter 19 and these rules, the superintendent of the nonresident district shall notify the parent

and the resident district in writing as to whether the student's application has been accepted or rejected. ~~The notification shall be sent via First-Class Mail to the address on the application.~~

6.025.1 If the application is rejected, the superintendent of the nonresident district shall state in the notification letter the reason for the rejection.

6.025.2 If the application is accepted, the superintendent of the nonresident district shall state in the notification letter a reasonable deadline by which the student shall enroll in the nonresident district and after which the acceptance notification is null.;

~~6.02.2.1 — A reasonable deadline by which the student shall enroll in the nonresident district and after which the acceptance notification is null; and~~

~~6.02.2.2 — Instructions for the renewal procedures established by the nonresident district.~~

7.00 LIMITATIONS

7.01 If the provisions of Arkansas Code, Title 6, Chapter 18, Subchapter 19 and these rules conflict with a provision of an enforceable desegregation court order or a district's court-approved desegregation plan regarding the effects of past racial segregation in student assignment, the provisions of the order or plan shall govern.

7.01.1 If a school district claims a conflict under Section 7.01 of these rules, the school district shall immediately submit proof from a federal court to the Department of Education that the school district has a genuine conflict under an active desegregation order or active court-approved desegregation plan with the interdistrict school choice provisions of this subchapter.

7.01.2 A school district shall provide the information required under Section 7.01.1 of these rules to:

Office of the Commissioner
ATTN: Arkansas Public School Choice Act
Four Capitol Mall
Little Rock, AR 72201

~~7.02 — A school district annually may declare an exemption under Arkansas Code, Title 6, Chapter 18, Subchapter 19 and these rules if the school district is subject to the desegregation order or mandate of a federal court or agency remedying the effects of past racial segregation.~~

~~7.02.1 An exemption declared by a board of directors under Section 7.02 of these rules is irrevocable for one (1) year from the date the school district notifies the Department of Education of the declaration of exemption.~~

~~7.02.2 After each year of exemption, the board of directors may elect to participate in public school choice under Arkansas Code, Title 6, Chapter 18, Subchapter 19 and these rules if the school district's participation does not conflict with the school district's federal court-ordered desegregation program.~~

~~7.02.3 A school district shall notify the Department of Education by April 1 if in the next school year the school district intends to:~~

~~7.02.3.1 Declare an exemption under Section 7.02 of these rules; or~~

~~7.02.3.2 Resume participation after a period of exemption.~~

~~7.02.3.3 A school district shall provide the notifications under Section 7.02.3.1 or 7.02.3.2 to:~~

~~Office of the Commissioner
ATTN: Arkansas Public School Choice Act
Four Capitol Mall
Little Rock, AR 72201~~

7.032 There is established a numerical net maximum limit on school choice transfers each school year from a school district, less any school choice transfers into the school district under Arkansas Code, Title 6, Chapter 18, Subchapter 19 and these rules of not more than three percent (3%) of the enrollment that exists in the school district as of October 15 of the school district's three-quarter average daily membership for the immediately preceding school year.

~~7.032.1 For the purpose of determining the percentage of school choice transfers under Section 7.032 of these rules, siblings who are counted in the numerator as transfer students shall count as one (1) student, and siblings who are counted in the denominator as part of the average daily membership shall count as one (1) student.~~

7.02.2 A student eligible to transfer to a nonresident district under Ark. Code Ann. §§ 6-15-430(c)(1), 6-18-227, or 6-21-812 shall not count against the cap of three percent (3%) of the resident or nonresident district.

7.032.23 Annually by ~~June 1~~ December 15, the Department of Education shall report to each school district the net maximum number of school choice transfers for the ~~current~~ next school year.

7.032.34 If a student is unable to transfer due to the limits under Section 7.032 of these rules, the resident district shall give the student priority for a transfer in the following first school year in which the district is no longer subject to Ark. Code Ann. § 6-18-1906(b)(1) and Section 7.02 of these rules in the order that the resident district receives notices of applications under Ark. Code Ann. § 6-18-1905 and Section 6.00 of these rules, as evidenced by a notation made by the district on the applications indicating date and time of receipt.

8.00 APPEAL, DATA COLLECTION AND REPORTING

8.01 A student whose application for a transfer under Ark. Code Ann. § 6-18-1905 and Section 6.00 of these rules is rejected by the nonresident district may request a hearing before the State Board of Education to reconsider the transfer.

8.01.1 A request for a hearing before the State Board of Education shall be in writing and shall be postmarked no later than ten (10) calendar days, excluding weekends and legal holidays, after the student or the student's parent receives a notice of rejection of the application under Ark. Code Ann. § 6-18-1905 and Section 6.00 of these rules and shall be mailed to:

Office of the Commissioner
 ATTN: Arkansas Public School Choice Act Appeals
 Four Capitol Mall
 Little Rock, AR 72201

8.01.2 Contemporaneously with the filing of the written appeal with the Office of the Commissioner, the student or student's parent must also mail a copy of the written appeal to the superintendent of the nonresident school district.

8.01.3 In its written appeal, the student or student's parent shall state his or her basis for appealing the decision of the nonresident district.

8.01.4 The student or student's parent shall submit, along with its written appeal, a copy of the notice of rejection from the nonresident school district.

8.01.5 As part of the review process, the student or student's parent may submit supporting documentation that the transfer would be in the best educational, social, or psychological interest of the student.

8.01.6 The nonresident district may submit, in writing, any additional information, evidence, or arguments supporting its rejection of the student's application by mailing such response to the State Board of Education. Such response shall be postmarked no later than ten (10) days

after the nonresident district receives the student or parent's appeal. The response of the nonresident district shall be mailed to:

Office of the Commissioner
 ATTN: Arkansas Public School Choice Act Appeals
 Four Capitol Mall
 Little Rock, AR 72201

8.01.7 Contemporaneously with the filing of its response with the Office of the Commissioner, the nonresident district must also mail a copy of the response to the student or student's parent.

8.01.8 If the State Board of Education overturns the determination of the nonresident district on appeal, the State Board of Education shall notify the parent, the nonresident district, and the resident district of the basis for the State Board of Education's decision.

8.02 The Department of Education shall collect data from school districts on the number of applications for student transfers under Section 8.00 of these rules and study the effects of school choice transfers under Arkansas Code, Title 6, Chapter 18, Subchapter 19 and these rules, including without limitation the net maximum number of transfers and exemptions, on both resident and nonresident districts for up to two (2) years to determine if a racially segregative impact has occurred to any school district.

8.03 Annually by October 1, the Department of Education shall report its findings from the study of the data under Section 8.02 of these rules to the Senate Committee on Education and the House Committee on Education.

~~9.00~~ — EFFECTIVE DATE

~~The provisions of the Arkansas Public School Choice Act of 2013 and these rules shall remain in effect until July 1, 2015.~~

~~109.00~~ STATE BOARD HEARING PROCEDURES

The following procedures shall apply to hearings conducted by the State Board of Education pursuant to Ark. Code Ann. § 6-18-1907 and Section 8.00 of these rules:

~~109.01~~ A staff member of the Arkansas Department of Education shall introduce the agenda item.

~~109.02~~ All persons wishing to testify before the State Board of Education shall first be placed under oath by the Chairperson of the State Board.

- 409.03 Each party shall have the opportunity to present an opening statement of no longer than five (5) minutes, beginning with the nonresident school district. The Chairperson of the State Board may, for good cause shown and upon request of either party, allow either party additional time to present their opening statements.
- 409.04 Each party shall be given twenty (20) minutes to present their cases, beginning with the nonresident school district. The Chairperson of the State Board may, for good cause shown and upon request of either party, allow either party additional time to present their cases.
- 409.05 The State Board of Education, at its discretion, shall have the authority to require any person associated with the application to appear in person before the State Board as a witness during the hearing. The State Board of Education may accept testimony by affidavit, declaration or deposition.
- 409.06 Every witness may be subject to direct examination, cross examination and questioning by the State Board of Education.
- 409.07 For the purposes of the record, documents offered during the hearing by the nonresident district shall be clearly marked in sequential, numeric order (1,2,3).
- 409.08 For the purposes of the record, documents offered during the hearing by the appealing party shall be clearly marked in sequential, alphabetic letters (A,B,C).
- 409.09 The nonresident school district shall have the burden of proof in proving the basis for denial of the transfer.
- 409.10 The State Board of Education may sustain the rejection of the nonresident district or grant the appeal.
- 409.11 The State Board of Education may announce its decision immediately after hearing all arguments and evidence or may take the matter under advisement. The State Board shall provide a written decision to the Department of Education, the appealing party, the nonresident district and the resident district within fourteen (14) days of announcing its decision under this section.

PARENT OR GUARDIAN INFORMATION			
Name:		Home Phone:	
Address:		Work Phone:	
Parent/Guardian Signature		Date:	
<p>Pursuant to standards adopted by a nonresident school board a nonresident district may reserve the right to accept and reject applicants based on capacity of programs, class, grade level, or school building. Likewise, a nonresident district's standards may provide for the rejection of an applicant based upon the submission of false or misleading information to the above listed request for information when that information directly impacts the legal qualifications of an applicant to transfer pursuant to the School Choice Act. However, a nonresident district's standards shall not include an applicant's previous academic achievement, athletic or other extracurricular ability, handicapping conditions, English proficiency level, or previous disciplinary proceedings, except that an expulsion from another district may be included pursuant to Ark. Code Ann. § 6-18-510. Priority will be given to applicants with siblings or step-siblings attending the district. The nonresident district shall accept credits toward graduation that were awarded by another district and award a diploma to a nonresident applicant if the applicant meets the nonresident district's graduation requirements. This application must be filed in the nonresident district (with a copy to the resident district) or postmarked no later than June <u>May</u> 1 of the year in which the applicant would begin the fall semester at the nonresident district. A student whose application for transfer is rejected by the nonresident district may request a hearing before the State Board of Education to reconsider the transfer by filing such a request in writing with the Commissioner of Education no later than ten (10) days after the student or student's parent receives a notice of rejection. (Consult Ark. Code Ann. § 6-18-1905 and the Arkansas Department of Education Rules Governing the Public School Choice Act of 2013 <u>2015</u> for specific procedures on how to file such an appeal).</p>
