ADE to Host Live Streaming Event to Celebrate Digital Learning Day

LITTLE ROCK - Technology skills are essential in today's learning environment. To bring awareness of their importance, the Arkansas Department of Education will host a live streaming event Feb. 5 at 9 a.m. to celebrate Digital Learning Day.

Digital Learning Day is a national event that focuses on improving technology in everyday teaching and learning. This year ADE is teaming up with AETN, local school districts and workforce professionals to discuss best practices for incorporating digital learning in the classroom, as well as how these skills prepare students for college and careers.

"Technology knowledge and skills have never been more important for our public school students than they are today," Arkansas Department of Education Commissioner Dr. Tom Kimbrell said. "This event will help students, teachers and the public learn why this is important for future success."

To learn more about local, state and national participation, go to the ADE website at <http://www.arkansased.org/divisions/research-and-technology/digital-learning-day>.
